There is a PSK31/PSK63 contest this weekend sponsored by the Michigan DX Association. It might be a good opportunity to practice PSK and to get macros setup for the ARRL PSK contest on January 5th and 6th.

Thanks to the Tuesday night MDXA Net for this information. (Lowell repeater, 9:00 PM)

Here is the rules site: http://www.mdxa1.org/deathmatch.html

14. Attracting new people to ham radio

Yahoo group: GRARA
Date: 2007-12-21 13:13:15 UTC
From: mike_w8der
Topic: 14 Message: 14

The following was posted on the Holland ARC Yahoo Group by Phil VenHuis. Thought it would be good food for thought.

.....
Last week there was some discussion about attracting young people to ham radio. I ran across the following piece on e-ham.net today and wanted to share it. It kind of gives an answer to the question brought up last week.

The Future of Ham Radio is Round
David F. Doler Jr. (WA3YAY) on November 22, 2007

I've had it up to here with the notion that Ham Radio can only survive if we bring in legions of new kiddies. Forget it. You'll assure the future of Ham Radio with legions of bored, middle-age dudes with a couple of bucks and some free time on their hands.

Kenwood, Yaesu, Icom and Ten-Tec want to sell radios by the thousands like they did back in the day. Ham Radio needs bodies. Lots of them.Big ones, small ones, skinny ones and round ones. Balding with a bit of gray hair? You the man! Nothing better to do on the weekends but wash the car and wait for the wife and kids outside of the mall? Great! A perfect Ham Radio recruit. We want QRM on every band, all the time.

Sure I'm being flippant here but please don't go all politically correct on me and speak about our responsibility to mentor young people with notions of public service and high technology. Pull-eez. That boat sailed. Please don't yell at me either, I'm a dyed-in-the-wool Amateur too. But think about it. There is a lot of business interests at work here that need customers. Sure, kids have money, but Ham Radio is not sexy and that money is going elsewhere (XBox, Wii, cell phones, iTunes, cars, girlfriends, boyfriends). Maybe you know some kid who actually does want to work a big contest all weekend instead of going out with his friends. Maybe you know two or three. Won't do. Thousands of 52-year-old accountants half-asleep on a Friday night might be the new market for HF rigs.

OK, don't abandon the kids. I understand, we need to be altruistic and we'll snag a few. But lets recruit our baggy-eyed co-worker in the cubicle next to us. Put a 440 rig in the golf cart. Bring QST to read at the Chiropractor's office. Wear an ARRL pin on your lapel to the next sales call. Aging citizens are really where the future of Amateur Radio will be, albeit it the turnover will be more frequent.

I'm really serious here. Wayne Green used to get on his hi-horse about the growing flabbiness of the aging Ham community. Embrace the

belly! Sell to the sagging. Open our doors to the hordes of girth-challenged professionals, semi-professionals, worker bees and retirees. That is the market. I'm convinced it's those guys who can save Ham Radio.

Enjoy ....

Phil, K8PVH

15. Show us that new toy at open radio room next Wednesday

Yahoo group: GRARA
Date: 2007-12-21 13:31:16 UTC
From: mike_w8der
Topic: 15 Message: 15

President Jack assures us that the W8DC radio room will be open as usual at 7:15, next wednesday night. Bring that new ham radio toy you got for Christmas to show the gang.

Last week Dave Ed demonstrated QS0.Net, a simulated radio program that allows you to talk to other hams from your laptop. Dave set the demo up in the conference room across from W8DC (Wi Fi, you know) and members talked to another ham in Canada. (http://www.QSO.Net)

Thanks to the efforts of President Jack and others, we have EchoLink running on the operating position computer in the radio room. Jim Leys (KD8CAN) and others demonstrated how to use EchoLink both in the computer to computer mode and through repeater K8SN.

A good time was had by all. Everyone is welcome to join us for this popular weekly get-together.

16. New poll for GRARA

Yahoo group: GRARA
Date: 2007-12-22 15:04:36 UTC
From: GRARA@yahoogroups.com
Topic: 16 Message: 16

Enter your vote today! A new poll has been created for the
GRARA group:

What do you think the number one objective of Field Day should be this year? [Other than practice of emergency communications]
Field day is now 6 month off on the last weekend in June.

o Motivating youth participation (scouts, etc.)
o Promoting the hobby to the general public
o Promoting the GRARA
o Promoting GRARA to potential sponsors
o Encouraging good ole fun around the campfire
o Training members in HF operations
o Training members in contest procedures
o Others

To vote, please visit the following web page:
http://groups.yahoo.com/group/GRARA/surveys?id=2629768

Note: Please do not reply to this message. Poll votes are
not collected via email. To vote, you must go to the Yahoo! Groups
web site listed above.

Thanks!

Good morning Bob,

Maybe I can help --- just a LITTLE.

While you are waiting for a response to your posting, you may want to get answers to specific questions on the yahoo group http://groups.yahoo.com/group/TM-D710_TM-V71/ .

Also search for yahoo groups using "V71" and notice the other smaller groups.

20. Re: Tranceiver in a Laptop Demo from Dave Ed

Yahoo group: GRARA
Date: 2007-12-23 04:56:30 UTC
From: mike_w8der
Topic: 15 Message: 20

All,

I made a mistake. (I almost made it through the year without making one) Thanks to those of you who pointed it out.

Dave Ed informs me that the Laptop Radio program he demonstrated at the last open radio room night can be found at:

http://www.QSONet.com

(NOT http://www.QSO.Net as I reported.)

It is a program worth looking at during this low sunspot cycle.

From the QSONet.com web site above comes the following description.

What is QSONet?
QsoNet uses the internet to receive audio signals from a ham radio transmitting station, then instantly reflects the audio back to all stations listening on that frequency. There is no RF. Everything is done over the internet. The result is a simulated ionosphere for worldwide amateur radio communication. Stations can use either.

How does it work?
QsoNet works with dialup, DSL and cable internet connections. There is no need to configure router ports. The network consists of an array of internet servers which provide streaming voip audio between stations. After installing transceiver software, QsoNet stations are connected to a central server by a single, outbound TCP connection.

The Windows display looks like a real radio. It is cool. --- A tranceiver in a laptop with no network change with your home system. All you need is a computer with a sound card, speaker and microphone.

The price is free for 90 days and $35 per YEAR thereafter. (I figure that 90 days will take me up to first spring Fox Hunt.)

You must be a ham to talk over this system.

We had a fun time playing with it at open radio room. The simulated tranceiver is awfully realistic. It shows still more ways that the internet and ham radio can work together.

Thanks again to Dave Ed (AC8AB)for the demo at the last W8DC open radio room night. Dave is heading south for the winter. If someone else gets in going on their laptop, maybe they can demonstrate it at the next meeting.

21. Receiving Yahoo Group e-mail Problem

Thanks!

33. New Net on the *MICHIGAN* conference server (EchoLink)

Yahoo group: GRARA
Date: 2008-01-10 15:19:48 UTC
From: mike_w8der
Topic: 33 Message: 33

For the growing number of EchoLink hams, here is a posting copied from the EchoLink Yahoo Group site related to the mighty *MICHIGAN* conference server. Note that the UPPER Net is connected to the K8SN repeater, 442.175 Mhz, PL 103.5 at Spectrun Hospital for those who enter EchoLink that way.

Posted by: "Michael J. Wolthuis" wolthui3@... kb8zgl
Wed Jan 9, 2008 7:26 am (PST)
I just wanted to take a second an alert everyone to two great nets we have added to the *MICHIGAN* conference [96170] for 2008. Please be aware these are Echolink nets, but combined IRLP connects are allowed on 9617.

Sunday nights at 8:00 PM EST is the Michigan Upper Peninsula and around the United States Social net. Checkins are taken first in the UP of Michigan and then a general check-in follows. This is a social net. We often have checkins from Alaska, Florida, Georgia and beyond.

Saturday mornings at 9:00 AM EST is the South CARS (SCARS) VoIP Net for around the United States. The initial net hosted 100+ checkins and a great time was had by all. This also is a social net. Checkins come from all across the US. More information is online at http://www.voip.southcars.com/
(be aware some parts of the page have music on them).

If anyone is interested in having additional nets on the *MICHIGAN* conference please contact me and we can see what arrangements can be made as we work to drive continued usage of this great asset.

Enjoy! 73s

Mike

34. W8DC Open Radio Room is the "Hotspot"

Yahoo group: GRARA
Date: 2008-01-10 16:20:14 UTC
From: mike_w8der
Topic: 34 Message: 34

This is a reminder about GRARA, W8DC open radio room on Wednesday nights at 7:15 at the Red Cross.

Last night, Mike (K8EX) found a short band opening on 10 meters. Steve (KC8WQL) and others talked to GRARA member Dave Ed (AC8AB) down in Florida on EchoLink. And of course Robert (KD8BIH) and Gary (KD8AZM) ran the regular Wednesday night 2-Meter net.

Bob (KD8HNF ...Happy Naughty Fellow) brought in his new HT to share while Steve (KC8WQL) gave him some pointers. Mike (KD8DLG) and Gary (KD8AZM) made contacts on VoIP using the CQ100 software tranceiver, Gary's laptop and the radio room WiFi.

We welcomed first time visitors Mark (KB8SVV) from Kentwood and Dave (N8WVI) from Portage.

Discussions for the night included (among others) the badly needed message handling training at the next meeting, where to find an old call book from the 1950s and world peace.

The attendees seem to change each week, but there is always room for one more.

35. Skywarn Annual Training. You won't want to miss this free event

Yahoo group: GRARA
Date: 2008-01-10 21:46:41 UTC
From: mike_w8der
Topic: 35 Message: 35

Guys and gals,

You won't want to miss this event. It is two solid hours of training
in how to spot and report emergency weather conditions. Regardless
of your group affiliation, this is a good training session!
Take a friend -- take your wife or husband.

Meet your favorite TV Weatherman.

Note the RSVP request so they can plan and can have your Skywarn card
ready.

Date: February 21st, 2008
Time: 7:00 PM - 9:00 PM
Location:
Grandville Middle School Auditorium,
3535 Wilson Avenue SW, Grandville, MI 49418
Cost: FREE!
Bring yourself and a friend.

RSVP required:

http://www.kcraces.net/signup/skywarn.php

36. Romney dismissed Amateur Radio operators

Yahoo group: GRARA
Date: 2008-01-16 21:56:37 UTC
From: tom_kd8deg
Topic: 36 Message: 36

Governor Mitt Romney dismissed the role of Amateur Radio operators in emergency communications during a televised "town meeting" program last night on WCVB's "When Disaster Strikes: Segment Two." The program featured public safety and volunteer organization officials from across Massachusetts among its audience.

Host and moderator Natalie Jacobson asked an increasingly-agitated Governor Romney questions about communications interoperability, and communication without commercial power. Romney was next asked by Jacobson, "...so does it come down to ham radio?..."

The Governor replied in a disgusted tone, "No, we don't need to deal with ham radio operators..."

Embarrassed public safety officials later tried to put in a good word for Amateur Radio. National Weather Service Warning Coordination Meteorologist Glenn Field was prepared to state the importance of Amateur Radio, when Salvation Army Colonel Fred Van Brunt was called upon. Van Brunt remarked about his organization's quest to improve its communications capabilities and how Amateur Radio has aided his organization. "The ham radio situation helps a great deal," he stated.

"I have already written and submitted a letter to the Governor's Office," wrote Eastern MA Section Emergency Coordinator Rob Macedo, KD1CY. "I have also written an email to Natalie Jacobson."

ARRL Section Manager Mike Neilsen, W1MPN sent a section-wide email today to all Eastern MA ARRL members describing the incident along with actions he and his staff were taking to mitigate the situation.

"[Romney's] attitude about us sets an unfortunate tone within the state's executive branch," wrote Neilsen. "As a former military officer, I see this as a failure in leadership. My immediate concern is our working relationship within the [Massachusetts Emergency Management Team] environment." Neilsen intends to address the Governor's comments as "an urgent matter" at a meeting on November 17 with Don Carlton from the Massachusetts Emergency Management Agency.

"I was very disturbed about what the Governor stated on the program," wrote Ron Wood, W1PLW, the section's Public Information Coordinator. "It does show that more work is needed by all hams in the section. It's a great idea to write letters explaining the good we do." Wood is attempting to schedule a meeting with the Governor's office tomorrow so that EMA ARRL staffers might discuss the matter further.

Tom Kinahan, N1CPE wrote that Governor Romney's comment has made "a PR problem" for Kinahan in his role as MA State RACES Officer.

"I've got a roster of over 150 Amateur Radio operators that support local communities, and those of us that directly support the state government. There are at least double that in terms of people that are actually out there that I don't have formal paperwork on that support Amateur Radio emergency communications in some organized manner... The Governor has said that he 'certainly doesn't need to rely on ham radio' -- where does that leave the RACES program now?"

"I am ashamed tonight that I am a Republican!" remarked one ham radio viewer. "[Romney] speaks in derogatory tones about hams. He certainly shows an ignorance as to what we do and are capable of. I suggest a grass roots campaign of local hams calling the State House and The Governor's Office to protest."

The television program can be viewed at http://www.thebostonchannel.com/video/5334306/detail.html.

37. Re: [GRARA] Romney dismissed Amateur Radio operators

Yahoo group: GRARA
Date: 2008-01-17 04:58:52 UTC
From: Raymond Larabee Jr
Topic: 36 Message: 37

Great story Tom. I watched this and they all think that their centralized system of digital communications is the answer. It's not the answer. If you put all of your communication in one basket, it's all doomed to fail. That's what happened in New Olreans. That's why we have RACES, ARES and Ham Radio in general. It's been shown to work (ie. Sept. 11th, Alabama during Katrina, ETC.)

38. Winter Comm. Exercise "Learning Curve II"

Yahoo group: GRARA
Date: 2008-01-18 13:53:36 UTC
From: mike_w8der
Topic: 38 Message: 38

The first Red Cross quarterly comm drill of 2008 will take place on Sat Feb 23rd with the alternate date of March 8th in case of bad weather. The drill will run from approx. 8 am to 1 pm. We will deploy 2 REV's- activate the radio room and experiment more with ATV. Please put this on your schedules now and e mail me your plans to participate. More details to follow.

WB8USA@...

J. Bell RC Comm Chairman

The Red Cross Communication Team (RCCT) is an affiliation between The Grand Rapids Amateur Radio Association (GRARA) and the Local Red Cross.

39. Red Cross Smoke Alarm Initiative

Yahoo group: GRARA
Date: 2008-01-18 14:08:26 UTC
From: mike_w8der
Topic: 39 Message: 39

We just received this request for Red Cross Communication Team (RCCT) and other GRARA members to participate in the Red Cross Smoke Alarm Initiative. In the past we have had one communicator with each team of installers as they go through a neighborhood installing smoke detectors.

From Joe Bell, RCCT Chairman, WB8USA

Below I've included the Saving Lives At The Sound Smoke Alarm Initiative installation dates and locations that we will be needing radio communication help for. I'm sorry about the late notice on the January date, I just locked that one down. If you could please ask your guys to help out, I would really appreciate it. As incentive, Qdoba will be catering lunch on the dates:)

Anyone who can help out should email SLATS@....

44. New Web Sign-up Screens -- Give one a "test drive".

Yahoo group: GRARA
Date: 2008-01-23 12:12:13 UTC
From: mike_w8der
Topic: 44 Message: 44

You may have noticed new links on the web site like "Click here to sign-up" or a link in an email similar to the one below. These are new applications written to make it easier for GRARA members and friends to sign-up for upcoming events. Each link is a little different depending on the project details. When you click one of these links, you will see a page very much like other sign-up sheets on the web. You can read details, fill in the blanks and then "submit" the request with the appropriate button. The appropriate event leaders will get an email with your sign-up details. You will also get a confirmation email showing your submitted data and detail information about the project as a reminder.

Below is a link to a test sample, fully functional, sign-up page. Why don't you give it a try? Just click the link, fill out the data and click the submit button. (Just a note. For this test, at least your email address should be correct so you can get the sample confirmation email.)

http://www.w8dc.net/w8dc/signup1.aspx

If clicking the above link doesn't work in your browser, cut it from this page and paste it into your browser address line.

45. What a toy! Where have I been for the last 7 years? "ECRV"

From: mike_w8der
Topic: 45 Message: 45

I was talking to AI4BF yesterday in Kentucky and he was telling me about his communications work with the local Red Cross group. I was especially amazed with their Emergency Communications Response Vehicle.

Google "ECRV"

Take a look at the following web site for details about these compact powerhouses.

http://www.riversidecounty.redcross.org/article.aspx?a=296

Some Specs!

From: wd8usa@aol.com
Topic: 45 Message: 47

Yep-The ECRV is a great aid in disaster response-The problem is there are not too many of them in service-There is one based in Chicago and Iowa are the closest ones to us. The chances of getting one when disaster strikes will be problematic as much depends on other disasters happening through out the Country. They are indeed wonderful tools to have- Imagine pulling up anywhere and having direct links to sat phones and the Internet! And that is only part of the weaponry that tank has! DE WD8USA ...-.-

54. New Hams DInner

Yahoo group: GRARA
Date: 2008-01-28 12:09:18 UTC
From: Jack
Topic: 54 Message: 54

An announcement from Al, WW8WW

The 'New Hams' dinner will be Saturday, February 16th, starting at 6:00 p.m., at Fire Mountain Restaurant & Grill on Alpine. I have reserved the largest of their two banquet rooms. The room is set up for 80 people, but an additional 20 can be added. The cost is $13.65 per person which includes your drink and gratuity. Anyone newly licensed during the past year, or a ham that moved to this area this past year will get their meal free. Also, the West Michigan 'Ham of the Year' award is also normally given out at this event. Plans are to have some door prizes. So, place this date on your calendar. Talk it up with your ham friends. I will contact MARA & GRARA. See you there. -AL- WW8WW

Jack,
I thought you might get two meals to go for Ann an me
and stick them in your freezer. we will pick them up
when we get home or just send me a check for the meal
costs. Don't you just love those great ideas. On the
serious side, we would love to be with you all. I
wish the time was different. Nice day for you and a
great day for us down here. I am feeling better and
should be back to normal in a few days.

60. How do I pay GRARA dues?

Yahoo group: GRARA
Date: 2008-01-30 03:19:53 UTC
From: mike_w8der
Topic: 60 Message: 60

This has to be dumb question #1 for 2008, but I know that GRARA dues are payable before the end of February, but who do I pay? I read the web site and they say I have to fill out that long form again -- Is that really necessary? (They have me figured out by now!) I told my wife to make the $25 chech out to "The Grand Rapids Amateur Radio Association." I plan to be walking around at the meeting Friday night looking for the mystery person who collects dues. Anybody know who gets the check and how much of the application I really need to fill out? If you are the guy, look for me. I will be the guy with a check signed by my wife sticking out from my shirt pocket.

By the way, my wife says that $25 is a bargain to get me out of the house. She would be willing to pay double! She would even be willing to pay more if GRARA starting having open radio room twice a week.

I'll have a talk with the treasurer tonight, I never liked the idea of filling out a whole form again. I think if the treasure makes out a receipt, as we used to, and you are not having problems getting the clubs email and other notices a new form should not be necessary.
We should all hit KC8NKA up at the meeting with our 2008 dues

64. Principles of Sending and Receiving Official Messages.

Yahoo group: GRARA
Date: 2008-01-30 20:13:39 UTC
From: mike_w8der
Topic: 64 Message: 64

You will want stay after the meeting Friday night for a special presentation on the "Principles of Sending and Receiving Official Messages" presented by Joe Bell. Joe is the Chairman of the Red Cross Communications Team (RCCT) and has a considerable amount of experience in message handling.

This training will be especially useful in sharpening our communications skills for the 4 simulated emergency tests (SETs) coming up this year. (See "Learning Curve II" on the W8DC.org web site.)

See you there.

69. Code Practice Classes, Beginner and Advanced

From: mike_w8der
Topic: 69 Message: 69

I have been asked to pass along the following posting from the Holland Amateur Radio Club about their code practice sessions under way. Sounds like a good opportunity to get the cobwebs off the old key.

For those of you who have never been to their club, the "T&TC" is their Technical and Training Center (ie Clubhouse). The clubhouse is easy to find at 280 East 8th ave in Holland. Right next to the train station.

Tuesday night (7 Peeyem) is advanced code practice class at the T & TC...7PM.
Practice starts at 12 - 13 Words per minute.

Anyone is welcome to join us.

Also the beginner class starting at 3 - 5 Words per minute meets Monday nights
at the same time (7 Peeyem) as the Tech / General theory class.

These classes meet in the conference room.

Coffee and snacks always available.

Chuck, W8GCW

Looks like there will be a lot of new stuff at the IRA Hamfest this year. You can see their new 2008 brochure by going to the W8DC.org main page and clicking the links just above the "Bitten by the Bug 2008" icon.

The Grand Rapids Michigan I.R.A "Good Old Days" Hamfest. Saturday, June 7, 2008 - 8 am to 2 pm.

74. Smoke Alarm Day-

Yahoo group: GRARA
Date: 2008-02-05 14:55:01 UTC
From: wd8usa@aol.com
Topic: 74 Message: 74

This Saturday is a Smoke alarm Install day. It will be held at the Berean Baptist Church 1574 Coit Ave NE. Please sign up on the GRARA web page if you can help. We were fortunate that there were few teams out because participation was poor on the last one. Please make the effort to be there! There is another one on Feb 16 in the Roosevelt Park area- Location TBA
Also we will have the first quarterly Comm. drill for RCCT on Sat Feb 23rd. We will stage at the chapter at 8am, have a briefing then deploy to the chosen sites. We will man the chapter base and deploy 2 ERV's. It should last until around noon or so. Again, sign up on the GRARA web page if you can participate.
Due to my being called into work this Friday I will not be able to teach the NTS class but have rescheduled it to Friday evening Feb 15th at the Chapter starting at 7pm. This is good because we can thoroughly cover the material and practice sending them as well. E mail me directly if you are attending at _wd8usa@..._ (mailto:wd8usa@...) .
Thanks for your time-It is worth all the money in the world to Red Cross!

76. National Traffic System Message Handling Training Rescheduled for Feb 15th

Yahoo group: GRARA
Date: 2008-02-05 23:00:04 UTC
From: mike_w8der
Topic: 76 Message: 76

The National Traffic System Messaging Handling Training has now been rescheduled for Friday February 15th at 7:00 PM at the Red Cross Building. This class is being taught by Joe Bell, WB8USA. For those of you who have heard him work net control for the West Michigan Traffic Net, you know that Joe really knows his stuff when it comes to passing traffic.

As you also know, this training was originally "snowed-out" last Friday night by the winter storm.

The rescheduled training session will give us the opportunity to thoroughly cover the material and practice sending and receiving as well.

Sign up by emailing Joe directly at WB8USA@... or by clicking the following link to the automated signup sheet.

http://www.w8dc.net/w8dc/ntstraining.aspx

Tom,

Is this SkyWarn Web Certification just good for Ottawa County or is it ok for kent county. I looked at the quiz questions. They are fairly straight forward like what does the F stand for in F4 tornado.

We have the live training coming up on February 21st at the Grandville Junior High School. It is a real fun "happening", but for those who cannot attend, this looks like a good alternative.

Mike,

I found out the online Skywarn training is for 15 Florida counties only, and the certificate is only good in those Florida counties. I will check further into the on line training to see if it is available in Michigan.

A note from N8LRF

The Red Cross Jnos Box has been changed. (ARCB)

New Call: K8FM
Host name:redcross.kent.ampr.org
New Freq. 147.56MHz.

This change was necessary to spread out Freq. usage. It is not
good to have everybody on the same Freq. You can send and receive
packet mail to and from all of the other Jnos BBS's in the Mi-DRG
Ampr.net network. and throughout the world......

Check it out. Let me know it I missed a change or if
you see something amiss....

From: mike_w8der
Topic: 90 Message: 90

Hey guys and gals,

I know the snow is falling and this event is on a Friday night, but I hope that all of you try to make it to the training class on Friday. This is really important to the club as well as each member. To retain our standing as crack emergency communicators, we need to maintain our personal and club credentials. This spring we have the opportunity to get every member though NTS Message handling and Skywarn.

Skywarn is scheduled for February 21st at the Grandville Middle School auditorium and on March 27th at the Allendale High School Auditorium. (see Tom, KD8DEG's Posting on the GRARA Yahoo site.) In addition, Tom is looking into ways to take the training online.

The NTS Message Handling Training is Friday night. Joe Bell has put together a good presentation. Pse see the notice below and the link at the bottom to the signup web page. Hope to see you there! :-)

The National Traffic System Messaging Handling Training has now been rescheduled for Friday February 15th at 7:00 PM at the Red Cross Building. This class is being taught by Joe Bell, WB8USA. For those of you who have heard him work net control for the West Michigan Traffic Net, you know that Joe really knows his stuff when it comes to passing traffic.

As you also know, this training was originally "snowed-out" last Friday night by the winter storm.

The rescheduled training session will give us the opportunity to thoroughly cover the material and practice sending and receiving as well.

98. Info On Exercise "Learning Curve II "

Yahoo group: GRARA
Date: 2008-02-15 18:08:15 UTC
From: wd8usa@aol.com
Topic: 98 Message: 98

On being presented with a unique opportunity I and my staff have decided to cancel the exercise on Saturday the 23rd and reschedule it to Thursday evening Feb 28th from 6pm to 10pm. This is so we can exercise with the Shelter Simulation class which is going on at the Rockford Reformed Church 4890 Eleven Mile Road in Rockford. The class will have Americorps trainees from across the State as participants and young school age folks as simulated "victims" for the shelter. This is a unique opportunity to sharpen our skills and introduce the participants to radio operations. They will be generating messages for us to pass.
We will staff the radio room at the chapter and be using Red Cross radio, 2mtr simplex (the 26/R as backup) and perhaps packet and ATV and set up the big GO Box at the shelter. Plans are being firmed up as of this writing.
Sorry of the sudden change of venire but this opportunity cannot be missed!
DE WD8USA ...-.-
OH! I almost forgot! See some of you tonight at the message handling class and at the smoke alarm install tomorrow!

99. Sometimes I am "button busting" proud to be a GRARA member.

Yahoo group: GRARA
Date: 2008-02-16 04:44:46 UTC
From: mike_w8der
Topic: 99 Message: 99

Last night it was so cold that the salt couldn't melt the ice on the streets. Michigan Avenue was more like an ice rink than a major thouroughfare. The potholes on Fuller Avenue were so big that President Jack could fall in and never be seen again! Yet 16 hams showed up to take the NTS Traffic Handling class taught by Joe Bell of the Red Cross. We have our next simulated emergency test coming up on Feb 28th. We will be ready! I predict that our traffic scores will be double those of last fall's SET. Go GRARA!

Speaking of the Simulated Emergency of Feb 28th, I hope everyone notices that the date has been changed from Saturday February 23 to Thursday night, February 28th, from 6:00 pm to about 10:00 PM This change is to take advantage of the Americorps Shelter Simulation exercise being held that night at the Rockford Reformed Church, 4890 Eleven Mile Road in Rockford.

The exercise will have Americorps trainees from across the State as participants and young school age folks as simulated "victims" for the shelter. This is a unique opportunity to sharpen our skills and introduce the participants to radio operations. I am so glad that we had such a good turnout tonight for NTS Traffic Handling training.

ALL CRACK GRARA COMMUNICATORS WILL BE DISPATCHED FROM THE Red Cross -- starting at 6:00 PM.

We have a neat group of guys. I hope the news media picks up on the "good news" stuff going on that night.

Note the "Learning Curve II" SET event sign-up web page is on line and waiting for your use. See the following link.

http://www.w8dc.net/w8dc/LearningCurveII.aspx

100. Grand Rapids Police 9-1-1 Operator (and Police Dispatch and Fire Dispatch) Job Opening

Yahoo group: GRARA
Date: 2008-02-16 12:31:24 UTC
From: AB8ND
Topic: 100 Message: 100

Job opening at GRPD for a distpatcher. They are looking for Amateur radio operators as we have 2 way comm. experience, sort of the reason the amateur service was established.
This is the email I received from Ralph, W8KGV the communications manger at the department and past president of GRARA
Your application MUST be in by Tuesday 19 Feb

Jack, AB8ND

*/
Ralph H. Gould/*
Communications Bureau Manager
Grand Rapids Police Department
One Monroe Centre, NW
Grand Rapids, Michigan 49503
616-456-*3840* office
616-901-7816 cell
616-270-8372 pager
rgould@...-rapids.mi.us
6167800949@... (up to 130 characters)
231-834-0150 residence
gould@... residence** AFTER 1 NOV 07: r.gould@...
<mailto:r.gould@...>**

We have five openings for Emergency Communications Operator I (ECO I), which is primarily a 9-1-1 operator position after training). The ECO I job description is attached.

Applications are being accepted for Emergency Communications Operator I until _19 Feb 08 (next Tuesday)_.

Applications can be downloaded, completed, then mailed to Grand Rapids Human Resources if postmarked no later that 19 Feb 08.

Starting base pay is *$35,073 ($16.86 per hour)* for the first six months, then *$37,178.*

ECO I has a max base pay of *$44,701*, but in two years ECO I normally leads to the higher base pay scale of ECO II (primarily Police Dispatcher and 9-1-1 Operator), which has a top pay of *$50,733 (24.39 per hour) *after more years of experience are obtained*.*.

After several additional years ECO II opens the door to ECO III (primarily Fire Dispatcher, Police Dispatcher, and 9-1-1 Operator), which has a top pay of *$57,081 (27.44 per hour*) after more years of

experience are obtained.

All of the above have shift differential pay when assigned to second and third shift, up to $.65 per hour, and offer overtime pay.

The training is conducted in the Police Communications Bureau in the Grand Rapids Police Department at One Monroe Centre in downtown Grand Rapids. The civilian staff of the Communications Bureau handle the 400,000 9-1-1 and other phones calls per year,. Grand Rapids Police Dispatch functions, and also Fire Dispatch for Grand Rapids, Kentwood, Cutlerville, Dutton, Caledonia, and Byron Center.

Applications are available in the City of Grand Rapids Human Resources Department, 300 Monroe Ave NW, Room 880, Grand Rapids, MI 49503 or can be downloaded from the City of Grand Rapids website by clicking on the following link:

http://www.grcity.us/download_upload/human_gr_employment_application_a4plus.pdf

103. Exercise "Learning Curve II "

Yahoo group: GRARA
Date: 2008-02-17 16:17:05 UTC
From: wd8usa@aol.com
Topic: 103 Message: 103

Now that the Smoke Alarm Install Day is done the next event for us is the drill coming up on Feb 28th.
We will staff the chapter base station, activate ATV and packet as well as Red Cross radio and 2mtr simplex. The W8DC 726 will be used for back up. The shelter participants will generate messages to pass and the local ERV will be out on assignments The shelter is located at the Rockford Reformed Church 4890 Eleven Mile Road-Staging will be at the chapter at 530pm a briefing and assignments will take place then we will deploy. This exercise is the first formal exercise of the year and should be great fun!
The drill will last until approx. 9pm. Please evaluate the drill before you leave on forms provided you. We will use the input to make the next exercise even better!
Sign up on the web page ASAP-Our planning depends on number of participants!
Thanks in advance and Let's GET SET TO PLAY! DE WD8USA ...-.-

From: mike_w8der
Topic: 105 Message: 105

The new "Hotspot" section on the GRARA Website gives you the latest "Headline News" from the website. Look here first, then get details elsewhere on the website.

Note the new Google calendar. For those of you already using a Google calendar, merge the new GRARA calendar with yours. Technology is great.

From: mike_w8der
Topic: 104 Message: 107

These are the techy guys who play with that new stuff in ham radio called "digital communications". You can tell they are techy because you have to know a formula to figure out when their meetings will be held. (Date = <First Friday of the Month> + 1 day) That's so they can talk about what happened at the GRARA meeting the night before.

The meeting is held at the New Beginnings Restaurant, 1455 Michigan NE, in Grand Rapids. Newcomers are always welcomed. Come and check it out Saturday March 8th at 8:00 am.

Not good at math? Check their website at http://www.dapr.org

(Time corrected)

108. Red Cross Comm Drill "Learning Curve II "

Yahoo group: GRARA
Date: 2008-02-21 15:50:38 UTC
From: wd8usa@aol.com
Topic: 108 Message: 108

Just a reminder of the up coming drill a week from today! Please sign up on the web too participate.
We will staff the radio room at Red Cross and open communications at the simulated shelter site at the Rockford Reformed Church 4890 Eleven Mile Rd in Rockford.
We will stage at the chapter house, have a briefing then proceed to the shelter site.
For security reasons we will announce the frequencies to be used for the drill at the briefing.
Ron K8DMR & CO are planning ATV from inside the shelter-
If you have ever wondered what it takes to set up a field station and pass messages please plan on attending. This drill is the first of four quarterly exercises we will do this year. See you next Thursday! DE WD8USA ...-.-

109. Is there a place for the internet in ham radio? Try these first.

Yahoo group: GRARA
Date: 2008-02-23 03:59:05 UTC
From: mike_w8der
Topic: 109 Message: 109

Is there a place for the internet in "Ham Radio"? I it may have
a vital role in our ability to provide effective emergency
response. What do you think? To register for these programs, you
will need to have a scanned (jpg) version on your ham license and a
Windows computer with a broadband connection.

CQ100 -- Download this from http://www.qsonet.com (90 days free,
$35/per year after that.)Uses only your computer.

EchoLink -- Download this from http://www.echolink.org (NOT .com)
(free unless you want a vanity node number)
Start in computer to computer mode, then expand to using
it with K8SN repeater locally (k8SN.org)

DV Dongle -- Costs $200 for the USB dongle, but good video and info
here. D-Star interface -- good reports!
Sept QST says it is an elegant EchoLink

DV Dongle Video

111. Holland Mini-swap Saturday 10:00 to 1:00 at Holland clubhouse

Yahoo group: GRARA
Date: 2008-02-29 15:14:46 UTC
From: mike_w8der
Topic: 111 Message: 111

Gang, I am reposting the notice from our friends at the Holland ARC
about their mini-swap Saturday morning. I plan to be there, hope you
can make it also.

It is easy to find. Just take Chicago drive to the end and look to
your right -- they are the blue house on the corner. If you go by
the train station, you have gone too far.

Date: Wed, 27 Feb 2008 15:04:29 -0500
From: The Aviator <rafaviator@...>
To: <k8daa@yahoogroups.com>
Subject: [HARC] HARC's next Mini Swap THIS SATURDAY (March 1st)

Greetings all,

HARC will be holding this Saturday March 1st, it's next Mini Swap.

Details follow;-.

Free Parking available on site.

DATE: SAT March 1st 2008 (Talk in : 147.060 94.8pl)

SET UP TIME: SAT 09H30 - 10h00
Note: Friday night prior a limited opportunity exists between
19h00 - 20h30 to pre-setup your
table.

SWAP TIME: SAT 10h00 to 1.00pm SNACKS AVAILABLE

VENUE: 280 East 8th Street, Holland (right next to Holland
Chamber of Commerce).

112. Red Cross Exercise "Learning Curve II "

Yahoo group: GRARA
Date: 2008-03-02 16:39:11 UTC
From: wd8usa@aol.com
Topic: 112 Message: 112

Thanks to those that participated in the exercise last Thursday and a special thanks to Robert, KC8WBR for occupying the "hot seat" as leader for the exercise. One of the objectives I had in mind since I couldn't be there due to work schedules was to simulate the second in command being charged with running the operation which due to all accounts Robert did well! I will issue a full report to the membership via e mail and have Robert KC8WBR if he can make the meeting pass out participation certificates courtesy of Mike W8DER at the meeting on Friday. Thanks for your time-It is worth more than money! DE WD8USA
...-.-

115. Announcing a new GRARA Net On W8DC on Wednesday nights

Yahoo group: GRARA
Date: 2008-03-09 00:50:56 UTC
From: grara_cheerleader
Topic: 115 Message: 115

1) I am sure a lot of you have heard about the New GRARA 2m FM net, Staring this coming Wed night at 8PM and every Wed there after on the GRARA repeater. Myself, Tom KD8DEG, along with Dave KC8PCL will be your net controllers.

2) If anyone is interested in co-hosting on the net let us know about 4 day's in advance so we can work you in. You could read an article that you found, read the ARRL news letter, talk about ATV, hint's for Fox hunting, hint's for contesting, digital modes, and so on, on the net that night. Again I will get with W8DC.org Webmaster to have our e-mail address on the web site as well as the Yahoo group too, so you can notify myself or Dave of your interest in co-hosting. Some of you may be interested in running the net as well.

3) Going to work with our Yahoo Moderator about putting a suggestion box on the Yahoo group for TOPICS FOR the nets.

4) Also Please let us know if you wish to remain anonymous, as we are going to acknowledge those for there topic's we use. Just in case it's a controversial topic and you don't want to take a hit for it.

5) Please let as many ham's you know about the net.

6) When you check into other nets, most all ask for general announcements, tell them about the GRARA net, the day, time, freq, PL

7) We are going to give out certificates, SUITABLE FOR FRAMING, to any one who checks in 12 times during the year. We will have the certificate posted on the GRARA Yahoo group & W8DC web site. for all to see.

8) Going to make it fun, educational, and informative for all. Looking fwd to hearing from all of you from time to time on the net.

9) Also Tom Hanson and Steve Provost, are working on getting the W8DC repeater set up for net control, so for now we have to be short on your responses to the topic's or I'll be handing out PURPLE CRYSTAL certificates for the most time out's.

116. Results Of The Winter Exercise "Learning Curve II" Red Cross

Yahoo group: GRARA
Date: 2008-03-09 03:56:24 UTC
From: wd8usa@aol.com
Topic: 116 Message: 116

Thanks again to the following GRARA members for participating in the winter communications exercise:
Robert Cardwell,KC8WBR Chapter Group Leader
Stephen Provost,KC8WQL Shelter Group Leader
Tom Hansen N8DGD
Gary Lauff KD8AZM
Mike Ayers KD8DLG
Mike Hill W8DER
Jim Leys KD8CAN
Mike Bowen N8ILU
Jack Kunnen AB8ND
Mike Jones Ottawa County KD8DLD
Robert Johnson KD8BIH and son Nathaniel
Ron Fredricks K8DMR & Dennis Tanner KC8LZK ATV Crew
A special thanks to Robert Cardwell for assuming command of the exercise when I could not be there and as it turned out it was good training from the stand point that one or more of the leaders just might be effected by a disaster and out of the game so it fit right in!
What we did:
Deployed communications using 2 mtr simplex, Red Cross 47mhz and ATV at a simulated shelter site in conjunction with a CERT training on shelter operations, staffed the chapter radio room, sent and received 10 simulated "official" messages between the shelter and chapter base, experimented with ATV at the shelter site and evaluated the exercise afterward. Total exercise run time 3 / 12 hours.
For some participants this was their first exposure to disaster communications and as you could expect "Murphy" did show up! The go box key was not sent to the shelter, some had never seen or set up the go box and never sent official messages by radio, some transmitting at the same time and no ID cards on some new folks, Not indicating on the bottom of the message forms the disposition of a message (who received it and the time received or who sent it and the time sent) ATV was marginally effective most probably due to terrain between shelter and the base. The use of repeaters by design was very limited and were not used for the formal part of the exercise.
The strong points were good improvising when needed, simplex was by in large effective, good interaction with shelter CERT participants and more training with message handling.
Corrective action has been taken with the go box- A combo lock was purchased by Robert KC8WBR. The combo to be given out as needed. Red Cross ID cards will be taken at the next club meeting to those that qualify.
For the first exercise we have had this year over all it went well and each time out it will get better. Stay tuned for news of the spring exercise date when set. One exercise a year is not enough as this exercise once again proves.
We have three more exercises this year to go so three more chances for greatness! Thanks again to those that participated! DE WD8USA J. Bell / Red Cross

GRR Com. Chairman

122. ADDED Work Party -- Smoke Alarm Installation Initiative

Yahoo group: GRARA
Date: 2008-03-12 14:56:19 UTC
From: grara_cheerleader
Topic: 122 Message: 122

As you may have noted under subject FWD: Installs, a new date (March 22nd) has been added to the Smoke Alarm Install Initiative list of work parties by the Grand Rapids Fire Department/Red Cross/Americorps. As usual, GRARA communicators are needed for each work team.

Hope you can come out for this one... (it is sure to be warmer than the last one.)

Here is the link to the signup page.
http://www.w8dc.net/w8dc/RCSmokealarm_03_22.aspx

We will also be putting this on the w8dc.org web page.

Reference:

Joe,

I completely forgot to email you but we are having an installation on March 22 at 704 W Fulton for SWAN neighborhood. We're starting that one at 8:30 and only going until 1. Can your guys make it?

I'm still working on the location for March 29.

Thanks!

127. Missing Vertex 150 HT

Yahoo group: GRARA
Date: 2008-03-19 03:41:24 UTC
From: Gary Lauff
Topic: 127 Message: 127

Hi all, could you please all be on the lookout for anyone that suddenly has a newly aquired Vertex 150 2 meter HT, since Saturday March 15th? My friend, Mike Ayers, KD8DLG, and I took a load of unsold items out to our vehicle, after the Marshall swap. Upon our return for the remainder of our things, we realized that Mike's Vertex was missing from the table. It is a very heavy in weight HT, in an all black metal case, with a very tiny readout window, in good physical condition, with all accessories, in the original box. Two years ago, I had a wrist watch stolen right off my Marshall table, while it was manned by other club members! Beware of Marshall cleptos! If you see or hear anyone talking on a new to them Vertex 150, could you please bring it to either Mike's or my attention? We would like to compare serial numbers with Mike's records. So much for the myth that Hams are in a higher echelon from CBers! Contact Mike at: m2096ay@... or his Nextel: (616)890-4594. Thanks, Gary Lauff / KD8AZM

Thanks for bringing this ARRL idea to our attention Tim. It looks like we are getting more for our dues this year. Cool idea to have a local map where field day events are being held. We will have to be sure to get ours posted as soon as it is approved.

Since I am not able to get to Dayton this year, I have already ordered my field day T-shirt (extra 2x large.)

This is going to be a fun year for field day. Have you seen the new rules on the ARRL.org site?

We may not be super winners, but we sure have fun!

Subject:
Saturday
From:
"Tamara Habib" <Thabib@...>
Date:
Wed, 26 Mar 2008 13:17:45 -0400

To:
<wd8usa@...>

Joe,

Thanks so much for your help!

This Saturday we'll be at Fuller Area Reformed Church at 1239 Fuller Ave SE, Grand Rapids, MI.

We're starting the training at 8:30 am and we'll be going until about 1. We'll provide snacks and breakfast foods, but no lunch this time.

The only difference in this installation is the fact that we will be giving out 500 smoke alarms from 9 am - 1 pm. I don't know how crazy things will get because we haven't advertised it that much, but it could become a factor.

Anymore questions let me know!

Thanks!

Tamara Habib

137. 2008 Michigan QSO Party, W8DC style?

Yahoo group: GRARA
Date: 2008-04-01 15:34:35 UTC
From: mike_w8der
Topic: 137 Message: 137

Several members have expressed an interest in joining the 2008 Michigan QSO Party from the W8DC Radio Room at the Red Cross. This sounds like a lot of fun! It is scheduled for April 19th from noon to midnight. That's less than 3 weeks from now.

This will be a good opportunity to get some good HF operating experience and enjoy some comradarie at the same time. Tech's can operate HF with control operators on site. This is probably one of the most casual contests of the year and a great opportunity to promote our home state.

What do you think? Show you interest by signing up on the Event signup form at:

http://www.w8dc.net/w8dc/MiQsoParty.aspx

More information:

http://www.miqp.org

2008 MICHIGAN QSO PARTY Attention
Michigan Amateurs!!!! It's that time of year again! It's time to gear it up and get ready for the 2008 Michigan QSO Party. The MiQP has something to offer for everyone and there is no shortage of reasons for joining in on the fun on April 19th, 2008. Last year was a good year for the MiQP. Activity was up and we hope to do even better this year. We hope to see an increase in activity within the traditional amateur radio clubs in Michigan. I think that most clubs are looking for special activities and the MiQP has some features that should be considered in filling this need.

This type of event is what it's all about. It is a group activity that can be a source enjoyment before, during and after the event! This year we will have the traditional categories such as Single-Operator, Multi-Operatorand Mobile. But in addition to these, we are adding a new "Emergencies Operation Center" EOC category. This will provide an opportunity to brush up your clubs emergency operation skills and provide great training (and fun). This would also be a great opportunity to expose some of your newer members to emergency communications operations, but in a less formal environment.

As you can see from the rules listed below, this is only a 12 hour event. Please consider getting on the air for the whole thing, or any portion of the 12 hour period. You can operate from home, portable, mobile or at the clubs EOC. With the support of mobile and portable stations, we plan on having activity in all 83 counties. Last but not

least, we ask those of you that have participated in the MIQP to please help us get the word out and encourage other Michigan hams and radio clubs to participate and join the fun.

See http://www.miqp.org for more details and the rules,

!> Date /Time: Michigan QSO
Party, sponsored by the Mad River Radio Club,from 1600Z April 19th t until 0400Z April 20th. Stations may operate the full 12 hours. (12 noon to 12 midnight local Michigan time on April 20th) Modes and Categories: Phone and CW on 80/40/20/15/10 meters. Single-op, multi-op, mobile and Emergencies Operations Center (EOC) categories. Single-op entries are categorized by output power, QRP (5W or less), Low Power (100W or less), and High Power (greater than 100W) Multipliers: Work stations once per band and mode. Work other states and Michigan Stations. MI to MI QSO's are allowed. Work portables and mobiles again as they change counties, state or province. Exchange: Exchange QSO number and location (county for MI stations, state/province or "DX" for others). Scoring: one point per phone QSO, two points per CW QSO. Countmultipliers once per mode. Multipliers are MI counties for all entries, plus states & provinces for MI entries only. Final score is total QSO points times total multipliers. Freqs:
Suggested frequencies: CW-3545, 7045, 14045, 21045, 28045; Phone-3800, 7200, 14250, 21300, 28450. Log Submittal: Mail logs no later than 30 days after the contest to: Mad River Radio Club, c/o Dave Pruett, 2727 Harris Road, Ypsilanti, MI 48198 or via e-mail to logs@...

More Information: For complete rules,
along with free logging software, log and summary sheets, see http://www.miqp.org 73 es cu April 19th 2008 Mark NU8Z

139. Smoke Alarm Install on Saturday, April 19th, Signup here

Yahoo group: GRARA

From: Hank Greeb
Topic: 141 Message: 141

Since it appears that W8DC will be operational during the upcoming Michigan QSO Party on Saturday, April 19, I'd encourage all who are interested to sign into the Michigan QSO Party Reflector for the latest news.

You may sign up by visiting
http://mail.miqp.org/mailman/listinfo/miqp-mail_miqp.org

By filling in your e-mail address, name, and choosing a password you'll then receive a message asking you to authenticate that you want to join. After this you'll receive occasional messages about planned activity, etc.

Another good resource for information on the MiQP is the website
http://www.miqp.org

Red Cross Adopt-A-Highway clean-up is Tuesday evening April 22nd.
Meet at the share a ride lot on exit 101 on US-131 at 6:15 pm.
I need eight people, can you help? (please reply)
I'll buy the first round at the Rockford Bar afterwards.
We coordinate on 146.880/R pl 141.3 hz since it is in the area and we
don't have our north receive site in service yet.
In case of rain we'll go for Thursday the 24th.
Mike,
could you please post this on the events calendar on w8dc.org?
Many Thanks ...

150. Michigan QSO Party, GRARA & W8DC Style

Yahoo group: GRARA
Date: 2008-04-11 14:23:18 UTC
From: mike_w8der
Topic: 150 Message: 150

The Michigan QSO Party is definitely on for April 19th from Noon to Midnight at the W8DC Radio Room at the Red Cross. Won't you come over and help us spread the word about our Great Lakes State? Everyone is welcome, especially newcomers.

This is a good chance to get some HF operating experience or mentor someone new to HF. A control operator will be on site all day, so Techs can see how they like HF also.

Is the MIQP a contest? Yes it is, but don't let that scare you off. The MIQO id a lot less intense than other contests you might be familiar with, such as Sweepstakes, DX Contests, or even Field Day. The bands are not as crowded as during those other events, and the operating style is a lot more relaxed. It's a great venue for a first-timer to get started. We probably won't score a lot of points, but we will have a good time. This does count as a club training exercise for certificates.

We will be monitoring the W8DC repeater if anyone needs directions or if we have secured the outside door. See W8DC.org for directions to the Red Cross at 1050 Fuller Ave NE (enter in back of building).

Please let us know you are coming, so we can plan ahead. If you want a particular time slot, let us know in the "comments" text box on the events signup page.

Sign up for an time slot or just drop in, we will keep the light on for you.

Jim, I believe you can use the extra frequencies right away. You just have to add /AE to the end of your call.

Welcome to the yahoo group.

Congrats, Jim:

You should have received instructions from the volunteer examiners. Typically, you may use your new privileges as soon as you pass the test and receive a certificate to that effect. Until your new privileges show up on the database you need to sign with some suffix like /AG - but I don't remember the suffix is for this part of the country.

Thanks to every one for the advice. We got talking about call sign change (I am changing mine via the computer assigned route) and diverted from the topic. The VE team is top notch. I see now that it is /AG when upgrading novice to general so /AE must be the right call for extra.

Jim,

you can use your new privileges as soon as you have your new CSCE, which shows the new license you just earned.
In your case, you got your CSCE for the Extra class last night, which means you could have walked out of the room, into the radio room, and start calling CQ on the Extra portion of any band,
as long as you add /AE or temporary AE to you current call sign, until you new class shows in the FCC ULS database .....

Have fun DX-ing .....

Gerben.

QST ALL HAMS...

HELLO ALL,

As I have told some of you last wednesday, (in the red x) I am starting a 10m a.m. net.

The first net will be on 04-21-2008 @ 21:00, on 29.085 A.M.

To start off, the radio I will be using (radio shack htx 10) will only put out 7w pep.

And the antanna will be a mobile whip, about 20' high.

If you want to know more, pleas go to my web page @ groups.myspace.com/rockford10amnet

<http://groups.yahoo.com/group/GRARA/groups.myspace.com/rockford10amnet>

Hope to hear you on. [:)]

163. HARC General license class - May 5, 2008

Yahoo group: GRARA
Date: 2008-04-15 19:51:03 UTC
From: Joe Veldhuis
Topic: 163 Message: 163

We tried to kick off our General class yesterday, but only one person showed up, so we are rescheduling the beginning of the class for the beginning of May.

If anyone out there has, or knows someone who has, a Tech license and wants to upgrade to General, the Holland Amateur Radio Club is offering a General license class. The class is free, study books are available for $20 from Ed Heyboer, KF8EV (eheyboer@...). Let either him or I know if you're interested!

Date: May 5, 2008 and the next 8-10 Mondays after that
Time: 1900h (7:00 PM)
Place: HARC Technology and Training Center - 280 E 8th St, Holland (42° 47' 24" N/86° 5' 40" W)
Directions: take Chicago Dr. west of US-31, look for blue house on the left just past the Chicago/8th merge, next to the Chamber of Commerce and across from Long John Silver's

At the same place and time, Chuck W8GCW is offering a beginners' CW class. So if you want to work DX without an amplifier, or just be able to identify repeaters, see him.

Spread the word!

From: stephen provost
Topic: 164 Message: 165

Joe-there is confusion about Saturday April 19th smoke alarm event.

Some people were told that his event was canceled.

Some people were not aware of April 19th at all.

Participation is difficult if the planners wait too long to plan or keep making changes;

is what I have been told.

168. Michigan QSO Party is Saturday, Noon to Midnight out of the club radio room W8DC

Yahoo group: GRARA
Date: 2008-04-17 11:10:32 UTC
From: mike_w8der
Topic: 168 Message: 168

Just a reminder......

The Michigan QSO Party is definitely on for April 19th from Noon to Midnight at the W8DC Radio Room at the Red Cross. Won't you come over and help us spread the word about our Great Lakes State? Everyone is welcome, especially newcomers.

This is a good chance to get some HF operating experience or mentor someone new to HF. A control operator will be on site all day, so Techs can see how they like HF also.

Is the MIQP a contest? Yes it is, but don't let that scare you off. The MIQO id a lot less intense than other contests you might be familiar with, such as Sweepstakes, DX Contests, or even Field Day. The bands are not as crowded as during those other events, and the operating style is a lot more relaxed. It's a great venue for a first-timer to get started. We probably won't score a lot of points, but we will have a good time. This does count as a club training exercise for certificates.

We will be monitoring the W8DC repeater if anyone needs directions or if we have secured the outside door. See W8DC.org for directions to the Red Cross at 1050 Fuller Ave NE (enter in back of building).

Please let us know you are coming, so we can plan ahead. If you want a particular time slot, let us know in the "comments" text box on the events signup page.

Sign up for an time slot or just drop in, we will keep the light on for you.

Michigan QSO Party

Call: N8M
Operator(s): N8XX
Station: N8M

Class: Single Op LP
QTH: MICHIGAN
Operating Time (hrs): 7 ?

Summary:
Band CW Qs Ph Qs

80: 89 53
40: 132 32
20: 19
15:
10:

Total: 240 85 CW Mults = 67 Ph Mults = 45 Total Score = 63,280

Club: Grand Rapids ARA

Comments:

20 metres was marginal, even on CW. Did work a few Europeans on 20 CW, and even
a couple Michigan stations! Never heard a peep out of 15, didn't even listen on
10. Was surprized that my recently found microphone netted quite a few contacts
and multipliers on 40 and 75 metre SSB. Turns out that 40 metres was the winner
- it stayed open, probably until the end. 40 was noisy during the day, but
quieted down in the evening. This part time effort beat my personal best, and
the Kent County SOLP best. All in all, conditions were considerably better
than the past two years.

Note that the part time effort was due to a gymnastics meet in which my grand
daughter participated. Grandkidz will trump ham radio 99.44% of the time!

175. Adopt a Highway cleanup - April 22th

Yahoo group: GRARA
Date: 2008-04-21 20:48:56 UTC
From: Hank Greeb
Topic: 175 Message: 175

I was reminded that the Adopt a Highway Cleanup date is tomorrow, April 22th. I'm sure that the more the merrier, so I'm plugging this once more.

Meet at exit 101 on US-131 at 6:15 pm. I found that the Park-n-Ride for that Exit is between the north bound and southbound exits.

To which "Rockford Bar" will we proceed afterward? There's the "Corner Bar" in downtown Rockford, but there's a nice place closer to Exit 101 called the Crazy Horse Saloon, at 4601 14 Mile Rd NE, which is within 1/2 mile of that exit. Both places serve cool "brown 807's" (Yes, I'm severely dating myself with such a reference to the sudsy stuff, but...) and the food is edible at both places.

Since this is within a hop skip and a jump of QTH N8XX, I plan to show up. Hope to see y'all there!

178. GRARA Results, The 2008 Michigan QSL Party

Yahoo group: GRARA
Date: 2008-04-22 19:53:09 UTC
From: mike_w8der
Topic: 178 Message: 178

I don't know when I have had more fun with a contest than we had last weekend with the 2008 Michigan QSO party from the Red Cross Radio room. It must have been the synergy from all the different operators. Nate, KD8NCS, certainly wins the "most aggressive" award for his unyielding attack on the 40 and 80 meter bands. And Tom, N8DGD, showed again how he can complete an exchange under impossible conditions (Mr. Impossible). And Jim, KD8CAN, for staying onboard (and awake) for the full 12 hour contest. It was a great time!

We would like to thank our operators, AB8ND, KD8CAN, W8DER, KD8NCS, N8DGD and KB8AFS. Together we worked 29 states/providences and 39 Michigan counties.

Let's do this again!

180. Announcing the first GRARA Fox Hunt of the 2008 Season

Yahoo group: GRARA
Date: 2008-04-23 19:54:15 UTC
From: mike_w8der
Topic: 180 Message: 180

We've done our homework, are you ready?

The first "fox hunt" (hidden transmitter hunt) of the 2008 season will be held on Saturday May 3rd from 1:00 pm to 3:00 pm. It's time to dust off that tape measure yagi and get ready to have a good time! See the rules and other information on the http://www.w8dc.org web site. You will also find helpful links there on making radio direction finding (rdf) equipment.

The fox hunt is open to all ham radio operators and their assistants. You don't have to be a GRARA member to participate. Teams of from 2 to 4 hunters are recommended.

Let's have fun with this! The date is coming up super fast. It's the day after our May membership meeting.

You can ask any questions here on the yahoo group. Let us know you are coming by using the web event signup page at:

http://www.w8dc.net/w8dc/RookieFoxHunt.aspx

184. Adopt A Highway Roadside clean-up #1 for 2008 is now history!

Yahoo group: GRARA
Date: 2008-04-27 01:27:26 UTC
From: n8dgd
Topic: 184 Message: 184

Many Thanks to the following for Adopt-A-Highway roadside cleanup on
Tuesday April 22, 2008
Mike Hill; W8DER
Ron Weinrick; KD8GBX
Jim Leys; KD8CAN (Mr. CAN do)
Hank Greeb; N8XX
Josepie Bell; W..D8USA
Tom Hansen; N8DGD
Rich Douglas; KC8NKA

After picking up 22 bags of trash we reclined at the Crazy Horse
Saloon and had a great time. Next Adopt-A-Highway roadside cleanup is
Tuesday July 15th 6:15pm. Rain date: Thursday July 17th.

A special thanks to Mike Hill for helping me get the word out using
the sign-up sheet on the web page and here on Yahoo!

Thanks Mike!

The prize is more like the unending respect and admiration of your peers and the opportunity to be the FOX in the June hunt.

By the way, who is the "Rookie" Fox for this hunt? We haven't heard a thing from him. Any hints yet old wise one? We need all the hints we can get now that Jack and Tom have teamed-up.

192. Fox Hunting Antenna -- Get it checked.

Yahoo group: GRARA
Date: 2008-04-29 00:40:42 UTC
From: mike_w8der
Topic: 192 Message: 192

For those of you who have built new radio direction finding antennas for the Fox Hunt Saturday, you can bring them to open radio room Wednesday night to check them out. Rich will be there about 9:00 with his analyzer for that final check.

Also for those of you who are making the simple passive attenuators from the W8DC.org website, we should have some samples for you to see at radio room Wednesday night or at the Membership meeting Friday night.

What is an attenuator, you ask? It is a device that goes between your antenna and your HT to knock-down the Foxes signal to midscale on your S-Meter. It is easier to see a direction indication when your S-Meter isn't pegged.

Don't let this tech talk scare you away. Just holding your ht (with rubber ducky) close to your chest as you turn your back to the foxes transmitter works good also.

Speaking about the fox. I see he is an official member of our Yahoo group now. He posts his email address as: RookieFox@... . I assume you could send him an email or simply leave a message for him on the yahoo group. (That sounds something like sitting on Santa's lap at Christmas time.)

This is going to be a fun hunt!

202. Saturday is almost here, you won't want to miss the Rookie Fox Hunt

Yahoo group: GRARA
Date: 2008-05-02 03:05:47 UTC
From: mike_w8der
Topic: 202 Message: 202

You won't want to miss the first GRARA fox hunt of the season. It's called the "Rookie Hunt" because we are out to use just some basic common sense to find our shifty fox. No computer assisted or doppler equipment is allowed. Just basic directional antennas and portable tranceivers. (full rules are on http:/www.w8dc.org .)

No RDF equipment? Don't let that stop you. It only takes one set of equipment per team or car, so we all don't have to have equipment. One thing we know for sure, the more people on a team, the more fun. You will have so much fun this time that you will be out making your own special antennas for the next hunt. I already have a quad in mind for the next hunt, but I will stick with the tape measure yagi for Saturday.

Meet at the Celebration Cinema parking lot along the M6 Freeway by Kalamazoo Ave SE between 12:30 and 12:45 -- so we can collect names and odometer readings. The contest starts promptly at 1:00 pm on the Fox's watch. It is over at 3:00 pm or when everyone finds the slippery feline. At the direction of the victorious fox, we will meet at a fast food joint of his choosing to brag and exchange stories. (If he told us where it is before the hunt, you would know what area to search.)

The fox will give us a five minute transmission at 1:00 pm and then a thirty second transmission on the request of any team until the last team finds the hiding spot (or it gets to 3:00 pm).

Out of all the activities hams take part in, fox hunting seems to be the event that generates the most fantastic stories.

Winner gets the unending respect of his fellow hams and the opportunity to the the fox at the next hunt. Good luck and lots of fun to all.

YOU ARE INVITED!

203. Petis site mowing party!!!

Yahoo group: GRARA
Date: 2008-05-03 02:39:38 UTC
From: sprovost64
Topic: 203 Message: 203

Hello, on Thursday May 8th, 2008 I want to go to our antenna site and mow the grass and run the weedwacker.

This is our agreement with WLAV to host our transmitter on their site.

If you want to help, please email to stprovost@... .

I would like to start around 5pm

Thanks

Stephen KC8WQL

GRARA technical officer

204. Tom and Sheila Bosscher Win 2008 Rookie Fox Hunt

Yahoo group: GRARA
Date: 2008-05-04 14:24:08 UTC
From: mike_w8der
Topic: 204 Message: 204

With a little bit of luck, some expertise and Sheila's stong insticts, Tom and Sheila Bosscher (K8TB & K8AJ) won the 2008 Rookie Fox Hunt. The winning time was 33 minutes and distance traveled was 6.2 miles, almost a direct hit on their initial bearing. Good job Tom and Sheila!

The fox hunt started at Celebration Cinema, Kalamazoo and the M6 Freeway, and ended with our winners finding the "fox", Jim Leys KD8CAN, in Gezon Park in Wyoming. Gezon Park is located between Burlingame Avenue and Byron Center Avenue on 52nd Street SW. Jim couldn't have picked a better place to "hide". He was within a mile from Palmer Park and Palmer Golf Course where the rest of the hunters fought one speed bump after another, trying to find the fox there, or at the Armory, or the golf clubhouse, or at the softball park or down by the Buck Creek Bridge, etc. He was within plain sight from the road and in the middle of the small parking lot.

Second place went to the team of Jack Kunnen, AB8ND, Tom Hanson, N8DGD, and Nate Smith, KD8NCS. At last sighting, they were still bouncing from the speed bumps in Palmer Park.

Third place went to the team Mike Ayers, KD8DLG, and Mike Hill, W8DER, bouncing into Gezon Park with a mere eight minutes left and 33 miles on the odometer (almost all on the speed bumps).

Fourth place went to the team of Bob Robinson, KD8HNF, Dave Ed, AC8AB, and Gary Lauff, KD8AZM.

Rumor has it that Rich Douglas, KC8NKA is still riding the speed bumps. If anyone sees him, have him call home.

We all had a great time! -- Lots of laughs, lots of fun! By the time we hit McDonalds afterwards, we were all exausted.

By winning the hunt, Tom and Shiela won the right to be the fox at our next hunt being planned for June. Watch the yahoo group and http://www.w8dc.org for details.

From: stephen provost
Topic: 208 Message: 208

Jim, Dave, and Hank

Thank you for volunteering.

<http://www.wlav.com> Our two-meter transmitter site is located at the WLAV-FM transmitter tower

located in an apple orchard off of Pettis Avenue, North of 3 Mile Road.

The best way to get there is go to East Beltline and head north to Knapp Street.

Turn right on Knapp and head east. Cross the river and go to Pettis Avenue.

There is a traffic light at Pettis.

You make a left hand turn onto Pettis heading north.

Go past three mile and look for my suburban.

If you make it to 4 mile, you need to turn around.

The entrance to the apple orchard is off Pettis and is a driveway that leads all the way

To the apple orchard.

I will be there and listening on the repeater to guide people in.

I will be there at 5pm.

Stephen KC8WQL

209. Airport Exercise- RCCT 5/30

Yahoo group: GRARA
Date: 2008-05-06 02:56:38 UTC
From: wd8usa@aol.com
Topic: 209 Message: 209

Here are the details for the airport drill to be held on Friday, May 30 from 10am to 1 or 2pm.
The RC will be activating mass feeding, mental health services and supply function areas for the Kent County Airport exercise. We will consider this the spring exercise for the RCCT if enough volunteers sign up. I know this is during the work day for some of you. Please sign up via the web if you can play no later than this weekend. If I do not get enough participants we will cancel it and do an evening drill that week. Could someone mention this on the Wed evening VHF net?
Thanks for your time and assistance! DE WD8USA ...-.-

It Takes a Club
By David Sumner, K1ZZ

May 01, 2008

Looking at variations in Amateur Radio licensing activity and new ARRL membership around the country, it's apparent that there are "hot spots" where newcomers are joining our ranks in relatively large numbers compared to other areas.

What does it take to make such a "hot spot"? One answer is that it takes a local radio club -- but not just any club. It takes a club that has made a commitment to reach out to the community or communities that it serves, with a program to bring friends and neighbors from a vague awareness of Amateur Radio all the way to being active radio amateurs.

Such clubs don't just happen. It takes vision, leadership and a lot of hard work. It takes club officers and members who are willing to venture beyond their normal comfort zone. It takes a welcoming, supportive and non-judgmental attitude on the part of everyone in the club that a newcomer is likely to encounter.

The good news is that once you have such a club it becomes -- almost -- a perpetual motion machine. Here's how it works.

Assuming that your community has a radio club and that you're a member, the first step is to develop a culture of outreach and welcome within the club. This takes conscious effort, especially if your members are in the comfortable rut of talking to the same group of friends all the time.

Imagine that you're listening to the club's repeater for the first time, as an amateur who is either new to the community or a new licensee. Would you feel welcome to join in the conversation, or would you feel that you would be regarded as an intruder? Now, imagine that you're attending a club meeting for the first time. You walk in and see knots of people talking among themselves. Would anyone greet you and introduce them-selves or would you be left standing by yourself? Before you're ready to make a serious outreach effort you must be able to answer these questions positively.

Being friendly and welcoming is necessary, but not sufficient. Does your club offer licensing classes? Do you help new licensees get over the many other hurdles -- selecting and installing antennas, learning how to use equipment, debugging interference to and from consumer electronic devices, and so on -- that stand in the way of aspiring operators? Do

you make sure that their first on-the-air contact is a positive experience, and offer nets and roundtables that they will want to join? Do you expose them to the wide variety of activities that they can pursue as radio amateurs? Do you encourage ARRL membership, so they will enjoy full access to membership benefits and will receive the monthly stimulus of QST?

If you have all of these bases covered, congratulations! Your club is ready to promote itself to the community. Most clubs already have some experience doing this, with varying degrees of success. While a full discussion of the do's and don'ts is more than this page can accommodate, here are a couple of thoughts.

There are many amateur licensees in your community who are not presently active. With the caveat that some are Silent Keys and others have not kept their addresses current in the FCC data base, it's easy to compile a mailing list for an invitation to an Open House or other special event. If you succeed in reactivating them, their renewed enthusiasm may infect their friends and family members.

If you invite the general public to come and see your club, make sure there's something for them to look at. Even a static display with some QSL cards and photos of past club events can be an ice-breaker, giving your greeters something to talk and invite questions about.

Field Day is just around the corner. With proper planning it can be an ideal event for introducing Amateur Radio to your community, and your club to existing and prospective licensees. This year there is a new, easy-to-use tool for publicizing your club's Field Day site: the ARRL Field Day Station Locator Web Site, www.arrl.org/contests/announcements/fd/locator.php. But remember -- an invitation to visit your site carries with it the responsibility to ensure that visitors (including children) are safe and that they have a positive, informative experience. If your Field Day operation is open to the public, the proper greeting of visitors cannot be left to chance -- it's as important a part of Field Day planning as the antennas, equipment, operators and food.

Every club has its ups and downs. If yours has been in the downward part of the cycle, now is a good time to take stock -- to capitalize on the strengths and overcome the weaknesses. The opportunities for club growth, in quality as well as quantity, have never been greater.

Oh, about that "perpetual motion machine." Have you ever attended a club meeting where there was to be an election of officers, but there were more offices than candidates? If not, you're fortunate. Many clubs with static or shrinking membership lists find that it's difficult to fill club offices or undertake new projects. Once a club finds the formula for attracting and nurturing new members, maintaining the club's vibrancy and activity becomes much easier.

The best local clubs provide a logical path for identifying and developing their future leaders, from student to new member and in succession to greeter, committee member, committee chairman, and officer. Your club's president for 2012 may be someone who sees Amateur Radio in action for the first time on Field Day -- or may be sitting in your licensing class right now!

The next Smoke Alarm Install day is this Saturday. Jim KD8CAN will be in charge. Sign up on the GRARA web page & Yahoogroups and send Jim an e mail. I know this is the same day as the river run but OH well!
The triband vertical is off the roof of the Red Cross. The roof is being redone with a new coating. It is lying on the ground next to the tower. I am told the roofing crew used care in placing it on the ground. The Wed night open radio room attendees should secure it for now. It was taken down late Tuesday.
A reminder on the airport drill- RCCT folks please sign up by the end of this week-It is a day drill. We need at least 4 communicators for this-
Thanks in advance for your willingness to serve- DE WD8USA ...-.-

I'll be at the airport. I'll be driving my ATV minivan. With the 800' ground elevation at the airport I should be able to demonstrate ATV coverage all the way back to the Red-X as well as help with activities on the ground.

Some further info for those participating in the May 30th exercise:
Staging is at the chapter house @ 915am where a briefing will be held, assignments handed out and credentials checked for those going to the airport. All need their ID's or a copy of their ham ticket for the Red Cross radio room personnel. It looks like we will have the minimum staff to play. For those at the Red Cross back ground checks will not be required. There is still more room for players. E mail me for more info- JB

For those of you who are interested in amateur television, be sure to check out the new page on the GRARA Website. K8DMR shows us how to receive ATV with just your computer and Internet Explorer. Should we stream video from our ATV repeater? It can be done.

Thanks to Ron, K8DMR for all the research.

http://www.w8dc.org Select "ATV Corner" on the main menu.

This is sure a fun hobby....

218. GRARA Dayton trip status

Yahoo group: GRARA
Date: 2008-05-14 02:53:26 UTC
From: stephen provost
Topic: 218 Message: 218

Hello, as listed below, we will have tables (six 3'x 8' tables)
So far.
I plan to have the trailer at the red cross (Leonard and Fuller)
At GRARA's open radio room Wednesday night 5-14-08
I will be there until 9pm.
If you are placing items in the trailer to sell at Dayton and getting there with other people, please consider donating cash for the gas to haul items there and new items!! back to grand rapids. With $3.99 gas and I expect to use about 70 gallons of fuel for the trip, any donations are gladly accepted!

I still have one spot open for a passenger who needs a ride down or back.

Currently, I am still waiting for my last email request about our fleamarket spot. The latest email I received a few days ago asked for me to fill out the form and email her the form. I have sent a request to see if she received my filled out word form. I will send another request tonight.

My plans for Thursday are the following:
Meet at the MDOT park and ride at E Beltline and I96 interchange.
This lot is on the same side as UNO's Bar and Grill
I would like to leave at 9am for Dayton!!
I will pick up Jack Amelar at the MDOT park and ride at the Lowell Exit (exit 52?) on the way down.

I will confirm times at the GRARA open radio room as well.
I will use the GRARA repeater for any communications while we are in GR
If we leave around 9am, we expect to arrive around 2pm to the rooms.
The latest information I have is we have until 8pm to get to our fleamarket spot.

My cell is 616-648-5983
You can also text me at 6166485983
Thanks
Stephen KC8WQL

> Kb8zgl

As Hank replied, LARC does not have a fleamarket/table setup at Dayton, GRARA does. I am riding down with the fellas hauling the trailer and tables and will be helping set up on Thursday. We have four spots total. You would be most welcome to be a part of the group / sell stuff. Anyone needing a "dropoff" place while shopping is welcome to stop by. I will post the site numbers if I get them before leaving Thursday morning. Otherwise, my cell phone is (616)318-4551 (Nextel 130*719*68). I'll have an HT, but I don't know what frequency the rest of the group monitors. Again, I'll post the information is I get it in time.

219. Fw: [HARC] Re: 14.270 mhz used for Earth quake in China

Yahoo group: GRARA
Date: 2008-05-15 01:14:48 UTC
From: Wilson
Topic: 219 Message: 219

Here is a message that I got, and wanted to pass on...

Tom KD8DEG

My apologies if you receive this message twice. It is being forwarded as a special notice so that all subscribers get it regardless of their email preferences.

Please do not use 14.270 MHz for the time being. It is being used for relief efforts in China. See below.

Tim, N9PUZ
B.U.G. Moderator

FORWARDED MESSAGE:

I know lot's of buddipole users monitor 14.270 for QSO's, but for now we may want to find a different frequency based on the following information:

"Strong earthquake hits China, all ham radio operators stand by

"A Magnitude 7.8 earthquake hits Sichuan, China on Monday, May 12, 2008 at 06:28:04 UTC. Casualties and loss unknown up to now. According to Chinese Radio Sports Association, 14.270Mhz, 7.050 and 7.060 Mhz are preserved for amatuer radio emergency service in the rescue. Please spread this message as far as you can and keep the frequencies clean for emergency use. Thank you.

"Your attention please! 14.270Mhz is now reserved for ARES in 5.12 earth quake in Sichuan, China. Please help to keep this frequency clear.

"A group of radio amateurs is now transmitting from Wenchuan, the center of quake. Its signal is reported to be very weak. They tried to keep communication with BY8AA in Chengdu, seeking for all resources needed. During a contact finished a few minutes ago, they were asking for raincoats, water, tents, and outdoor living facilities.

"PLEASE HELP TO FORWARD THIS MESSAGE TO ALL RELEVANT FORUMS, MAILING LISTS, AND NEWS RESOURCES. MEANWHILE, KEEP THE ABOVE FREQUENCY CLEAN FOR EMERGENCY COMMUNICATION.

"Michael Chen, BD5RV/4
Email:michael.bd5rv@...

MSN: bd5rv@...
Skype: michael-bd5rv"

220. Red Cross News-

Yahoo group: GRARA
Date: 2008-05-15 02:48:13 UTC
From: wd8usa@aol.com
Topic: 220 Message: 220

Some news items-
1- Effective June 1st Jim KD8CAN will take over from Robert KC8WBR as Vice Chair of Communications of Disaster Services for Red Cross. Jim is still in training but brings a commodity which will be even more precious than money and that is time to devote to the program. Please welcome him in his new role when you see him!
2- The wooden box to house the pod radios is here! It needs staining and mounting of the radios in it yet. I request the club assist in completing this project. It will be in the radio room next week by Friday.
3- The airport exercise planning is proceeding nicely. We will treat this as the spring exercise. If you want more details and are thinking about participating on Friday May 30 from 915am to noon or 1pm send me an e mail for more info.
4- Robert KC8WBR has the ball for Red Cross during my absence at the Dayton hamvention. I will be gone starting tomorrow May 15th through the 18th. DE WD8USA ...-.-

222. W8T - National Trails Day - Jun 7

Yahoo group: GRARA
Date: 2008-05-19 03:55:27 UTC
From: Hank Greeb
Topic: 222 Message: 222

Anyone care to join me in this effort? It's always nice to have at least two operators for an event such as this. Anyone capable of either or both phone or CW is cordially invited to contact me. Availability for all or part of the proposed operating times is all that's required.

The special events call W8T will be activated during the National Trails day from the Hospitality Kiosk next to the Fred Meijer White Pine Trail <http://www.whitepinetrail.com/> http://www.whitepinetrail.com/ either in Belmont Michigan or a similar kiosk in Peppler Park, downtown Rockford, Michigan. Proposed operation will be between about 1600Z and 2359Z on June 7. I've just reserved the call, it should be official within a week or so.

The advantage of downtown Rockford is it is close to home, power is probably available, and the park is quite busy. This location is also near facilities for food, restrooms, etc. The advantage of the Belmont location is that is is very close to the White Pine Trail, so it might be a slightly better site for advertising ham radio, but we'd need a generator (which I have), and practically need two people, since restrooms and food facilities are a mile or two away. Both site would involve only very short trek with radio gear.

See http://www.greeb.net/w8tinfo/ for details.

From: kb8ild192
Topic: 223 Message: 223

Greetings:

I'm just letting everyone in the group know that I probably will be out somewhere (due to my job as a truck driver) in the 48 states or in Canada the weekend of Field Day. I'll be on 28.3-28.5Mhz for sure but not sure about 2 meters since I don't have a 2 Meter antenna on the truck at the moment. So, keep an ear out there for my call sign. I hope to just make a few contacts while on the road.

This is a beautiful rail-to-trail, might be fun if there was enough, so
that operators could bicycle/skate between Belmont and Rockford during
operating breaks. Hank, will this be in conjunction with a trail clean up.

Yahoo group: GRARA
Date: 2008-05-19 12:51:24 UTC
From: Hank Greeb
Topic: 222 Message: 225

Jack:

Your idea is intriguing. If there were enough interest we could have two stations, one in Belmont and the other in Rockford, and bicycle mobile ops on VHF between them. I'll keep the group informed if we get volunteers for the effort.

The trail cleanup day is the first Saturday of the month, between May and October, usually starts around 9 or 10 a.m., and ends before noon. It so happens that National Trail Day is on the same day as the work party. That's why I chose to operate after noon, so that I could help with the clean up.

I don't have details of where the work will be done on June 7. In May we repaired some vandalism at the Belmont staging area - that was what reminded me of the nice publicity kiosk just north of the bridge over West River Drive near Rogue River Drive.

I'll publicize the trail cleanup details here as soon as I know them.

234. GRARA Fox Hunt rumor -- is it true?... Yes !!!!

Yahoo group: GRARA
Date: 2008-05-28 23:11:49 UTC
From: K8TB
Topic: 227 Message: 234

Yes, there will be a fox...

Details:

On June 8, 2008 at 1PM the fox will start transmitting on 145.53 MHz.

Transmissions will be 1 minute long, every 5 minutes, plus any request
for transmissions.

The starting point will be the IRA swap location at the Hudsonville fair
grounds.

The fox will be limited by boundaries:

West- 96th Ave in Ottawa Co.
South- Adams (Ottawa County)/100th St (Kent)
East- Byron Center
North-M-45

This fox hunt is under the auspices of GRARA, and you do not have to be
a member of GRARA to participate.

Someone from GRARA will take odometer readings at the start location,
and the winner is the car that gets there with the
least mileage.

Other details to follow.

Find me if you can...

Tom Bosscher K8TB

p.s., people have asked me about the DF receiver that I use. It is made
by VK3YNG, and a indirect link to him can be found at:
http://users.bigpond.net.au/vk3yng/foxhunt/foxhunt.html

Date: 2008-05-30 02:49:42 UTC
From: wd8usa@aol.com
Topic: 235 Message: 239

We are still on for the Airport exercise but we probably will not send any one out there now as the ERV will be long gone by the time we get there. So we will have a deployment training session- I will cover what to do and where the places we operate from in the building. I will also cover the ERV operating positions and the go boxes contents etc. This exercise will be somewhat different but you need to be aware of this stuff.
For those that don't know my mom is slowly passing from this world to the next. She has stopped eating and drinking and is in and out of consciousness-the Parkinson's disease has finally taken it's toll. It is only a question of when she will pass. All prayers for her will be welcome- DE WD8USA ...-.-

240. Pod Radio Housing

Yahoo group: GRARA
Date: 2008-05-30 03:08:24 UTC
From: wd8usa@aol.com
Topic: 240 Message: 240

The box to secure the pod radios has been stained by Jim KD8CAN and ready for installation. I would like to do this at open radio room on Wednesday. We need a drill and bits, mounting self taping metal and wood screws and a tool kit. In addition to mounting the radios in the wooden box we need to bolt it to the desk. Then this project is a done deal! Thanks in advance for the help on Wednesday night! DE WD8USA ...-.-
OH! by the way a formal thank you letter is on it's way to the club from the Red Cross brain trust for all the help given the department of Radio Comm's.

241. GRARA Fox Hunt rumor -- is it true?... Yes !!!! Part 2, corrected date

Yahoo group: GRARA
Date: 2008-05-30 21:33:53 UTC
From: K8TB
Topic: 241 Message: 241

.....Well, the 55 year old brain backfired..

The date is June 7, thats June 7.

You still will have a problem finding me...

Yes, there will be a fox...

Details:

On June "7", 2008 at 1PM the fox will start transmitting on 145.53 MHz.

Transmissions will be 1 minute long, every 5 minutes, plus any request
for transmissions.

The starting point will be the IRA swap location at the Hudsonville fair
grounds.

The fox will be limited by boundaries:

West- 96th Ave in Ottawa Co.
South- Adams (Ottawa County)/100th St (Kent)
East- Byron Center
North-M-45

This fox hunt is under the auspices of GRARA, and you do not have to be
a member of GRARA to participate.

Someone from GRARA will take odometer readings at the start location,
and the winner is the car that gets there with the
least mileage.

Other details to follow.

Find me if you can...

Tom Bosscher K8TB

p.s., people have asked me about the DF receiver that I use. It is made
by VK3YNG, and a indirect link to him can be found at:
http://users.bigpond.net.au/vk3yng/foxhunt/foxhunt.html

Joe, I hope you're not planning on bolting the pod box to the left back desk, near the newest, silver Dell computer area, we quite often use that desk for soldering projects, as table space is already at a premium... I own a brand new Ramset gun and 22 cal. studs, suitable for masonry installation. Don't you think it would be more secure to mount the box to a wall, rather then the desk? If it was on the wall, it wouldn't be in the way for soldering projects, yet still be both quickly accessible and secure in the room, so no one could walk off with the entire p0d. Just a suggestion...Gary / KD8AZM

245. Joe Bells Mother

Yahoo group: GRARA
Date: 2008-06-03 20:01:14 UTC
From: Hank Greeb
Topic: 245 Message: 245

With condolences to Joe Bell, WD8USA and his family, I forward the following from m-Live.com.

The url for the obituary, which is in the Tuesday edition of the Grand Rapids Press is

http://tinyurl.com/6npp7e

Sally Grace Bell, age 86, passed away on Monday, June 2, 2008 at Clark Retirement Community, her second home after being a long-time Rockford, MI resident. Sally Grace was born in Canton, Madison County, Mississippi on September 1, 1921, daughter of Stanley Gaylord Young and Hattie Emma Denson. She grew up on the family farm four miles from town before the era of tractors and technology. In those depression era years, a full bale of cotton yield meant prosperity and the ability to afford the essentials including shoes and a new dress for school plus a few extra quarters set aside for emergencies. Sally's life was enriched by many close relationships from her extended family during her youth; she had continued to maintain connection with many cousins through the years by frequent correspondence. Sally graduated from Canton High School in 1940, earning a special recognition award for never having missed a single day of school during her school career. She celebrated her fiftieth high school reunion in 1990, to the delight of her family and alumni friends. Miss Young came to Michigan in 1940 where she began work in the mailroom at Wolverine Shoe Company in Rockford, Michigan, later becoming a bookkeeper in the sales division. After her retirement in 1953, she continued to manage the books at several local businesses. Robert G. Bell and Sally Grace Young were united in marriage on February 11, 1950, at the First United Methodist Church in Rockford. Mr. Bell was a manufacturer's representative, in partnership with Bell & Schrotenboer at the time of retirement. During her children's youth, she was a 4-H leader, band parent, and interested in her children's school careers. A 50-year member of the Rockford United Methodist Church, she had served as past board member and enjoyed membership in several women's circles. Sally loved her flower garden, arts and crafts, and treasured her southern heritage and tradition. She loved to travel with her husband and had visited many foreign countries, as well as many points of interest in the USA. Bob and Sally wintered in Pompano Beach, FL where they enjoyed participation as owners in the harness racing business in which their favorite "Mainstreet" was a special joy. After her husband's death, Sally pursued her dream of dancing by taking ballroom lessons, doing a mean tango at age 72. Sally Grace Young Bell was predeceased by her husband, Robert on September 10, 1992, and her parents, Stanley G. Young and Hattie Emma (Denson) Young, and very special friends, Joseph Bonello, and Ray Wayno. Survivors include her son, Joseph and Kathleen (Ure) Bell; daughter and her husband, Charles and Roberta Bell Wolfe;

four grandchildren, Kathryn E. Wolfe and her fianc?, Aaron Norris, Robert V. Wolfe, Elizabeth G. Bell, and Jennifer A. Bell; sister, Mrs. Emma Jean Bowman; and nieces, nephews, and cousins. The service for Sally will be Thursday at 2:00 p.m. at the Pederson Funeral Home in Rockford, MI, with Pastor Richard Riley of the Rockford United Methodist Church officiating. Interment will be in Cannonsburg Cemetery. The family requests in lieu of flowers, please consider the Rockford United Methodist Church or Faith Hospice. Friends may meet with Sally's family from 3 to 5 p.m. and 7 to 9 p.m. Wednesday at the funeral home. The Pederson Funeral Home, Rockford www.pedersonfuneralhome.com

An interactive map for the Pderson Funeral Home is at

246. Last Minute Info: Saturday's Fox Hunt

Yahoo group: GRARA
Date: 2008-06-04 00:09:29 UTC
From: mike_w8der
Topic: 246 Message: 246

Be sure to stay around after the IRA Hamfest in Hudsonville Saturday for the "My Money's All Gone" Foxhunt put on by the Grand Rapids Amateur Radio Assoc.

Meet the "Official Starter" Jim Leys, KD8CAN, in the Park Avenue Parking lot by the IRA ticket booth by 12:45 PM to record your odometer reading and to get the latest instructions. The Fox (the team of Tom and Sheila Bosscher K8TB/K8AJ) will begin transmitting their taunts exactly at 1:00 PM.

See the GRARA website http://www.w8dc.org/FoxHuntMain.htm for rules and all kinds of useful links to foxhunting info.

In the words of Jack Kunnen, GRARA President.... "The hunt should be a good one, even if you don't have fancy equipment come on out we can match up and car pool as needed. Fox hunts are a good time, putting some of our Ham skills to a test. Everyone is welcome."

What do you win, you ask? Just the unending respect of your peers and the first option to be the fox at the next GRARA fox hunt.

In addition, you will have the extreme pride in knowing that you brought the current championship back to your Grand Rapids Club. The current reigning champions are Tom and Sheila Bosscher from the Holland Amateur Radio Club. (The HARC couldn't win twice in a row..... could they?)

If you get a chance, sign-up on the W8DC website so we know to expect you. This is a beginner level fox hunt. No computer aided or doppler tracking systems are allowed.

Come on out and enjoy ham radio! Saturday at 12:45 at the IRA Hamfest.

247. W8T - National Trails Day - Jun 7 - Update

Yahoo group: GRARA
Date: 2008-06-04 02:51:47 UTC
From: Hank Greeb
Topic: 247 Message: 247

The special events call W8T will be activated during the National Trails day from a gazebo in Peppler Park, downtown Rockford, Michigan. The operation will be between about 1600Z and 2359Z on June 7. The call has been reserved, and three operators will share the duty on 80 thru 20 metres, CW and SSB, plus several 2 metre FM repeaters in the area. See http://www.greeb.net/w8tinfo/ for details of the proposed operating frequencies and times. A pictorial QSL card will be available - send #10 envelope or larger with SASE to N8XX QTHR.

Another special events station will be N8T, will be activated by the Lake Effect Amateur Radio Club of Marquette, Michigan in the Upper Peninsula. Details of this operation can be found at http://www.lakeeffectarc.info/N8T%2DTrails2008/N8TBandOpsPlan.htm

We hope to see as many operators from West Michigan on the bands as possible.

248. Fox Hunt - Start up

Yahoo group: GRARA
Date: 2008-06-04 12:00:56 UTC
From: Jim Leys
Topic: 248 Message: 248

I will be at my red van. Will be as close to the ticket booth as possible. Lic plate KD8CAN. Be a lotta fun trying to find the fox in a different county. Hope everyone can find their way home afterwards.

250. Laryn, K8TVZ and Bob, KD8HNF narrowly beat GRARA's Pres. in Fox Hunt

Yahoo group: GRARA
Date: 2008-06-08 23:55:59 UTC
From: grara_cheerleader
Topic: 250 Message: 250

Fox"ees" Tom and Sheila Bosscher (K8TB/k8AJ) kept everyone laughing with their taunts as searchers combed western Ottawa County in the GRARA "My Money's All Gone Fox Hunt" Saturday afternoon. Tom and Sheila had quietly slipped out of the IRA Hamfest in Hudsonville and were sitting under a shade tree in Heritage Park on Canel Avenue in Grandville. For a while it seemed like nobody would find them. Hints like "I see a lot of green", and "this ice cream tastes good" didn't seem to help a lot.

Laryn Lohman, K8TVZ, and his sidekick Bob Robinson, KD8HNF, narrowly beat the GRARA team of President Jack Kunnen, AB8ND, Tom Hansen, N8DGD, and Louie White, N8ZVB.

Both teams took over an hour to find the Fox with the winning team traveling 8.9 miles and the second team traveling 10 miles. The team traveling the least distance within the two hour contest time becomes the winner who earns a nifty certificate "suitable for framing" and the first shot at becoming the fox for next month's hunt.

All teams found Heritage Park within the two hour limit with "straggler" Mike Hill, W8DER, stumbling in with 8 minutes to spare and the team of Jim Leys, KD8CAN, and Kirk Wyatt, KC8TTT, slipping in with three minutes to spare. Admittedly the hints got a little better at the end. The final hint went something like "fill in the blank -- I would go to a dentist for a root _____."

Everyone who met at the Burger King on 44th and Kennowa for a drink agreed that this transmitter hunt will be hard to beat.

BUT WE ARE GOING TO TRY IN JULY. STAY TUNED......

Clubs represented included HARC, GRARA, Lowell and GVSU.

Our thanks go out to Tom and Sheila for showing us how much fun a transmitter hunt can be. Also our thanks to the IRA folks for letting us start our hunt from their hamfest.

For information on the next hunt, rules and equipment tips, watch the GRARA web site, http://www.W8DC.Org under "Fox Hunts 2008".

From: AB8ND
Topic: 249 Message: 251

Congratulations to Laryn and Bob they meet us fair and square, although Tom, Louie and I had to wait 20 minutes for them to show up at the hidie hole.. :-)
Lesson to all, when taking mileage don't say "Oh, miles are good enough, tenths don't matter". Then another excuse - we didn't have an Ottawa County map.

For all who missed the hunt, Tom and Sheila did a great job of hiding from a super place, their transmissions where spot on. This was a fun one, I hope we can get more hunters next time, maybe we need an antenna building party.

Thanks too for the hunters, Laryn, K8TVZ; Bob, KD8HNF; Tom, N8DGD; Louie, N8ZVB; Mike, W8DER; Kirk, KC8TTT; Jim, KD8CAN

I should also thank Tom for doing most of the antenna work while I set on my behind making sure no one stole the car. :-[

Jack, AB8ND

Just to let you know what we are planning. In the future all new RCCT volunteers (and old one's lacking id cards) will receive the necessary ID cards, application forms and everything necessary to be "official." This process will occur on Wednesday evenings with open radio room nights. This is the best way to make sure the proper "credentialing" takes place and no more lost applications. Will notify every one when the first opportunity is scheduled. By the way Chip replaces Deb Jones as the new head of Disaster Services for the Red"X" DE WD8USA ...-.-

From: ronhweinrick
Topic: 256 Message: 256

I'm not sure who to ask this question so I'm throwing out there on the group site. I'm gearing up for the next foxhunt and I've got a few questions.

Are offset attenuators legal?
Is there a designated starting place, or can I be anywhere inside a defined area (such as a ten mile diameter circle)when the flag drops?
Are dual band HT's legal as the primary receive radio?
Would it be possible to "tune up" my RDF rig before the hunt using the fox transmitter?

I'm having fun already.

Ron,

I can't say for sure on the attenuator
There is a designated starting place, mileage is take there, buyt once the fox starts transmitting you can go anywhere - usually best any way to get in the clear.
Any radio is fine to use, I used a scanner for a while
Tuning before hand probably should be discouraged, but maybe we should schedule something the night before so we could all do it.

From: mike_w8der
Topic: 256 Message: 258

Jack is correct. With our current rules, all teams must start from the designated starting point, so that milage can be verified. Also each member of each team must start from the designated starting point and remain together. (No team trianglulation.)

I think the last team that won used an offset attenuator. (Laryn, K8TVZ and Bob, KD8HNF. I personally use a switched attenuator made my Arrow Antennas. I also use a simple home made passive attenuator like on my web site, project page:

http://www.w8der.net/W8DER/projects/projects.htm

Glad to hear you are getting ready for the July (TBA) Fox Hunt. We have been having a lot of fun and learning at the same time.

260. VHF Contests this summer

Yahoo group: GRARA
Date: 2008-06-17 16:28:21 UTC
From: kf8ql
Topic: 260 Message: 260

I wanted to forward a nice synopsis of this summer's VHF contests:

Here's the summer lineup for your contesting pleasure:

CQ WW VHF -- 6 and 2 meters only. No worrying
about band-hopping, this is a great contest for *everyone*.
Runs from 1800Z on Sat., July 19th until 2100Z on Sun.,
July 20th.
6 meters was WIDE open for hours and hours in this
contest 2 years ago. I made 600 Q's in 140/50-some
grids. Also, for those who think you have to have big
antennas to put up those numbers, uh-no.
I worked the vast majority of those 600 Q's on 6 with
a pair of omni-directional loop antennas mounted on the
side of a tower. And my usual 100 watts. It was amazing.
July 2005 remains the single most fun I've ever had in
a contest. Also, there was great tropo on 6 and 2 as
night set in. Worked all kinds of guys on 2 FM simplex,
out to 300 miles, most of the overnight. Worked guys out
200-300 miles on 6 meters, guys who couldn't believe how
well we were getting out.
Here's the link to the rules:
http://www.cqww-vhf.com/VHFContestRules2008.pdf

Aug ARRL UHF contest -- 222 and up. This is the
one NLRS created Rovermania for. ARRL was about
to discard this contest a few years back, but especially in
the Upper Midwest, we've kept it alive. Make plans now
to do your part.
This one kicks off at 1800Z on Sat., Aug. 2nd and runs
for 24 hours. ARRL doesn't currently have an active
rules page to link to. When they get one up, I'll try to
remember to post it.

Sept ARRL VHF QSO party -- Weekend of Sept.
13-15. It starts at 1800Z on Sat., Sept. 13th and runs
until 0300Z on Mon., Sept. 15th. (10pm local Sunday)
Again, there isn't a specific rule page to link to at this time.

73,
Todd KC9BQA EN63ao

Dave,

Thanks for the post on UHF/VHF contests this summer. I think I'll try my luck on the July 19th event. I am just getting the contest bug. I had a ball on the MDXA "Death Match" and the "Michigan QSO Party" this year.

I'll put these contests on the GRARA web calendar also.

W8DER

The purpose of this Intro class is along with an introduction to Red Cross for those that need it but also provides for new ID cards to be issued and fresh paperwork and applications that the Red Cross needs no matter the volunteers status or familiarity with Red Cross. Nothing happens in a vacuum and changes happen to any program-So it is a catch all class! DE WD8USA ...-.-

From: wd8usa@aol.com
Topic: 267 Message: 267

Congrats to the following for attending our first Training / application for
Red Cross volunteer night last Wednesday night:
Jack Kunan AB8ND
Ron Weinnick KD8GBX
Tim Courtier KB8AFS
There were other seasoned veterans there as well for refresher training.
This program is off to a fantastic start and will streamline the application
process. The next class is scheduled for Wed evening July 2nd in room L-4.
There is a telephone answering machine up and running in the radio room. The
recorded announcement invites users to leave a message for RC radio room
staff and GRARA officers. Be sure to check for messages that might be left there.
The number for the radio room is: 616-456-8088.

Yahoo group: GRARA
Date: 2008-06-21 02:27:18 UTC
From: tom_kd8deg
Topic: 268 Message: 268

How many of you know what "The Amateurs Code" is.

See Below

de Tom KD8DEG

THE AMATEURS CODE

by Paul M. Segal, W9EEA (1928)

The Radio Amateur is:

CONSIDERATE..... never knowingly operating in such a way as to lessen the pleasure of others.

LOYAL..... offering loyalty, encouragement and support to other amateurs, local clubs and the American Radio Relay League, through which Amateur Radio in the United States is represented nationally and internationally.

PROGRESSIVE..... with knowledge abreast of science, a well built and efficient station, and operation beyond reproach.

FRIENDLY..... with slow and patient operation when requested, friendly advice and counsel to the beginner, kindly assistance, co-operation and consideration for the interests of others. These are the hallmarks of the amateur spirit.

BALANCED..... Radio is an advocation, never interfering with duties owed to family, job, school or community.

PATRIOTIC..... with station and skill always ready for service to country and community.

269. Building Security

Yahoo group: GRARA
Date: 2008-06-21 02:32:13 UTC
From: wd8usa@aol.com
Topic: 269 Message: 269

Time to revisit the issue of building security for club events. For obvious reasons we have to secure the building during and after events. Therefore the following should be observed for personal safety:
1- Know who the other users are in the building and ask they notify you when they leave-Likewise notify them when our activity ends. The radio room should be locked or a monitor present when in a meeting in another room.
2- Entrance doors should be locked 15 min after meetings start or a hall monitor placed by the doors to control access if no other users are present in the building. Monitor the repeater for late arrivals if necessary.
3- Normally the only doors used to exit the building are the main glass doors in the rear of the building-Using any other exit will set off the alarm system!
4- Make sure the last to leave properly arms the alarm system and locks the doors.
Following these basic steps will make every one safe and secure and protect the building. Thank you-

Hi all,

A reminder that Field Day is this week end, Ron, K8DMR has been working very hard putting things together.
We will be at the Front Street lot of GVSU, between Fulton and Wealthy, the radio club at GVSU will be setting up the GOTA station. I believe the
engineering department has a couple of things to play with, like spin bikes with generators so this should be a fun event for the club.

We would like to finalize plans at Open Radio Room this Wednesday, come by if you can. Some of small things we need are computers & software, antenna rope, a chef or 2, a grille, portable tables, chairs, power strips, power cords, small lights to put on the operating tables and anything else y'all can thing of.

280. Morley receive site grounds maintenance plus campout.

Yahoo group: GRARA
Date: 2008-06-30 15:45:27 UTC
From: Jack Amelar
Topic: 280 Message: 280

Morley receive site grounds maintenance plus campout.

It's time once again for grounds maintenance at the 250ft commercial tower NE of Morley owned by T&W Electronics which, among other radio services, hosts the Lowell Amateur Radio Club 145.27- (94.8Hz) Morley remote receiver 144.67 MHz.
Part of our arrangement with T&W is upkeep of the grounds.
Being the site is a mix of field and woods located in a rural area near Amish families and an Elk-Deer-Buffalo farm, some of us combine this with a camping trip.
The main cleanup day will be this Saturday, July 5. Figure start around 10AM. Rolls and coffee will be provided in the morning, Burgers and beverages for lunch. The "better half" and kids are welcome.
There are no toilet facilities here, but I will have the rest room in my motorhome available. It's not a problem, really!
I plan to arrive Thursday the 3rd and not leave "until I'm ready to".
Anyone else interested in a cheap non-crowded campsite for the Independence Day weekend is welcome. Electricity is available.
Questions? My cell phone is (616)318-4551

On the cleanup agenda this time. Mowing. Cut out stumps. Clearing trees and brush growing under the east guy wires. If time and energy permits, the same for the north guy wires.
Extra chain saws and operators a big plus. Anyone with access to an industrial grade chipper would be a big plus as well.

HOW TO GET THERE?
Use your preferred mapping program and input: 3800 155th Ave, Morley, MI 49336

Directions from Grand Rapids via US-131 Expressway are simple. If your arriving from Lowell, the "from Lowell" directions use paved county roads and really is the shortest, quickest way. But I know some people will go 100 miles out of the way to use expressway. If your heading up, you decide for yourself.

FROM GRAND RAPIDS to Morley receive site.

Head north on US-131 expressway to Morley exit 125, Jefferson Rd.

Turn right / east for 1 1/2 miles to Northland Dr. in the center of Morley.
Just before passing thru Morley, give a shout on the radio to see if we need Ice or anything from a gas station / convenience store.

Jog left / north then right / east. Continue on Jefferson Rd for another 1 3/4 miles.

Turn left / north on 155th Ave for 2 1/2 miles.

Turn right in the drive and park. You will have spotted the tower well before you arrived.

FROM LOWELL to Morley receive site, start at the intersection of Main St. / Hwy M-21 and Hudson. There are Shell and BP fuel stations on opposite corners.

Head north on Hudson St, soon changes to Lincoln Lake Ave, for 20 miles, crossing Hwy M-44 and M-57 along the way.

Turn left / west on 18 Mile Rd., toward Cedar Springs, for 1 mile.

Turn right / north on Meddler Ave for 4 miles. Meddler ends at 22 Mile Rd.

Turn left / west on 22 Mile Rd for 1/2 mile. 22 Mile Rd borders Kent and Montcalm Counties.

Turn right / north on Amble Rd, entering Montcalm County, for 2 miles.

Turn left / west on Briggs Rd for 1 mile.

Turn right / north on Bailey Rd for 4 1/2 miles, passing through the village of Coral.
Just before passing thru Coral, give a shout on the radio to see if we need Ice or anything from the gas station / convenience store.

Turn right / east on Church Rd for 1 mile.

Turn left / north on Amble Rd for 7 1/2 miles. **If Amble Rd were a thru street, I would not have routed you thru Coral!** You will cross Hwy M-46 along the way. Past M-46, you will enter Mecosta County where Amble Rd becomes 150th Ave.

Turn left / west on Jefferson Rd for 1/2 mile.

Turn right / north on 155th Ave for 2 1/2 miles.

Turn right in the drive and park. You will have spotted the tower well before you arrived.

281. How to attract new members

Yahoo group: GRARA
Date: 2008-06-30 20:49:28 UTC
From: Hank Greeb
Topic: 281 Message: 281

The one thing I've noted with 90+% of the club meetings, Field Days, and other activities, of probably a hundred different Ham Radio clubs is that they aren't very friendly to newcomers. A newcomer is generally greeted at some point in a formal meeting, and sometimes one or two members come around and say a few trivial words, butt the newcomer is generally left to his own devices after that.

Take Field Day 2006, 2007, and 2008. I had the privilege of attending the GRARA Field Day effort two of those three years. At the first one, I knew only a very few people. Yet, when I arrived, I don't seeing a name badge on anyone except me. I think there were a few - less than half dozen, who had caps or embroidered shirts with their names and/or calls, but they were few and far between. And, the same goes for meetings - folks come in, "most olde tymers" seem to know each other, but seem to have an aversion to wearing name badges or other ID's. Newcomers are left in the cold. It seems like no one wants anyone else to know his/her identity.

The same with Lowell ARC, I saw very few name badges or other ID's with the assembled multitude at Field day 2007 and 2008. And, there's less than a handful of members who wear any sort of identification at the regular meetings. After the very first meeting or event, a newcomer is expected to know everyone else.

This is not unique - I had the same complaint for some 40 years of attending meetings in SW Ohio - it amazes and discourages me to note that only rarely were ID badges or labels prepared for attendees at meetings or other gatherings. I was berated for periodically bringing up the idea of wearing name tags at meetings.

The only exceptions are (sometimes), gatherings such as hamfests, where paid admission is required, and one is required to wear an entry ticket to get into the place. Sometimes the ID part of the ticket isn't even filled out.

Many of us complain that the average age of hams is increasing, that the level of technical competence is decreasing, yet we continue to be unfriendly to the newcomer.

Methinks this is something about which to ponder.

Hank,

I think you "hit the nail on head" with your comments about our sometimes lacking social skills at meetings and outings. We often stand around enjoying our status as "good ole boys" and forget to enable others to join "the gang." I know we have been aware of this problem at GRARA meetings and are trying to improve our hospitality skills. We have just gotten lazy and our membership numbers have shown the price.

However, let me tell you about a club that has the social skills developed to a "T". I am talking about the Holland Amateur Radio Club. They are exactly what all other clubs should try to be. I don't know if they all went to some sort of Dale Carnegie course, or if the older members just set a good example, but that club has the "friendly factor" showing.

I first saw the members in action when I visited their technology center (clubhouse) on an open radio room night. I couldn't believe how much they went out of their way to be sure I met people with common interests. (They also make a pretty good cup of coffee.) When I left, I was amazed that almost everyone had made the effort to remember my name and encouraged me to come back to a meeting. At first I thought it was because they were a smaller club, until I found that they have more than twice the number of members as GRARA. ...and now I know why.

I attended their next membership meeting and I am sure it was just a coincident that I won the 50-50 raffle. Again they showed a sincere interest in this "new guy" and made the attempt to make me feel welcome. By this time, I was starting to remember more names also.

And now to the field day test you were talking about Hank. I have been a HARC member for some time now and was invited in the spring to take part in their field day. But, when I got to their field day Saturday morning, the first person I ran into I had never met before. His name is Jeff, KB8QAP. Since he had me pegged as still a "new guy", he stopped what he was working on and showed me the stations being set up and introduced me to a group of guys so I felt that I belonged. Before I knew it, I was telling stories with the best of them. They have an outstanding field day site and we all had a great time.

Sometime, if you get a chance, stop by a Holland Amateur Radio Club function and notice the difference. We could all learn from them.

Mike,
Other than being more friendly at meetings and learning peoples needs, maybe we should do a better job with people that are testing on Friday nights. Maybe a group of guys to talk to the people after testing regarding club membership and what the club is all about. This can be done while the are waiting for their test scores. We should discuss this at a meeting and come up with a committee of a few people to come up with new ideas on how to increase membership.

Jack,
I will be out of town this weekend but I can help by sharpening chain saw chains. I have a commerical sharpening machine and will bring it to the radio room Wednesday night and will sharpen every chain that the guys bring in.

Morley receive site grounds maintenance plus campout.

It's time once again for grounds maintenance at the 250ft commercial

tower NE of Morley owned by T&W Electronics which, among other radio

services, hosts the Lowell Amateur Radio Club 145.27- (94.8Hz) Morley

remote receiver 144.67 MHz.

Part of our arrangement with T&W is upkeep of the grounds.

Being the site is a mix of field and woods located in a rural area near

Amish families and an Elk-Deer-Buffalo farm, some of us combine this

with a camping trip.

The main cleanup day will be this Saturday, July 5. Figure start around

10AM. Rolls and coffee will be provided in the morning, Burgers and

beverages for lunch. The "better half" and kids are welcome.

There are no toilet facilities here, but I will have the rest room in

my motorhome available. It's not a problem, really!

I plan to arrive Thursday the 3rd and not leave "until I'm ready to".

Anyone else interested in a cheap non-crowded campsite for the

Independence Day weekend is welcome. Electricity is available.

Questions? My cell phone is (616)318-4551

On the cleanup agenda this time. Mowing. Cut out stumps. Clearing trees and brush growing under the east guy wires. If time and energy permits, the same for the north guy wires.

Extra chain saws and operators a big plus. Anyone with access to an industrial grade chipper would be a big plus as well.

HOW TO GET THERE?

Use your preferred mapping program and input: 3800 155th Ave, Morley, MI 49336

Directions from Grand Rapids via US-131 Expressway are simple. If your arriving from Lowell, the "from Lowell" directions use paved county roads and really is the shortest, quickest way. But I know some people will go 100 miles out of the way to use expressway. If your heading up, you decide for yourself.

FROM GRAND RAPIDS to Morley receive site.

Head north on US-131 expressway to Morley exit 125, Jefferson Rd.

Turn right / east for 1 1/2 miles to Northland Dr. in the center of Morley.

Just before passing thru Morley, give a shout on the radio to see if we need Ice or anything from a gas station / convenience store.

Jog left / north then right / east. Continue on Jefferson Rd for another 1 3/4 miles.

Turn left / north on 155th Ave for 2 1/2 miles.

Turn right in the drive and park. You will have spotted the tower well before you arrived.

FROM LOWELL to Morley receive site, start at the intersection of Main St. / Hwy M-21 and Hudson. There are Shell and BP fuel stations on opposite corners.

Head north on Hudson St, soon changes to Lincoln Lake Ave, for 20 miles, crossing Hwy M-44 and M-57 along the way.

Turn left / west on 18 Mile Rd., toward Cedar Springs, for 1 mile.

Turn right / north on Meddler Ave for 4 miles. Meddler ends at 22 Mile Rd.

Turn left / west on 22 Mile Rd for 1/2 mile. 22 Mile Rd borders Kent and Montcalm Counties.

Turn right / north on Amble Rd, entering Montcalm County, for 2 miles.

Turn left / west on Briggs Rd for 1 mile.

Turn right / north on Bailey Rd for 4 1/2 miles, passing through the village of Coral.

Just before passing thru Coral, give a shout on the radio to see if we need Ice or anything from the gas station / convenience store.

Turn right / east on Church Rd for 1 mile.

Turn left / north on Amble Rd for 7 1/2 miles. **If Amble Rd were a thru street, I would not have routed you thru Coral!** You will cross Hwy M-46 along the way. Past M-46, you will enter Mecosta County where Amble Rd becomes 150th Ave.

Turn left / west on Jefferson Rd for 1/2 mile.

Turn right / north on 155th Ave for 2 1/2 miles.

Turn right in the drive and park. You will have spotted the tower well before you arrived.

Maybe a group of guys to talk to the people after testing regarding club membership and what the club is all about. This can be done while the are waiting for their test scores. We should discuss this at a meeting and come up with a committee of a few people to come up with new ideas on how to increase membership.

I agree with Dave, and think that is an excellent strategy to gain new GRARA members from the VEC test dates. That is how I first got involved with GRARA- after I passed my Tech test, someone shook my hand, introduced themself as a GRARA member, handed me a blank membership form, explained when and where the club's meeting time was, and stressed the part about the first year's membership was FREE! Free is good! I showed up, liked what was going on, and now they can't get rid of me! I think it was Robert / KD8BIH that was my ambassador into the club. Now days, no one takes responsibility to make sure there are plenty of club business cards laying around on the tables and blank membership applications readily available. Why it's almost as tough to get a club membership card with GRARA, even AFTER you pay your dues, as it is getting an I.D. badge from RACES! They'll get around to it someday, when they feel like it. Everyone seems to just make a joke out of things, pass the buck, or act complacent about it, or delegate it to someone that's not there, and say" "That's their job," and that's as far as it goes. Or like the one meeting we had where the newcomer father brought his young daughter with him to the meeting. She was the only female present. Someone (not mentioning any names) let their guard down, some brief colorful language occured. I have never seen that guy return to another meeting, much less bring his daughter back. So much for drumming up young hams!
Mike, I total agree with you about how hospitable the Holland club is. I got that same impression from those boys when I took their

Amateur Extra class,this past winter. And last year's field day I
briefly stopped out to the Lowell club, to see what was going on, and
I got the same Red Carpet treatment. I think it is a decficiency that
this club, in particular, needs to address, if we expect to keep
membership at statis quo, let alone increased membership.
Gary KD8AZM/AE
Sorry about the candid comments, but that's how I see it.

Hank & Mike,

You have hit the nail on the head. Yes Mike I got the same treatment my self when I first entered the Holland club door. I am a member also. They all go out of there way to say hi and introduce them selves and on your return visits it's the same warm friendly greeting by everyone. Only club I know that offers CW classes from entry level to what ever speed you desire to achieve or just a refresher, Tech to Extra class, classes every year and club projects. First Saturday of every month they have a club breakfast/mini swap at the club house. They have, "3 World Class Chiefs", as they put it, serving up a class "A" menu . Great eat's, some good buy's, and "Fellowship Time". Take in one of the breakfast/mini swaps sometime. Oh yes, and "Please Do Come Again".

Yes Hank, not only newcomers but existing members, some clubs also tend to be very clickie and/or competitive.

Hank,

I think you "hit the nail on head" with your comments about our sometimes lacking social skills at meetings and outings. We often stand around enjoying our status as "good ole boys" and forget to enable others to join "the gang." I know we have been aware of this problem at GRARA meetings and are trying to improve our hospitality skills. We have just gotten lazy and our membership numbers have shown the price.

However, let me tell you about a club that has the social skills developed to a "T". I am talking about the Holland Amateur Radio Club. They are exactly what all other clubs should try to be. I don't know if they all went to some sort of Dale Carnegie course, or if the older members just set a good example, but that club has the "friendly factor" showing.

I first saw the members in action when I visited their technology center (clubhouse) on an open radio room night. I couldn't believe how much they went out of their way to be sure I met people with common interests. (They also make a pretty good cup of coffee.) When I left, I was amazed that almost everyone had made the effort to remember my name and encouraged me to come back to a meeting. At first I thought it was because they were a smaller club, until I found that they have more than twice the number of members as GRARA. ...and now I know why.

I attended their next membership meeting and I am sure it was just a coincident that I won the 50-50 raffle. Again they showed a sincere interest in this "new guy" and made the attempt to make me feel welcome. By this time, I was starting to remember more names also.

And now to the field day test you were talking about Hank. I have been a HARC member for some time now and was invited in the spring to take part in their field day. But, when I got to their field day Saturday morning, the first person I ran into I had never met before. His name is Jeff, KB8QAP. Since he had me pegged as still a "new guy", he stopped what he was working on and showed me the stations being set up and introduced me to a group of guys so I felt that I belonged. Before I knew it, I was telling stories with the best of them. They have an outstanding field day site and we all had a great time.

Sometime, if you get a chance, stop by a Holland Amateur Radio Club function and notice the difference. We could all learn from them.

RadioShack Recalls Power Supplies Due to Electrocution and Fire Hazards

WASHINGTON, D.C. - The U.S. Consumer Product Safety Commission, in cooperation with the firm named below, today announced a voluntary recall of the following consumer product. Consumers should stop using recalled products immediately unless otherwise instructed.

Name of Product: 13.8V DC Power Supplies

Units: About 160,000

Importer: RadioShack Corp., of Fort Worth, Texas

Hazard: The recalled power supplies are wired incorrectly, posing electrocution and fire hazards.

Incidents/Injuries: None reported.

Description: The recall involves RadioShack 13.8V DC Power Supplies, catalog numbers 22-507 and 22-508 with date codes from 08A04 through 01A08.

Date code format is MMAYY where MM is the month and YY is the year. The catalog number and date code are located on the back of the power supply. Power Supplies with a green dot on the product and the product's packaging have already been repaired and are not included in the recall.

Sold at: RadioShack stores nationwide from October 2004 through January 2008 for between $50 and $85.

Manufactured in: China

Remedy: Consumers should unplug the recalled power supply immediately and take it to any RadioShack store for a free repair. Registered owners of the recalled power supplies will be mailed a notice.

Consumer Contact: For additional information, contact RadioShack at 800-843-7422 anytime, or visit the firm's website at:

http://www.radiosha ck.com/recall

To see this recall on CPSC's web site, including pictures of the recalled products, please go to:

290. Continuing Problems with Red Cross Background Checks

Yahoo group: GRARA
Date: 2008-07-03 08:46:55 UTC
From: hgreeb
Topic: 290 Message: 290

I attended a "webinar" on Tuesday evenig, sponsored by the Southeastern Division Director of ARRL, concerning the current status of the Red Cross Background Checks in regards to Amateur Radio volunteers. Two things:

1. We had no way of knowing how many attended the seminar. There were at least two ARRL directors in attendance, possibly more. The questions kept coming, for the full hour allotted for the meeting!

2. It seems that, contrary to published proclamations by the League and others, not much has changed except for wording of the statements. Upon careful reading by our counsel, it seems that the provider of choice by the Red CRoss, MyBackgroundCheck.com still asks us to sign something which will allow all sorts of data to be gathered, even though the intent was/is to permit a criminal background check only.

ARRL continues to work with Red Cross on the subject, and more positive news is expected "real soon now." We were asked during the webinar to "stay tuned" to the news on the League's efforts to get a resolution on the subject. "Real soon now" is expected to be within a week, perhaps even this week.

Long term volunteers (like me) will welcome this. Red Cross is worthy of our full support!

From
****
The ARRL Letter
Vol. 27, No. 26
July 3, 2008
****

==> ARRL TELLS RED CROSS OF REMAINING BACKGROUND CHECK POLICY CONCERNS

ARRL President Joel Harrison, W5ZN, has written to Armond T. Mascelli, Vice President for Domestic Disaster response for the American Red Cross (ARC) to identify the ARRL's remaining concerns over the background check policy for ARC partners. Harrison emphasized that the commencement of negotiation of a replacement Statement of Understanding (SOU) between the two organizations should not be further delayed while these concerns are resolved and that he looked forward to signing a new SOU once additional edits to the background check Disclosure Form and clarifications of the background check Authorization Form are in place for those radio amateurs who volunteer their service to the Red Cross.

Harrison first wrote to Mascelli on November 28, 2007, setting out the ARRL's concerns with the background check procedures recently implemented by the ARC. ARC now requires a background check for Amateur Radio volunteers seeking to support a Red Cross disaster relief response for more than a seven day period. In the ARRL's view, Amateur Radio volunteers were being asked to consent to a more intrusive background check than was necessary or appropriate.

Mascelli's reply on May 8, 2008, addressed some of the ARRL's concerns and Harrison's latest letter to the ARC -- sent on June 30, 2008 -- recognizes considerable improvement in the forms related to the background check procedures that are linked via the ARC's Web site; however, Harrison also states that analysis of the forms has revealed two continuing problems:

* The Authorization for Background Investigation consent form still contains "some highly equivocal and broad language which, because of its ambiguity, will inevitably discourage substantial numbers of radio amateurs from participating in the background check process." This form was not included with Mascelli's reply and was not seen by the ARRL until later.

* The "Disclosure Regarding Background Investigation" can still be construed as overly broad, although this can be corrected by fairly simple edits.

Harrison told Mascelli, "We do not want the implementation of these additional changes to further delay the negotiation of the terms of a replacement SOU. A new SOU is, in my view, a critical and urgent matter. Because the old SOU expired on September 16, 2007, the vacuum thereafter has served neither ARRL nor ARC well." ARRL and ARC staff are ready to work on a draft replacement SOU, the text of which will be reviewed by the ARRL's Programs and Services Committee and approved by either the Executive Committee or the Board prior to completion.

Harrison concluded, "We look forward to continuing to provide seamless disaster response communications by Amateur Radio and to enhancing and expanding ARRL's proud partnership with the American Red Cross. I look forward to meeting with you and executing the new SOU once additional edits to the Disclosure Form, and adequate clarifications are included in the Authorization Form that appears on your web site for partner organizations are made, and when the new SOU terms are agreed upon."

These riddle clues for the fox hunt are driving me nuts. I might have the search boundaries solved, but the starting point is beyond me. Is this what it is like to be clueless?

Three words. A four letter word, five letter word, and then a 4 letter word again, describing someplace just North & East of the South Boundary Line.

From: mike_w8der
Topic: 191 Message: 298

Today I was determined to solve the riddle for the "starting Point" of the July 26th GRARA Fox Hunt. Three words -- 4 letters, 5 letters and 4 letters each describing a place "Just, North & East of the South Boundary Line"

I failed miserably. I put away my maps and went to Google Earth to see what is Just, North & East of the South Boundry line. Google makes it look like someplace Fred Flintstone would work. Besides -- who would start a fox hunt OUTSIDE of the search area! Hmmm, that's got to be a clue that I am lost -- again!

I checked with the Foxes. Yes it is 3 words 4, 5, and 4 letters each. I forgot to check if it is a proper noun. I tried Kent County park, but that is too many letters.

What do ya say foxee, is it a name or description in dem there 3 words.

Lost in fox country.

Mark your calendar and start making plans to attend the premier technical conference of the year, the 27th Annual ARRL and TAPR Digital Communications Conference to be held September 26-28, 2008, in Chicago, Illinois. The conference location is the Holiday Inn Hotel, Elk Grove Village IL

The ARRL and TAPR Digital Communications Conference is an international forum for radio amateurs to meet, publish their work, and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results, and practical applications.

Topics include, but are not limited to: Software defined radio (SDR), digital voice (D-Star, P25, WinDRM, FDMDV, G4GUO), digital satellite communications, Global Position System (GPS), precision timing, Automatic Position Reporting System? (APRS), short messaging (a mode of APRS), Digital Signal Processing (DSP), HF digital modes, Internet interoperability with amateur radio networks, spread spectrum, IEEE 802.11 and other Part 15 license-exempt systems adaptable for Amateur Radio, using TCP/IP networking over amateur radio, mesh and peer to peer wireless networking, emergency and Homeland Defense backup digital communications, using Linux in amateur radio, updates on AX.25 and other wireless networking protocols.

Call for papers is currently underway. This is a great time for the experimenter to present work in the digital field. Some of the papers are highly technical, others are very simple explanations of "how to" do something.

302. Riddler Fox has left another clue for the July 26th FoxHunt.

Yahoo group: GRARA
Date: 2008-07-18 22:41:41 UTC
From: mike_w8der
Topic: 302 Message: 302

The RiddlerFox has left another clue for the July 26th FoxHunt.

This clue is more of a general hint to help you solve the other clues
for north hunt boundary, south hunt boundary, west hunt boundary and
east hunt boundary. Also the toughest clue of all is for the
starting point.

This clue could help on all of the others.

From RiddleFox

None of these Letters are in the answers of the clues.

F - H - J - Q - U - X - Z.

Also there are 5 - I (ies) in the answers to the clues.

Hope this helps a little. Congratulations to GRARA President Jack
for getting them all correct.

Any questions, please email RiddlerFox@...

This clue and all the others are on the http://www.w8dc.org web site
on the Fox Hunt 2008 page.

vhfcontesting@...

Climbers to get their day in the sun
NBC's "Dateline" to explore the perilous world of tower dogs on July 21

July 16, 2008 - NBC's "Dateline Presents" says it will take "a never-before-seen journey into the hazardous world of the tower climbers who work on the frontlines of America's high-tech communications system." The program, "Tower Dogs," will air on Monday, July 21 at 10:00 PM/ET.

The hour-long broadcast is expected to give an up close and personal no-holds-barred look at tower dogs' lives - up in the air and on the ground. "We experience their on-the-job tension and watch them work hard, play hard, and mourn when they lose one of their own," NBC said in a press release. In a twist on all the dangerous-job programs that solely feature males, typically narrated with muscular prose, "Tower Dogs" follows an unusual tower crew boss: a woman named Nikki Collins, a single mom, former cheerleader, and the person keeping her tough-guy charges in one piece. Although there has been a noted increase in tower construction company owners and climbers that are women (http://www.wirelessestimator.com/t_content.cfm?pagename=Women Climbers) , they are in a small minority in a predominately male profession.

The "Dateline" team worked for four months documenting this group of tower climbers as they worked their way through 40 towns and cities in 24 states. During this time there were seven fatalities nationwide, including five deaths in a 12-day period in April. Please see:
National exposure long overdue, say many (http://www.wirelessestimator.com/t_content.cfm?pagename=Tower Dogs)

Hey diddle, diddle

The foxes have a riddle

My poor brain I do twiddle

The last clues arn't worth a piddle

Where to start

Maps I have taken apart

But we will take part

In this State of the Art

We will go North and East

To try and find the beast.

Win the can of gas

To cut the grass [:-s]

306. From The Fox! Some of the Hunters Comments

Yahoo group: GRARA
Date: 2008-07-20 01:58:09 UTC
From: Bob
Topic: 306 Message: 306

Hi All, I see that you are having fun with the puzzle.

I just thought I would post some of the hunters comments and
questions that I recievied. Please email the RiddlerFox@... and
I will let you know how you are doing.

The Fox

**
GOT IT!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

---- Sorry but that wasnt the answer.

**
All good members should know this. WLAV Tower Site. It is somewhere
off Pettis Road. I still don't know where it is, but I have seen it
on the google map overhead.

**
I worked on your new clue and discovered that the 3-word name for the
starting point must have a W and one I in the three word name. How
smart is that! :-]

**
A _______ is a large military unit or formation usually consisting of
around ten to twenty thousand soldiers.

Platoons Ave.(The answer is a street or road in kent
county, that runs north and south.)

**
How about the starting point being "Golf Snack Shop".

--- Sorry try again.

**
Jack says he has the starting point figured out, but it has 5 letters
in the last word, not 4.

--- He could have the first two words correct but the last one only
has 4 letters in it.

**
How about the W8DC TOWER SITE.

--- Jack, The boundarys are correct. But the starting point is not.

--- Where is Mary Waters Park?

**
By my calculations, the search area is approximately 85 square miles.

**
I will let you know if I solve the starting point, but I have pretty much given up.

**
I have searched the Microsoft streets and trips map and there is nothing that corresponds. I will try a fresh start tomorrow.

**
It is difficult to find something north and east of a line that is 9.15 miles long.

**
I am still very lost on the starting point.
I tried to make it the Mich Blood Bank, but it is really called the Michigan Community Blood Center.
It is at the Fuller end of Coldbrook north & east.
I suggested to Jack tonight that all the hunters should establish our own starting spot and fool the foxes.

**
--- I know that it is frustrating but if feels good when you get the answer.

**
Now I am working on the starting point..... I see Mary Water(s) Park, but that is north and west of one section of coldbrook and Waters has six letters.
I see that the Red Cross is north and east of the other section of Coldbrook, but that doesn't fit in the blanks.
I see Siedman County Park just north and east of my "South Boundary Line" -- the one you told me to draw to Egypt Valley.

**
Think I got it. Coldbrook st NE. DUH!!

**
I got the south boundary this morning, but I did a lot of scanning of the map. I wouldn't have gotten it without the number of characters. I was thinking of water volume, not water temperature.

**
I guess I am just slow. You clue is probably very good, but as a hunter, all I want to know right now is "where to show up at 10:30 on the 26th." Like the old news man said, "just Who, What, Where, When and Why." :-) Boy it is hard to be a helpful friend in the expressionless email media! Maybe I can add a couple more happy

faces. :-{ :-] :-)

**
Well, to tell you the truth, I tried to guess, but I couldn't find
Running Water, Creek Run, or Runway on my county map, so I gave up.
My county map doesn't list a runoff Ave, so I didn't even try to look
that up.

Have Fun !

319. Sheila and Tom Bosscher k8AZ/K8TB Win Saturday's Fox Hunt

Yahoo group: GRARA
Date: 2008-07-26 19:18:58 UTC
From: mike_w8der
Topic: 319 Message: 319

Sheila and Tom Bosscher showed us how to win a fox hunt Saturday in the "My Money's All Gone II --- The Sequel" Fox Hunt. This is the second win this GRARA season for Sheila and Tom. (We were all watching how they do it.

Ken Meksula, KC8YTC, and Doug Phillips, KC8EGM, came in second with two additional miles traveled.

In all, six teams finished the hunt. Winners if the "can of gas" for coming in last was the team of Jim Leys, Kirt Wyatt, and Nate Smith. As expected, the can was labeled "Campbells Pork and Beans."

The Foxes were found hiding in a "no-name" park just north of the Plainfield Cemetery on Packer Drive --- (near Northland Drive and 7-mile road.)

Our thanks go out to Laryn Lohman, K8TVZ, and Bob Robinson, KD8HNF, for a great fox hunt. The riddles gave us a tough time, but the hunt was a lot of fun.

Larry and Peg Dells invited all to try the MARA Fox Hunt on August 23rd. See http://www.w8usa.org

Sheila and Tom Bosscher showed us how to win a fox hunt Saturday in the "My Money's All Gone II --- The Sequel" Fox Hunt. This is the second win this GRARA season for Sheila and Tom. (We were all watching how they do it.

Ken Meksula, KC8YTC, and Doug Phillips, KC8EGM, came in second with two additional miles traveled.

In all, six teams finished the hunt. Winners if the "can of gas" for coming in last was the team of Jim Leys, Kirt Wyatt, and Nate Smith. As expected, the can was labeled "Campbells Pork and Beans."

The Foxes were found hiding in a "no-name" park just north of the Plainfield Cemetery on Packer Drive --- (near Northland Drive and 7-mile road.)

Our thanks go out to Laryn Lohman, K8TVZ, and Bob Robinson, KD8HNF, for a great fox hunt. The riddles gave us a tough time, but the hunt was a lot of fun.

Larry and Peg Dells invited all to try the MARA Fox Hunt on August 23rd. See http://www.w8usa.org

324. Packet Radio at the Meeting

Date: 2008-07-29 12:10:37 UTC
From: mike_w8der
Topic: 325 Message: 325

For those interested in details of the Fox Hunt Saturday, here are the mileage numbers.

Crow Flying Distance: 4.5 miles
Direct Driving Distance: 6 miles

Winner: 13.1 miles
Next: 15.5 miles
Next: 17.0 miles
Next: 20.1 miles
Next: 24.6 miles
Next: 28.6 miles

I think we all agree that we have to work on our "last mile" techniques.

327. Friday's GRARA meeting, GRAHamfest

Yahoo group: GRARA
Date: 2008-07-30 13:55:50 UTC
From: Jack Amelar
Topic: 327 Message: 327

ALL GRARA MEMBERS

As Jack AB8ND and Ron K8DMR have e-mailed, the August GRARA meeting is this Friday, August 1.

I have nearly 1100 GRAHamfest post cards to mail out. Our Treasurer, Rick KC8NKA, will bring a load of 27 cent post card stamps. So we'll have group participation night affixing stamps to post cards. Fortunately postage stamps these days are peal and stick so our tongues are safe.

I need to remind the membership the hamfest is a club event. I still have assistant-chair positions to fill. Taking on an assistant-chair position doesn't mean you do the particular job all day of the event. It means you coordinate. We all need to give a half hour or so during the event to help out as well as all available hands for Friday afternoon setup.

TALK-IN STATION, 147.16+ and 146.52

SECURITY

PRIZES

PARKING, TRAFFIC

CONCESSIONS: ARGYL will take care of this.

TICKET SALES: Steven KC8WQL

I went through my notes. If someone previously volunteered for one of the open positions, accept my apology and contact me again. Thanks.

I will bring extra fliers to the meeting to have someone drop off at T&W Electronics and SF Supply. Radio Shacks ate optional.

73 de n8xx Hg

---------- Forwarded Message ----------

Hello to all,

I will be operating in KanKan, Guinea (Africa) from August 3rd to August 9th. My Guinea issued call is 3XY0D (three x-ray yankee zero delta)

Operating most on the higher bands of 20 / 17 / 15 meters, with some tries of 40 meters, all depending on conditions.

Operating times will be around 10:00 GMT (6:00 EST AM) to 11:00 GMT (7:00 EST AM)
Evenings are 23:00 hours GMT (7:00 EST PM) until bands or operator becomes too tired.

A Special QSL card will be made, upon my return for all contacts.
Hopefully a web site with pictures will be posted once I return.

Station will consist of a Kenwood TS-50S, operating with batteries and Solar array. Power output will be around 10 to 20 watts.
Antenna will be a vertical and 88 ft dipole fed with ladder line.
I will only be able to do the logs via paper.

John Grow VE2EQL/3XY0D

I was talking to a friend today, and we drifted to the new digital t.v.
laws that will be in efect next year.
He has a dish, my roommate has cable, and I have a converter box for my
t.v. in my room.
So we are all set for next year.
After we confermed that we are ready, we talked about the next
eventuality for the t.v. stations.
We figuered that before long, the t.v. stations will start to advertise
in the new formate.
EX...
WZZM 13.1"
"WWMT 3.2 ALL SPORT ALL THE TIME"
"WXMI 17.3, YOUR ALL WEATHER ALL THE TIME STATION"
I would say, look for it to start this late fall.
If not, sooner.
NOW, for somthing of more interest to us amateurs.
How long befor someone logs a DTV DX?
Just something to think about.

340. IEEE Symposium open to area hams

Yahoo group: GRARA
Date: 2008-08-14 17:45:54 UTC
From: Hank Greeb
Topic: 340 Message: 340

-------- Original Message --------
Subject: IEEE Symposium open to area hams
Date: Thu, 14 Aug 2008 10:56:03 -0400 (EDT)
From: ARRL MI Section <memberlist@...>
To:

August 14, 2008

ARRL Mi Section & Great Lakes Division:

We cordially invite all ARRL members in the Michigan Section and Great Lakes Division to take part in the 2008 IEEE International Symposium on Electromagnetic Compatibility as a guest at one, or more, of our Amateur Radio related events. The Symposium will be held August 18 22, 2008, in Detroit, Michigan, at Cobo Center. Simply "register" as an "Exhibits only" (FREE) participant, and explore all the exhibits and demonstrations the Symposium has to offer.

As part of our Symposium, we are hosting an Amateur Radio Station to be operated by members of the Motor City Radio Club (MCRC). This station will be prominently located in the exhibit hall and should generate much interest in Amateur Radio and in the equipment used by Hams in their hobby.

In addition to the station several other related Amateur Radio activities are planned for the Symposium. In total they are:
Operating Station SSB / FM / CW
Amateur Radio Examination (Th. 9-12)
Amateur Radio Luncheon (Wed: BYO)
Amateur Radio Message Service
Repeater "talk in service"
Visiting operator opportunity.

Ed Hare (W1RFI) of the American Radio Relay League (ARRL), primary editor for the ARRL publication "Radio Frequency Interference" will be with us as part of our Symposium, and to assist with the station. Ed has long been the liaison between the ARRL and the EMC Society and a strong supporter of RFI (EMC) concerns among the Amateur Radio community. We are very glad to have Ed's participation and support for this event. http://www.emc2008.org.

341. Petis final amp has been removed for repair

Yahoo group: GRARA
Date: 2008-08-17 01:53:28 UTC
From: sprovost64
Topic: 341 Message: 341

Hello, today Tom Hansen N8DGD and I decided to pull the power amplifier out of the rack at the petis site. We measured 3 watts going into the amplifier and only 14 watts going out to the antenna. According to the log, when the new power amplifier was installed, the output was 175 watts!!!
We are running the exciter radio at 5 watts output until the power amplifier is repaired.
So you will notice more noise in the background and your HT may not receive a strong signal until the power amp is returned.

Sent: Tuesday, August 19, 2008 2:59 AM
Subject: [WXSpots] Streaming Audio Feeds, listen only nodes for VOIP WX NET - weather system "Fay"

Monitor weather reports from Flordia during Tropical Storm, what could be Hurricane Fay.....
----Amatuer Radio Voice Over Internet Protocal systems-----
Catch Ham Radio Skywarn Operators from "ground zero".

Listen Only IRLP/EchoLink capability include the following systems:

IRLP:
Reflector 9508 Sydney Australia Reflector channel 8.
Reflector 9129 New England Reflector channel 9.

EchoLink:
KC4QLP-C Node: 290251
VKEMCOMM Node: 270177
N5API Node: 77433

A streaming audio feed has been setup thanks to the assistance of David McAnally-WD5M. This is the first time he has setup a streaming audio server so please bear with any technical difficulties. The links are listed below:

http://wx5fwd.net:8000/voipwx.mp3
http://wx5fwd.net:8000/voipwx.ogg

The net is also available in listen only mode on eQSO...the KC4QLP-R node for those of you that have access to eQSO.

I setup a streaming audio server and patched in audio from my repeater...the stream is up and running at the following URL
http://kc4qlp.dyndns.org:8082
You may also reach the stream at
www.midtalanticengineeringservice.cjb.net/kc4qlp.html

There is a media player embedded within the web page.

The server can handle 32
connections. If anyone that has extra bandwidth wishes to setup a
shoutcast server and relay my stream be my guest.

It is playable via on desktops, laptops and PDAs via Winamp, Windows
Media or any other player that supports mp3 type streams. For various
cellphones, google and download RadioBee or MFRadio for play back on
those devices.

350. Ohio QSO Party, Saturday, August 23

Yahoo group: GRARA
Date: 2008-08-21 21:13:18 UTC
From: Hank Greeb
Topic: 350 Message: 350

Please look for W8W, WILLiams county, where N8XX will be 2nd operator of K8NQC's station in Montpelier, Williams County, Ohio. We will be operating Multi Operator Single Rig, both phone and CW.

The Ohio QSO Party is held on the fourth Saturday of August, this year on August 23rd, from noon to midnight. Both CW and Phone (Usually SSB) are encouraged. Out of State stations try to work as many Ohio Counties as possible on 80 through 10 metres

Suggested frequencies are:

Band CW (MHz) Phone (MHz)
80 3.545 3.825
40 7.045 7.200
20 14.045 14.250
15 21.045 21.300
10 28.045 28.450

Note that multipliers are per mode, i.e., it is possible for an out of state station to garner 176 multipliers - 88 counties CW, 88 counties Phone.

For full rules and suggestions on maximizing scores, etc., see http://www.oqp.us

Hope to work y'all on Saturday.

```
Ohio QSO Party

Call: W8W
Operator(s): K8NQC, N8UOO, N8XX
Station: K8NQC/N8UOO
Class: M/S HP
QTH: WILLIAMS COUNTY OHIO
Operating Time (hrs): 10

Summary:
Band CW Qs Ph Qs
--------------------
80: 41 119
40: 109 35
20: 52 5
15:
10:
--------------------
Total: 302 159 CW Mults = 1 Ph Mults = 1 Total Score = 71,101

Club: QUEEN CITY EMERGENCY NET

Comments:

Didn't calculate the CW or Phone multipliers - just lazy. Total
multipliers was 127. Nice station @ K8NQC/N8UOO. We checked 15 several
times, nary a peep.
```

354. Labor Day Sprint - Monday 1 Sep 08 Local (US) time

Date: 2008-08-26 19:59:05 UTC
From: Hank Greeb
Topic: 354 Message: 354

Please join the Michigan QRP Club on their Labor Day Sprint

Time: 23:00::00Z Monday September 1, 2008 until
02:59::59Z Tuesday, September 2, 2008
(That's 7 p.m. to 11 p.m. EDT. or
(6 p.m. to 10 p.m. CDT. or
(5 p.m. to 9 p.m. MDT. or
(4 p.m. to 9 p.m. PDT. for those who have difficulty
figuring out the times zones in these Colonies.)

Details: Annual Labor Day Sprint - See
http://www.miqrp.org/contest.html for details

For the extreme QRPers there are categories of power starting at 250 milliwatts or less, another 250 milliwatts to one watt, another for 1 to 5 watts, and another for anything over 5 watts. So, all operators are welcome, from a few milliwatts up to and including a full gallon. Please join the fray!

Note that logs should be sent to n8xx QTHR. I apologize for not getting the results posted for the past two contests. I'll try to get the results of this contest out within a couple weeks of the final submission date.

355. Notice to all radio amateurs in IARU Region 2

Yahoo group: GRARA
Date: 2008-08-27 15:45:20 UTC
From: Hank Greeb
Topic: 355 Message: 355

There will probably be an ARRL bulletin to this effect, or I might have even missed one, but, nevertheless, it's worth a reminder or two

Hurricane Gustav - Notice to all radio amateurs in IARU Region 2

Hurricane Gustav is currently making its way through the central part of the Caribbean basin and has passed through Dominican Republic and Haiti and will be affecting the island of Cuba in the next few hours.

It has been requested that IARU R2 member societies remind their members to be aware of emergency communications that may occur in that region, and to keep those frequencies clear for emergency traffic. This message does not indicate any particular frequencies that may be used for this purpose.

Hi all,

A reminder that there are only 3 days until the Swap, volunteers are still needed - talk-in, Ticket Sales, Concessions, Security and Prizes - and tear down. VE's don't forget your badges, there are usually a few folks taking tests, Rich will be in need on examiners.

We will be setting up on Friday, a potluck and the September meeting (we'll try to keep it short) following. If you can help, Friday afternoon there are things at the Red Cross that need to be loaded and taken to Lowell. Check the GRARA net tonight, I'll try to email the time also, for the time the group will meet to do the pick up.

I was "blown away" when I saw 4.9" of rain in my rain gauge in Courtland Township, just outside Rockford.

The local TV station said the showers were quite scattered, which seems to be correlated with these data.

Note that my rain gauge is a cheepie from the local hardware store, so it may not be accurate. Where, how, and for how much can one get a rain guage which is certified for reporting to the weather bureau?

Hank,

if you go to this web site (http://www.cocorahs.org/), you can not only follow a few links to buy a good gauge (about $25 or so), but you can also view the data on a daily basis that is being reported buy volunteers throughout the country.

I had 3.83 inches of rain at my house just SE of the airport this morning.

To: undisclosed-recipients: ;

Hello from N6RNO "The Rhino" your new chairman for the greatest State
QSO party the California QSO Party.

When: 1600 UTC October 4, 2008 to 2159 UTC October 5, 2008
Where: 160m, 80m, 40m, 20m, 15m, 10m, 6m, 2m
Modes: CW, SSB
Logs Due: November 15, 2008

The only real change this year is that we will not have county line
operations. This means that there is only one county given on a QSO.
We feel this makes it easier for everyone.

Key Information:
Website: http://www.cqp.org
Rules: http://www.cqp.org/Rules.html
County Registration http://www.cqp.org/Counties-Plan-2008.html
Operating Strategy: http://www.cqp.org/pdf/cqp_strategy_k6rb.pdf
Information: mailto:info@...

CQP Flyer: http://www.cqp.org/2008/CQP2008_Flyer.pdf
One page key information, date, times, frequencies and rally times.
Also, maps showing likely rare counties and state/provinces.

CQP Package: http://www.cqp.org/2008/EviteCQP2008.pdf
General invite, Rules, County/State Abbreviations

Last year if you were in Montana and sent in a log you would have won
the state.

Get the certificates, plaques and wine that you deserve. Send in your logs.

370. Meetings and events coming soon

Yahoo group: GRARA
Date: 2008-09-09 13:58:34 UTC
From: Jack Amelar
Topic: 370 Message: 370

LARC members, family, friends, guests, anyone interested.
RE: Annual meeting and Morley gathering (Separate events)

The Lowell Amateur Radio Club's "Annual" meeting / gathering is this Saturday, September 13. This meeting, including election of officers for Oct 1-Sept 30 is usually abbreviated, followed by a picnic gathering that all are invited to.
The meeting begins at 12 noon, followed by picnic. The picnic will be outdoors if the weather permits, indoors conference room if not. Bring your own food and drink. "The Shack" at the Flat River Outreach Ministries building, 11535 E Fulton Ave - HWY M-21, Lowell. West end of Lowell, about 1 mile west of the Lowell Meijer. Talk-in 145.27-(ctcss94.8Hz).

An event this club have not done in a long time is a weekend campfire gathering. We also should do one more site cleanup at the Morley receive site.
Sooo, Saturday, September 20, campfire-cookout at the Morley receive site. Input "3800 155th Ave, Morley, Mi 49336" in your favorite maping software or website. Figure about 6PM, I'll provide burgers and dogs, bring something to pass. You might want to bring a chair as well.
Now for more details. I'll arrive with my motorhome Friday afternoon, and since I'm taking vacation the following week, leave when I'm good and ready to. Anyone else feel like a camping trip out in a rural area with mix of trees and open areas is also welcome to bring your gear. Electricity is available, bring extension cord, you'll need to bring water, etc. Saturday will be site cleanup, figure about 10AM start. Cookout / campfire at 6PM. If you have to choose, do the evening campfire. Not a lot has to be done during the day, we'll manage just fine. Anyone who was around when we first raised our antennas on the Morley tower remember the good time and comeradaty we had the night before and during the antenna work should look forward to the weekend. Of course, all are welcome including family, friends, guests. Talk-in 145.27-(ctcss94.8Hz), you will have no problem accessing the repeater as you approach the Morley tower. I will also have my cell phone.

ARRL Presents New Membership Benefit

With just a mouse click or two, ARRL members can now access the online QST magazine archive. This new benefit -- a service of the ARRL Technical Information Service (TIS) -- provides PDF copies of all QST articles from December 1915 through December 2004, enabling members to view and print their favorite article, project and more. For many years, the TIS has provided members with assistance researching ARRL periodicals and publications, as well as providing members and non-members with article reprints for a small fee. Access to the new online digital QST archive is free for ARRL members

"Having access to every issue of QST through 2004 is absolutely incredible!" said ARRL Lab Manager Ed Hare, W1RFI. "The best of the best of QST from every era is now at the fingertips of every ARRL member with a keyboard and an Internet connection. Members can research articles on any subject that interests them, or just browse the past issues. This will be a popular membership benefit that will be of special value to new and long-time hams alike. This valuable content will help radio amateurs who use QST as a technical resource -- for projects, equipment 'hints and kinks' -- and for other research contributing to the advancement of the radio art. We know many hams will simply enjoy perusing these pages of history, too."

The ARRL Periodicals Archive and Search lists every article for QST from 1915 to the present, QEX from 1981 to the present, Ham Radio from 1968 to 1990 and NCJ from 1973 to the present (please note that beginning in 1998, each issue of QEX covers two months). Only ARRL members will be able to download and print copies of the QST articles.

QST magazine is the official journal of ARRL, the national association for Amateur Radio. An interest in Amateur Radio is the only essential qualification of membership. ARRL membership is $39 per year in the US. For a complete list of membership benefits and dues, please visit the ARRL Membership Web page at https://www.arrl.org/forms/membership/

ATTN. ALL GRARA GROUP READERS, AND OTHERS.
Just got off the phone with the F.B.I. in Detroit, over a letter that I receved today.
The letter was about a money transfer with a bank in NIGERIA, that I am involved with.
Here are the facts...
1. The email address is NOT from the F.B.I., or any other U.S. agency.
2. My name, adress, and known phone number was NOT in the letter.
3. I know NONE of any names listed in this letter.
The agent told me that the "F.B.I. cyber team" in D.C. is working on the case.
And that I can "just deleat it".
The case has been ongoing for over a week.
Rule of thumb...
IF it dose not say .gov then deleat....

Hey Mike !

I don't know if you are on the West Michigan Ham email list, but
look what juuuust showed up:

>All:

You, yes YOU, are invited to a fun Saturday (yes, THIS one) packed
with events. The day starts with a fox hunt at one o'clock. There
will be fox hunting hardware available if you find yourself short an
antenna or such. There will also be instruction and encouragement.
Clarke, K8BP is heading up the fox hunt.

Actually you could start even earlier with breakfast at Whitlow's
Restaurant. That's even more fun.

Later in the afternoon we're enjoying a Steak Dinner. New York Strips
highlight the menu. Dinner starts at five o'clock. You don't have to
be a fox hunter to enjoy the beef.

It all happens at the Muskegon Area Amateur Radio Council's clubhouse
at 2888 Scenic (yep, ask your favorite mapping program for directions)
over near Lake Michigan.

Come early, stay later, only show in the middle? It will all be great
fun. And it doesn't matter if you are a ham or that you're just
curious. Drop in and enjoy.

We hope to see you there.

Bill, AB8SC
MAARC guy

From: Jack Amelar
Topic: 379 Message: 379

LARC members, other club members, family, friends, guests, anyone interested.
RE: Morley receive site grounds maintenance and campfire/cookout.

An event we haven't done in a long time is a weekend campfire
gathering. We also should do one more site cleanup at the Morley receive site.
Sooo, Saturday, September 20, CAMPFIRE-COOKOUT at the Morley receive
site. Input "3800 155th Ave, Morley, Mi 49336" in your favorite
maping software or website. Figure about 6PM, I'll provide burgers and dogs,
bring something to pass. You might want to bring a chair as well.

Now for more details. I'll arrive with my motorhome Friday afternoon,
and since I'm taking vacation the following week, leave when I'm good
and ready to. Anyone else feel like a camping trip out in a rural
area with mix of trees and open areas near a buffulo and elk ranch is
also welcome to bring your gear. Electricity is available, bring
extension cord, you'll need to bring water, etc. Saturday will be site
cleanup, figure about 10AM start. Cookout / campfire at 6PM. IF YOU
HAVE TO CHOOSE, do the evening campfire. Not a lot has to be done
during the day, we'll manage just fine. Anyone who was around when we
first raised our antennas on the Morley tower remember the good time
and comeradaty we had the night before and during the antenna work
should look forward to the
weekend. Of course, ALL ARE WELCOME including family, friends, guests. Talk-in
145.27-(ctcss94.8Hz), you will have no problem accessing the repeater
as you approach the Morley tower. I will also have my cell phone.

380. 23rd Annual SW Ohio Digital Symposium, January 10 2009

Yahoo group: GRARA
Date: 2008-09-18 15:03:09 UTC
From: Hank Greeb
Topic: 380 Message: 380

Call for Papers, 23rd Southwest Ohio Digital & Technical Symposium

We are currently soliciting authors and papers for the 23rd Annual Southwest Ohio Digital & Technical Symposium, to be held on 10 January 2009. This event will cover subjects concerning any digital mode of communications, plus "leading edge" discussions of new technologies in the analog modes.

If you're experimenting in any of these areas, we'd like to hear from you! Please send your ideas to Jay Slough, K4ZLE, 2554 Hamilton Road, Lebanon, OH 45036-8849, Phone: 513-934-0235,
Email: k4zle <at> embarqmail <dot> com

The symposium will run from 8:00 a.m to about 4:00 p.m. EST, in Thesken Hall, Middletown Campus, Miami University, Middletown, Ohio.
For details on past events, and up to date plans for 2009 see http://www.swohdigi.org

FREE AMATEUR RADIO KIT BUILDING WEBINAR -- Last moment registration

This is a last-moment reminder of the Webinar described below. It is
proving to be rather popular -- we are approaching 200 registrants.

Join us for a Webinar on September 22

Webinar Title: Amateur Radio Kit Building Webinar

Date: Monday, September 22, 2008

Time: 8:00 PM - 9:30 PM EDT

System Requirements

PC-based attendees
Required: Windows? 2000, XP Home, XP Pro, 2003 Server, Vista

Macintosh?-based attendees
Required: Mac OS? X 10.4 (Tiger?) or newer

Space is limited.
Reserve your Webinar seat now at:
https://www1.gotomeeting.com/register/487131608

Audio is via telephone and the web. There is no charge to participate.

The Great Lakes Division's own Dan Romanchik, KB6NU will provide the
online seminar that shows how simple it is to build many pieces of
equipment that are useful to radio amateurs. Dan lives in Lansing, MI
and is the ARRL Affiliated Club Coordinator for the Michigan Section. He
has considerable experience in building kits.

In his Webinar, even the most uninitiated participant will learn how
simple it is to assemble many useful and relatively inexpensive kits
being sold today as well as many pieces of equipment that are described
in QST and other electronics journals.

In addition to being able to build useful equipment, kit builders have
the great satisfaction of saying "look at this piece of gear I built" to
family and friends.

NOTE: A few members have had difficulty in registering for these Webinars. In all cases of which I am aware, the problem has been with their web browser. Changing web browsers has solved the problem.

We regret that some members may not have operating systems required to participate in the Webinar. Fortunately, most do. The requirements are established by the owner of the Webinar service and not by any of us who are involved in providing this series of Webinars.

Thanks to Director Bill Edgar, N3LLR of the ARRL Atlantic District for providing access to the Webinar system to us in the Great Lakes Division.

73,

Jim

Hiker summons help with ham radio
'It's just a stroke of luck that turned out great'

By JACKSON HOLTZ
THE (EVERETT) HERALD

EVERETT -- A series of dots and dashes bouncing off the ionosphere Sunday helped save a hiker stranded on Buck Creek Pass east of Glacier Peak.

The hiker, who broke his leg, used a low-voltage portable radio and Morse code to send out a call to help.

Six hundred miles away, in Bozeman, Mont., Robert Williams was testing his ham radio Sunday when he heard the call signal, "W-7-A-U."

Williams replied and quickly learned, in the dashes and dots, that he was talking with a 62-year-old Corvallis, Ore., man, who had slipped and hurt himself in the high Cascades of Western Washington.

"I just happened to be at the same frequency," Williams, 65, said Monday. "It's just a stroke of luck that turned out great."

Williams called 911 and was connected to Snohomish County search and rescue officials. He spent much of Sunday and Monday relaying information, including GPS coordinates, from the hiker to rescuers.

"It was quite an experience," Williams said. "I'm just glad that he was a ham radio operator and that I was able to talk to him. It made the difference for him."

On Sunday, rescue crews reached the man, who had set up camp on Buck Creek Pass, at about 6,000 feet just west of the Chelan County line.

He was taken to safety Monday on horseback.

The call set in motion one of two mountain rescues Sunday.

A second team of rescuers went up Three Fingers Mountain after a man there fell about 200 feet on a glacier near the summit.

Including the weekend rescues, search and rescue teams this year have now responded to 100 missions, Snohomish County Sheriff's Sgt. Danny Wikstrom said.

Both of the injured men in the weekend rescues were well prepared for the wilderness conditions, he said.

"To have that equipment will save your life," he said.

The man on Three Fingers was hiking with three other people when he fell. His climbing party summoned help, officials said.

On Monday afternoon, he was taken by helicopter off the mountain to Providence Regional Medical Center Everett, sheriff's Lt. Rodney Rochon said.

He wasn't able to walk when he was loaded into the chopper, Rochon said. He apparently had sprained his ankle and knee in the fall.

Bad weather Sunday prevented helicopter rescues of both men. Teams spent a night in snow and frigid conditions in the mountains.

Rescuers on Three Fingers used a pulley system to hoist the man off the glacier and onto the trail, Wikstrom said.

Teams then carried the man to Goat Flats, where he was loaded onto the chopper.

Rescuers on horseback reached the man on Buck Creek Pass on Monday morning.

The trail from Darrington was washed out from recent storms and wasn't passable, so crews approached along the Trinity Trail near Lake Wenatchee, Wikstrom said.

It isn't the first time amateur radio operators have helped out with an emergency situation, said Allen Pitts, a spokesman for the American Radio Relay League in Newington, Conn.

The radios work well when other kinds of communication fail, he said.

Ham radio operators were of paramount importance after Hurricane Katrina in 2005 and when a tsunami ravaged Southeast Asia in 2004.

Still, it's rare that Morse code is used to initiate a rescue, he said.

Amateur radio operators used to be required to know Morse code to get a license. That requirement was dropped a few years ago.

Since then, Morse code has actually gained popularity, Pitts said.

"Morse code will get through when no other type of communication will," Snohomish County Hams Club President Grant Hopper said.

Williams, the Montana man, said he was able to understand the injured man's code even when his signal became very weak. Voice communication over the airwaves likely would have become garbled or misunderstood.

The man had a low-voltage radio transmitter, which operates on about as much power as it takes to make a tiny Christmas tree light sparkle.

In the right conditions, radio signals can bounce off the Earth's atmosphere and ricochet thousands of miles.

"A signal like that can skip a long way around the world," Williams said. "You can talk to Europe or Asia given the right conditions."

This is the first time Williams has helped someone in danger using his radio.

The rescue likely wouldn't have been possible if the injured man weren't a competent radio operator, Williams said.

"My guess is that he was just waiting to hear from somebody," he said. "I happened to be the lucky one."

Note: a version of this, written mainlhy for ham radio operators, is at http://www.arrl.org/news/stories/2008/09/23/10348/?nc=1

383. Fw: [HARC] Ken Groom, ZR5AAD, Funeral Arrangements

Yahoo group: GRARA
Date: 2008-09-25 22:39:55 UTC
From: Wilson
Topic: 383 Message: 383

The funeral arrangements for Ken have been finalized.

The visitation will be on Sunday, between 4 PM and 8 PM at
VanZantwick-Bartels-Kammaraad Funeral Home,
<http://www.vbkfuneralhome.com/> located at 620 Wahington St. Grand
Haven, Mi
<http://maps.google.com/maps?f=q&hl=en&geocode=&q=620+Washington,+St+Gra

It is at the corner of Washington and 7th. Rosary will be said approximately
7pm to 7:20pm.

The service will be held at St. Mary Margaret Catholic Church
<http://maps.google.com/maps?f=q&hl=en&geocode=&q=St.+Mary+Margaret+Cath
located in Allendale, Mi. at 10 AM on Monday Sept 29, 2008.

Ken will be interned at Restlawn Cemetery
<http://maps.google.com/maps?f=q&hl=en&geocode=&q=Restlawn+Cemetery,+Hol
in Holland, Mi following the service/luncheon.

The following is the official Obituary. A slightly modified one, second
paragraph will be missing, will be published in the Holland Sentinal
newspaper today.

Death Notice for News Media

For Kenneth William Groom

September 24, 2008

Kenneth William Groom, age 56, of Holland passed away Wednesday,
September 24, 2008, at Holland Hospice House. He was born August 23,
1952, in Durbin, Republic of South Africa, to Claude and Phyllis Maud
(Lloyd) Groom, and moved here from South Africa 8 years ago.

Ken had been employed in High Level Access Security for Sky Com Inc. in
South Africa and had previously been in bank management for Standard
Bank and sales manager for Cullen's Satellite all in South Africa. He
served in the South African Defense Force, was a proud member of The
Republic of South Africa National Shooting Team, a member of St. Mary
Margaret Church in Allendale, Holland Amateur Radio Club, EAA
Experimental Aircraft and volunteered with the Red Cross (Holland
Chapter) as a board member, International Red Cross of South Africa,
Ottawa County EOC (Homeland Security) and as a Tulip Time marshal.

Survivors include his loving and caring USA family of friends; Charles,
Sherry and Ian Krueger of Holland, Caleb and Amanda Zimmerman of London,
Canada and his church family at St. Mary Margaret Church. Also, Ken's

extended family in The Republic of South Africa; Candace Lotrict who he treated as a daughter, cousin, Collen Pappas, aunt, Podge Ponter and cousin, Mike Ponter in Virginia Beach, VA.

The Funeral Mass for Ken will be at 10:00 a.m. on Monday, September 29, 2008, at St. Mary Margaret Catholic Church in Allendale with Fr. Joseph Dreher as celebrant. A time of visitation with Ken's family will be Sunday from 4:00-8:00 p.m. with a rosary service at 7:00 p.m. at VanZantwick Bartels Kammerad in Grand Haven (PLEASE USE NEW EAST ENTRANCE). Interment will be at Restlawn Memorial Gardens in Holland. Contributions may be made to the Ken Groom ZR5AAD medical donation account or Hospice House of Holland. Share memories with the family at their online guest book at www.vbkfuneralhome.com <http://www.vbkfuneralhome.com/> .

386. Microwave frequency measurement equipment?

Yahoo group: GRARA
Date: 2008-09-27 04:37:38 UTC
From: Joe Veldhuis
Topic: 386 Message: 386

I've recently come into possession of a 10 GHz Gunn oscillator, which I'd like to use as the basis of an X-band receiver. It appears to work (draws some current and puts voltage on a field strength sensor), so the next question will be: QRG?

I don't have any equipment here capable of operating on those bands (my freq counter is only good to 200 MHz, my scope does only 10 MHz), so I'm wondering if anyone has something that'd be useful for the task of tuning this thing.

Thanks,
-Joe, N8FQ

To: 'AB8ND@...'
Subject: A historical note.

Jack,

Couldn't resist sending an email to the club where I started as a ham and new Novice with the call Wn8LEN in 1952.
I was in high school (16 YO) and learned about ham radio from a GRARA member I met when I stopped by his radio repair shop to find how I could build a super-het radio. Some names are now forgotten but it was at a meeting that I visited with my radio shop Elmer that I learned about ham radio and I after that I couldn't learn fast enough. A few months later, I passed the Novice test at the National Guard armory where the FCC team came a couple of times each year to do the testing.

My ham radio nickname was given to me by GRARA at one of the meetings in my first year as a novice. My given name is Nils Carlson but my first name has always been a problem for people to remember or get right (even today) and I was asked to give a short talk at a meeting about what I thought about ham radio and what I was doing, getting on the air, etc. The president of the club (this would have been in early 1953) was introducing me to stand up and give my talk. He said, " ... and Len will now talk about ...". My call was WN8LEN and I looked around to see "who is Len?" No one was standing up to talk. Then he pointed to me and from that moment on I have been Len until this day. In 1953 my parents put me on a plane to ChIcago where I passed my General. I have moved around a bit since those days and have held several calls W9GEX (Illinois) and KZ5IW [Canal Zone] and eventually K4IWL (Florida) in 1972 and that's the call I still hold today.

I have lived in the Dallas area for 20 years and a former president of the Dallas Amateur Radio Club and Len is my name. If you ask my ham friends about Nils they will give you a blank stare. You can read my profile on www.qrz.com/k4iwl.

Anyway, I couldn't resist sending this email after running across the GRARA web page tonight. By the way, I graduated from Union High class of '53.
One final thing, after reading where the repeaters are I wonder how many remember this bit of trivia: WLAV got its call letters from the name of the original owner Leonard A Versluis. I had met him a few

times when I used to hang around the radio studios getting a little education in broadcasting.

Enough for now,

72,

From: grara_town_crier
Topic: 389 Message: 389

Come and join us for the installation of the new high frequency (HF) antenna at the Red Cross on Saturday, October 4th, at 11:00 am. (i.e. THIS Saturday)

This is the multi-band dipole that we bought at Daton and used for the first time at field day this summer. It will greatly expand our ability to take part in contests from the Red Cross Radio Room.

We have the installation tools, but maybe somebody can bring hand tools and a saw to help clear the brush along the fence line by the parking lot.

This is one of the fun projects!

390. GRARA club meeting is this Friday..... 7:00 PM

392. Scouting Radio Merit Badge

Yahoo group: GRARA
Date: 2008-10-02 18:39:09 UTC
From: mike_w8der
Topic: 392 Message: 392

While looking at this month's CQ magazine, I noticed their "Amateur Radio Web Site of the Month" went to a site that focuses on the Boy Scout Radio Merit Badge and how hams can help the Scouts earn this badge.

Ref: http://k2gw.tripod.com/radiomeritbadge/
<http://k2gw.tripod.com/radiomeritbadge/>

This sounds like an effort that has "local radio club" written all over it. Does any group in western Michigan do anything with this?

Subject: [GRARA] Scouting Radio Merit Badge

While looking at this month's CQ magazine, I noticed their "Amateur Radio Web Site of the Month" went to a site that focuses on the Boy Scout Radio Merit Badge and how hams can help the Scouts earn this badge.

Ref: http://k2gw. tripod.com/ radiomeritbadge/

This sounds like an effort that has "local radio club" written all over it. Does any group in western Michigan do anything with this?

Dave, Thanks for the input on the Scouting Radio merit badge.

However, might I remind you that you promised to keep us posted on where you are in that super RV of yours. Let's hear from you! Are you using that new tranceiver that your XYL won?

Are you in Arizona yet?

The 51st JOTA / 12th JOTI will take place on 18 and 19 October 2008.

Not sure what the local Troops are doing,but I believe Carl, WA8AAT,
or Tom, N8DGD can get us more information.
This is a good time to help out the Boy Scouts and introduce many of
them to Ham Radio.

In reading about the ARRL Vice Director candidates, I noted that the candidate from the Ann Arbor ARC had run a Scout Radio Merit Badge Day last March 31st for the Scouts. He has a good report on the event on the club site. Again it sounds like a neat project to get young people introduced to ham radio.

Date: 2008-10-06 15:06:55 UTC
From: Jack
Topic: 400 Message: 400

The Charlevoix, Cheboygan, Emmet Counties Public Service Communications Organization is operating a ham station on board the Icebreaker Mackinaw Maritime Museum Ship. The station's call sign is W8AGB, commemorating the ship's WAGB-83 designation. If you happen to be at "The Bridge", licensed Amateurs are invited to operate the station when manned by a CCECPSCO member - I believe Ed, N8UXN has operated the equipment. Below is a link to CCECPSCO's web page about the ship.

405. GRARA Meeting Presentation Announcement for Friday, November 7th

Yahoo group: GRARA
Date: 2008-10-16 16:17:40 UTC
From: W8GL
Topic: 405 Message: 405

For Immediate Release:

Aside from elections, the GRARA group will have a talk on the subject of contesting. The speaker will be Hank / N8XX. It is entitled: "Contesting 101." Be sure to attend the meeting at the Red Cross, on Friday, November 7th, 6:30pm. Hope to see you there,
Gary / W8GL
Off-Air Director

406. Suggested Activity for GRARA Members

Yahoo group: GRARA
Date: 2008-10-26 00:31:57 UTC
From: Hank Greeb
Topic: 406 Message: 406

I believe we should activate W8DC for the Phone November Sweepstakes, which starts 2100 UTC Saturday November 15, ends 0300 UTC Monday November 17 - That's 4 p.m. Saturday, November 15 thru 10 p.m. Sunday, Eastern Time. We may operate any 24 hours of the 30 hours.

I can't make the meeting on November 7, but please discuss the desirability of this activity, and the preferred times. I'd be available Saturday evening and Sunday after about 2 p.m. until evening, but my availability shouldn't dictate the operating times. We should have one operator on hand who is familiar with the equipment at all times - who is preferably an Extra Class Licensee so we don't need to worry about sub-bands, though any General Class or higher licensee could be the control operator..

We should encourage new hams, and hams who haven't participated in contesting to pitch in and "give it a go." The only real way to get an idea of what goes on in a contest is to do some operating.

Hank,

I think this is an excellent idea.

An added note to this:
We will try to install the Gap vertical antenna next week end, this will enable W8DC to operate 2 stations from the radio room

411. Just wanted to introduce myself...

Yahoo group: GRARA
Date: 2008-10-29 00:15:55 UTC
From: Tom
Topic: 411 Message: 411

Hello folks! Name here is Tom, call sign KC8TBY. I was glad to see that GRARA had an on-line Yahoo group and I am looking forward to being an active member of the group!

Although I've been licensed as a Tech since 2001, I am about ready to take the test to upgrade my license to General class within the next few weeks! Although I certainly enjoy using my simple HT for that 2 meter work, I have to admit that I am excited about the possibility of getting those additional HF privileges! Anyway, wish me luck!

I am also determined to learn the code, as well! I was very happy to see that GRARA is leading the way, so to speak, to keep the code alive and well, at least here in the Grand Rapids area! Correct me if I'm wrong, but is GRARA planning on starting some actual CW classes some time in the future? I thought I read that somewhere on the main GRARA web site.

Anyway, just wanted to introduce my self to the rest of my fellow "hams" and wish everyone here '73!!

Hi, Tom:

Welcome to the group! Be sure to visit us on Friday, the 7th, and come down to any of the open radio rooms on Wednesday evenings at the Red Cross HQ on Fulton Street.

More than likely we'll be activating the club station, W8DC, for the ARRL Sweepstakes contest November 15/16. This is a great chance for folks to partake of some HF operating! Do drap by if you get a chance. Pay attention to info on the W8DC repeater and this reflector for exact times of operation.

Who erects ham radio towers in the Grand Rapids are? I met a fellow today who is very interested in becoming a ham, and wants to hire someone to erect a tower as soon as he passes his general license. I told him to look up the zoning regs for Plainfield Township. Does anyone know who might do such a job for a "reasonable" price? I haven't erected a tower since the 70's, so types of towers and pricing is beyond my field of expertise.

This fellow was licensed years ago in Argentina, and has regained interest in hamming. He doesn't have evenings free to join a ham radio class, so I'll be tutoring on his schedule so he can take an exam. I gave him info on the license manuals and the Q&A pools from ARRL.

He'd like to take an exam on a weekend - I think I found one in Allendale on a Saturday in November, but if anyone knows of one closer to Rockford it might help.

If things work with this fellow's schedule, I'd like to bring him down to W8DC during the Phone Sweepstakes to "show off" ham radio and the station.

Please advise about tower erection.

If things work with this fellow's schedule, I'd like to bring him down to W8DC during the Phone Sweepstakes to "show off" ham radio and the station.

Please advise about tower erection.

Phil,

Elections are being held at Friday's, 7 November, meeting.
Because the September meeting, when the nomination committee is formed,
always (or usually) falls on Swap weekend we moved everything up on
month. A bylaw change is being worked on to make this official.

From: Hank Greeb
Topic: 406 Message: 424

Jack:

See rule

1. 3.2. Multioperator
1. 3.2.1. Multi-Single only
1. 3.2.1.1. Only 1 transmitted signal is permitted at any
time.
2. 3.2.1.2. No limitation on the number of band changes.
3. 3.2.1.3. Unlimited?Spotting assistance and Skimmer use
is allowed

If we have two antennae I guess we can operate single transmitter two receivers, to help "find" new stations/sections, and certainly we can use a DX cluster for spotting, but we can't have more than one rig on at a time. This is undoubtedly due to the fact that the logging would have to be networked if a station were to have more than one transmitter at a time. Remember that one can work a station only once, not once per band as we could during Field Day or during the Michigan QSO party.

One thing I noted AFTER the CW event this weekend was that if we get 75 Sections, we are eligible for a special 75th anniversary commemorative magnet. We should keep an eye out for sections, and try to work as many as possible. I screwed up on the CW SS, and got 74 before I quit. I had plenty of time, and could have found at least one more in the two or three hours that I had left before 10 p.m., but I had more than my goal for number of contacts, so I quit. I kicked myself when some others mentioned that they got 75 or more sections just to be eligible for this special award.

From the amount of activity on the CW bands this weekend, I'd say it shouldn't be too difficult to find 75 sections on phone - especially if we use a DX Cluster to help with spotting. Do you know if there are "preferred" DX clusters for listings during the sweeps? If not, I'll inquire of my contest club.

What's the program for this meeting? A while back I heard we were going to have an excellent video, but I haven't seen it advertised, and forget the details.

A great program can bring in a large audience, many members and guests. That's one way to build interest, membership, and the ham radio community in general.

Unfortunately I can't make the meeting. But, I've suggested that we participate in the ARRL November Sweepstakes (Phone) Next Saturday/Sunday, November 15/16. It's one where we may have multiple operators, but only one station, and the competition is enough to make things interesting, but not overwhelming. It runs from 2100Z (5 p.m. EST) Saturday, to 0300Z Monday (10 p.m EST Sunday). We may operate up to 24 hours during the event out of the 33 hour period. This would be an excellent time for newcomers and olde tymers alike to dip their feet in contest operating. Remember, you don't need a General or Extra license to operate as long as there is at least one General or Extra Class Licensee on site as control operator. So, do plan to come out NEXT Saturday and join in the fun!

From the GRARA website (nice new look BTW):
http://www.w8dc.org/grr_license_testing/license_testing.htm

"Amateur radio license examinations are given on the second Friday of each month at the Red Cross building (1050 Fuller Avenue NE, just South of Leonard Street.) The Volunteer Examiner (VE) Team is led by Rich Douglas, KC8NKA. Each session begins promptly at 6:30 PM in the lower level of the building. An elevator is available for access."

That would make it next Friday, November 14. The website gives more details.

430. Technician Class

Yahoo group: GRARA
Date: 2008-11-10 12:53:49 UTC
From: Jack
Topic: 430 Message: 430

Larry Dells, KC8KVR, will be conducting a Technician Class starting 12 January 2009 at the Northview Schools Cross Roads Media Center. The class will be 9 weeks from 12 January to 9 March with VE testing on the 10th , 16 March. The first date, 12 Jan is an informational session, the other eight are class sessions. I wasn't given times for the class, but would assume 6pm until 9pm, the exact time and cost of the class will be posted later. Check the MARA web site for more info as the class draws closer. VE's, Larry can use of us that can help with testing.

Hey guys, you don't want to miss Saturday Night!

It's the ARRL Phone Sweepstakes from the GRARA Red Cross Radio Room.

[:)] The club officers call this 'training', we call this 'a whole lot of fun!"

An Extra Class operator will be on duty at all times, so you Technicians can get lots of HF practice in the Extra Class abands. Sorry, no code Saturday night, just ole fashioned phone operation and lot's of it. Can anyone match Nate's aggressive techniques from the Michigan QSO Party? Come and see...

We will also be testing-out the two new tri-bander antennas.

See the new web site, http://www.w8dc.org <http://www.w8dc.org> for more information and the sign-up sheet.

433. Doesn't 2100Z = 1600 EST for Start of ARRL Sweepsteaks Phone?

Yahoo group: GRARA
Date: 2008-11-14 22:01:16 UTC
From: Hank Greeb
Topic: 433 Message: 433

I looked at the ARRL Sweepsteaks rules, which sez the contest period is 1600Z Saturday to 0300Z Monday.

For the CW event, when we were operating in Daylight time, That meant we started at 5 p.m., with a four hour offset from Greenwich Mean Time.

For the Phone event, I think that means we MAY start at 4 p.m. That doesn't mean we MUST start at 4 p.m., just that we could start anytime after 4 p.m.

I think our goal was to start at 5 p.m., so gathering about 4:30 p.m at the Red Cross seems reasonable.

That sounds good Hank. Jack will be there to unlock at 4:30 PM on Saturday. Jim Leys will also be there so we will decide who is going to lockup at midnight(?)

Tom Hansen will meet me there at Noon on Sunday to unlock again. Jack will possibly be there all afternoon if the bike race is cancelled.

RADIO ROOM PHONE NUMBER IS 456-8088.

We will also monitor the W8DC repeater for talk-in. The upstairs door will be locked when we are the only guys in the building, so drop by anytime and contact us with the above or bang on the basement door like the regulars do. Everyone is encouraged to come by and get on the air. An Extra Class control operator will be on duty the full time, so technicians can operate also.

Is there any word if Nate is coming? He logged most of the points at the Michigan QSO Party. I hope he didn't wear himself out.

436. What Kind of Club are we?

Yahoo group: GRARA
Date: 2008-11-15 15:51:27 UTC
From: Hank Greeb
Topic: 436 Message: 436

This was originally published in another ham reflector.

I think it's worth pondering by us all......

Thanks to K6JEB for his prose
==========

"Argue for your limitations, and VOILA! they're yours." - Richard Bach

Regarding World Radio: it will be missed. It was always something I enjoyed reading as a young ham and I've kept my subscription current since getting back into the hobby.

That said, regarding the never ending number of times we STILL hear about the sky falling, err, I mean ham radio coming to a screeching halt (it was just as shrill in 1983 when I became a ham), don't forget the part where:

Kid finally talks parent into driving to ham a meeting (cost=gas+time which parents have so much of in this 'awesome' economy)

Kid and parent get to ham meeting, kid and parent mostly ignored as many hams at meeting are talking another language in their cliques and won't "QRS" to talk to ordinary humans. The few who do approach them haven't actually been on the air for months (years if you don't count repeaters) and often are the people no one else in the club will talk to.

When kids and parents gather the gumption to ask some pertinent questions, kid and parent get all kinds data but no way to discern the useful from the BS. Or they get very expensive answers. Mostly they get opinions or non sequiturs. If they're lucky, they'll just be handed a flier with info on the next licensing class.

Meanwhile, almost every corner of the club meeting room has conversations that often contain things like "kids these days are just worthless" or "everyone is just an appliance operator nowadays" or "if it wasn't for cell phones we'd still have a thriving hobby" or "that darned Internet . . ."

Looking around the room, kid and parent get the feeling they don't belong. Especially since the feedback they're getting on so many levels is that they'll never be a 'real' ham (many reasons to choose from: no more CW test, multiple choice exams, because all gear sold these days is junk and anyone who would even buy the stuff shouldn't be allowed on the air, because computers do all the work, etc . . .).

Pleasantries are exchanged. Goodbyes are said, and even though the kid goes off to become an engineer or technician, or a rocket scientist,

their first glimpse of the hobby was filled with cranky, whining, opinionated, long-winded, selfish individuals who put out less welcoming energy than a rabid dog.

There it is. I've said it. If the shoe fits, wear it.

And then, there are the rest (most?) of you who are wonderful, helpful, generous, interesting, good listeners, fun, funny, and always looking for a way to help another person get on the air. You're the person who approaches the kid and the parent and in a friendly way, pulls them away from the cranks and the crazies and perhaps at the club meeting, more likely sometime later; you invite them to your shack and you all have a blast getting on the air.

Parent asks about the workbench where you solder all your kits and not missing a beat, you put a soldering iron in the parent's hand and have them finish up that through-hole kit (which just needed an RCA jack, so it was simple and a good primer for soldering). Meanwhile, kid is on her second contact and now the parent wants on too.

Pretty soon it's nearly midnight and finally they leave, but they're carrying a box of old magazines (including WorldRadio and those old issues of Ham Radio Horizons as well as others), a CW key and sidetone oscillator, HRO catalog so they can start getting an idea of what some gear costs (along with an explanation of how a lot of this stuff can be built for a fraction of the cost and with a hundred times more satisfaction). You lend them a soldering iron, and an easy kit (you had that unbuilt keyer kit sitting in your drawer). They're also carrying with them a list of useful URLs and most importantly, they have come away knowing they can depend on you, at least for now, to help mentor them into this wonderful hobby. And yes, I said THEM.

We used to have 'Elmers'. For me it was one helpful person who really went out of his way to help me out. As a 14 year old, I had no budget. he showed me things like putting together simple circuits from junk box parts. We didn't get stuck on trying to build the greatest Big Gun station ever. Instead we focused on working with what we had, and developing our operating technique, and most of all, a lasting love for ham radio.

He didn't accomplish this by trying to convince me that if I didn't have a ham radio license and there was a natural disaster, that I'd be somehow NOT safe. He didn't sell ham radio to me by making me feel inferior, or too young, or not experienced. He didn't give me some spiel about how a career in electronics begins with a Novice license (although it did for me). He didn't do it any other way than by demonstrating how much fun ham radio can be. When I would get frustrated because I wasn't getting through in a pile-up, he would give me useful pointers instead of a condescending statement or whining about how operators these days just suck. If I asked a question with an "obvious" answer, he wouldn't just give me the answer, but how to arrive at that answer in the future, on my own.

I would argue that we don't have a shortage of motivated, bright, curious and persistent kids. I'd say we have a shortage of good Elmers.

I worry that these days, at least here in the States, we are mass producing hams. Or more accurately, we are licensing them en masse, and we leave the _learning to operate and get on the air_ part to them, however they see fit. And sadly, I see so many single-purpose clubs/organizations who are pushing people to get their license thinking a ham license is somehow akin to a degree or certification. Those same people will get an HT and never learn about the rest of what this huge hobby has to offer.

After having lived in Germany while I was stationed there with the US Army, I don't think the issue is so much ham radio, it's ham radio in America. The clubs I took part in were thriving with people of all ages and walks of life. The interests within any one club spanned numerous facets of ham radio (it's not just EMCOMM, or QRP, or contesting, or traffic handling, or satellites, DXing, etc . . .). At least in the clubs I was in, there were almost as many women involved in the hobby as men.

I was visited this summer by a young ham from South Korea and we spoke at length about the ham club at his college in Seoul (HL0R). He told me that usually they have between forty and sixty members at each meeting. They often meet with another college club in Seoul with the callsign HL0J, so they call those meetings the "Romeo and Juliet" meetings. :) By the way, he wasn't an engineering student, but rather, an economics student.

The sky is NOT falling. But we'd still better get our act together. Let's do what we can to 'water the garden, not the weeds'. We need to think of being "V.E.'s" as also meaning VOLUNTEER ELMERS. Bring your QRP radio to the local school! They'd be glad to have you. If someone tries to convince you otherwise, tell them to step off.

Also, it's not just ham printed periodicals that are dropping off. Newspapers in general have been taking a real hit. And THAT you can 'blame' on the Internet, but the up side is where one big tree falls, many smaller ones pop up: look at all the web sites that we have within ham radio! Now instead of just QST, 73, CQ, World Radio as the main pubs, we now have dozens of web sites (and that's not even counting the myriad personal sites and specialty sites). Hey, you're not going to have a shortage of things to read, that's for sure.

All the same, I will really miss that little ham magazine on newsprint. It was great while it lasted in print. But at least we'll still have it via the web.

72/73
Jack, K6JEB

Mike,
Thanx for all the good info, you've saved me a lot of grief, trying to decipher: "zulu time." Also, finally SOMEONE knows the phone # of the radio room telephone! Why is that phone not labeled with the # on it? What if there was an emergency need to call down there. That is ridiculous, that phone needs to be labeled, yesterday!
If I ever get done hauling wet, heavy, leathery oak leaves to the Kentwood dump, I'll come join youse guys.
73,
Gary W8GL

Subject: [GRARA] Start of ARRL Sweepsteaks Phone? "Lines in the sand"

That sounds good Hank. Jack will be there to unlock at 4:30 PM on
Saturday. Jim Leys will also be there so we will decide who is going
to lockup at midnight(?)

Tom Hansen will meet me there at Noon on Sunday to unlock again. Jack
will possibly be there all afternoon if the bike race is cancelled.

RADIO ROOM PHONE NUMBER IS 456-8088.

We will also monitor the W8DC repeater for talk-in. The upstairs door
will be locked when we are the only guys in the building, so drop by
anytime and contact us with the above or bang on the basement door like
the regulars do. Everyone is encouraged to come by and get on the
air. An Extra Class control operator will be on duty the full time, so
technicians can operate also.

Is there any word if Nate is coming? He logged most of the points at
the Michigan QSO Party. I hope he didn't wear himself out.

Mike, W8DER and I will be at W8DC tomorrow afternoon, beginning about 3 p.m.

Anyone want to join us? Come on down.

If you get there after the doors are locked, we'll try to monitor 146.26 MHz, and we'll definitely be listening for the telephone, 616-456-8088

The biographical info for W8DC is listed for the year 2005. Many of the items are okay, but we probably should change some of the items.

I'm not sure who can do this, as I've never put a bio on my own call page. the current info was put up on 1/2/05 by AD8BC

The crew at W8DC had a great time during Sweepsteaks this weekend.

Thanks to all who partook of the event. A more complete report will be forthcoming in the near future.

73 de n8xx Hg

p.s. Note the mispeling of Sweepsteaks - it's intentional, I no how 2 spel. :)

Joe,
I will label the phone, my sister gave me one of those Brother labeling machines for Christmas, in an attempt to get my life organized. It hasn't happened as of yet, but I'm working on it. I didn't want to just go sticking signs on things, until I got the OK from someone impotent, such as yourself.

446. Stats from W8DC, ARRL Phone Sweepstakes

Yahoo group: GRARA
Date: 2008-11-17 16:13:50 UTC
From: mike_w8der
Topic: 446 Message: 446

Stats from the W8DC, ARRL Phone Sweepstakes from Saturday and Sunday
are on the home page of the GRARA Website: http://www.w8dc.org

I think we all really enjoyed this one...

447. Great Going! Some data from W8DC Sweepsteaks effort

Yahoo group: GRARA
Date: 2008-11-17 20:30:07 UTC
From: Hank Greeb
Topic: 447 Message: 447

Yep, we had a GRRRRR-8 time at W8DC over the weekend. Whilst all the data haven't been tabulated, Mike, W8DER, was there to the "bitter" or "elated" end, and offers the following details:

Total contacts 115 in 10 hours of operation.

12 participants.

Contacted 51 out of 80 ARRL Sections.

Claimed score 11,730.

Participants included Dave, AC8AB: Jim, KD8CAN; Tom, KD8DEG; Mike, W8DER; Tom, N8DGD; Ron, K8DMR; Gary, W8GL and friend; Bob, KD8HNF; Nate, KD8NCS, and brother, Dakota; Jack, AB8ND; Hank, N8XX. If we missed anyone, please advise.

Besides making these contacts, we learned quite a bit about using a DX Cluster for finding section which we hadn't worked, we learned some of the advantages and limitations of the rig and antenna system, and several ops made their very first contest contact!

Personally, I still remember the very first Novice Roundup in which I participated. I think I made 10 or 15 Q's in the 24 hour period, but it got me started. The next few years I dabbled in Sweepsteaks, and learned that "we are all in the same boat!." and "you don't need to be an expert, nor in the top 10% to have fun." Usually my goal was to beat my previous record - some times which was possible, other times impossible. But, it was always fun!

So, next time, come on down! Right now there's talk of operating during the ARRL RTTY contest. It is on the first weekend of January, but never on January 1. So, next year it should be 1800Z (1 p.m. EST) Saturday, January 3, and end at 2400Z (7 p.m) Sunday, January 4, 2009. Following that, the next contest might be the ARRL DX contest in March, 2009. If you're interested in either adventure, please let me know.

449. Great Contester KL7FH SK

Yahoo group: GRARA
Date: 2008-11-19 17:22:17 UTC
From: Wilson
Topic: 449 Message: 449

FYI for all contesters

Tom KD8DEG

----- Original Message -----
From: Allen R. Brier
To: towertalk@...
Sent: Wednesday, November 19, 2008 11:31 AM
Subject: [TowerTalk] KL7FH SK

Cross-Posted from CQ Contest Reflector:

Fellow Contesters,

Long time ham and contester, Frank KL7FH, became a silent key around 12:30PM November 17th.

He was at the KL7DX QTH in Willow, AK for the weekend, getting things ready for CQWW CW.

He suffered a massive aneurysm that put him into a coma, and never recovered.

A ham since he was 14, he held the calls KL7HNU, NL7HP, and KL7FH. He really enjoyed DXing, EME, and most of all, contesting. He loved building antennas, and like all of us, enjoyed being loud! He was a close friend of Dan, KL7Y(SK) and operated at his M/M's for several years. Recently he purchased land in Willow, AK and began construction of his own contest station. The two 125 foot towers were completed this summer, with the help of many local hams. They had just gotten the 3 high tribander stack on the first tower in the air. Plans were to be competitive in the M/2 class, and full on SO2R. He already had a 3 element 40m beam ready to be put on the 2nd tower next summer. The grand plan was "something big!" on 80 and 160. In the early 90's he used to run the ARRL RTTY Roundup from home in Anchorage M/S. He was very proud of the efforts from a small station on a city lot.

He had always talked about going to Dayton and meeting everyone he has worked 1000 times. In 2005 and again in 2006 or 2007 he was finally able to go. Those trips to Dayton were something he talked about frequently. He loved hanging out with the guys he "knew" but had never seen face to face. Swapping contest stories, technical stuff, or just plain hanging out, were memories he cherished. As we all know, contesters are a special breed, and he loved the camaraderie and competition.

The whole family has ties to ham radio. I can't remember his grandfathers call, it was a 2xx call from New Jersey. We even have his old logbooks

somewhere still, very cool. His father is now KE7MP (ex KL7HHX), and always teases us for ruining the bands on those damn contest weekends! His brother is NL7XO, and ham radio really was great when he was overseas in the Navy. We could keep in touch with him on the ship anywhere in the world. Of course email these days makes that task a lot less complicated.

I grew up with ham radio my whole life, and was never pressured into becoming a ham. He said if I ever wanted to learn more about it, to just let him know. I was definitely intrigued! At the time he was doing satellite stuff quite regularly. He put me on I believe Oscar 13? and I had the proverbial Pileup From Hell. I was hooked after that, and he elmered me through the years. When he traveled for work, we would QSO on CW in the 40m novice band to get my code speed up. He taught me how to remember what was being said instead of writing it down. That way I could get my speed up and get my extra someday. He was a patient elmer, and always positive. I had 10000 questions and he answered all of them. We would build things together and operate together. Later on he would make a point to work me in every contest that I traveled around for. It was always great to work "the OM" from stations around the country.

He really liked multi-op contesting, and especially operating with his wife Corliss, AL1G. Nothing like a husband and wife team to really tear it up!

He really loved ham radio, and the fact that he could go anywhere in the world, and be able to have a beer with someone he already knew.

His enthusiasm for excellence was contagious, and the world lost a good op and father.

RIP OM, I hope you get a good band assignment on the big M/M in the sky.

-Chris KL9A

Subject: [HARC] UPS Spam is Trojan

Look out for this one guys. I got an Email very much like it this week.

Chris

UPS Spam is Trojan-Spy.Zbot.YETH
Monday November 10, 2008
New malware is being spammed in an email masquerading as a notice from UPS (United Parcel Service). The email subject line reads "Your Tracking # 8773004563" and the message makes the following bogus claim:

Sorry, we were not able to deliver postal package you sent on October the 19th in time because the recipient's address is not correct. Please print out the invoice copy attached and collect the package at our office. If you do not receive package in ten days you will have to pay 6$ per day.

Your UPS

The attached file is named "UPSINVOICE_87612.zip". Inside the zip file is an executable named "UPSINVOICE_87612.exe" with an icon poorly disquised as a Microsoft Word document. By default, Windows suppresses file extension viewing so if you've never fixed that, this simple trick could fool you. The alleged "invoice" isn't an invoice at all. According to ThreatExpert analysis, opening the file installs a rootkit-enabled banking trojan on your system. At the time of the spamming, detection among antivirus vendors was almost non-existent and the rootkit capabilities could mask its presence even after signature updates are applied. Simple steps can help you avoid being fooled by Trojan-Spy.Zbot.YETH and others like it. Make sure you have file extension viewing enabled and never open attachments received unexpectedly. To help ferret out malware hidden by rootkits, use one of these free rootkit detectors.

452. HF Antenna Work Party

Yahoo group: GRARA
Date: 2008-11-21 13:18:33 UTC
From: Jack
Topic: 452 Message: 452

Members,

This past weekend working the contest operators had many problems with the HF antennas, checking with an anaylizer Ron, K8DMR, at open radio room Wednesday, found the SWR on all 3 antennas was way high.

Thus forgive me for the short notice:

There will be an antenna work party tomorrow,
Saturday 10am at the Red Cross. We will be checking, replacing if necessary, the feed lines and the HF antennas as well as installing/mounting the Gap Vertical.

Jack, AB8ND

There WILL be an Open Radio Room this Wednesday, day before Thanksgiving.
Roast turkey and Stuffing would be greatly appreciated. A pumpkin pie
would get you HF operating privileges all evening.

Subject: [GRARA] HF Antenna Work Party

Members,

This past weekend working the contest operators had many problems with the HF antennas, checking with an anaylizer Ron, K8DMR, at open radio room Wednesday, found the SWR on all 3 antennas was way high.

Thus forgive me for the short notice:

There will be an antenna work party tomorrow,
Saturday 10am at the Red Cross. We will be checking, replacing if necessary, the feed lines and the HF antennas as well as installing/mounting the Gap Vertical.

Submission to 3830@... - the reflector where many contest
operators place their claimed scores.

ARRL Sweepstakes Contest, SSB

Call: W8DC
Operator(s): AC8AB: KD8CAN, KD8DEG, W8DER, N8DGD, K8DMR, W8GL, KD8HNF, KD8NCS, AB8ND, N8XX
Station: W8DC

Class: Multi-Op LP
QTH: Grand Rapids, MI
Operating Time (hrs): 10

Summary:
Band QSOs

160: 0
80: 45
40: 43
20: 25
15: 2
10: 0

Total: 115 Sections = 51 Total Score = 11,730

Club: GRAND RAPIDS AMATEUR RADIO ASSOCIATION

Comments:

Good way to introduce new hams into contesting. We had lots of fun. Found out
after the fact that the antenna had SWR> 3 over most of the bands, which was
the reason the tuner had to be reset every 15 KHz or so.

Members and Friends

The December meeting is this Friday it will be a potluck, with Pop, Coffee and a Honey Baked Ham and Turkey provided by the club, bring a dish to pass.
Gathering starting at 6:00 and Dinner time at 6:30
A short meeting following.

Don't forget:
ARRL Straight Key nite 0000 UTC to 2359 UTC PM January 1st
ARRL RTTY Roundup 1800 UTC Saturday, ends 2400 UTC Sunday (3-4 January 2009
W8DC will be operating from the radio room, not sure of the actual times yet, but stay posted.

Please put the following on your extended calendar:

January 3-4 2009 ARRL RTTY Roundup 1800 UTC Saturday, ends 2400 UTC Sunday -- Jack already mentioned this one, but do plan to help out and have some fun!

March 7 - 8 ARRL International DX Contest (Phone)

March 18 - The Michigan QSO Party - We had lots of fun @ W8DC in 2008.

I'd hope that the HF bands would be in "reasonable shape" though one can never tell now a daze. They were el-stinko during the recent CQ-WW DX contest last weekend.

Mark your calenders -
The DAPR club will be hosting a packet radio training
seminar on Saturday, 3 January 2009 at the Grand Rapids Red Cross
Chapter house. Time will be 9:30 am until noon. Bring your equipment,
WIFI is available to connect with the internet. There will also be
help if you are having trouble getting your station running.
GRARA will also have W8DC activated and operating the ARRL RTTY
Roundup contest over the weekend. Stop into the radio room take a hand
at operating a digital HF contest.

463. Holland Amateur Radio Club General licensing class coming

Yahoo group: GRARA
Date: 2008-12-11 00:38:00 UTC
From: K8TB
Topic: 463 Message: 463

For those who live close enough to Holland, the HARC will be offering General Class Class's:

Greetings All:

Upgrading your license to General gives you many benefits:

-additional frequencies to use,
-additional modes to operate,
-a chance to participate in contests and paper chasing,
-more technical skills in setting up your station,
-additional skills in building equipment and antennas.

The Winter class will be led by experienced Amateur Radio Operators. We hope you will join us.

When: Monday, January 5 through the end of February.

Where: the Ken Groom Technical/Training Center 280 E. 8th Ave. Holland Amateur Radio Club

Time: 7:00 pm - 9:00 pm

Cost: Fee $20 and book $20

To reserve a seat and to order a book, call:

Ed, KF8EV 616-772-4811
or e-mail kf8ev@... <mailto:kf8ev%40arrl.net>

466. Holland Code Classes

Yahoo group: GRARA
Date: 2008-12-11 17:57:21 UTC
From: Charles Rich
Topic: 466 Message: 466

If there is enough interest, I will start a new beginner code class in January. My classes are fun and you WILL learn the code in a simple format. This is a no-pressure class and we know how to make it fun. I have NEVER had a failure in all the years I have taught morse code, as long as the basic criteria of the class is followed. The class will require a class meeting once a week and at least an hour a day practice.
Ask anyone who has attended my classes, and you will get a testamony of how easy it is to learn the code
There is NO charge for these classes.
GUARANTEE: If you can't learn the code in my classes - the full cost will be refunded....!!!!

Presented by Holland Amateur Radio Club, at the Ken Groom ZR5AAD Technical and Training Center, 280 East eighth Street in Holland, 7 - 9 Peeyem, Monday nights.

We also offer on-going advanced code classes. This class is now at abaout 5 WPM.

467. Antenna for Field Day, 2009

Yahoo group: GRARA
Date: 2008-12-11 20:17:20 UTC
From: Hank Greeb
Topic: 467 Message: 467

Cortland/All:

Take a look @ QST, January 2009, Page 30ff

This is the antenna we used for the CW Station, but the top part is supported by a balloon, so the apex is considerably higher..

Anyone know where we could get a balloon and some helium? Is there a meteorology department @ GVSU which might have access to weather balloons? Or, might we find some other way to commandeer a balloon for a Day in the Field 2009?

From what I gather about this kind of antenna, with the configuration in 2008 most of our radiation was going straight up, with some directivity toward the south, and lots of the radiation was being absorbed by the close proximity to the ground.

It might be interesting to try something like a balloon assisted antenna support.....

Whatcha thimk?

Hank,

You might try the National Weather Service, they can direct you to a source for a weather balloon.. The Helium can be purchased from any welding supply store.

Subject: [TowerTalk] NOT ALL PLASTICS ARE GOOD INSULATORS - TALE OF ABEVERAGE PROBLEM

In the past we used several beverages at a previous NR4M qth to good advantage. Since moving to a farm about 15 miles away we expereinced beverage problems that were a bit bewildering.

Last year we errected four two wire, two direction beverages. While they were certainly helpful to some degree, performance when comparing each was not at all consistant and f/b left something to be desired.

After getting them back up this fall the same thing was observed. Bill KC4D had loaned us a K1FZ transformer and reflection transformer last fall. In replacing the homebrew boxes on the NE/SW antenna we noticed a great difference. Many folks have spoken highly of the K1FZ products, but I questioned why they would be so much better than our homebrews that were used so successfully by so many.

I measured SWR of the eight antennas at the feedpoint. The ones fed with the K1FZ boxes had decent swr across 160, 80 and 40. The homebrews were all over the place and quite high in many cases.

I did some research on transformers and posed a few questions to some of the folks who frequent this and the top band reflector. Things just weren't making sense.

I noticed that in one direction one of the beverages was much deader than any of the others. I brought the matching transformer box for it in and started looking for broken wires, shorted turns, or anything that would be a problem.

Finding no visible issues, I decided to check continuity and resistance at various connection points. The first thing I noticed was some amount of resistance between the primary and secondary of one of the transformers. It wasn't a dead short, but should have been completely open.

I ended up removing the transformer from the box. In that case the two windings were isolated.

Next I checked resistance between opposite ends of the plastic box and was amazed to find it was conductive. I walked around the antenna field and found that all four boxes had varying degrees of resistance end to end.

Now with binding posts mounted through the plastic at the ends of the boxes and SO239s with shield isolated from ground mounted in the plastic boxes, one can only imagine how effective these transformers were. The varying degrees of reistance in each box explains why performance varied so much.

We discovered that the boxes were actually designed to store electronic components. There are black ones and red ones. The black ones were designed to be conductive to prevent eletrostatic charge problems with sensitive components. We checked the red ones and found that they had the normal insulating properties of plastic.

After placing the transformers in red plastic boxes they have been working great and display consistent low vswr across the three low bands similar to what we saw with the K1FZ boxes.

The moral of the story is "use red boxes instead of black to house matching and reflection transformers for beverage antennas";-).

While the odds of a plastic box being conductive are fairly small, our expereince shows that it can obviously happen. It's entirely possible that the pigment used to color plastic could be a conductive material such as carbon!

From: Hank Greeb
Topic: 474 Message: 474

In case folks missed the reference in a recent ARRL letter, there's a "rather interesting" report from a Congressional Oversight Committee concerning the FCC.

http://www.arrl.org/news/files/FCC_Report120908.pdf

In essence, it delineates a series of screwups, mismanagement, and lack of observance of laws concerning how the FCC is supposed to operated.

Though it's 110 pages, the first 26 are the "meat" of the report. Most of the rest contains footnotes and references.

Hey guys! The Holland Clubhouse isn't that far away. They are having beginning code classes and General licensing classes both on Monday nights. GRR hams car pooled last year to the Extra license classes and code class. Put out a shout here on the Yahoo group and see if anyone else wants to ride together.

The Holland Club classes are well organized and well presented. Don't miss the opportunity.

Why don't we solicit help from our membership and sponsor our own code classes along with licensing classes? Surely we can come up with enough help to do such a thing.

As far as code classes, I thought we had discussed a two-step process.

1. Have members use the tool on the web site to 'Learn' the code.
2. Then when we had 3 or 4 members to the beginning starting point,
we would start holding classes where individuals could motivate each
other and practice without the fear of being 'on the air.'

Has anyone tried the web site tool yet?

Good idea, Mike, but.....

Maybe we should have a demo of how to use "the tool on the web site."
I, for one, didn't know the "tool" existed until you mentioned it now.

I believe I am NOT the only one who doesn't know about its existence.

Okay, Mike:

I found the programme, and have"Just Learn Morse" on my computer. It seems a very good programme, and a good way to start with learning.

I tried the it. It seems a big "harsh" to my taste, but I'm learning. Probably because I generally copy stuff - like messages or contest exchanged. In so doing, I have an expectation of what is to come, and also because I copy plain text. Copying "random size groups with random letters/numerals" makes for very difficult copy. I can't get even 20 wpm/20 wpm spacing solid, even though I have a 40 wpm certificate from the Connecticut Wireless Association and I practiced for years with copy from NSS at 22.5 wpm code groups. NSS sent classified material with 5 letter code groups at 22.5 wpm, AP news at about 30 wpm. Great copy and great place to learn. Unfortunately, they stopped CW years ago. When they were going strong, I could copy 100% for many minutes at a time.

Maybe I've slipped, early onset of Alzheimer's or something. I'll have to work at it for more time.

But, I have a question - how does one change the text file if one wants to send from a text file. I selected one at random on my computer, which turned out to be a dud - only a few hundred bytes of info. I went back to the source menu, clicked on the "file" but when I returned to the menu it didn't give me an option to change the source file. I'm sure I'm missing something.

And, have you timed the code? I generally set my computer logging program for around 26 to 30 WPM, yet 20 wpm on the "Just Learn Morse" program seems at least as fast. Or, is there an adjustment for different CPU speeds on computers? (There is on the logging programme.)

Hank,

Start here: Go to http://www.w8dc.org.

Then go top the Tech Corner page.

Then look on the right column for 'Morse Code Communications'
and then click on 'GRARA Learns Morse Code'

A set of pages will come up under a logo that reads 'GRARA Learns
Morse Code'. There are learning lessons and practice lessions along
with practice I downloaded from W1AW.

This tool was made with the JUST LEARN MORSE CODE software program,
but you don't need to know that until the first formal class. Just
click on the links on the GRARA pages -- learn and practice.

Subject: [HARC] Snow fall net. Friday 12/19/2008 6:00 PM 145.27/R

Hi Peter, good question, please note below:

Snowfall Only: For this you need a snowboard and ruler. A snowboard is typically a flat piece of plywood painted white measuring roughly 18" x 18" (or a little smaller). Decks and other flat wooden structures offer reasonable surfaces for snow measurement. However, decks do not typically offer good exposure because they are usually very close to houses. Because snowfall distribution is very subjective to airflow over and around objects, your snowboard should be placed a distance of 2x the height of your house away from the house and placed at ground level. It should also be away from tall trees if possible.

Snowfall measurement is done with a ruler. We suggest a yardstick since a 12" ruler will be too short in the big storms. Official snowfall measurement is in tenths of an inch, but most rulers are in 1/8" or 1/16" increments. Just enter what you can. Less than a tenth of an inch is considered a "trace". Snow that falls and melts as it hits your measuring surface is a "trace."

One of the difficulties with accurate and consistent snowfall measurement is related to the melting, settling, or evaporation of snow before you have a chance to measure it (especially in the Fall and Spring). Please try to do a measurement as close in time to when the storm ends as possible. Don't wait until 7AM if the snow ended the previous day. During long-duration snowfalls, you may choose to measure and clear the snowboard every six hours. The total snowfall would then be the summation of the different measurements.

In very big snowfalls (20" or more), you may find yourself averaging several readings around your yard and estimating snowfall to the nearest inch.

Nearest tenth-inch increments: 1/16 = 0.1, 1/8 = 0.1, 3/16 = 0.2, ¼ = 0.3, 5/16 = 0.3, 3/8 = 0.4,

7/16 = 0.4, ½ = 0.5, 9/16 = 0.6, 5/8 = 0.6, 11/16 = 0.7, ¾ = 0.8, 13/16 = 0.8, 7/8 = 0.9, 15/16 = 0.9

Importance: High

So everyone.. Pass the word. Snowfall Net on 145.27/r Friday night 6:00 PM. Lets give the NWS a bunch of solid reports of what this storm does to the area.

How to measure snow from
http://www.crh.noaa.gov/grr/coop/howto/measuresnow/
<http://www.crh.noaa.gov/grr/coop/howto/measuresnow/>

How to Measure Snow

The following procedures were developed from previous National Weather Service procedures and input from a broad array of expertise from climatologists, snow specialists, weather observers, and data users. Some of the materials have been extracted from "The Snow Booklet" by Nolan J. Doesken and Arthur Judson, CSU, 1996).

It is essential for all observers to understand the importance of taking standard measurements in the prescribed consistent manner. Inconsistent observing and reporting methods result in incompatible data which can result in profoundly incorrect differences between stations and observers.

Each season before the first snows come: Review these instructions for measuring snow. It is easy to forget what needs to be measured, especially in those parts of the country where snow falls infrequently.

* At the beginning of each snowfall/freezing season, remove the funnel and inner measuring tube of the eight-inch manual rain gauge to expose the 8-inch diameter overflow can so that it can more accurately catch frozen precipitation.

* Put your snowboard(s) out and mark their location with a flag or some other indicator so they can be found after a new snowfall. They should be located in the vicinity of your station in an open location (not under trees, obstructions, or on the north side of structures in the shadows).

* Check your gauge to make sure there are no leaks. If there are leaks, take appropriate action.

* Once your equipment has been readied for winter you are prepared for taking snowfall measurements.

Observers should determine three values when reporting solid precipitation. They are:

1. Measure and record the snowfall (snow, ice pellets) since the previous snowfall observation

2. Determine the depth of snow on the ground at the normal observation time

3. Measure and record the water equivalent of snowfall since the previous day's observation

Measure and record the greatest amount of snowfall that has accumulated on your snowboard (wooden deck or ground if board is not available) since the previous snowfall observation. This measurement should be taken minimally once-a-day (but can be taken up to four times a day, see note below) and should reflect the greatest accumulation of new snow observed (in inches and tenths, for example, 3.9 inches) since the last snowfall observation. If you are not available to watch snow accumulation at all times of the day and night, use your best estimate, based on a measurement of snowfall at the scheduled time of observation along with knowledge of what took place during the past 24 hours. If you are not present to witness the greatest snow accumulation, input may be obtained from other people who were near the station during the snow event. If your observation is not based on a measurement, record in your remarks that the "snow amount based on estimate".

Remember, you want to report the greatest accumulation since the last observation. If snowfall occurred several times during the period, and each snowfall melted either completely or in part before the next snowfall, record the total of the greatest snowdepths of each event and enter in your remarks "snowfall melted during the OBS period". For example, three separate snow squalls affect your station during your 24 hour reporting day, say 3.0, 2.2, and 1.5 inches. The snow from each event melts off before the next accumulation and no snow is on the ground at your scheduled time of observation. The total snowfall for

that reporting 24-hour day is the sum of the three separate snow squalls, 6.7 inches, even though the snow depth on your board at observation time was zero. Snow often melts as it lands. If snow continually melts as it lands, and the accumulation never reaches 0.1 inches on your measuring surface, snowfall should be recorded as a trace (T) and record in your remarks that the "snow melted as it landed".

It is essential to measure snowfall (and snow depth) in locations where the effects of blowing and drifting are minimized. Finding a good location where snow accumulates uniformly simplifies all other aspects of the observation and reduces the numerous opportunities for error. In open areas where windblown snow cannot be avoided, several measurements may often be necessary to obtain an average depth and they should not include the largest drifts. In heavily forested locations, try and find an exposed clearing in the trees. Measurements beneath trees are inaccurate since large amounts of snow can accumulate on trees and never reach the ground.

If your daily schedule permits, you may wish to make a snowfall observation every 6-hours, beginning with your regularly scheduled time of observation. This is the procedure followed by NOAA's National Weather Service Forecast Offices. Follow the same rules for a once-a-day observation, but the snow accumulation reported will be the greatest for the previous six hours instead of 24 hours. If you take your observations at this frequency, make sure that you clear your snowboard (or other measuring surface) no more than once every 6 hours. Record the frequency of observations during the day in the comments section of your report. Never sum more than four, six-hourly observations to determine your 24 hour snowfall total. If you use more than four observations, it would falsely increase snowfall totals.

Freezing rain (glaze ice) should never be reported as snowfall. This precipitation type is liquid precipitation and should be reported as such.

1. Determine the total depth of snow, ice pellets, or ice on the ground. This observation is taken once-a-day at the scheduled time of observation with a measuring stick. It is taken by measuring the total depth of snow on exposed ground at a permanently-mounted snow stake or by taking the average of several depth readings at or near the normal point of observation with a measuring stick. When using a measuring stick, make sure the stick is pushed vertically into the snow until the bottom of the stick rests on the ground. Do not mistake an ice layer or crusted snow as "ground". The measurement should reflect the average depth of snow, ice pellets, and glaze ice on the ground at your usual measurement site (not disturbed by human activities). Measurements from rooftops, paved areas, and the like should not be made. Note: Even though the depth of hail (usually associated with spring, summer, or fall thunderstorms) at observation time is also reported in the same manner as snow depth, make sure you record in your remarks that the "accumulation on ground is from hail".

Report snow depth to the nearest whole inch, rounding up when one-half inch increments are reached (example 0.4 inches gets reported as a trace (T), 3.5 inches gets reported as 4 inches). Frequently, in hilly or mountainous terrain, you will be faced with the situation where no snow is observed on south-facing slopes while snow, possibly deep, remains in shaded or north-facing areas. Under these circumstances, you should use good judgement to visually average and then measure snow depths in exposed areas within several hundred yards surrounding the weather

station. For example, if half the exposed ground is bare and half is covered with six inches of snow, the snow depth should be entered as the average of the two readings, or three inches. When in your judgement, less than 50% of the exposed ground is covered by snow, even though the covered areas have a significant depth, the snow depth should be recorded as a trace (T). When no snow or ice is on the ground in exposed areas (snow may be present in surrounding forested or otherwise protected areas), record a "0".

When strong winds have blown the snow, take several measurements where the snow was least affected by drifting and average them. If most exposed areas are either blown free of snow while others have drifts, again try to combine visual averaging with measurements to make your estimate.

2. Measuring the water equivalent of snowfall since the previous day's observation. This measurement is taken once-a-day at your specified time of observation. Melt the contents of your gauge (by bringing it inside your home or adding a measured amount of warm water) and then pour the liquid into the funnel and smaller inner measuring tube and measure the amount to the nearest .01 inch (use NWS provided measuring stick) just as you use for measuring rainfall. Do not measure the melted precipitation directly in the large 8-inch outer cylinder. Make sure the inner measuring tube can't fall over when pouring the liquid back into it. If the melted water equivalent (including any added warm water) exceeds two inches and cannot fit into the measuring tube all at one time, then empty the full measuring tube and pour the remaining liquid from the large 8-inch outer cylinder into the emptied measuring tube. Then, add and record the water equivalent of the multiple measurements.

If you added warm water to the gauge to melt the snow, make sure you accurately measure the amount of warm water added before pouring it into the gauge. Then, when you take your liquid measurement, subtract the amount of warm water added from the total liquid measurement to get your final liquid water equivalent of the snowfall.

As winds increase, gauges collect less and less of the precipitation that actually falls. Generally speaking, the stronger the wind and the drier the snow, the less is captured in the gauge. If you notice that less snow is in the gauge than accumulated on the ground, you should first empty any existing snow from inside the 8-inch cylinder, then use it to take a snow sample, sometimes referred to as "take a core" or "cut

a biscuit" from your snow board with the 8-inch overflow can. Melt the biscuit of snow, pour the liquid into the small measuring tube to measure the water equivalent.

405 AM EST THU DEC 18 2008

...WINTER STORM WARNING IN EFFECT FROM 7 PM THIS EVENING TO 7 PM
EST FRIDAY...

THE NATIONAL WEATHER SERVICE IN GRAND RAPIDS HAS ISSUED A WINTER
STORM WARNING FOR HEAVY SNOW...WHICH IS IN EFFECT FROM 7 PM THIS
EVENING TO 7 PM EST FRIDAY. THIS IS AN UPGRADE TO THE WINTER STORM
WATCH.

A DEVELOPING LOW PRESSURE SYSTEM WILL MOVE FROM EASTERN COLORADO
THROUGH ILLINOIS...INDIANA...AND OHIO TONIGHT AND FRIDAY. SNOW
WILL DEVELOP OVER FAR SOUTHWEST LOWER MICHIGAN AFTER 7 PM TONIGHT
AND SPREAD NORTHEAST DURING THE NIGHT. THE SNOW WILL BECOMING
HEAVY LATE TONIGHT AND CONTINUE INTO FRIDAY. SNOWFALL RATES OF AN
INCH PER HOUR ARE POSSIBLE WHICH WILL MAKE FOR VERY HAZARDOUS
DRIVING CONDITIONS.

TOTAL SNOWFALL IN THE 6 TO 10 INCH RANGE IS EXPECTED BY LATE
FRIDAY. THE HIGHER TOTALS WILL BE ALONG AND SOUTH OF A WHITEHALL
TO ALMA LINE.

IN ADDITION TO THE HEAVY SNOW...IT/S POSSIBLE THAT SOME SLEET MAY
MIX IN WITH THE SNOW LATE TONIGHT AND EARLY FRIDAY SOUTH OF I-94.

A WINTER STORM WARNING FOR HEAVY SNOW MEANS SEVERE WINTER WEATHER CONDITIONS ARE EXPECTED OR OCCURRING. SIGNIFICANT AMOUNTS OF SNOW ARE FORECAST THAT WILL MAKE TRAVEL DANGEROUS. ONLY TRAVEL IN AN EMERGENCY. IF YOU MUST TRAVEL...KEEP AN EXTRA FLASHLIGHT... FOOD...AND WATER IN YOUR VEHICLE IN CASE OF AN EMERGENCY.

485. 60 meter DX Activity Night

Yahoo group: GRARA
Date: 2008-12-20 08:48:34 UTC
From: Wilson
Topic: 485 Message: 485

Steve, G4TRA & Joe, W8GEX have come up with the idea to have a monthly DX night in order to get more DX stations active. Let's give it a try and see how it works.
Purpose: An activity session with the aim of working as many stations as possible, in a friendly and gentlemanly manner.
Title: 60m Atlantic Sessions.
The 7th 60 Meter "DX ACTIVITY NIGHT" on 20 DECEMBER at 2300 gmt
Frequency: The common 5MHz channels: 5.366.5, 5.371.5 and 5.4035.5 MHz
Mode: USB
Exchange: Report, name, location, that’s all. This is not a contest.
If you like, send an Excel log to G4TRA at steveredway@.... Include above details plus frequency, and time. Steve will collect and publish the results.

One of our readers suggested that we have a WAS (work all states night).
So let's all get on and pass out our states to those trying to work WAS.
Let's try Tuesday, Dec. 23, (local) time. Don't forget the W6 and W7s are two to three hours behind the east coast.
Some of those states are hard to work.
Joe W8GEX

Topic: 487 Message: 487

I assume many of you are just taking it easy today. I was going through some of my bookmarks, and I would like to pass on some links that are to the Air Force Space Radar. If you have never heard of this, take some time to see what good some of your tax money does. How about a transmitter on 216 megs, with over 6 Billion watts ERP? Pointed straight up. Any satellite over the earth that is not in a geo-synchronous orbit has to fly over this site. By listening to the Doppler signal the Air Force keeps track of the satellites.

That area of Texas does have ice storms from time to time. However, the array consists of over 2,500 antennas, each fed with its own 300 watt amplifier. What boggles the mind is the 0.02 degree beam width. Do the math to see how narrow the beam still is at 200 miles, the height of many of satellites. Then think about the power of that beam to any plane flying overhead at 35,000 feet!

490. : [HARC] Winter General Class classes

Yahoo group: GRARA
Date: 2008-12-20 02:10:46 UTC
From: K8TB
Topic: 490 Message: 490

The Ken Groom, ZR5AAD Technical/Training Center will be warm on Monday nights this Winter. We have enough students signed up for the General licensing class to warrant heating the house. We do have room for more if anyone wants to share the learning experience.

The class begins January 5 at a little after 7:00 pm. The fee is $20 and $20 for the book if you need it. Let me know if you wish to be added to the list and need a book. Besides heat, coffee and cookies are always available too.

Now, if you want a real learning experience just read on:

If there is enough interest, I will start a new beginner code class in January. My classes are fun and you WILL learn the code in a simple format. This
is a no-pressure class and we know how to make it fun. I have NEVER had a failure in all the years I have taught morse code, as long as the basic criteria
of the class is followed. The class will require a class meeting once a week and at least an hour a day practice.
Ask anyone who has attended my classes, and you will get a testimony of how easy it is to learn the code
There is NO charge for these classes.
If you can't learn the code in my classes - the full cost will be refunded....!!!!

Contact Chuck, W8GCW or
Ed, KF8EV at:
616-772-4811
kf8ev@... <mailto:kf8ev%40arrl.net>

Both classes will be held on Monday nights.

491. Reminder: No GRARA Net/No Open Radio Room on Xmas Eve & New Years Eve

Yahoo group: GRARA
Date: 2008-12-22 14:52:35 UTC
From: grara_town_crier
Topic: 491 Message: 491

Hey guys,

Just a reminder that there will be no open radio room or 2-meter nets on Christmas Eve and New Year's eave.

Then remember that the January membership meeting comes up quick on January 2nd.

Then the DAPR Packet Seminar comes up on the next day, Saturday January 3rd

Also the RTTY Roundup (also psk31) comes up on Saturday afternoon at 1:00 pm in the Red Cross Radio room.

We are starting 2009 off with a bang!

See the http://www.w8dc.org web site for more information

492. Prelim Announcement, 2009 Michigan QSO Party, April 18

Yahoo group: GRARA
Date: 2008-12-24 00:10:08 UTC
From: Hank Greeb
Topic: 492 Message: 492

Preliminary announcement of the 2009 Michigan QSO Party, sponsored by the Mad River Radio Club, from 1600Z,Saturday April 18 until 0400Z, Sunday, April 19. (That's Noon to midnight, Saturday, April 18, Local time) Stations may operate the full 12 hours. Phone and CW on 80/40/20/15/10 meters. Single-op, multi-op, and mobile categories. Work stations once per band and mode. MI-to-MI QSOs allowed. Work portables and mobiles again as they change county, state or province. Exchange QSO number and location (county for MI stations, state/province or "DX" for others). Suggested frequencies: CW-3545, 7045, 14045, 21045, 28045; Phone-3825, 7200, 14250, 21300, 28450. One point per phone QSO, two points per CW QSO. Count multipliers once per mode. Multipliers are MI counties for all entries, plus states & provinces for MI entries only. Final score is total QSO points times total multipliers. Mail logs no later than 30 days after the contest to: Mad River Radio Club, c/o Dave Pruett, 2727 Harris Road, Ypsilanti, MI 48198 or via e-mail to logs@.... For full rules, along with free logging software, log and summary sheets, see http://www.miqp.org

Note that the web site doesn't have the 2009 info, but it should be revised in early 2009.

Mark your calendars....February 21,2009 is the date of the
New Hams Dinner and this year the MDXA is a co-sponsor!
In addition to recognizing and welcoming new hams,two of
Our areas top awards will be issued! The MDXA sponsors the
Region wide - entire Great Lakes area,Amateur Radio Pillars
Of Society Award and it will be presented to Abe-W8HVG
Ham Of The Year will also be awarded at this event and is sponsored
By MARA and other local clubs. We hope to see "you" there. Info below...

NEW HAMS DINNER! All Hams, keep open Saturday, February 21, for the
Annual New Hams Dinner. This is a traditional Get out of the Cabin
Gathering to have a good time, and make a special welcome to those who
Have acquired a ham ticket in the past year, and hams that have moved
Into the area. For those hams, dinner is on us. Dinner is at Fire
Mountain Buffet, 3725 Alpine Ave NW (Hwy M-37), Comstock Park, MI 49321.
Map: http://tinyurl.com/6ulo2d There is a back entrance off 4 Mile Rd
Just west of Alpine Ave. In order to avoid the Saturday night crowd,
Dinner will be at 2PM to 3:30, so skip lunch and come hungry. Cost is
$14.50 which includes meal, drink, and gratuity.

495. FCC site which Cites Amateur Radio

Yahoo group: GRARA
Date: 2008-12-26 06:23:14 UTC
From: Hank Greeb
Topic: 495 Message: 495

Next time you see your friendly, or not so friendly zoning
administrator, here's a web site to cite:

http://www.fcc.gov/pshs/services/amateur.html

It puts the FCC's imprimatur on ARES, RACES, SKYWARN, HEART, and NTS,
with links to additional URLs.

It might be a nice summary article to include in any application for a
zoning permit. I would urge any applicant to join one of those
organizations, because supporting public service is a good thing, and,
subsequently, I would consider using this web page to show that such
public service is federally recognized.

496. GRARA Meeting, Friday, January 2, 2009

Yahoo group: GRARA
Date: 2008-12-30 04:26:39 UTC
From: Hank Greeb
Topic: 496 Message: 496

Come one, come all, to the next meeting of the Grand Rapids Amateur Radio Association, Friday, January 2, 2009

Besides the usual hum-drum, boring stuff of a meeting, we will have an exciting discussion of the ARRL RTTY Roundup, which starts the next day (Saturday) at 1 p.m., and runs through 7 p.m. Sunday. We plan to activate W8DC for that event!

And, even more exciting, Mike, W8DER, is bringing his state of the art FLEX-5000 rig for "show and tell." This rig is essentially a front end and final amplifier, with all the signals generated at baseband via an on board computer. For ARRL members, there's a nice writeup of the Flex-5000 in the July 2008 issue of QST.

After the meeting, there will be ham sandwiches, sodas.

Come on out for an interesting, educational, and entertaining evening!

Subject: [kq2h_repeater] Gotta love Yahoo....NOT

An e-mail I got from the owner of another group I belong to:

Attention Group

As part of our continuing efforts to serve our list-members we will pass
along any general Yahoo Groups-related announcements that are of
relevance to all of you such as the one below:

Yahoo is Tracking Group Members

If you belong to ANY Yahoo Groups - be aware that Yahoo is now using
"Web Beacons" to track every Yahoo Group user. It's similar to cookies,
but allows Yahoo to record every website and every group you visit, even
when you're not connected to Yahoo. Look at their updated privacy
statement at ttp://info.yahoo. com/privacy/ us/yahoo/ details.html

About half-way down the page, in the section on *cookies*, you will see
a link that says *WEB BEACONS*.

Click on the phrase "Web Beacons." On the page that opens, on the left
find a box entitled "Opt-Out."

In that section find "opt-out of interest-matched advertising" link that
will let you "opt-out" of their snooping. Click it and then click the
opt-out button on the next page.

Note that Yahoo's invasion of your privacy - and your ability to opt-out
of it - is not user-specific. It is MACHINE specific. That means you
will have to opt-out on every computer (and browser) you use.

Please forward this to your other groups. You might complain, too, but
I'm not sure if anyone is listening. I remember when they signed all
users up to get spam and we had to opt out of that a few years ago.

Related article:

Michigan DX Association Weekly Nets

MDXA Tuesday Night 2 Meter Net Reminder!

Just a reminder that the Michigan DX Association holds it's Area Wide Net every
Tuesday night at 9:00 PM on the 145.270 94.8 repeater in Lowell

Note: EchoLink is now available during the net! Just use the LARC node.
EchoLink check-ins may be "limited" by the amount of traffic on the net.

Net Control is Dave Smith,KC8PCL...join us for club News,Ham Trivia and this weeks
Newsline!
In case of severe weather,our alternate repeater is the A.R.G.Y.L. machine,146.620 PL 94.8
Visit our Net page for more information.Dave does a great job as Net Control,he is located
in East Grand Rapids,Michigan. Co - Net control is Tom Wilson, KD8DEG

http://mdxa1.org/NETS.html

Club simplex activity:Simplex frequency 146.445 MHz 8-10 PM nightly

We wish to thank the LARC and A.R.G.Y.L clubs for their generosity in allowing us to use
their fine repeaters!

MDXA Wednesday Night 6 Meter SSB Net Reminder

Please Join Us Every Wednesday night at 9:00 PM on 50.140 SSB

Like all of our nets,the 6 meter net is fun and educational!

Jerry Willett..AC8AH is located in Cedar Springs,Michigan and he does a great job with our
6M nets.

Note: There is a 6 Meter FM simplex net every Monday night at 8:30 PM on 52.510

MDXA 2 Meter SSB Net Thursday Nights At 9:00 PM
144.185 USB

The 2 Meter SSB Net will have rotating net controls,contact Jerry Willett,AC8AH to
volunteer as
a net control. 2 Meter SSB is a lot of Fun!

MDXA HF/DX Activity

Rag Chew Frequencies

10 Meters 28.350 MHz - 15 Meters 21.335 MHz For Unstructured Rag Chew Activity.

Where is the best place to find our members on HF?..... In the DX Pileups chasing DX ! Members have been heard on MidCars and the Triple H WAS-DX net.

Members are also heard on HF from the 10 Islands and 4 Lighthouses we have activated. We also hold an HF Special Event station every summer! A visit to our ScoreBoard page and Top Gun page will give you a better idea as to how active our members are on HF.We have several members above and beyond the 300 DX total mark!
Visit our Net page for HF standby frequencies.

http://mdxa1.org/NETS.html

506. MICHIGAN QRP CLUB ANNUAL CW CONTEST January 10-11

Yahoo group: GRARA
Date: 2008-12-27 20:47:20 UTC
From: Hank Greeb
Topic: 506 Message: 506

MICHIGAN QRP CLUB ANNUAL CW CONTEST

Date: Saturday January 10, 2009
Time: 12:00 pm - 12:00 am
Location: ON AIR EVENT SEE DETAILS
Notes: Actually, this is a "Marathon event" which runs from
1200Z January 10 through 2359Z January 11. Yes! that's about 36 hours,
so pick whatever time(s) you have to operate.

For details see: http://www.miqrp.org/contest.html

You do NOT need to be a member of the Michigan QRP Club.

You MAY operate more than 5 watts, all the way to the full legal limit!

All hams are invited to take part in this event. Do join us for this fun
time!

NOTE: Many CW operators use straight keys and send/receive slower code
(10 to 15 WPM) This (and other QRP contests) would be a good event to
try out one's newly minted code.

O I C. A Web Beacon could be as simple as a one pixel gif, which doesn't show up on your screen, but which is on a yahoo site. If you allow remote pictures to be downloaded into an e-mail, it will send your ip address to the place where the one pixel file is located, then that host can access your computer if your firewall isn't good enough to stop it.

Anyway, I guess I won't allow remote pictures from yahoo, in particular.

Thanks for the heads-up.

Now, to go get our grand daughter, who has a rather strong case of homesickness and is crying at a friends place, wanting her parents and grandparents.

Ain't kids wonderful?

Happy Gnu Yaer

508. Membership meeting Friday Night, Jan 2nd. See program abt Flex-5000A

Yahoo group: GRARA
Date: 2009-01-02 03:27:53 UTC
From: mike_w8der
Topic: 508 Message: 508

Please remember the January Membership meeting comes up fast this month. The program is a demonstration of the Flex-5000A software defined Transceiver.

Also DAPR will be having a packet workshop at 9:30 Saturday morning and GRARA is entering the RTTY Roundup Contest from the radio room at 1:00 in the afternoon. (at the Red Cross)

The RTTY Roundup hours are currently flexible. We hope to keep you updated on the W8DC repeater, GRARA Yahoo group and on W8DC.org.

Make a note.... the phone number in the Red Cross Radio Room is: (616) 456-8088.

Also note that our http://www.w8dc.org web site service provider will be going through some equipment changes this next week, so we could have some brief outages on the club web site.

Hank reminds us that the Michigan QRP Annual CW contest is the next weekend, so there's no rest ahead. Ham Radio is fun in Grand Rapids!

Mike, and everyone,

Sorry, but I completely forgot about the meeting coming up so fast! I really wanted to see the Flex-5000A demo, too! I have been pre-occupied since Monday, Dec 29, when I went downstairs in my basement, and stepped in 3 inches of water, wall to wall! With all the huge amounts of snow and rain, it quietly came up through my sump pump storm drain basin, overnight! I built a recording studio/sound room down there, with a carpeted floor and cork line walls for sound acoustics, and it all got soaked! My Baldwin piano in sitting in water, along with 500 records albums that I had laying on the floor, temporarily, sorting them, to be put back on the shelf. I have a huge project to dis-infect everything to avoid black mold and mildew! What a mess! 2009 is not going very well for me, so far.

511. Update: MiQRP Annual CW Contest, Jan 10-11, 2009

Yahoo group: GRARA
Date: 2009-01-04 21:32:51 UTC
From: Hank Greeb
Topic: 511 Message: 511

Update: The web site for the MiQRP Club is temporarily down, because of the demise of web hosting on qth.net/qsl.net. Hank, K8DD, has come to the rescue, and details may be found at

http://k8dd.com/miqrpclub/Contest09.html until the club web site is again operational. (Big thanks to K8DD!)

The key items are the Contest period - Saturday 1200Z January 10 through Sunday, 2359Z January 11.

Frequencies - all standard QRP frequencies on 160/80/40/20/15/10 meters

Exchange info: RST, QTH (State/Province/Country) and MI-QRP Membership Number. If not a member, send power output.

You do NOT need to be a member of the Michigan QRP Club. All hams are invited to take part in this event. Do join us for this fun time!

515. W8DC.org Code Learning/Practice tool improved.

Yahoo group: GRARA
Date: 2009-01-07 16:28:38 UTC
From: mike_w8der
Topic: 515 Message: 515

Thanks to a suggestion from Dave, KF8QL, we have significantly
improved the download speed from the code practice tool on the
W8DC.org web site. This should help users with slow network connections.

For those of you who haven't tried the code learning/practice tool,
you can access it from the w8dc.org main page using the "New Code
Practice Tool" link on the right side of the page. It can also be
addressed from the Tech Corner page with the "GRARA Learns Morse Code"
link on
the right side of the page.

516. Kudos to Kent county Hams from the Michigan QSO Party

Yahoo group: GRARA
Date: 2009-01-08 17:41:06 UTC
From: Hank Greeb
Topic: 516 Message: 516

Kudo's to Operators in Kent county - From the official report of the 2008 Michigan QSO Party. For complete report, see http://www.miqp.org/2008/2008_MiQP_Report.pdf

Many of us might not have read the details in the 2008 Michigan QSO party, because it is some 36 pages long. I'll admit that I didn't read it carefully, haven't read the document thoroughly, and probably never will. However, I caught an interesting tidbit, which is worthy of note:

"For the ninth year straight, we can report that all 83 MI counties were active during the contest. The five most active counties were Oakland, Washtenaw, Kent, Lenawee and Wayne. Oakland repeats it's top spot from 2007, while Washtenaw returns after a year's absence and Kent makes the list for the first time, replacing Macomb and St. Clair that just slipped outside of the "top 5" this year. The ops from Kent County are to be congratulated - the number of Kent county fixed stations in 2008 was greater than in the total of all the previous years combined!"

Please talk this up in your local club - get the word out. The 2009 Michigan QSO party is right around the corner - Saturday, April 18, 2009 from noon to midnight. This is a "fun" contest, designed for the olde tymer or newcomer, the died in the wool contester, or an op who just wants to make a few contacts. Note that, if a single club has two or more entries from its members are eligible for club competition awards.

For full details of the Michigan QSO Party, see http://www.miqp.org/

Hope to CU on the Michigan QSO Party, 2009!

519. Talking about Radar Detectors

Yahoo group: GRARA
Date: 2009-01-09 16:30:45 UTC
From: Hank Greeb
Topic: 517 Message: 519

Ladies and Gentlemen:

The cited article about radar detectors and jamming radar guns in Florida reminds me of a very legal operation which several of us did back in the 70's or early 80's while traveling from Cincinnati to Columbus, Ohio for a ham radio meeting. One of our more technically inclined hams was experimenting with a 10 GHz gunplexer. Seems the 10 GHz ham band is very close to the frequencies used for 10 GHz radar. We put the gunplexer on the dash, pointed forward, and set up an automatic "CQ" beacon, which we activated occasionally when we'd see an 18 wheeler driving toward us. We were also monitoring CB channel 19, and it was interesting to pick up the chatter about "smokies taking pictures" and note that many truckers in our direction were slowing down to the speed limit instead of barreling down the road faster than the automobile speed limit. Note that we never knowingly transmitted when police had radar set up, we had our amateur radio licenses with us, so our CQ's were legal in all respect. We were unsure about whether a legal ham transmission could be considered the same as an illegal jammer, but we didn't want to be a test case.

Another time our family was on a trip to Pennsylvania. I took my 220 MHz ham rig with me, along with a CB rig and my 2 metre rig. In those daze radar detectors had an IF frequency near the 220 MHz band, so when I'd call CQ on 223.5, traffic would slow down, the chatter on Channel 19 about "smokies taking pictures near mile xx" would increase. I remember making one or two contacts with other hams during the trip - but more contacts were made with 2 meters.

In those daze monitoring Channel 19 was about as effective as using a radar detector. I never owned a radar detector.

Subject: [montcalmcountyares] Winter Field Day 2009

SPAR Announces Winter Field Day 2009

Field Day is perhaps the most popular of the many activities enjoyed by Amateurs. Every June the bands come alive with improvised signals proving the ability to respond to emergencies. The event also offers an opportunity for camaraderie and a chance to test ourselves in less than ideal circumstances, however, emergencies and natural disasters don't always happen in the summer. Winter winds, icy limbs and bitter cold replace the thunderstorms and blistering heat of summer. To test our abilities to operate in the winter, in 2007 SPAR established a Winter Field Day event and invited all Amateur Radio operators to participate. In both 2007 and 2008 the event was enjoyed by many and considered a success and has been designated an annual event to be held the last full weekend each January. Therefore it is time to issue the invitation for the Third Annual SPAR Winter Field Day!

The 2009 Winter Field Day will be held from 1700 UCT (12:00 noon EST) Saturday January 24, 2009 through 1700 UCT (12:00 noon EST) Sunday January 25, 2009. The object of the event is familiar to most Amateur Radio operators: set up emergency-style communications and make as many contacts as possible during the 24 hour period. The rules encourage as many contacts on as many bands and modes as possible, because during a real emergency, the most important factor is the ability to communicate, regardless of band, mode or distance.

The official rules can be found at the SPAR web site. The event is open to all amateurs, although we encourage everyone to join in the discussions and other activities sponsored by SPAR. Information about SPAR can be found on the SPAR Home Page. Membership is free and open to all amateurs who want to encourage technical and operating skills. You can register by going to the SPAR Forum and registering, using your amateur callsign as your user name.

Please join with SPAR in promoting amateur radio and keeping our bands alive!

Subject: ARISS contact on 1/20/2007 @ 18:52 UTC
From: "Dieter Schliemann" <kx4y@...>
Date: Sun, January 11, 2009 6:29 pm
To: kx4y@...

On Tuesday, 20 January 2009, starting at approximately 18:52 UTC, there will be an ARISS contact between the ISS and the Children's Hospital of Eastern Ontario, Ottawa, Ontario, Canada via the telebridge amateur radio ground station ON4ISS in Belgium. Please join us in listening to this event.

The audio for this event will be fed into the EchoLink *AMSAT* (101 377) and *JK1ZRW* (277 208) Conference Room servers by Graham G7EVY. The audio from this event will also be fed into the IRLP Discovery Reflector 9010. We hope to have good two way audio from this contact.

As we do normally, as soon as audio is suitable for transmission over amateur radio, we start feeding audio of set up activities from about 25 minutes prior to the start of the actual contact into EchoLink for listeners who enjoy listening in on these proceedings.

Please note that there are automatic breaks in the audio transmission every 2.5 minutes during the event and while we listen to preparations going on for this contact. Each audio break is approximately 1 second long. Please configure your systems to not time out during times of inactivity or ongoing audio transmissions.

For everyone's information and future reference. When any ARISS event is supported through the IRLP "Discovery" Reflector 9010, audio is automatically streamed to the Internet.

It is then available via the "Discovery" Reflectors companion web site www.discoveryreflector.ca . Once on its main page, select "Live Streaming Audio" on the left side bar and follow the prompts.

More directly the URL is as follows:
www.discoveryreflector.ca:8000/listen.pls

The audio on the Internet is typically delayed by about two minutes.

73 de Dieter kx4y

Dieter K. Schliemann, kx4y - zs6bbh - hs0zcn

To all hams , SWLs....
There is going to be some PRB-1 activity that will effect
the amateurs and SWLs of Michigan, on amateur and SWL
antennas. We all need be informed, and write our representatives
when the time comes. This is a verry important to keep PRB-1
informed, to the amateur radio and SWLs operators, as well. We
need to get as many hams, SWLs to get connected to do this as
a group. Some of you already know what a nightmare it can
be just get a hearing for a permit for putting up a tower, for your
antennas. Listed below is web sites if you are interested in getting
on the email list...
Here are some web sites for info:

536. FYBO 2009 February 7

Yahoo group: GRARA
Date: 2009-01-22 17:58:09 UTC
From: Hank Greeb
Topic: 536 Message: 536

Greetings, everyone,

Anyone for a QRP Outing in the cold of winter?

The annual F)reeze Y)our B)... O)ff contest will be held on Saturday, February 7, 2009, between 1400Z-2400Z. I think that means 9 a.m. to 7 p.m local (Eastern Standard) time.

In 2007 Cortland, KA5S, and I joined Ed, AB8DF, in Hell, Michigan for the event. Yes, it WAS a cold day in Hell. :) Last year Cortland wasn't available, and I had to be in Ohio that weekend for a family event, so I went to the "hallowed groud" of the Bethany, Ohio, Voice of America Site, which is now a park, and operated with a couple of my friends from that area.

However, this year I'm planning to go to a site locally (within 20 miles or therabouts) of Rockford, preferably, but not absitively necessarily, a location on a hill, and prfereably where there is possibility of some shelter from the elements.

Does anyone care to join the effort? Ideas for an outdoor site, with possible shelter from wind/sn*w, etc? For details on the event, see

http://www.azscqrpions.org/FYBO2009.htm

Please respond off line

----- Original Message -----
From: Bobby Corr
To: Michigan Amateur Radio Clubs
Sent: Thursday, January 22, 2009 4:47 PM
Subject: Fw: Michigan ARRL PRB-1 eMail List - Update 4

To: Michigan ARRL PRB-1 eMail List

There was an error in the URL contained in Update 3. The correct URL for the Michigan ARRL PRB-1 Committee web site is www.prb1michigan.org.

To date, 156 persons have signed-up for the PRB-1 eMail list. While this is gratifying, consider the following statistics:

· There are over 21,000 Amateur Radio Licensees in the State of Michigan

· There are 116 Amateur Radio Clubs in Michigan

· Of these 81 are ARRL Affiliated Clubs

· There are 4,248 Amateur Radio Licensees who are members of ARRL Affiliated Clubs

· Of these 2,823 are ARRL dues paying members

While I will acknowledge that some of the 21,000+ licensees are not active, we definitely need the support and action of all Amateur Operators to make this legislative effort successful. Please encourage your fellow HAMs to sign-up for the eMail list so we can keep them informed of our progress and let them know when the time comes to write to their elected representatives.

I have added what I believe is a significant page to the Committee Web Site entitled "Benefits of PRB-1 Legislation" www.prb1michigan.org/id24.html. I believe that this page is an excellent one-page summary of what this initiative is all about and why legislators, their constituents, local municipalities, and zoning boards should support our proposed legislation. If you have not watched the 6-minute video by Walter Cronkite KB2GSD about Amateur Radio Today, I encourage you to do so. This video highlights the significant contributions made by Amateur Operators during 911 and during the wildfires in the Western US during 2002. You can find a link to the video on the "Links" page at www.prb1michigan.org/id7.html.

It is also worthy to note that ARES members contributed almost $2 million in man hours in support of Public Service and Emergency Communications activities during calendar year 2008. You can find the ARES Report - 2008 on the "Emergency Comm Examples / Statistics" page at www.prb1michigan.org/id23.html. You will also find links to case histories about Emergency Communications in Michigan; e.g. 24-Aug-07 Potterville/South Lansing Tornado and 18-Oct-07 Williamston, MI EF-2 Tornado.

I will continue to keep you updated on activities and topics of interest regarding the PRB-1 Legislation in Michigan.

73,

Bobby Corr N8CY, Chairman

Michigan ARRL PRB-1 Committee

From: Jack
Topic: 539 Message: 539

Once again the Michigan Mountain Bike Assoc. as asked for radio help at the Yankee Springs Time Trial on Sunday 19 April. This is a mountain bicycle timed event/race held at the Deep Lake campground in the Yankee Springs Rec. area, the trail is a 10 mile loop, usually there are about 400-500 riders competing. Being a wooded hilly area communications with anything but our equipment is very sketchy. They need a couple radios on the course and one hanging around headquarters, the campground. 2 meter handhelds working simplex work well, with repeaters as backup.
Can't say for sure, but usually lunch and a volunteer T-shirt is provided to all helpers. You are also welcome to ride the course and if I'm not mistaken camping in free Saturday evening for workers (don't quite on on this one). At any rate Yankee is a great outdoor area to spend some time in and the people do appreciate our help. Please let me know if you can make it.

Date: 2009-02-05 19:04:57 UTC
From: Hank Greeb
Topic: 542 Message: 542

Hello Again, GRARA members

Hate to sound like broken record, because I've announced this event at least once, maybe twice before on this reflector.

HOWEVER, at the risk of being redundant and prone to overkill, I'm repeating......

Cortland, KA5S, Bob, KD8HNF, and I will be operating during the upcoming F)reeze Y)our B)*** O)ff QRP Contest this coming Saturday, February 7. In keeping with the QRP theme of this contest, I've arranged for us to use WQ8RP, the Michigan QRP Club call for this event.

Cortland has made arrangements to operate at Leonard Park, also know as the ADA Covered Bridge Park, located A map to the site is at Thornapple River Drive SE and Fase St SE near downtown Ada. The Ada Township Park officials have been very cooperative in this event. An interactive map is at http://tinyurl.com/df6jmp. There's a ball field which is now a skating rink, excellent heated restrooms, and several Trees for putting up antennae! All operators and/or spectators are welcome. We'll try to monitor 145.27 MHz, but may be tied up with operating. If you get lost, you may call my cell phone 616-433-9050.

We will have a "semi-heated" tent, and a dining canopy for shelter, but dress appropriately. Temperature is supposed to be moderating, but rain showers are predicted - that's why we have a dining canopy and a tent!

Regardless of whether you come out or not, we'd appreciate a contact from you. Look for us on or near 3.560 MHz, 7030 to 7040 MHz, or 14.060 MHz (CW), or 3.985 MHz, 7.285 MHz, or 14.285 MHz (SSB). 80/75 will be the easiest for local contacts, but if you're really close, look for us on all the above listed frequencies.

Subject: MPSCS Newsletter- Volume 1, Issue 1

Michigan's Public Safety Communications System would like to announce that a bi-monthly newsletter is available for all users of the system. The newsletter is packed with information about the system and how it can work better for you and your agency. It is meant to be a tool to supplement any information found on the website or from personnel at MPSCS.

Any suggestions on future topics and story ideas are welcomed and greatly appreciated. Contact Robin Stremlow at StremlowR@michigan. gov, or by telephone at (517)336-6345.

Generally, reminder notes will be sent out to each agency at the issuance of each future newsletter. This time we've included a PDF version that can be distributed to all staff and users.

Also, the newsletter is available on-line at MPSCS's wesbite:
http://www.michigan .gov/mpscs

Please forward this email on to your public safety colleagues.

MPSCS thanks you for your loyal service. Feel free to let us know what we can do to help service your communication needs.

Robin Stremlow
Publications Specialist, MPSCS
(517) 336-6345

546. For those needing North Dakota for the Triple Play WAS Award

Yahoo group: GRARA
Date: 2009-02-08 23:44:01 UTC
From: Hank Greeb
Topic: 546 Message: 546

From: http://www.arrl.org/news/stories/2009/02/07/10619/

North Dakota to Offer State QSO Party in March

Stations working on their Triple Play Award or Year of the State QSO Party Award will want to be on the air on Saturday, March 21 as North Dakota -- always a rare state -- will hold their first QSO Party in 14 years.

"The North Dakota QSO Party (NDQP) is certain to put North Dakota on the map -- and hopefully off the Needed List of many a deserving amateur," said ARRL Contest Branch Manager Sean Kutzko, KX9X. The contest is sponsored by the North Dakota Radio Association (NDRA) with help from several other North Dakota clubs.

Newly appointed North Dakota Section Manager Lynn Nelson, W0CQ, told Kutzko that interest has been high for starting the event up again. "I had many hams asking me to kick off a State QSO Party," Nelson said. "We are encouraging North Dakota stations to work 20 meters in the afternoon hours. This will help to tackle the demand of the state -- and its many rare counties -- for several Amateur Radio awards, including the ARRL's Triple Play and Year of the State QSO Party."

The North Dakota QSO Party runs from 1700 UTC Saturday, March 21-0100 UTC Sunday, March 22. All bands from 160-2 meters (except 60, 30, 17 and 12 meters) are acceptable. Complete rules and forms can be found on the NDRA Web site. Don't miss your chance to work one of the rarest states in the country -- get in on the fun of the North Dakota QSO Party!

551. [TowerTalk] Antennas and towers near broadcast stations

Yahoo group: GRARA
Date: 2009-02-15 17:34:11 UTC
From: Wilson
Topic: 551 Message: 551

The FCC has without much notice in Amateur circles passed was: "quietly snuck," a poor choice of words, a Rule that will affect non-broadcast radio licensees including Radio Amateurs.

In the Matter of
An Inquiry Into the Commission's Policies and Rules
Regarding AM Radio Service Directional Antenna Performance Verification
MM Docket No. 93-177 SECOND REPORT AND ORDER AND SECOND FURTHER NOTICE OF PROPOSED RULEMAKING
Adopted: September 24, 2008 Released: September 26, 2008
Comment Date: (30 days after date of publication in the Federal Register)
Reply Comment Date: (60 days after date of publication in the Federal Register)

excerpt:

Quote:
§1.30002 Tower construction or modification near AM stations.
(a) Construction near a nondirectional AM station. Proponents of construction or significant modification of a tower which is within one wavelength of the AM station, and is taller than 60 electrical degrees at the
AM frequency, must notify the AM station at least 30 days in advance. The proponent shall examine the potential impact of the construction or modification as described in paragraph (c). If the construction or
modification would distort the radiation pattern by more than 2 dB, the licensee shall be responsible for the installation and maintenance of any detuning apparatus necessary to restore proper operation of the
nondirectional antenna.
(b) Construction near a directional AM station. Proponents of the construction or significant modification of a tower which is within the lesser of 10 wavelengths or 3 kilometers of the AM station, and is taller than 36 electrical degrees at the AM frequency, must notify the AM station at least 30 days in advance.
The proponent shall examine the potential impact of the construction or modification as described in paragraph (c). If the construction or modification would result in radiation in excess of the AM station's licensed standard pattern or augmented standard pattern values, the licensee shall be responsible for the installation and maintenance of any detuning apparatus necessary to restore proper operation of the directional antenna.
(c) Proponents of construction or significant modification of a tower within the distances defined in (a) and (b) herein of an AM station shall examine the potential effects thereof using a moment method analysis. The moment method analysis shall consist of a model of the AM antenna together with the
potential reradiating tower in a lossless environment. The model shall employ a simplified version of the methodology specified in § 73.151(c) of this chapter. The AM antenna elements may be modeled as a Federal Communications Commission FCC 08-228 series of thin wires driven to produce the required radiation pattern, without any requirement for measurement of tower impedances.
(d) A significant modification of a tower in the immediate vicinity of an AM station is

defined as follows:
(1) Any change that would alter the structure's physical height by 5 electrical degrees or more at the AM frequency.
(2) The addition of one or more antennas or a transmission line to a tower that has been detuned or base insulated.
(e) The addition or modification of an antenna or antenna supporting structure on a building shall not be considered significant.
(f) With respect to an AM station that was authorized pursuant to a directional proof of performance based on field strength measurements, the proponent of the tower construction or modification may, in lieu of the study described in paragraph (c), demonstrate through measurements taken before and after construction that field strength values at the monitoring points do not exceed the licensed values. In the event that the pre-construction monitoring point values exceed the licensed values, the proponent may demonstrate that post-construction monitoring point values do not exceed the pre-construction values.
Alternatively, the AM station may file for authority to increase the relevant monitoring point value after performing a partial proof of performance in accordance with § 73.154 to establish that the licensed radiation limit on the applicable radial is not exceeded.
(g) Tower construction or modification that falls outside the criteria described in the preceding paragraphs is presumed to have no significant effect on an AM station. In some instances, however, an AM station may be affected by tower construction notwithstanding the criteria set forth above. In such cases, an AM station may submit a showing that its operation has been affected by tower construction or alteration. If necessary, the Commission shall direct the tower proponent to install and maintain any detuning apparatus necessary to restore proper operation of the AM antenna.

LINK<http://fjallfoss.fcc.gov/edocs_public/attachmatch/FCC-08-228A1.pdf>

A vertical resonant at 1.8 MHz is 81 degrees tall at 1.6 MHz and would be if not detuned at the BC frequency forbidden within 2 miles (approx) (or 10 wavelengths at its frequency if less) of a directional AM station. An 80 meter vertical falls to it as well, as well as many shorter towers according to their electrical length.

I leave to others to calculate what their antennas and towers will require.

Considering the impact the unnoticed Part 73 action has had in Amateur circles, a reconsideration could be in order if only to accept our comments.

To RCCT and GRARA members
We are planning a exercise on March 21,2009. 9am-noon at the Red Cross.
Objectives of this exercise will be:
Setting up field radio operations
Experience packet operations, with the JANOS system and use of Red Cross radios. We will be using Red Cross Frequencies 47.580 because of possible inter-mod issues with 2 meter
Pass packet test messages between the chapter and units in the field.
We plan(hopefully) on using two ERVs, one in the south part of the county and one north.
Pass test messages to State EOC/ARRL Director.
Debriefing. Strengths and weakness of the exercise.
This will be a great time to hone up on packet radio and field operations.
The Ann Arbor group in Washtenaw Co. may participate in our exercise.
Any questions please feel free to contact Joe Bell or my self, Jim Leys

558. Some very interesting ham web sites

Yahoo group: GRARA
Date: 2009-02-22 03:07:27 UTC
From: K8TB
Topic: 558 Message: 558

If I may, I have come across some rather interesting, and time consuming web sites.,

The first is essentially a ham radio version of You Tube., There are some rather unique videos. Search out the "AmateurLogicTV" series. These are really rather well done, and are rather long. I found that many of these videos have shown me some of the "diamond facets" of this hobby that I was aware of, but never saw up close.

This site is http://hamradiotube.com/Vidiscript/

Be prepared to spend some time there!

From that, I found a link to another interesting site:

http://k5ehx.net/

This guy has put some time into the site.

Look at the Google map interface for repeaters, including terrain mapping:

http://k5ehx.net/repeaters/qrepeater.php

Don't tell me I didn't warn you!!

Ladies and Gentlemen...

Saturday, February 28th
9:00 am - ???
Perkins Restaurant - Holland

HAM is for Breakfast!

It is time once again to join your fellow hams for either a muffin or a meal at the Holland Perkins Restaurant. The coffee will be hot and the conversation lively. Bring a buddy or bring a spouse... the more the merrier.

Look forward to starting your weekend out without having to cook or clean those dishes!

Perkins is located on North Park Drive, off US 31 at James Street at the Wal Mart plaza. . . Between Pizza Hut and Pier One Imports.

We have the back room reserved... so stop on by!

Megan and Jim

567. Meeting and Club Activity, Friday, March 6

Yahoo group: GRARA
Date: 2009-03-05 15:04:22 UTC
From: Hank Greeb
Topic: 567 Message: 567

There will be a PowerPoint presentation "Contesting 101" at the meeting
if the Grand Rapids Amateur Radio Association

This Friday, March 6, 2009
American Red Cross Building, 1050 Fuller Ave NE
Grand Rapids, MI 49503
Gathering Time: 6:30 PM
Meeting Time: 7:00 P.M

This presentation was originally developed and present by Dave Pruett,
K8CC, for the ARRL State Convention in Kalamazoo last year. Dave is the
chairman of the Michigan QSO Party contest.

I'll include information on the ARRL DX Contest (which starts at 7 p.m.
Friday, concurrent with our meeting), and a few other contests.

We will adjourn afterwards to work the ARRL Phone DX Contest
from the W8DC Station. Everyone is encouraged to participate.
.
This is an excellent opportunity for hams, new and old, to participate
in an on the air activity, work a few foreign countries, and have a few
eyeball QSO's while others are "CQ DX"ing away.

Have you noticed the new youth net on the IRA Linked Repeater System?

It's the new "Michigan Amateur Radio Youth Net", held every Thursday night at 7:00 P.M.

Great idea -- don't you think?

They encourage all youth under the age of 22 to check in and discuss what is happening in their world -- both licensed and unlicensed (with control operator)can check in. This way they can talk without the intimidation of being with us older folks. They obviously don't need our help on the air, but we can all support them by spreading the word to all youth in the state. Can you help?

And Grandpa hams out there, get you grandkids on the air from your shack. Maybe they will get interested in being just like grandpa. My granddaughter Erica is a good candidate at my station. She has already been on echolink.

The net had 15 check-ins last week. I hope they continue to grow.

Date: 2009-03-07 16:38:36 UTC
From: Wilson
Topic: 573 Message: 573

Skew - in these times of odd, short-lived, and downright confusing propagation, skew paths can be your best friend! When the direct path between you and the DX isn't open, try beaming closer to the equator where ionospheric tilt and the higher ionization densities can create "bank shot" openings above the MUF on the direct path.

7:00 pm
HARC Technical & Training Center

It is time again for our monthly meeting. We invite all the members and their guests to attend Tuesday at the clubhouse.

This month Joe Veldhuis N8FQ will make a presentation on Meteor Scatter.

For those of you who do not know what Meteor Scatter is... This newbie Technician knows that meteors come into the atmosphere and radio waves bounce off of them. Joe will enlighten us on this phenomenon. He will have a power point presentation, handouts, and a Q&A session .

Not only will we have this wonderful speaker, there will be a 50/50 drawing, special treats for those who celebrate a birthday in March, cookies, coffee and camaraderie. After the break, there will be a short business meeting.

Don't forget that your dues are now "PAST DUE", which we will gladly accept at this meeting. (Checks can be made out to HARC and given to Phil Van Huis).

I will also have available a calendar for events in March and April.... so don't miss this event!

3. Saturday March 14: The Mini Swap / Breakfast at HARC has been cancelled. The Marshall hamfest will be taking place instead. So don't plan on chow and chumming around at the clubhouse, plan on dining and driving to Marshall!!

73,
Megan
WO0MEG
Vice president

Sent: Monday, March 09, 2009 10:09 AM
Subject: [HARC] Citizen Corps News: Does your Emergency Preparedness Kit contain recalled or expired items?

Currently the United States is in the midst of one of the largest food recalls in American history. As Americans dig through their cabinets and refrigerators to remove potentially contaminated food associated with the recent peanut recall, we would like to also remind citizens to open and check their Emergency Preparedness Kits to remove any potentially harmful items from these also.

Because peanut products are often recommended as staples in Emergency Preparedness Kits due to their long shell life and because they are a good source of protein, we encourage all kit owners to look at their kits to ensure food products are not on the peanut recall list. Please keep in mind that the peanut product recall extends beyond peanut-flavored products. The following are some examples of foods also included in the recall that may contain peanuts:

* Granola

* Snack bars

* Crackers

* Cereal

* Trail Mix

* Cookies

* Noodles

* Dog treats

A full list of recalled peanut products and what individuals should do with recalled items can be found on the Food and Drug Administration's Web site, http://www.accessdata.fda.gov/scripts/peanutbutterrecall/index.cfm.

In addition to checking for peanut-related items, please be sure to check for other items in your kit that may have expired, including

medications, food and pet food, water, and other recalled items. The U.S. government provides information on unsafe, hazardous, or defective products ranging from consumer products, food, medicine, and cosmetics at www.recalls.gov <http://www.recalls.gov/> .

Ensuring family and neighbors are prepared is an essential step in helping communities during and after an emergency. Families should have an Emergency Preparedness Kit in all locations that are frequented often, including homes, offices, schools, cars and day care facilities. These kits should hold a variety of essential items that are needed during a disaster, such as a flashlight, radio, cash, clothing, protective equipment, medicines, and of course food and water. For a complete list of Emergency Preparedness Kit recommended items, please visit http://www.fema.gov/plan/prepare/supplykit.shtm.

Citizen Corps Councils and Partners: Councils and partners should remind their communities about the importance of maintaining and constructing an Emergency Preparedness Kit and consider hosting public preparedness training sessions to ensure that information about kits is reaching the community. In addition, Councils and partners should consider adding a link to the FDA Web sites along with information on the recall on peanut products to any Web pages or documents that refer to community preparedness or Emergency Preparedness Kit preparation.

This news story and other Community Preparedness news, including Citizen Corps Bulletins, can be found on our website at http://www.citizencorps.gov/.

Sincerely,

The National Office of Citizen Corps
FEMA Community Preparedness Division

580. Michigan QSO Party. April 18, 2009!

Yahoo group: GRARA
Date: 2009-03-22 16:26:24 UTC
From: Hank Greeb
Topic: 580 Message: 580

Hear ye, Year Ye! Hear Ye!

The Michigan QSO Party approacheth!

It will be held on the Saturday of the third full weekend in April, or Saturday, April 18, 2009 from 1200 EDST to 2400 EDST (16Z Saturday until 04Z Sunday UTC). All stations may operate the full twelve hours.

This is a chance for Michigan stations to be hunted - i.e. all stations in the contest will be looking for us!

Categories for fixed and mobile operation, single or multi operator, and three power levels.

Rules and operating hints are at http://www.miqp.org

We plan to activate W8DC during the contest - possibly with two stations.

If you can't make it to W8DC for that time period, fire up your home station and join the fun! If we have three or more individual stations we may enter the club competition!

583. Skywarn Training This Thursday, March 26th

Yahoo group: GRARA
Date: 2009-03-23 19:02:39 UTC
From: mike_w8der
Topic: 583 Message: 583

For those of you who missed the Skywarn training in Kent County, the next one is Thursday in Ottawa County. Remember to be current, you must attend one of the training sessions once every two years. You can expect to see many of your Kent County Friends at this next session in Ottawa County.

For address and time, see "Ottawa" county in the following list on the noaa site.

http://www.crh.noaa.gov/grr/skywarn/training/

Another feature, this will be an opportunity to see the Filmore Complex. It is out on Port Shelden Road.

I will be there. (forgot the one in Grandville) :-(

584. 2009 MICHIGAN QSO PARTY

*2009 **MICHIGAN** QSO PARTY*

Attention Michigan Amateurs!!!!

Hey, it's me again, and I'm frying up a new bunch of "spam" to remind all you Michigan Amateurs that it's time to gear it up and get ready for the 2009 Michigan QSO Party. This years QSO Party will be held on April 18th.

In spite of the lousy conditions last year, it was a record year for the MiQP. Activity was up and we had over 300 entries with a record 41,660 total QSO's. There has been a lot of traffic on the MiQP email reflector announcing 2009 operations from all around the state. The early indications point to another record year. With the support of fixed, mobile and portable stations, we plan on having activity in all 83 counties.

Whether you operate from the home station, the club station, the EOC, mobile, or portable, the important thing is that you get on the air and join the fun. Operate for an 1 hour, or the full 12 hours, every little bit of RF will help make Michigan "Radio Active".

In addition to the normally awarded plagues and certificates for the different categories, there will be a special ?Rookie of the Year Award? in 2009. It should also be noted that the ARRL has declared 2009 ?The Year of the State QSO Party? and is offering a special certificate. Others will need to work Michigan stations during the QSO party to earn the Michigan flag for their ARRL award http://www.arrl.org/awards/ysqso/

Last but not least, we ask those of you that have participated in the MIQP to please help us get the word out and encourage other Michigan hams to participate and join the fun. See http://www.miqp.org <http://www.miqp.org/> for more details and the rules.

Date/Time: Michigan QSO Party, sponsored by the Mad River Radio Club, from 1600Z April 18^th until 0400Z (19th) Stations may operate the full 12 hours. (12 noon on the 18^th until 12 midnight local Michigan time)

Modes and Categories: Phone and CW on 80/40/20/15/10 meters. Single-op, multi-op, mobile and Emergencies Operations Center (EOC) and ?Rookie? categories. Single-op entries are categorized by output power, QRP (5W

or less), Low Power (100W or less), and High Power (greater than 100W).

Multipliers: Work stations once per band and mode. Work other states and Michigan Stations. MI to MI QSO's are allowed. Work portables and mobiles again as they change counties, state or province.

Exchange: Exchange QSO number and location (county for MI stations, state/province or "DX" for others).

Scoring: One point per phone QSO, two points per CW QSO. Count multipliers once per mode. Multipliers are MI counties for all entries, plus states & provinces for MI entries only. Final score is total QSO points times total multipliers.

Freqs: Suggested frequencies: CW-3545, 7045, 14045, 21045, 28045; Phone-3800, 7200, 14250, 21300, 28450.

Log Submittal: Mail logs no later than 30 days after the contest to: Mad River Radio Club, c/o Dave Pruett, 2727 Harris Road, Ypsilanti, MI 48198 or via e-mail to logs@...

More Information: For complete rules, along with free logging software, log and summary sheets, and Fliers see http://www.miqp.org

+++ Division Convention September 12 +++

After careful consideration it was decided to go ahead with a biannual Great Lakes Division Convention this year. The 2009 event takes place in Findlay, OH on September 12. This is the Saturday immediately before the Sunday Findlay Hamfest. The date had been tentative the past few months until the recent decision on the convention was made. The Findlay Radio Club is sponsoring each event.

Previous conventions had been in 2003, 2005 and 2007. These were in Findlay, Toledo and Cleveland in order. sites for future conventions continue to be sought in Kentucky and Michigan.

With the economy straining to recover, concern had been expressed that holding a convention this year was too much to ask of members. It was decided to pursue a no-frills approach while maintaining the high quality of seminars that have come to characterize GLD conventions.

Former astronaut Tony England, W0ORE will headline the convention as its principle speaker. OM England served with NASA FOR many years and spent 8 days aboard the (spacecraft). A premier representative from ARRL is being arranged as this is written.

As in the past, Division Awards for special service to Amateur Radio will be available. These are the George S. Wilson III, Lifetime

Achievement Award; Amateur of the Year; DX Achievement Award, Technical Achievement Award and Newsletter of the Year. Vice Director Gary Johnston, KI4LA is chairing a committee to develop the criteria for a new, young amateur achievement award.

Please read the Call for Papers, immediately below.

+++ Call for Papers -- 2009 GL Division Convention +++

The Great Lakes Division Convention will be in Findlay, Ohio on Sept. 12, 2009, the day before the Findlay Hamfest. The Convention is being organized and sponsored by the Findlay Radio Club.

When the opportunity to have the Convention in Findlay came up, the Club decided that to sponsor it, but to try a few things different than in the past.

We know that hams are thrifty, so we decided to keep the cost of admission low. In fact, we decided we would pick up the cost of the convention so the admission charge will be $0.00. (Ed. This is correct -- nada, nothing, free!)

We also decided that we would not have a standard convention banquet. There will not be a $30 per person sit down dinner banquet at the end of the day. Instead, we are looking into doing a chicken barbecue at the fairgrounds. Tickets for the barbecue would be available for purchase at the Convention or at the barbecue. For lunch we will take orders for box lunches that will be brought in, or you can eat at a local restaurant of your choice. The Findlay Radio Club can not take credit for any of these ideas. We are modeling the convention format after the very successful SW Ohio Digital Conference and a picnic meal the day before the Lake Placid NY Hamfest!

Our "theme" for the Convention will be attracting new hams through "Elmering-like" activities and re-interesting existing amateurs through ground-up discussions of newer technologies. We would like to provide seminars and demonstrations to help a new ham get on the air (especially on HF) and also show new and old hams alike some of the hobbies within ham radio like homebrewing, satellite, digital, ATV, ballooning, APRS, etc. In addition, we plan to showcase methods people have found that work well introducing people to our hobby. Obviously there is not enough time to really cover everything in detail, but we hope to spark interest in these areas for new and old hams alike. Attendees will learn where they can go to get detailed information and more help to get started.

We intend that the Convention will expand your horizon. Perhaps that should be the theme of the Convention - "Expanding your Ham Radio Horizon"

We need speakers. K8JE has arranged for a top notch main speaker - former astronaut Tony England W0ORE - and is arranging for a quality

speaker from ARRL. All I have to do is get a dozen or so speakers to talk on topics like:

1 Getting On HF -- Your First Station
2 Getting On HF -- Your First Antenna
3 Homebrew -- It Is Still Being Done
4 Contesting -- Getting Started
5 The Digital Modes -- An Introduction
6 Getting on the Air with Satellites
7 The QSL Bureau -- What Is It, and How Do I Use It?
8 Emergency Communications -- What Can I Do to Help, And How Do I Start?
9 Amateur Radio in the Local Schools
10 Getting New Hams Through the Boy Scouts, Using Radio Merit Badge
11 Mobile Operation
12 VHF/UHF/Microwave Operation
13 Triple Play Award
14 Echolink/ILRP
15 Winlink
16 PSKmail
17 Other

(Please tell us the number your top four favorite ideas for seminars through the survey described below. If you click on 17 on the survey, please go to the Forum area to add your suggestions for topics as well as for speakers.)

You get the idea. If you can speak at the Convention on any of these topics or something similar to these, please contact me (n8et@...). We have a good internet connection at the Convention site, so if you can do a talk remotely, let me know and we will see what we can work out.

Our tentative plans are to start the talks at 9 AM, and go to 5 with an hour for lunch. Sessions will start on the hour, with the initial 5 minutes for speaker set up, and the last 10 minutes of the hour as a break between sessions. We have the room to do two concurrent tracks, so we should be able to get 10 or 12 speakers. If you have a topic that needs more than an hour (for example -- a panel discussion on attracting new hams or building club membership), we can combine sessions and make a two or even three hour session.

There is a huge parking lot at the Convention site. If the weather is good we can do demos in the parking lot at lunch, like erecting and trimming a dipole or working a satellite, and there is room in the hall for displays if you have something you would like to display.

Feel free to contact me if you have an idea that you think would fit in the 2009 Convention. We want to make this new, different, and the best convention ever!

Hope to hear from a lot of you soon!

73 -- Bill -- N8ET, Convention Chairman
n8et@...

+++ A Survey is on the Division web site +++

There is a survey on the Great Lakes Division web site. It requests your input about the coming Division Convention. Your initial views and opinions will be very helpful in our planning for the convention. To take the simple survey, please go to www.greatlakes.arrl.org/. At the web site, click on the Survey/Feedback link to go to the survey.

The survey is in a click-on-the-answer format. If you wish to leave comments about the survey, the convention or anything else, mark the statement at the bottom of the survey, then click on the Enter My Forum icon and add your comments.

Thanks for your help with this survey.

+++ Is a Repeater a Repeater? +++

FCC needed 15 months to decide the thorny question, but it has concluded that a repeater is a repeater. The question that was posed to the Commission was whether digital repeaters are repeaters as analog repeaters are repeaters. The issue was that there is a brief delay in digital repeaters from the time they receive the input signal until they transmit the output signal.

Technically, of course, there is a very slight delay between receipt and retransmission of a signal for analog repeaters as well. The delay in analog repeaters is generally slightly less than with current digital repeaters.

The result of the FCC clarification of the definition of a repeater means that digital repeaters need to operate in the subbands designated for repeater operation. Some amateurs had argued the delay in relaying signals by digital repeaters qualified them for use outside of these subbands.

+++ Michigan QSO Party +++

The Michigan QSO Party (MiQP) will be held on Saturday, April 18 from 1200 EDST to 2400 EDST (1600Z Saturday until 0400Z Sunday UTC). Stations may operate the full twelve hours. The general objective of the MiQP is for amateurs outside of Michigan to operate

The objective of the Party for stations outside of Michigan is to work Michigan stations, only. For Michiganders, it is to work anyone. The objective for everyone is to have fun.

Rules are at http://www.miqp.org/Rules/htm. These include a description of operating categories, bands to use and multiplier factors.

+++ ARRL Legislative Agenda +++

There is an old saying that goes, "The Lord helps those that help themselves." This cannot be more true when it comes to the Legislative Agenda the ARRL Board of Directors adopted for the current, 111th Congress. Great Lakes Division Legislative Action Chair John Meyers, NB4K offers the following poignant comments related to what will be needed to move the agenda forward:

"With the changes in Congress and the House of Representatives we have our job cut out for us no matter how you look at it. With the changes in seat holders this means that a number of our Legislative Action Assistants (LAAs) will need to establish relations with the freshman Representatives or Senators or their aides who have taken over the offices. This will need to be done as soon as possible. The time is now to start making contact with these freshman Legislators and Congressman or their aides.

"Incidentally, you are not expected to travel to Washington to perform your duties. Instead, the following discussion assumes your visits with Congressmen or their aides will occur 'back home' in a local office.

"Be aware that we often are unable to meet directly with a Congressman. Instead, we may meet with one of his/her aides. This is fine. The fact that you met and the legislative position you supported during your meeting will be forwarded to the Congressman. The support you show during your meeting will provide much assistance to the ARRL Legislative Advocate in Washington, DC. Your meeting will prove to the Congressman that voters back home are interested in the legislation.

"If you have the opportunity to drop in to meet your Congressman's aide in a local office, consider introducing yourself. Tell them that later on you will doubtlessly contact them to make an appointment to visit the Congressman while he/she is at home, or to visit him (the aide) to discuss legislation that relates to Amateur Radio. Leave your Legislative Action business card and, if possible, a brief introduction to what Amateur Radio is and how it benefits the public."

By John Meyers, NB4K
Division Legislative Action Chair

+++ ARRL Legislative Agenda Booth +++

Stop by the ARRL Legislative Agenda Booth at its national convention at the Hamvention(r). You will be able to discuss the ARRL legislative agenda and learn how easy it can be to promote the actions the League intends to initiate during the current, 111th, US Congress. The booth will be in the ARRL convention area at HARA.

+++ Incoming 8th Area Bureau QSL Factoids +++

Jay Slough, K4ZLE the very competent Manager of the very effective 8th Area Incoming QSL Bureau reported the following activity for the bureau for the years 2003 through 2008. The year and the number of incoming

QSLs handled during it follow:

2008 -- 80,248 QSL cards
2007 -- 89,028 cards
2006 -- 111,734 cards
2005 -- 110,905 cards
2004 -- 138,236 cards
2003 -- 154,054 cards

Does anyone want to take a guess where we are in the current sunspot cycle?

+++ KYSAT-1 +++

Kentucky's first orbiting satellite - developed in part by students at

Western Kentucky University - has been selected by NASA to take flight in
mid-2009. Students at WKU teamed with students at other Kentucky universities to design and build KySat-1.

The satellite has Amateur Radio capabilities along with a camera and cell phone. Students in K-12 across Kentucky will be able to use the features of KySat-1 to take photos, see the temperature and check the status of status of satellite components. The intent is to interest youngsters in mathematics and the sciences.

The satellite project cost about $850,000. It is expected to remain in orbit for 18 to 24 months. KySat-1 is said to be unique because it was developed in conjunction with several universities and is NASA's first launch of a university-built satellite.

+++ What does ARRL do for Me? +++

Members and non-members alike have occasionally asked me what ARRL does for them that the beneficiary doesn't need to pay extra to get. It seemed to them that nearly everything the League does for members requires them to pay extra to obtain. The prevailing attitude among non-members also seems to be that unless they DX or contest, ARRL membership offers nothing to them.

Once one knows the facts, it is obvious that neither of these contentions is correct. With this issue of Words I begin a series of discussions of what ARRL really does. In these discussions you will learn which member benefits have fees associated with them and which member benefits are not associated with fees.

First, let me give a brief listing of services provided by ARRL. After doing this, I'll expand on one item that I believe is of interest to many members. The listing is below. No fees are charged to take advantage of the services marked "(n/c):"

- QST, Your Monthly Membership Journal
- Members-Only Web Access (n/c)
- Technical Information Service (TIS) (n/c)
- Outgoing QSL Service
- ARRL Field Organization including ARES? and several additional, important services(n/c)
- Operating Awards
- Representation of your Amateur Radio interests in Washington, DC to the FCC and Congress (n/c)
- Representation of your Amateur Radio interests in International Government Treaty negotiations. (n/c)
- A Regulatory Information Branch that provides information on FCC and regulatory questions; problems with antenna, tower and zoning restrictions; and reciprocal licensing procedures (n/c)
- Volunteer Counsel Program (n/c)
- Volunteer Examiner Coordinator program (n/c)
- Registered Amateur Radio Instructor program (n/c)
- W1AW broadcast bulletins and code practice (n/c)
- Preferred subscription rates for QEX, the ARRL Forum for Communications Experimenters
- Discounts on Continuing Education Program courses.

This listing is generally available at www.arrl.org/benefits.html#awards.

It is a fact that a number of what I consider the superficial services provided by ARRL, require the recipient to pay a few cents to several dollars. In most instances the fees are to pay for certificates and optional plaques -- the well-known and hard-sought "wallpaper" with which so many of us paper our shack walls.

Look, through the list of services for which fees are not assessed. These very importantly include the tough work ARRL does. As I will discuss later, these services relate to keeping our amateur frequency allocations, obtaining new frequencies, protecting our frequencies from invasion by interfering individuals or services, protecting amateurs' rights to pursue the Amateur Radio Service and generally protecting the value of the Amateur Radio license.

I ask you, first, to review the frequencies you use during your personal operating. The basic fact is: None of us would have use of these frequencies if it was not for ARRL. There is no charge by ARRL for the services that resulted in obtaining these frequencies.
+++ Triple Play Certificate +++

A long-time friend and member in southwest Ohio wrote me saying he thought the quality of the TPA certificate he earned was subpar. I forwarded the comment to HQ. Staff noted the certificate looked fine in proof copies and that a respected commercial printer had printed them. On checking through the standard run of certificates they, too found it to be below League standards. A new run of the certificates was made and replaced the original batch.

Everyone who received one of the earlier, off-quality certificates will automatically receive a replacement from the new run.

Communications from members do receive attention.

+++ DTV Presentation Available +++

With the switch from analog TV (ATV) to digital TV (DTV) having been delayed from its initial February deadline, an offer by Frank Sanor, WA8WHP of the Alliance (OH) ARC remains very viable. Club members developed a presentation that includes a PowerPoint show based on FCC DTV pages.

If you would like to receive a copy of the PP presentation for possible use with the pending switch to DTV, please contact Frank at wa8whp@.... Alliance ARC members who made and have given the presentation are Tom Steele KD8JRK, John Myers KD8MQ and Frank. John developed the power point from the FCC web site.

Congratulations to all clubs that helped educate the public on the switch to DTV. With the deadline for switching to DTV delayed until June, there is still time to help educate the technologically-deficient members of the public.

+++ Travel Schedule +++

The following is the schedule of travel by Division staff for the coming weeks. In addition to Vice Director Gary Johnson, KI4LA, Division Legislative Action Chair John Meyers, NB4K and 8th Area QSL Bureau Manager Jay Slough, K4ZLE will visit the events shown below.

Date......Event.....Division Representative(s)

SCHEDULE

19 Apr: Cuyahoga Falls, OH; Cuyahoga Falls ARC 'fest -- Gary, Jim
26 Apr: Athens, OH; Athens Co. ARA 'fest -- Gary
15-17 May: Hamvention(r)/ARRL National Conv. -- Gary, John, Jim
6 Jun: Grand Rapids, MI; Indpndnt Rptr Assoc. 'fest -- John, Jim
7 Jun: Chelsea, MI; Chelsea ARC 'fest -- John, Jim
20 Jun: Midland, MI; Midland ARC 'fest -- Jay, Jim
21 Jun: Monroe, MI; Monroe Co. RCA 'fest-- Jay, Jim
9 Jul: Mahoning Valley ARA Meeting -- Jim
16 Jul: A&F Committee meeting, Newington -- Jim
17-18 Jul: ARRL Board meeting, Newington -- Gary, Jim
26 Jul: Randolph, OH -- Portage ARC 'fest -- John, Jim
12 Sep: Findlay, OH -- GLD Convention -- All
13 Sep: Findlay, OH -- Findlay ARC 'fest -- All
19 Sep: Reynoldsburg, OH -- Ohio Section Conference -- Jim

TENTATIVE SCHEDULE

16 Aug: Cortland, OH -- Warren ARA 'fest -- John, Jim
20 Sep: Cincinnati, OH -- Gr. Cin. ARA 'fest -- Gary, Jim

17 Oct: Holland, MI -- Holland ARC 'fest -- Gary, Jay
18 Oct: Kalamazoo, MI -- K'zoo ARC/SMART 'fest-- Gary, Jay

NOTE: Please apply to have your hamfest/swap sanctioned well in advance of the date it will be held. The sooner it is sanctioned as an ARRL event, the sooner it will appear on the listing of hamfests and conventions on the ARRL web site. This will provide more publicity for the event.

587. FCC Delays SSB and AM Change

Yahoo group: GRARA
Date: 2009-04-01 16:25:27 UTC
From: Hank Greeb
Topic: 587 Message: 587

From: http://www.arrl.org/?artid=8829

FCC Delays SSB and AM Change (Apr 1, 2009) -- The FCC announced April 1 that the scheduled mandatory changeover of SSB and AM HF voice communications in the Amateur Radio Service has been delayed for one year; originally scheduled to begin April 1, 2009, the new changes will now take effect April 1, 2010. Under the plan, originally approved by Congress during the Clinton Administration, all Amateur Radio voice communication in the HF spectrum (3-30 MHz) will adopt digital voice technologies, reducing the bandwidth of typical QSOs from an average of 2.4 kHz to an average of 1.5 kHz. No particular protocol is specified -- amateurs can use any method they desire as long as it is digital. During the transition period, 20 meter nets have been assigned temporary frequencies in the 10 meter band for their analog (SSB or AM) operations; they have also temporarily been allowed to use up to 10 kW due to limited propagation on that band. Note that 160 meters is not included in this changeover, as it -- being below 3 MHz -- is an MF, rather than an HF band. As previously announced by ARRL, QSLs for 10 meter contacts using the temporarily authorized higher power will not count toward DXCC. For more information, please see http://www.arrl.org/news/stories/2009/04/01/FCC_Delay/

588. Deep Solar Minimum

Yahoo group: GRARA
Date: 2009-04-01 22:57:35 UTC
From: Hank Greeb
Topic: 588 Message: 588

Note, even though this one is dated April 1, 2009, it isn't an April Fool joke - unless NASA is forging data. Anyone have data to contradict these findings?

==========

April 1, 2009: The sunspot cycle is behaving a little like the stock market. Just when you think it has hit bottom, it goes even lower.

2008 was a bear. There were no sunspots observed on 266 of the year's 366 days (73%). To find a year with more blank suns, you have to go all the way back to 1913, which had 311 spotless days.. See:
http://science.nasa.gov/headlines/y2009/images/deepsolarminimum/centuryplot_gif2.gif
Prompted by these numbers, some observers suggested that the solar cycle had hit bottom in 2008.

Maybe not. Sunspot counts for 2009 have dropped even lower. As of March 31st, there were no sunspots on 78 of the year's 90 days (87%).

It adds up to one inescapable conclusion: "We're experiencing a very deep solar minimum," says solar physicist Dean Pesnell of the Goddard Space Flight Center.

"This is the quietest sun we've seen in almost a century," agrees sunspot expert David Hathaway of the Marshall Space Flight Center.

Glad I don't have to depend on solar activity to QSO on CQ100! I'd have a long gray beard before I ever got WAS if I waited for the elusive: "Cycle 24" all you nay-sayers keep fantacising about.

594. 2009 Sgteelcase Dualthon Communications

Yahoo group: GRARA
Date: 2009-04-06 18:54:18 UTC
From: Jack
Topic: 594 Message: 594

Hi all,

I received the following email, via our webmaster, asking to communications help at the Steelcase Duathlon event on Sunday, 26 April. Please let my know soon if you can help, so that I can get back to them

Jack, AB8ND

Hello,

My name is Greg Roan from 3 disciplines Racing. We host events all over the state of Michigan and are looking for some course support from the ham radio club. Our event is at the Steelcase complex in Kentwood, MI on Sunday, April 26th, 2009. This would entail having some operators on the course and a home base set up by our race directors tent. Please let me know if this is something that your club would be interested in or not and we can go from there with more specifics of the event if you are interested. Thank you for your time and I look forward to hearing from you.

Happy Training & Good Health!

From: Hank Greeb
Topic: 600 Message: 600

Remember, GRARA plans to activate W8DC for the MiQP next Saturday, noon to midnight. There will be plenty of ops with HF privileges, so come on down regardless of whether you have a general class license or higher, or, even if you're just interested in ham radio.

If you can't make to W8DC, why not fire up your rig and make a few Q's from home?

N8XX will be operating from home as K8MAD - the Mad River Radio Club call.

**** *2009 **MICHIGAN** QSO PARTY*

**

Just frying up a little "spam" to remind you all of the 2009 Michigan QSO Party. This years MiQP will be next weekend on April 18^th.

We would like to invite you all to get on the air and have some fun. Be it a serious effort, or just passing out some Q's , your participation will be appreciated.

We are expecting a good level of "in state" activity this year. There will be a good mix of fixed, mobile, and portable stations to make contact with.

The details are listed below:

Date /Time: Michigan QSO Party, sponsored by the Mad River Radio Club, from 1600Z April 18^th until 0400Z (19th) Stations may operate the full 12 hours. (12 noon on the 18^th until 12 midnight local Michigan time)

Modes and Categories: Phone and CW on 80/40/20/15/10 meters. Single-op, multi-op, mobile and Emergencies Operations Center (EOC) and ?Rookie? categories. Single-op entries are categorized by output power, QRP (5W or less), Low Power (100W or less), and High Power (greater than 100W).

Multipliers: Work stations once per band and mode. Work other states and Michigan Stations. MI to MI QSO's are allowed. Work portables and mobiles again as they change counties, state or province.

Exchange: Exchange QSO number and location (county for MI stations, state/province or "DX" for others).

Scoring: One point per phone QSO, two points per CW QSO. Count multipliers once per mode. Multipliers are MI counties for all entries, plus states & provinces for MI entries only. Final score is total QSO points times total multipliers.

Freqs: Suggested frequencies: CW-3545, 7045, 14045, 21045, 28045; Phone-3800, 7200, 14250, 21300, 28450.

Log Submittal: Mail logs no later than 30 days after the contest to: Mad River Radio Club, c/o Dave Pruett, 2727 Harris Road,

Ypsilanti, MI 48198 or via e-mail to logs@...

More Information: For complete rules, along with free logging software, log and summary sheets, and Fliers see http://www.miqp.org <http://www.miqp.org/>

From: Jack
Topic: 602 Message: 602

The MI QSO Party is this Saturday, W8DC will be activated and operating from the Red Cross radio room.
We will be operating in the EOC (Emergency Operations Center) class and hopefully we will be operating (2)
stations. The GAP vertical has been installed (big thank you to Tom, N8DGD for doing most of the work) giving
the club two multi band antennas.
Come on down to the shack, no matter what your license class there will always be an open seat to operate
a station, log or even help us hear those hard to copy calls. As many of us are Morse challenged, we will
probably be operating SSB, but would sure welcome anyone that wants to operate CW (on my knees saying please).
The Red Cross door will probably be locked in the evening - we will monitor the 147.26 repeater

Hours (our time) are 12 noon until 12 midnight (if we can stay awake that long)
Saturday 18 April

Comments:

Fun contest, even though Murphy struck. For the Ohio QSO Party I had loaned my Computer to rig interface to a friend but, alas!, didn't get it back. So, I cobbled another together with parts on hand. Unfortunately, I didn't check it out prior to the event. It was DOA. I looked it over, but didn't see anything wrong. So, I hooked up my ancient bug (circa 1955, hadn't been used since the 80's). It had corroded contacts, and simple burnishing didn't do much. Brought out the trusty J-38, and did the pump handle thing. It's amazing that 1800's technology still works in the 21st Century! Even at 1 p.m. 20 metres was all but dead, so quick move to 40. About 4 p.m. I looked over the computer interface, tried it again, and, LO! And Behold! It worked. But, after about 10 Q's it went into an oscillation and wouldn't stop - made a horrible noise in the rig, and probably on the air. After unhooking it and reinstalling it, the same problem, so back to the trusty J-38. At that point I didn't determine if it was the USB to Com port device, or the Com port to rig which I had assembled. The trusty J-38 worked great!

Thanks to all who slowed down to my hand sent hand keyed speed, even though I could copy faster. It's nice to see that a rookie would have been treated well.

K8MAD was an interesting call, especially on phone. People would do a double take, and I'd say I was the "mad man from Michigan."

606. Anyone for QRP TTF 2009?

Yahoo group: GRARA
Date: 2009-04-20 22:45:03 UTC
From: Hank Greeb
Topic: 606 Message: 606

Anyone for QRP To The Field 2009 this coming Saturday? Details of this event can be found at

http://www.zianet.com/qrp/qrpttf_002.htm

The "Theme" of this year's event is "The Great Depression" - and bonus points/multipliers are given to expeditions to sites build by the WPA/CCC, etc. during the 1930's The idea is to operate as a portable station at or near such a site.

I haven't settled on a site - but I do know that Riverside Park in Grand Rapids is the site of a CCC camp which was built in the 1930's. Also, there's a depression era mural on the wall of the Post Office in Rockford. And, I believe that parts or all of Fallasburg Park, and perhaps Myers Lake Park, both in Kent County, might have been built during the 1930's.

Please let me know of your interest, and suggestions for operating sites. The current plan is to operate from near the Rockford Post Office - along the White Pine Trail, but this is very tentative. A "better" WPA/CCC site would be welcomed.

Pardon the late solicitation - the organizer of the event had preliminary info a couple months ago, but didn't

607. WQ8RP during QRP-TTF this Saturday

Yahoo group: GRARA
Date: 2009-04-22 23:29:54 UTC
From: Hank Greeb
Topic: 607 Message: 607

QST QST QST - Attention all GRARA Members and other Michigan Hams!

This is to advise that KA5S, N8XX, KD8HNF, and as many suckers.... errr.... QRP operators as we can muster, will be operating QRP TTF this Saturday, April 25, from about 11 a.m. (? SNAFUs caused by operator/technician incompetence - and possibly unforeseen problemmes). We'll probably start out on 20 and 40 metres, and switch to 80 and 40 metres as daylight fades. Usual QRP CW frequencies, 3560KHz, 7030KHz, 14060 KHz, all ? QRM.

"Probable" times

20 metres 1500Z to about 2000Z (That's 11 a.m. to 4 pm Eastern Daylight time)
40 metres 1500Z to about 2259Z (That's the entire contest period, 11 a.m. to about 6:59 p.m. Eastern Daylight time)
80 metres 2001Z to about 2259Z (Thats about 4:01 p.m. to about 6:59 pm. Eastern Daylight time.)

Note that QRP operations on CW are generally rather slow, so if you wish to try some QRS CW, come on out, no matter how rusty you may be on code. QRP ops are known to slow down to whatever speed an operator is sending.

Since this is a fun event, you may call 616-828-9663 if you wish a special time for a sked on 80 metres - Michigan Stations probably won't be able to be heard on 40 metres due to lack of sunspot which makes NVIS not very good on 40 metres these daze)

If you're in the vicinity of Lowell Michigan, please join the fracas - we'll be operating from Fallasburg Park, near Lowell, 1124 Fallasburg Park Dr NE, Lowell, MI?. An interactive map from which you may receive driving directions is at http://tinyurl.com/d5qc83

Any any all operators are cordially invited to join us. Please Lettuce no via return mail to n8xx@..., or call my cell phone number listed above.

If you can't join us, please operate from the field, preferably near a facility construction during the 1930's by the CCC or WPA, And if you can't get outside, that's fine too, there's a "home station" category. Details, rules, etc, can be found at http://www.zianet.com/qrp/qrpttf_002.htm

611. Meeting this Friday

Yahoo group: GRARA
Date: 2009-04-29 14:57:18 UTC
From: Jack Kunnen
Topic: 611 Message: 611

Hi all,

The May meeting for GRARA will be this Friday, 2 May, 7 pm with a coffee clutch at 6:30.

Tom Bosscher, K8TB (Fox Hunter extraordinaire) will be giving a talk on Fox Hunting should be excellent.

Hope everyone can attend, if not remember the June meeting will be held at the Hudsonville Fairgrounds following the IRA Roadkill Chili dinner.

Jack, AB8ND

Is it me? There seems to be something about the weekend following Mother's Day that has A LOT of events going on. Besides Hamvention and the Flat River Trunk Sale that I would like to attend if it wasn't that I'll be in Dayton, there seems to be all sorts of events, most non-ham related, going on that same day. I would consider attending some of these other events if it wasn't for the fact I'll be in Dayton and can't possibly attend a half a dozen things on the same day even if I wasn't in Dayton!

Oh, and as far as the "reminder", this is the first I've heard of the trunk sale.

624. SOLAR CYCLE 24 TO PEAK IN MAY 2013

Yahoo group: GRARA
Date: 2009-05-17 12:12:11 UTC
From: Wilson
Topic: 624 Message: 624

http://www.spaceweather.com/headlines/y2009/08may_noaaprediction.htm?PSESSID=9c1qmjl4b4mfl0v00d2pvm1od5

NOAA Predicts Solar Cycle 24

May 8, 2009: A new active period of Earth-threatening solar storms will be the weakest since 1928 and its peak is still four years away, after a slow start last December, predicts an international panel of experts led by NOAA's Space Weather Prediction Center. Even so, Earth could get hit by a devastating solar storm at any time, with potential damages from the most severe level of storm exceeding $1 trillion. NASA funds the prediction panel.

Solar storms are eruptions of energy and matter that escape from the sun and may head toward Earth, where even a weak storm can damage satellites and power grids, disrupting communications, the electric power supply and GPS. A single strong blast of solar wind can threaten national security, transportation, financial services and other essential functions.

The panel predicts the upcoming Solar Cycle 24 will peak in May 2013 with 90 sunspots per day, averaged over a month. If the prediction proves true, Solar Cycle 24 will be the weakest cycle since number 16, which peaked at 78 daily sunspots in 1928, and ninth weakest since the 1750s, when numbered cycles began.

The most common measure of a solar cycle's intensity is the number of sunspots-Earth-sized blotches on the sun marking areas of heightened magnetic activity. The more sunspots there are, the more likely it is that solar storms will occur, but a major storm can occur at any time.

"As with hurricanes, whether a cycle is active or weak refers to the number of storms, but everyone needs to remember it only takes one powerful storm to cause expensive problems," said NOAA scientist Doug Biesecker, who chairs the panel. "The strongest solar storm on record occurred in 1859 during another below-average cycle similar to the one we are predicting."

The 1859 storm shorted out telegraph wires, causing fires in North America and Europe, sent readings of Earth's magnetic field soaring, and produced northern lights so bright that people read newspapers by their light.

A recent report by the National Academy of Sciences found that if a storm that severe occurred today, it could cause $1-2 trillion in damages the first year and require four to ten years for recovery, compared to $80-125 billion that resulted from Hurricane Katrina.

The panel also predicted that the lowest sunspot number between cycles-or solar minimum-occurred in December 2008, marking the end of Cycle 23 and the start of Cycle 24. If the December prediction holds up, at 12 years and seven months Solar Cycle 23 will be the longest since 1823 and the third longest since 1755. Solar cycles span 11 years on average, from minimum to minimum.

An unusually long, deep lull in sunspots led the panel to revise its 2007 prediction that the next cycle of solar storms would start in March 2008 and peak in late 2011 or mid-2012. The persistence of a quiet sun since the last prediction has led the panel to a consensus that the next cycle will be "moderately weak."

NOAA's Space Weather Prediction Center (SWPC) is the nation's first alert of solar activity and its effects on Earth. The Center's space weather experts issue outlooks for the next 11-year solar cycle and warn of storms occurring on the Sun that could impact Earth. SWPC is also the world warning agency for the International Space Environment Service, a consortium of 12 member nations.

As the world economy becomes more reliant on satellite-based communications and interlinked power grids, interest in solar activity has grown dramatically. In 2008 alone, SWPC acquired 1,700 new subscription customers for warnings, alerts, reports, and other products. Among the new customers are emergency managers, airlines, state transportation departments, oil companies, and nuclear power stations. SWPC's customers reside in 150 countries.

"Our customer growth reflects today's reality that all sectors of society are highly dependent on advanced, space-based technologies," said SWPC director Tom Bogdan. "Today every hiccup from the sun aimed at Earth has potential consequences."

625. HR 2160- A bill that will help all Amatuers

Yahoo group: GRARA
Date: 2009-05-17 13:54:16 UTC
From: Wilson
Topic: 625 Message: 625

From this weeks ARRL News Letter.

Each local club, ARES, RACES, and SATERN organization should work on this at there monthly meetings to encourage it's members to support this bill in the way that the ARRL has out lined below. It will take just a few minutes of each Amateur's time to complete and send their support for this bill.

This bill will help us with tower & antenna restrictions that we are currently fighting with in many of the communities through out the country. In allot of communities they are getting to be more restrictive very day.

Go to this URL to read the HR 2160 Bill: http://frwebgate.access.gpo.gov/cgi-bin/getdoc.cgi?dbname=111_cong_bills&docid=f:h2160ih.txt.pdf

Many Amateurs are not members of the ARRL, and are not aware of this opportunity to voice their approval for this bill in such an easy way. So please forward this on to other Amateurs, clubs, and organizations you know.

ARRL SEEKS MEMBER SUPPORT FOR HR 2160

To support HR 2160 -- The Amateur Radio Emergency Communications Enhancement Act of 2009 -- the ARRL is asking its membership to contact their members of the US House of Representatives with a request to become co-sponsors of this significant piece of legislation.

"Getting a bill successfully through Congress is a formidable task -- one that is going to require the involvement of every ARRL member," said ARRL Regulatory Information Manager Dan Henderson, N1ND. "Working with our Washington consulting firm Chwat & Co, we are laying a dynamic approach that will allow us to make our case most effectively. We have developed a strategy to maximize our impact when dealing with each member of Congress."

Since the anthrax scare that followed the 9/11 attacks, all incoming mail to Congress is delayed anywhere from four to six weeks while it is screened. This means using normal US Mail is no longer an effective method of letting Congress hear your voice. While e-mail is convenient, it is also not effective, due to the large volume of e-mail that each Congressional office receives.

"To ensure that ARRL members' letters are quickly and expediently received by Congress, our strategy is to ask ARRL members send their letters directly to Chwat & Co," said Henderson. "Chwat's staff will sort the letters by Congressional district and hand-deliver them to the

appropriate House offices, providing a direct point of contact with the Congressman and their staff. This personal contact gives us the chance to provide not only letters from constituents, but information from the ARRL on why this legislation is important."

The ARRL has provided a sample letter for League members to personalize and send to their Congressional representative <http://www.arrl.org/news/files/DearMemberOfCongressHR2160.doc>. "Personalized letters make a better impression than a standard form letter or petition," Henderson explained. You can find the name and address for your member of Congress on the ARRL Members Only Web page <http://www.arrl.org/members-only/>.

Once it has been personalized, ARRL members should send their letter to Chwat & Co using one of three methods:
* As a signed attachment to an e-mail <arrl@...>
* As a signed fax to 703-684-7594
* As a regular letter to John Chwat, Chwat & Co, 625 Slaters Ln, Suite 103, Alexandria, VA 22314

If you choose to e-mail your letter, please send it as an attachment to the e-mail instead of having it be the text of the e-mail. This allows the letter to be easily printed and delivered. Should you decide to draft your own letter supporting HR 2160 instead of editing the sample, Henderson asked that you please remember a couple of things:
* Identify the bill by number and title: HR 2160 -- The Amateur Radio Emergency Communications Enhancement Act of 2009
* Keep the letter brief and on topic -- one page at the most
* Ask your congressional representative to consider becoming a cosponsor
* Thank them for their consideration

"Simple is better when making this kind of request to a representative," said Henderson. "They and their staff are looking to gauge interest and support for the bill. A lengthy letter that strays off-topic can detract from the focus of asking for support for the legislation."

Should you decide not to send your letter to Chwat & Co but directly to your Representative, it is still important to send a copy of your correspondence to Chwat & Co. This allows Chwat to discuss accurately with the Congressman and their staff the amount of support for the bill in each individual district. "There is strength in numbers," Henderson added.

Aside from bill sponsor Representative Sheila Jackson-Lee (TX-18), the ARRL is fortunate to already have six additional members of Congress who have signed on as co-sponsors of HR 2160 -- Madeleine Bordallo (Guam), Brett Guthrie (KY-2), Mary Jo Kilroy (OH-15), Zoe Lofgren (CA-16), Blaine Luetkemeyer, (MO-9) and Bennie Thompson (MS-2).

"We congratulate ARRL Great Lakes Division Director Jim Weaver, K8JE, and his grassroots legislative action team in Kentucky for securing the support of Representative Guthrie -- the first new co-sponsor of the

bill," Henderson said. "It shows that our grassroots effort can work!"

You may be asking yourself "What should I do if my Representative has already signed on as a co-sponsor for HR 2160?" The answer is simple: Thank them for their support. If your Congressman is one of those listed as a co-sponsor, please send them a letter thanking them for their support. Use the same contact information for Chwat & Co. "It is important to convey your appreciation to your Representative when they sign on as a co-sponsor or support the bill," Henderson explained. "That simple 'thank you' may help open the door the next time their help is needed."

Once you have prepared and sent your letter supporting HR 2160, your job is not over: Feedback is an important part of the process. "What your Congressman has to say in regards to your contact can provide the ARRL with important information as we try to push our bill forward," Henderson noted. "This feedback can possibly help us identify potential new support for the bill or a weakness in the legislation we may need to address."

When you receive a response from your Congressman, please forward a copy to the Regulatory Information Office at ARRL Headquarters via e-mail <reginfo@...> or hard copy to Regulatory Information, ARRL, 225 Main St, Newington, CT 06111.

"HR 2160 presents the Amateur Radio Service with a unique opportunity -- but also carries with it the important responsibility of making your voice heard," Henderson summarized. "HR 2160 stands as the first step in trying to address the long standing problem of extending the protections afforded Amateur Radio operators under PRB-1 to deed restrictions and covenants <http://www.arrl.org/FandES/field/regulations/PRB-1_Pkg/prb-1.pdf>. To be clear, passing HR 2160 is not going to achieve that goal right away. But it will help lay the ground work by assessing the impact such restrictions have on our ability to train for and respond to disasters and other emergencies."

626. Searching for gear...

Yahoo group: GRARA

From: Hank Greeb
Topic: 627 Message: 627

A jump on the usual morass of indecision about Field Day - how about thimking about an order for Field Day T-Shirts for 2009, and getting $$'s to me by the June 5 meeting?

Description of these shirts can be found at

http://www.arrl.org/catalog/?item=NO-0515

2009 Field Day T-Shirts--$12.95/ea Now Shipping!
Soft, heavy weight cotton. Hunter Green (unisex sizes).

Small #0515-S
Medium #0515-M
Large #0515-L
X-Large #0515-XL
2X-Large #0515-2XL
3X-Large #0515-3XL
4X-Large #0515-4XL Temporarily out-of-stock

If we get 6 or more orders, the shipping will be $12 for the lot. Therefore I suggest we collect $15 for each T-Shirt, and the change will be thrown into the treasurer's pot.

What say fellow members of GRARA?

630. Anyone want an AL-80A amplifier?

Yahoo group: GRARA
Date: 2009-05-22 17:56:40 UTC
From: Hank Greeb
Topic: 630 Message: 630

I have a brand new Ameritron AL-80A amplifier which I bought at least 18 years ago, perhaps longer, which I've only plugged in once, just after receiving it from the vendor. I'm in process of rejuvenating the HV electrolytics, and hope to have it in running condition by the Hudsonville Hamfest/Swap.

If anyone would like to take it off my hands prior to that event, I'd sell it for $800, Cash or certified check.

Repondez s'il vous plait via private message.

632. Midland Hamfest, June 20

Yahoo group: GRARA
Date: 2009-05-24 12:47:45 UTC
From: Hank Greeb
Topic: 632 Message: 632

The Midland Amateur Radio Club is pleased to announce that the date and location for the 35th Annual Midland Hamfest and Computer Show has been set. The Hamfest will take place on Saturday, June 20th, 2009, which is the weekend prior to Field Day. Due to scheduling problems, we've changed our venue to the Midland Salvation Army building, 330 Waldo St, in Midland. Though somewhat smaller than the facility at the Fairgrounds, we?re excited about the move to the Salvation Army building. The new facility will allow us to move the kitchen and socializing area off the display floor proper, and at the same time provide us with space to present forums of interest to the Amateur Radio community, allowing us to become a more full-featured amateur radio event.

We are also proud to announce that Great Lakes Division Director Jim Weaver, K8JE and Eighth District Incoming QSL Bureau Manager Jay Slough, K4ZLE, have announced their intention of attending this year's Hamfest.

We would like to take this opportunity to invite Amateur Radio Operators throughout Michigan to this year's Hamfest. If you merely want to shop around or take the opportunity to meet with old friends or new acquaintances, this is the perfect setting, and the admittance remains at a low $5.00. If you?d like to reserve a table, or to participate in the trunk sale area, the price again remains the same: $5.00 per table, or $5.00 for trunk sales. Typically we have over 400 enthusiasts in attendance and this year we plan an aggressive publicity campaign to bring in even more attendees than in past years. This, coupled with our new seminars and the appearance of the Great Lakes Division Director, should insure this year?s event will be a success.

And, of course, we will be offering a VE licensing session; registration starts at 11:00 am, and testing begins at noon. Walk-ins are always welcome.

One last item, we?ve received word that Dentronics will be present. Word has also reached us that Tower Electronics is planning to attend, though we have not confirmed this at the present time.

For further information or for table reservations, mail us at MARC Hamfest, P. O. Box 1049, Midland, MI 48641-1049. You may also contact the Hamfest Committee Chairman, Keith Johnson, KB8SOE, at (989) 488-4337, or via e-mail at kb8soe@...

633. Help needed for Bike MS 2009 - June 13 & 14

Yahoo group: GRARA
Date: 2009-05-25 12:51:35 UTC
From: Hank Greeb
Topic: 633 Message: 633

For many years I've help with the MS-150 and predecessors in SW Michigan, and last two years in the Bike MS rides in Western Michigan. These events are great public service events - and generally well received by hams and by the public. Some 400 to 700 (or more) bikers participate. This year's event will start from Hope College on both June 13 and 14, the first day going in a loop to the south, the second going to the north.

Ham radio communications really helps - bikes break down, people get overstressed due to lack of conditioning, some (usually rare) times there's an accident requiring medical attention. Communications via ham radio make quick response.

Why not tell the MS people to use cell phones or other commercially available communications? Well, for one thing, cell phones don't work in many of the outlying areas which are covered by the routes. Second, cell phones, when they do work, are one to one communication - you can't do a "break priority" during a conversation.

As of today, it appears that there are some 16 hams signed up. And, there are 10 "open" spots available.

If you're available for either (or both) Saturday, June 13, and/or Sunday, June 14 for 4 to 8 hours, please let Fred Moses, W8FSM know at fred@...

Note, if you're available for both days, the MS-150 will put you up in a dorm room at Hope College on Saturday evening. Please let W8FSM know your need in this respect.

634. Help us find Tom and Sheila (The Fox) at Saturdays IRA Hamfest.

Yahoo group: GRARA
Date: 2009-05-31 19:11:00 UTC
From: mike_w8der
Topic: 634 Message: 634

Be sure to bring your fox hunting equipment to Saturday's IRA Hamfest at the Hudsonville Fairgrounds. For the second year in a row, Tom (K8TB) and Sheila (K8AJ) Bosscher will be challenging us all as the "fox team" in the IRA Hamfest Fox Hunt. Last year, they really gave us a run for our money. This year promises to be even more imaginative. It's alway a lot of fun.

Be sure to join us! Discussion session at noon, Check in at 12:45 and start at 1:00. The winner will be the team that travels the least number of miles to find the fox before 3:00 PM.

For more information and rules, goto http://www.rookiefox.com

635. Meeting Friday

Yahoo group: GRARA

From: Jack Kunnen
Topic: 635 Message: 635

Members and friends

A reminder that this Fridays, 5 June meeting of GRARA will be held at the Hudsonville Fairgrounds after the IRA Roadkill chili potluck. We will be making plans for Field Day and the September Swap.

VE's the GRARA team will be doing the testing at the IRA swap and I know our fearless leader can use help.

The 1st Fox hunt will be held Saturday after the swap (and VE testing). If you don't have equipment come anyway you can pair up with others, the more opinions on the received signals and locations the better.

Hope to see y'all at the meeting, swap and hunt

Jack, AB8ND

636. Fox Hunt at IRA Hamfest Saturday

Yahoo group: GRARA
Date: 2009-06-03 22:41:59 UTC
From: mike_w8der
Topic: 636 Message: 636

You know, we had a lot more chatter about the upcoming fox hunt when we had bob writing rhymes for us. Live and learn. Be sure to bring your fox hunting equipment and skills to the fox hunt Saturday. Fox Hunting discussion at 12:00 with Tom Bosscher, Check-in at 12:45 by the ticket gate and the hunt should start very close to 1:00 PM. This is the second year GRARA has helped with this fox hunt. Tom Bosscher and Sheila will be the Fox team again this year. This should be a lot of fun. No equipment, try to team-up with others at the Hamfest. The more hams, the more fun!

637. Will GRARA take the IRA Fox Hunting championship next Saturday?

Yahoo group: GRARA
Date: 2009-06-03 23:32:32 UTC
From: mike_w8der
Topic: 637 Message: 637

At last year's IRA Hamfest, Jack and his team came within a cat's eyebrow of winning the hunt. Can we make up the difference this year and bring home the prize? You bet we can!

There are rumors out of the Holland Club that someone is going to tie Laryn to the starting gate at the Hudsonville Fairgrounds. With Tom and Sheila as the fox team, the victory is wide open.

Victory is GRARA's turn. Good luck to all the Grand Rapids teams. (I can just see the headlines now!) Go Gra!

640. Variac (or Equivalent) anyone?

Yahoo group: GRARA
Date: 2009-06-04 21:12:15 UTC
From: Hank Greeb
Topic: 640 Message: 640

Does anyone have a Variac (or equivalent variable autotransformer) which I could borrow? Mine seems to have lost the carbon contact on the rotating part, and provides zero voltage at any part of the rotation of the dial.

I'm trying to make sure an AL-80 amplifier has good capacitors in the HV supply part of it. I was planning to "soak it in" at 30 volts up through 120 volts so if they needed reforming from lack of use, they'd reform their dielectric rather than becoming a short circuit.

Please advise. Also, is there an electric shop in town which could provide parts for my variac? All I need is a small carbon brush, and probably a spring, and I'm 99.44% sure my variac would work.

Hank, Have you ever looked at the selection of iron-on letters and numbers available at stores like Hobby Lobby or Micheal's Arts & Crafts? They have quite an array of different colors and fonts, that compensate for the different shirt background colors. At those 2 stores and Walmart, in the computer supply sections, I saw special T-shirt transfer packets that include transfer paper for specific color shirts, either for white, and another separate package for dark color shirts, for ink jet or a separate pack for laser printers. Some packs included a code # to go to their website, and download multiple fonts and clip art, for additional art design capabilities. Check it out, the packs were less than $10.00.

PS. You didn't say whether you got any response to your Variac repair issue or not, just wondering.

You're on! Since they are black, the iron ons won't work. They're only
good for white or neutral colours.

646. RE: [GRARA] Results of the IRA Hamfest Fox Hunt

Yahoo group: GRARA
Date: 2009-06-08 13:50:31 UTC
From: Gary W8GL
Topic: 644 Message: 646

Mike,

Glad to hear the Fox Hunt was a success. I realize that it was planned on the day of the swap intentionally, to take advantage of many hams already in assembleage in the area, but I heard many comments in conversing with swap attendees, that they thought it would have been more condusive for them to participate in the fox hunt, if you had started it a couple-three hours AFTER the swap was all over, including tear-down, or else, on a non-swap day, all together. Many swap goers, especially the vendors, had prior commitments with packing up what didn't sell, table tear-down, and getting lunch, after an early-bird set-up call, minimal breakfast, and personal hygene time that morning, and just plain TOO EXHAUSTED to participate! I, for one, being a vendor, would have liked to participate, but couldn't, for those very reasons. Just some constructive criticism, for you to ponder, when planning your next fox hunt.

Subject: [GRARA] Results of the IRA Hamfest Fox Hunt

There is nothing better than foxhunting on a Saturday afternoon in June. Tom and Sheila Bosscher did a masterful job of playing the fox and keeping everyone smiling. Although there were some super tired hams by 3:00 in the afternoon, it was a real good way to cap off the IRA hamfest. Click the attached link to see the surprise results and a map of the final search area. Thanks to Tom and Sheila for the super fun hunt.

There seems to be somewhat of an error, here!!!

The second placers, in reality, should be credited to HARC...and not GRARA..

You see, all three of these are in my code class. And since the coce class is at HARC....their points belong to HARC

So from what I can figger --these points DO BELONG TO THE H A R C group.

Is there anyone who can't understand that?????

I'm sure Mike understands, and if he doesn't, I'm going to take his 13 WPM certificate away from him.

Sorry GRARA!!!!!!.

649. Field Day Organizational Meetings - June 10 & 24 7 p.m., Radioroom

Yahoo group: GRARA
Date: 2009-06-09 07:21:48 UTC
From: Hank Greeb
Topic: 649 Message: 649

I'll be at the Open Radio Room on Wednesday, June 10 and 24 for settling questions about the Field Day operation. The Open Radio room is held at W8DC, at the Red Cross building, 1050 Fuller Ave NE (one block south of Leonard St.) in Grand Rapids.

As previously announced we have been invited to K8IHY's FB QTH, including his hanger/barn for FD 2009.

The address is 1840 BYRON RD, HUDSONVILLE, MI 49426, a few miles from Rivertown Mall in Grandville, and a few miles from Hudsonville.

I'm looking for "crew chiefs" for the SSB and CW stations - I've identified two likely suckers..... errr, candidates, but if you'd like to volunteer please contact me and/or be at the meeting on Wednesday.

Hope to see a good turnout on Wednesday, if not, I'll be twisting arms :)

650. GRARA Yahoo Group will be down for maintenance on Thursday, June 11th. see below

Yahoo group: GRARA
Date: 2009-06-10 02:39:15 UTC
From: mike_w8der
Topic: 650 Message: 650

This Thursday (June 11th, 2009) Yahoo! Groups will be undergoing maintenance. During this time 50% of groups will be unavailable for up to an hour. The outage is scheduled to begin some time between 2 and 3 pm PT (10-11 pm GMT).

While the maintenance is going on, all features of affected groups, including messages, photos, attachments, etc. will be completely unavailable. However, once the outage concludes, any messages that were posted to these groups via email during this downtime will be distributed.

This is Thursday only.

Topic: 652 Message: 652

We had quite a bit of interest in Field Day Wednesday Evening at the Open Radio Room. We also had a visitor from Monroe, WB8FBG, who was taking Red Cross courses at Calvin College, and decided that she would rather visit us than stare at the walls of a dorm room at the college!

She gave our web site a W8DC.org kudos - so we know it is effective in publicity.

I've put a "Field Day Check List, revision 0" in the files area of this reflector. Please review it and let me know your interest in helpng out, or advise what we are missing for the best possible Field Day.

From: Gary W8GL
Topic: 657 Message: 657

Hi Hank,
Just to let you know, Gary RX your message last night.
Incidently, my German Shorthair Pointer, Anke, got sprayed in the face last night by a skunk. This is the second time this has happened. Does anyone know of an EFFECTIVE cure to get rid of the naucious odor? I went online, and they said to use tomato juice. I didn't have any on hand, but I did have three cans of Cambell's Condensed Tomato Soup in the cupboard. I made a bathwater sollution, but it didn't entirely erradicate the putrid smell. She didn't like the acidity in the tomatoes burning her eyes, either. Would white or apple vinegar work? I'm desparate. The first time she got sprayed, the smell hung around for two weeks!
Sorry about getting off ham subjects, but I wanted to call on your elder astute dog owner knowledge.

Hi, Mike

I'm having trouble with my mail service, so I need to ask whether you received my message from last evening. I'm sending this from the yahoogroups web site, which I know works. I've had reports that my ISP is holding messages for periods of 3 hours to infinity.

Nice job on the web site.

I saw this recipe on a couple of sites

RECIPE FOR REMOVING SKUNK SMELL FROM YOUR DOG

You will want to use this formula for removing the skunk smell from your dog:This formula gets rid of the odor (it doesn't just mask it) and it changes the chemical properties of the skunk spray to break it down.

You will need the following from any local grocery or drug store:

* 1 QT. OF 3% HYDROGEN PEROXIDE

* 1/4 CUP OF BAKING SODA

* 1 TEASPOON OF A LIQUID SOAP (I recommend DAWN, it breaks down oil and grease well)

MIX AND IMMEDIATELY APPLY TO YOUR DOG. BE VERY CAREFUL NOT TO GET THE MIXTURE IN YOUR DOGS NOSE, EYES ,EARS OR MOUTH.

661. VHF CW activity in West MI

Yahoo group: GRARA
Date: 2009-06-16 19:23:25 UTC
From: Joe Veldhuis
Topic: 661 Message: 661

Speaking of CW...

There has been some discussion about starting up some CW activity on VHF in the area. Not FM-modulated code mind you, but actual "A1A" signals. I made a purely random QSO with an op in GR on 2m a few days ago, so there is some activity already.

I would propose that anyone interested begin making a proactive effort to monitor the FISTS frequencies of 50.058 and 144.058 whenever they're by the rig. These are probably the closest thing to a "calling frequency" on these bands for CW. I will personally try to monitor 6m in the evening hours, with the beam facing east from central Ottawa county, assuming I'm not working some other band/mode. If the band's open I may be running digital modes slightly above 50.290.

Note that you're not just confined to the local area with this. You can expect to get out about 200 miles on a typical summer day on 2m, and 6m opens up for 700-2000 mile paths nearly every day. Contacts from W8/VE3 to Europe have been reported on 6 CW the last few days.

On a simlar note, if you have some gain in your antenna system, listen very closely while you're calling. If you hear yourself with a ~2 second delay, you're working "Oscar Zero" and being heard over half the world!

Something to keep in mind: the subbands from 50.0-50.1 and 144.0-144.1 are reserved for CW operation ONLY. This is in the FCC rules, it is not a voluntary band plan. That means you can't switch to sideband, digital or FM unless you move farther up the band.

Gary,

I had the same think with dogs over the years, especially living out in the sticks. Any lingering odor will will dissipate with-in a week, it's bio-degradable. At least in my case, the dog never goes near a white stripped kitty again.

667. Field Day T-shirts

Yahoo group: GRARA
Date: 2009-06-18 14:58:14 UTC
From: Hank Greeb
Topic: 667 Message: 667

Order for T-Shirts has been received

Good news and bad news...

Good news first
6 of 10 Field Day T-Shirts have arrived.
Large, 2X-Large, 4X-Large

Bad news
X-Large are out of stock, and, what really irks me, is
NO Order has been placed to obtain new stock.

I checked the web site, and there are NO Field Day T-Shirts available.

I suspect there are many folks like me, who held off ordering so that more orders could come in. I figured that 2 weeks before field day would allow sufficient time for ordering. As it was, my order, placed on 12 June, was not actually put into the system until 15 June.

I've expressed my displeasure at this situation with our K8JE, our ARRL Director and with the appropriate people @ HQ.

I'll return money to folks whose order I couldn't fill, and deliver T-shirts to those I have.

I'll be at the Open Radio Room on June 24 for last minute Field Day planning, so please try to attend.

Newington CT June 23, 2009
To all radio amateurs

SB SPCL ARL ARLX008
ARLX008 Ohio Section Manager Joe Phillips, K8QOE (SK)

Joe Phillips, K8QOE, who served as ARRL Ohio Section Manager since 1998, passed away suddenly at his home on Saturday, June 20. He was 68.

Licensed in 1959 as KN9SYL, Phillips first joined the ARRL Field Organization as an Official Emergency Station (OES) in 1986. He became a Public Information Officer in 1989 and has served as an Official Observer (OO) since 1997. He was elected Ohio Section Manager in 1998.

A graduate of Youngstown University, Phillips had a career as a journalist and a teacher. He edited six separate ham radio newsletters in Cincinnati before becoming Newsletter Editor for the Ohio Area Repeater Council in 1984, a position he held for five years.

In 1986, Phillips organized the first Ohio Repeater Directory and in 1992, organized the Ohio Section Ham Radio Newsletter Contest.

He authored a weekly ham radio newspaper column in the Sunday edition of the Cincinnati Enquirer called "Ham Call" and hosted a similarly named program for cable television in the Cincinnati area.

In 1994, Phillips was elected to the Greater Cincinnati Amateur Radio Hall of Fame, and in 1995, he was the recipient of the ARRL's McGan Silver Antenna Award. This award is given annually to a League member who demonstrates outstanding public relations success on behalf Amateur Radio at the local, state or national level.

Phillips was excited about having his photo on the cover of the May 2009 issue of QST featuring the annual Dayton Hamvention. "Throughout a 40-year friendship, Joe and I worked closely together on many occasions," said ARRL Great Lakes Division Director Jim Weaver, K8JE. "From his early days of supporting the county ARES/RACES unit and the Ohio Repeater Council, Joe has always provided energetic and effective leadership with a friendly, personal touch. The magnetism of his style of leadership drew the best from others who soon became solid friends, not mere associates."

ARRL Membership and Volunteer Programs Manager Dave Patton, NN1N, remembered Phillips fondly: "If you have been to Dayton you have met and laughed with Joe. He was the master of the Wouff Hong ceremony. His red jacket is the stuff of legend in Ohio. Joe was more than a Section Manager -- he really gave all of himself to ARRL for 20-plus years. With him dies the last paper newsletter sent to section membership. When I answered his phone calls, he announced his call with 'Here's your Ohio Nightmare.' He loved baseball, maybe more than I did. He was a good man, and he is really going to be missed."

From: Charles Rich
Topic: 672 Message: 672

Our code classes will be on vacation 'til the fall theory class sessions start in September. We've had some great classes and a lot of fun learning and laughing. Proficiency certificates have been awarded
up to 13 WPM. Class goals are 20 WPM.

Plan, now to learn or improve your ability to copy code in a fun, non-threatening environment.

You DO NOT have to be a HARC member to attend these classes, and there is NO CHARGE...!!!

WATCH FOR DATES AND INFORMATION..

Have a great summer.....

673. Field Day organizational Meeting, tonight at W8DC

Yahoo group: GRARA
Date: 2009-06-24 13:06:29 UTC
From: Hank Greeb
Topic: 673 Message: 673

I'll be at the Open Radio Room tonight, Wednesday, June 24 for the final Field Day organizational meeting The Open Radio room is held at W8DC, at the Red Cross building, 1050 Fuller Ave NE (one block south of Leonard St.) in Grand Rapids.

I have Field Day T-Shirts for those who have reserved them, except that no "XL" sizes were available. I'll have money for those who paid for an "XL" size.

For reference (pardon the redudancy for those who pay attention) we have been invited to K8IHY's FB QTH, including his hanger/barn for FD 2009.

The address is 1840 BYRON RD, HUDSONVILLE, MI 49426, a few miles from Rivertown Mall in Grandville, and a few miles from Hudsonville.

KA5S is the crew chief for CW, N8DGD for Phone.

CU tonight!

This is an important meeting to make sure all bases, or better put stations, are covered for Saturday. We will be having a bit of friendly competition with the Holland club so let's make FD a big and Fun GRARA event.

Along with the FD Meeting, we will try to run coax to the GAP Vertical. COme early if you can help out.

675. Field Day News

Yahoo group: GRARA
Date: 2009-06-25 01:16:20 UTC
From: Hank Greeb
Topic: 675 Message: 675

We have a "reasonable" setup for 2A + VHF

KD8HNF will bring a 3 burner gas stove for cooking. I'll provide breakfast on Sunday for whoever stays up and/or operates during the night or wants to cover the very early shif on Sunday morning.

The menu will be sausage and eggs, orange juice, coffee (?) of sorts, toast, etc.

If you'd like to bring food for cooking the stove will be available.

We will be going to dinner at the Rainbow Grill in Hudsonville at 5 p.m. Reservations are for 10, but can be shrunk or expanded because the restaurant doesn't expect to be crowded at that time.

Anyway, we'll start setting up about 10 a.m. Saturday, and hope to be ready to operate by the 2 p.m. start time.

Come on out! 1840 byron Road, Hudsonville.

Date: 2009-06-26 13:06:48 UTC
From: Hank Greeb
Topic: 676 Message: 676

For those who missed the final organizational meeting - and it was a good one - here are the final instructions for all those interested

1. show up (any time after 9 a.m. or so on Saturday but before 2 p.m. Sunday)

2. Help set up (if you arrive before 2 p.m. Saturday)

3. Operate

4. Enjoy!

Note that, if we need to tell you where to do, you may see
http://tinyurl.com/pvtauv

And, please review the "to do" list before the event, in case you can contribute to our needs. it is at http://www.w8dc.org/grr_images/FD2009plan.pdf

The main object is to "have fun" and make some contacts. There's a "secret" challenge between the Holland ARC and GRARA - all in good fun, so this should be "an interesting weekend."

Text of 2009 Amateur Radio Awareness Week Proclamation by Governor Jennifer Granholm

Submitted by kc8rtw on Thu, 2009-06-11 18:50. Executive Office of Jennifer M. Granholm, Governor

On behalf of the citizens of Michigan, I, Governor Jennifer M. Granholm, do hereby proclaim the month of June 2009

Amateur Radio Awareness Week

Whereas, Amateur radio provides a bridge between people, societies and countries through the sharing of ideas; and,

Whereas, Throughout its history, amateur radio operators have provided countless hours of community service without compensation; and,

Whereas, There are over 20,000 amateur radio operators in the state of Michigan and approximately 85 amateur radio clubs that have demonstrated their value in public assistance by providing, at their own expense, emergency radio communications; and,

Whereas, Amateur radio operators provide services to many of the state's emergency response organizations, such as FEMA, the Michigan Department of Human Services, and the Office of Emergency Management, and also serve as weather spotters for the Skywarn program, which is a part of the National Weather Service; and,

Whereas, This year's Amateur Radio Field Day will be a 24-hour emergency encampment exercise and demonstration of the skills of amateur radio and readiness to provide communications;

Now, therefore, be it Resolved, That I, Jennifer M. Granholm, governor of the state of Michigan, do hereby proclaim the week of June 22, 2009, amateur Radio Awareness Week in Michigan. I encourage the resident of this site to listen up and to turn on their radios in observance of this week and its activities.

signed,
Jennifer M. Granholm,

679. Field Day Wrap up

Yahoo group: GRARA
Date: 2009-06-28 17:21:31 UTC
From: Hank Greeb
Topic: 679 Message: 679

Field Day is all but over.

We had a "very interesting" time @ K8IHY's this year.

N8DGD set up a nice SSB Station, KF8QL brought his VHF setup, and KA5S & I set up in the "east 40" with a CW station.

Six Metres was open, and a bunch of stations were worked on six and 2.

The SSB station worked flawlessly on 40/20/15 metres.

The "very interesting" part was with the CW station. It, literally, 'blew down" about 3 a.m., when a BIG WIND came through. We tried to guy it down with extra guy ropes, but the wind was too strong. We finally decided that it was fruitless, and "let it go", but tried to hold on enough so it wouldn't "literally" fly away. But, it got tangled in one of the guy ropes for the antenna, and the antenna and mast collapsed! Too bad it didn't happen during daylight, or Jack, AB8ND, or official photographere, could have had a "great photo opportunity."

We didn't check the windspeed at K8IHY's airfield, but it must have been rather high, because the dining canopy has withstood 30+ MPH winds in the past.

Anyway, we probably didn't meet the goal of 4000 QSO's and 12000 points, but we had fun!

We'll try to have a full report at the August meeting.

This IS a sad situation.

Do I detect, though that the news paper writer was trying to describe Field Day, and that this was possibly a temporary installation?? Just curious.

From: Bernd Och <bo@...>

Hi all,

I have created a quick and dirty webpage with more information on our upcoming antenna test this Saturday from 21:00 ☐ 21:10z on 20 meters. If you are preferably located in North America, and have time in this timeframe, please have a look to the webpage and join us for the test.

http://www.dr1a.com/20m-antenna-test.html

(Of course we are also happy about reports from other continents, but antenna direction and propagation will favor North America)

Please feel free to spread this information.

Thank you,

73 Ben

691. Stuart Makes His First Contact @ Field Day

Yahoo group: GRARA
Date: 2009-07-04 15:23:44 UTC
From: Hank Greeb
Topic: 691 Message: 691

Here's a link to an excellent article about a first time would-be ham who makes his first contact via ham radio during field day - and at 22+ WPM CW at that! WOW!

If we'd get a few more youngsters like Stuart interested in hamming we might start a trend and lower the average age of hams from old fogey's to middle age. :)

Have the following for sale for a friend :

T2X $295
Ham IV $245
T2X rebuilt with stainless $325
Yaesu 450 $125

all with control boxes

Also have tower mast mounts:
for:
Tailtwister $35
Ham IV $25
Ham $20

For KLM many parts for rebuilding:

boom to mast insulators blocks and clamps
spreaders
misc aluminum for 6, 15,20 and 40
everything for $150

All prices plus shipping from NY.

Tks ,

I found an updated article on qrz about SK Larry Prelog / KE4PM age 57 , born 1952 Extra that fell from a tower he climbed on Field Day. The tower was only 30 ft tall--not 60 as the first article stated. It was field day related, but Chuck, it was not a temporary FD tower-- it was a permanent tower. It buckled at the BASE! How unlikely. And his son was present at the time and saw the whole thing happen--horifying! Go to:
http://www.southbendtribune.com/apps...WS01/907010368, for more info.

From: Hank Greeb
Topic: 700 Message: 700

Tom Hansen, N8DGD, Kept a list of operators and visitors to our Field Day. We hope it is complete, and beg forgiveness if it isn't.

The list we have is

John Meyer K8IHY FD Host
Lois Meyer KA8ONM FD Host
Codie Wheeler SWL
Bob Tiemersma SWL
Jim Leyes KD8CAN
Tom Hansen N8DGD
Ron Fredricks K8DMR
Bob MC Clymont K8DOG
Duane Birdsley N8FBI
Gary Lauff W8GL
Rob Robinson KD8HNF
Ray Larabee Jr. KB8ILD
John Huzinga WD8JMA
Ryan Hayes KD8LNN
Ray Larabee Sr. N8LRF
Nate Smith KD8NCS
Jack Kunnen AB8ND
Rich Douglas KC8NKA
Bob Moe WD8OZS
Dave DeVos KF8QL
John Streyle W8QZ
Cortland Richmond KA5S
Joseph Bell WD8USA
Dan Thompson N8WKM
Hank Greeb N8XX

Except for our Field Day Hosts (who are listed at the top because hosts are always "Top Dogs", and SWL's (non licensed visitors) who are very valuable resource as potential hams, the list is sorted by the last three letters of one's call.

Please review this list and advise if there are any additions or corrections needed.

Fellow Ham,

I want to first thank you again for your time. When I last sent you
an email, I requested that you help me grow the MRAY (Michigan Radio
Amateur Youth) Net. Today, I'm asking for the same favor. We had a
good response after I last sent out the MRAY Flyer, but I need your help
again. The net is growing, but it needs to continue to grow. I can't
stress enough how much I appreciate your help! Your help in passing on
the MRAY Flyer and telling any hams you know that we are here helps get
the word around and get more young people on the net each week. It
might seem simple, but it is crucial. People tell me all the time, "The
Youth is the future of Ham Radio." I have to agree.

We all want this great hobby to grow, and that's what I'm here to
do. I want young people who get on the Net each week at 7:00 PM (on the
W8HVG linked repeater system) to feel comfortable on the air and hold
onto this great hobby to pass on to their families. So please, help me
accomplish this goal that I have. Send out the flyer again, post it to
your website, and slap it on the front of your fridge as a weekly
reminder. Thank you so very much! Feel free to contact me at ANY time
with questions or comments!

Thanks and 73,
Corey J. Bulock KD8BOQ

From: Hank Greeb
Topic: 705 Message: 705

From Montcalm ARES reflector:

SURRENDER YOUR RPTR FREQ TO ME OR BE JAMMED

Off the air" This is what Kevin W Bondy told a large mall operator in Ventura County Ca. When (licensed) mall operators refused, Bondy installed a pulse modulated JAMMING REPEATER on top of nearby Oak Mountain. The FCC located the repeater and while mall people were discussing the surrender of their repeater pair to Bondy, the FCC and Ventura County Sheriff caught him red handed. He has a GMRS license so the FCC demanded an inspection of his equipment to which he refused so he forfeits $24,000. Then the Ventura County cops hauled out of his house over 120 hand helds, 18 mobiles, 1000W FM transmitter and other broadcast equipment. It is believed that much of the Motorola equipment may be stolen. Cops value the gear at $1 million.

For your reading enjoyment... ..

706. Michigander Bicycle Tour

Yahoo group: GRARA
Date: 2009-07-14 21:23:03 UTC
From: Hank Greeb
Topic: 706 Message: 706

If you're so inclined, there's a BIG bicycle tour coming through the area on Thursday and Friday. It's call the Michigander, and started in Edmore on Sunday, and will be wending its way from Reed City, down the White Pine Trail to Rockford on Thursday, and from Rockford back to Edmore on Friday for the finale.

CRAIG A MARTIN is N8VIP, Phone 313-799-0048 from Dearborn, is in charge of ham radio communications, and could use some more help. Give him a buzz in the late afternoon to early evening - he's riding with the group, but has a cell phone and will be happy to put you to work. They plan to use 147.26 MHz and/or 145.27 MHz while in the Rockford and Greenville areas. He can use several more hams at strategic points.

I've never partooken of this event, so don't know if there will be much traffic on these circuit, but I've volunteered to help on Friday morning. It might be like MSBike which was very uneventful (fortunately because of good weather), or it could be like the T?SRV (T?ur ?f the Sci?t? River Valley) when it rains or sn?ws and medical emergencies occur with regularity. Lettuce pray for good weather.

Repeat, call N8VIP, 313-799-0048 to volunteer. If you respond to this message I'll just reply that you should call that number.

QSO Opportunity with High Altitude Balloon Flight Saturday, 18 July 2009

As part of SpaceJam-3(www.spacejamboree. com),
DePauw University(www.depauw.edu/ acad/physics/ base) will be flying a cross band repeater to allow the Scouts at the Jamboree to talk with ground stations from a large area of the central portion of the United States.

Launch will occur at 13:50 UT (8:50 am Central Daylight Time) from Rantoul, IL (40.29 N, 88.14 W) The target ascent rate will be 1000 feet/min.

APRS information will be sent over 144.39 MHz every minute under the call sign, W9YJ-11.

The helium filled balloon will reach a float altitude of 70000 feet (21.5km) about 15:00 UT and will attempt to float at this altitude for about three hours. During this time the balloon should travel slowly to the NW from about 40.0N & 87.8W to 40.1 N & 88.1 W. The descent

will begin about 18:00 UT on a slowly deflating balloon with landing about 19:30 UT.

The uplink frequency on the radio will be 144.36 MHz, and the downlink frequency will be 446.025 MHz.

The Scouts will be using the call sign WB9SA. If you have a chance to contact the station, the Scouts will be thrilled to make the contact! You may also attempt to use the repeater for a long distance Earth-Balloon- Earth contact with hams from larger distances.

Thanks to Howard Brooks, KC9QBN, Professor of Physics & Astronomy at DePauw University, W9YJ for making this happen!!!

If you are in the IL/IN area you might catch ATV from our first balloon going up (100,000 ft) at 8:20 AM CDT Saturday from Rantoul IL 430 Mhz, with a CW call "DE WB9SA"

A big thank you, to all the hams radio operators making www.spacejamboree. com the coolest Scout Technology event in the Central USA!!!!! THANK YOU Howard! Thank you VCARA, ARISS, ARRL Foundation Contributors, NASA, Richard Garriott, West Mountain Radio, PolyCom, 323.tv, Mike and Dave (our welders) and DePauw University.

73, and Make it a Tremendous Day,

710. 6 and 2m activity this weekend

Yahoo group: GRARA
Date: 2009-07-17 20:51:06 UTC
From: Hank Greeb
Topic: 710 Message: 710

Relayed for kc9bqa, <sprinkies@...>

New poster KC9BQA here. I'm Todd, right across the lake in Sheboygan Co. WI. Big lover of V/UHF, and I want to share a fun ham activity this weekend of which you may not be aware.

Many of us in S WI and N ILL will be on 6m and 2m FM simplex, making contacts with anyone for this weekend's CQ VHF Contest. http://www.cqww-vhf.com/rules.htm

We're asking for your help because you're not that far away in W MI, especially with a water path between us. Many of you have surely heard distant repeaters "skip in". Well, this weekend we're looking for you W MI hams to make some noise on 6 and 2 meter FM simplex. Work each other, or maybe work some of the
stronger stations across the Lake. Listen carefully, with squelch low and with headphones, so you can hear the weak stations, because those are your best contacts in a contest.

We're going to focus in on two time periods for FM activity in this contest. 10pm-midnight on Sat. July 17th and 7-9am on Sun. July 18th. All times eastern. Those times were chosen to take advantage of the tendency to have better band conditions later at night and early in the morning.

The frequencies to use are 52.525 on 6 meter FM mode. On 2 meters, we're talking 146.550-146.580 primary, but be ready to spread out to 146.400-146.490 simplex as well, if it's busy.

There is no contesting on repeaters, nor on the 146.505-146.535 frequencies. This protects the 146.52 national call freq. on 2m FM.

You do not have to "be in the contest" to enjoy this. You can just hand out points on a casual basis. V/UHF contests are WAY more casual than HF ones. We also need new ops, so consider this a friendly invite. Have a new ham radio experience. Talk with some new hams. Hear what VHF can sound like when the bands are alive with activity. Any V/UHF contest is a great time to experience this.

Talk this concept up with your ham buddies and get on the air this weekend. It will generate a lot more contacts, if you share some enthusiasm with others. Nobody likes dead bands.

Thanks for your time, I'm done with the short version.

For those who enjoy more detail, there's a wealth of contesting info up on my website -- http://www.kc9bqa.com. I will let you know that I'm

very thorough, so you may want to visit when you have some time. I'd pay especially close attention to the posts I made on July 11 and 12th. That has everything you need to get up to speed with what's going on this weekend.

It will also get you thinking about reaching beyond the local repeater, improving your station's range, and expose you to another interesting aspect of ham radio -- weak-signal V/UHF work.

I am always willing to help anyone with a sincere interest, so if you have questions, email me.

73,
Todd KC9BQA EN63 (my grid square) 40 north of Milwaukee

Hello to all,

My name is Michael Hopwood, KE5EUA. I would like to start out by introducing myself.

I spent 8 years in the Army at Fort Hood in Texas. After my first deployment I got my ticket and started to get involved into ham radio more and more. Upon my second deployment I got my YI9EUA call and did a little radio stuff over there. Now that I'm out I came home for a little bit, Louisiana, and now on my way to Grand Rapids where my wife is from.

I try to be as involved as I possible can be in the ham community. I enjoy special events where I can help as much as I can.

I have been to the West Michigan Privately Owned Repeater Network's website and programed my 900 MHz radio for the ones listed and my D710 for the others.

What repeaters are the best to monitor, talk on?

In Texas the club I belonged to, we had monthly breakfast where everyone would get together. Is there anything like that in Grand Rapids?

I know I have said a lot and asked very few but as I am coming to a new place I hope the ham community is as friendly as it was in Texas, unlike my current residence.

Thank you,
Michael Hopwood

Michael,

Welcome to the Grand Rapids area and to the GRARA forum. The Grand Rapids Amateur Radio Association shack is at the AMerican Red Cross building on Fuller NE. We meet on the 1st Friday of the month and every Wednesday the club has an open radio room at the shack. The "Open Radio Room" evening is open to all, it is an opportunity to meet club members and friends, operate the clubs radios, work on projects, ask questions or just hang out.

Hi, Michael:

First of all, Welcome to Grand Rapids. Hope you can join us for a Grand Rapdis ARA meeting - next one is August 7, 6;30 gathering 7:00 p.m. offishial meeting. I don't know what, if any, programme we'll be having, but keep your ears open for more details as we get closer to the date. You won't have the privilege of meeting me in person, because I'll be on vacation to Colourful Coloradio and western New Brass Key for a fambly rebellion.

As far as places to contact folks - naturally I MUST mention 147.26 MHz, the GRARA repeater, 94.8 CTSS tone for access. The tone isn't to make it private, just to keep distant repeaters from keying it up.

Another repeater is the W8HVG linked repeater system, local access is on 147.16 MHz, 94.8 CTSS tone. It is linked to numerous other repeaters, so you might find yourself chatting with someone across the state if you're on that repeater.

And, another "fairly active" repeater is the Lowell ARC repeater on 145.27 MHz, 94.8 CTSS tone. It has a couple of remote receivers, so it can dear widely, sometimes better than mobiles or handhelds can hear.

There's a monthly breakfast for the Downtown Amateur Packet Radio group at New Beginning's Restaurant, 1455 Michigan St NE, just a few blocks from the fuller avenue exit of I-196. They meet on the 2nd Saturday of each month, at 8:00 a.m.

And, the W8HVG crowd plus hangers on like me, meet at Schnitz South, 1529 Langley St SE, at noon or thereabouts every Friday.

The MICHIGAN AMATEUR RADIO ALLIANCE has weekly breakfasts on Saturady, but I've lost track of when and where they meet, you might send a message to w8usa@..., or look them up at http://www.w8usa.org.

If you're interesting in QRP and QRP cw, I'll be glad to bombard you with info on that subject, but this isn't the forum for it.

Again, welcome aboard!

Tim,

I looked up Cronkite's callsign on qrz, and it said he was still a Novice, yet he just renewed in summer/ 2008. I wonder when the last time he actually operated was, and in what modes? Looks like he never upgraded, could he use voice/phone or just CW with that old of a classification?

Just curious, incidentally "Kronk," in German, means: "sick," as in Kronkenhaus (hospital).

RIP, Walter, my Dad had great respect and admoration for him,

Hi Mike,

Well, first may I say, thank you for your service to our country!

Just what we need, another "Michael" in the club! (lol, seems like everyone in the club is either named: Mike, Bob, or rhymes with my name, Gary.) Just kidding, we'd love to have you! Please stop on down, at your earliest convenience. If you drink coffee, and like to pig out on cookies, you'll fit right in!

If you can stop down to the open radio room on Wednesdays, after 7:15PM, as Jack / AB8ND suggested, that would be a great way to learn about the local ham radio scene. I will bring a brochure with the local freqs and tones for you to keep. Come in the front door of the Red Cross building, turn to the left, and walk down the stairway to the basement level. The radio room is the last door down the hallway, on your right. We're pretty friendly up here, for a bunch of "Damn Yankees." (lol)

73 and welcome to Grand Rapids,

Gary Lauff W8GL

From: Hank Greeb
Topic: 727 Message: 727

As some of you may remember, the hard drive in my laptop computer cra$hed shortly after Field Day, before I had a chance to back it up. I lost all the data. The file system was so corrupt that when I tried using Windows repair diagnostics, the routines would "repair" damage but when I tried to restore the operating system it would detect even more damage.

Thanks to several folks, including N8DGD, KF8QL, and KA5S I received all the data for the 2nd time.

But! The folks @ DLI Computers, 10194 Northland Dr NE, Rockford, MI? - (616) 866-2518? were able to recover all the document files, and some other files for which I asked them to search, for a very nominal price.

So, if your computer cra$hes, you might check with them on whether they can recover the files. You might be surprised at their charges.

Note that I have no commercial interest in DLI computers, but was very impressed at their capabilities.

Greetings,

I know I'm new to the area but I would like to comment on this. I know Echolink, IRLP, and WIRES were introduced to bring new things to radio.

Being able to communicate across the world via VOIP on 2 meters, 440, and such is nice. But when you eliminate the radio at all I don't believe it is amateur radio.

I got into amateur radio to experience wonderful things via rf, not voip. Don't get me wrong, I use echolink, and it was wonderful when I was deployed this last time. But there was always a rf link between me and the node.

Just my two cents.

One of the great things about IRLP and Echolink, is the availablity of amateur Radio for the newbie who can't afford a radio to get started. They get the experience without the investment. I, too use both. I am logged in all day, every day. The band is always open with DX. Hi Hi

Hi Michael:

To join this august (or Septober) group, just show up at the next meeting or the next meeting when you're available. We meet at the Red Cross Building at 1050 Fuller Ave NE, Grand Rapids, MI 49503, which is less than a block south of Leonard street on the East side of Fuller. We start gathering about 6:30 p.m., and try to have some semblance of a business meeting at 7 p.m.. Occasionally we have some sort of programme. For details of the programme for August contact Gary, W8GL.

Next meeting is August 7. I'll be in New Brass Key @ a family rebellion, but there should be a few others to welcome you.

73 de n8xx Hg

p.s. Special events include - Field Day (which we'll be featuring at the September meeting, the Michigan QSO party, and one or two other contests. WD8USA schedules periodic communications drills with various modes/scenerios. We sponsor VE testing sessions each month - and from time to have have a licensing class. Come on out and see whatcha thimk.

Michael

Welcome to Grand Rapids, in addition to the meeting on 7 August we
also have an "open Radio" room at the Red cross every Wednesday from
around 7 pm until everyone leaves.
We do work a couple of bike events, and help the ARES group with the
annual RIver Bank Run in April. The club also helps the Red Cross
Americorps with smoke detector installs in the fall as well as radio
installs in the Red Cross vehicles

Hello all in GRARA,

I juat had a few quock questions. Can someone be a member of GRARA who does not have a Lic. And may I attend a meeting? I have reacntly moved and came across my handset and my passion to get Lic to operate it. I am in the hopes of joining GRARA to meet members and have theier support to become a TECH level Operator. Thank you all for your time

Steven,

Yes, you can be a member and attend meetings, which are held on the 1st Friday of the month. The club also has an 'open radio room' at the shack on Wednesday evenings from around 7 pm until everyone leaves. We try to play radio, work on projects or just bat the breeze. You are welcome to come down and ask all the questions you want, we will try to answer the best we can, you might get a few differing opinions, but we try. I'm sure you can get some study help if you want.

Jack, AB8ND

Hi Steven,
Welcome to ham radio. I am sure you will find plenty of support from the guys at GRARA..

When you get a chance, drop in at the Holland Club. and pay us a visit. Like GRARA, we offer classes including Morse Code Classes, although not a requirement of the FCC..

There's a lot to do thoughout the West Michigan area via Ham Radio.

Again -- Welcome.

From: Charles Rich
Topic: 740 Message: 740

Time to think ahead. The fall code classes will be starting up in a few weeks.Start from scratch or join in with the advanced class. CW will ALWAYS be with us. It cuts through the QRM, is great for DX contesting and field day, and shows who the real hams are.

The classes are fun, non-intimidating, and you WILL learn the code. The classes are free with a double your money back guarantee.

Classes meet in Holland at the Ken Groom ZR5AAD Memorial Technical & Training Center, 280 East Eighth Street.

You DO NOT have to be a member of HARC to join in

GR guys, ...form a car pool. We have one coming, now

Contact me.

From: Hank Greeb
Topic: 746 Message: 746

The Ohio QSO Party is great fun, even for out of state entries. Hope many of the GRARA folks can try it out. Best bet to work Ohio is 40 metres during daylight and 80/75 metres in late afternoon and into the evening!

73 de n8xx Hg

==== attached Message from K8MR ================
Hi all,

I'd appreciate it if you could pass along this information about the upcoming Ohio QSO Party to your local contest clubs and state qso party lists and reflectors.

As mentioned below, there has been some confusion arising from a local dispute up here, so we do want to get things cleared up to the outside world.

Thanks a lot!

73 - Jim K8MR

==========

I'd like to invite all of you to join us for the Ohio QSO Party, on Saturday, August 22. The OQP runs from 1600z to 0400z Sunday. 80 through 10 meters, phone and CW, with multipliers counting on both modes (for a total of 88x2 = 176 possible from outside Ohio).

Full info is available at http://www.ohqp.org. THIS IS A CHANGE FROM LAST YEAR.

We in the Mad River Radio Club, the sponsor of the OQP since 1999, for various reasons decided to move the administration of the OQP to this new site from the old one (www.oqp.us). The holder of old site has tried to take over the running of the OQP from this old site, which remains online. So please be sure to change any old bookmarks you may have had. We regret the confusion arising from this, please bear with us!

We in Ohio have likely supported your state's QSO party in the past - so we hope to have lots of your guys showing up in our logs on August 22 (and indeed in past years we have seen very good activity from many of you!)

See you on Saturday, August 22 !

73 - Jim Stahl K8MR

749. Hollands "The Fox and One Old Guy" Fox Hunt, Aug 25th, Tuesday Night

Yahoo group: GRARA
Date: 2009-08-13 17:46:26 UTC
From: mike_w8der
Topic: 749 Message: 749

Hear ye, Hear ye...

The Holland ARC is announcing its next hidden transmitter hunt.

August 25, A Tuesday Night, at 7pm , a signal from an unknown
location will emanate on 145.53 MHz, for 30 seconds, every five minutes.

Your job, if you think you can handle it, is to find that source of that
ether filling RF.

The start location for the hunters will be at the Holland ARC club house
on 8th Avenue. Talk is on 147.060

You do not have to be a member of the Holland ARC group to participate.
However, if you are not, and you find the fox first, you have to buy
everyone late dinner.

Just kidding.

If anyone shows up with a doppler scanning antenna, they will be in a
separate category. If you do not have any equipment, please come on over
to the club house and see if you can ride with an equipped vehicle.

In addition, there is a new Yahoo group out for Fox Hunting in Michigan:

http://groups.yahoo.com/group/MichiganFoxHunter/

The messages are in the open, and you don't have to be a member to
read them.
To join this group, press the blue "Join This Group" button over on the
right hand side.

See you all August 25. Some sooner than others.

Sheila and Tom Bosscher K8AJ and K8TB

753. "Tuesday Tuneup" for the Holland Fox Hunt -- Dust off those RDF skills.

Yahoo group: GRARA
Date: 2009-08-16 12:51:43 UTC
From: Michel Hill
Topic: 753 Message: 753

"Tuesday Tune-up" for the Holland Fox Hunt -- Dust off those RDF skills.

Here's an opportunity to get out that old radio direction finding (RDF) antenna and check it out before the Fox Hunt coming up on August 25th. Please join us on Tuesday evening next to the McDonalds in Hudsonville (central location) for a checkout of your equipment and a practice hidden transmitter hunt. New to hidden transmitter hunting? Tom Bosscher and others will be there to answer any questions and to show you how before we start an easier, no pressure -- but lots of fun, collaborative practice hunt.

If you don't have RDF equipment to test, come anyway we will try real hard to get you a ride with other fox hunters. The practice fox hunt will be collaborative, which means that teams are free to travel in packs and exchange information on the fox hunt frequency of 145.530. Even Doppler antennas are allowed. Everybody wins!

There will be at least one or two extra "tape measure" antennas and attenuators.

Where? In the truck parking lot next to the McDonalds at I-196 exit 62 in Hudsonville. (That's 32nd street to the locals.) This is an easy location between Grand Rapids and Holland.

When? 7:00 PM until dark.

Talk-in will be on the Holland repeater of 147.060 Mhz, PL 94.8 Hz and the fox hunt frequency of 145.530 Mhz. BRING YOUR HT IF YOU HAVE ONE!

Questions, post them here or email Mike@... or K8TB@...

Tuesday, August 18th. -- that's just a couple of days from now.
Talk in on the Holland repeater or the fox hunt frequency of 145.530 Mhz.

"TUNE-UP TUESDAY", May 18th at 7:00 PM ----- Hudsonville McDonalds
"THE FOX AND ONE OLD GUY" Fox Hunt, May 25th at 7:00 PM ---- Holland ARC Clubhouse

Subject: RE: [HARC] Minimaglite upgrade

I did this to mine about a year to year and a half ago . great upgrade and
awesome battery life!

Peter C. Venlet

pvenlet@...

Hello HARC members...

After talking to Mike N8XPQ, and Rick N8GGO on the radio about an upgrade I
did to my minimag flashlight I offered to pass along the
info. I also got a couple calls from others who were listening, and wanted
info. I thought the easy way would be to just post it on the
club reflector, and everyone would have it. The upgrade increases the light
output by a factor of 8 and doubles the battery life. I will try
to remember to bring it along to the next open radio night. The upgrade is
19,95 + shipping, and there are discounts for larger orders.

John N8WVN

www.batteryjunction.com is the place, and
http://www.batteryjunction.com/tle-5k2.html is the link for the upgrade
item. If you have an old
minimag in the drawer somewhere this is a way to give it new life, and bring
it to almost tatical light levels.

757. Owosso SWAP Saturday - August 22

Yahoo group: GRARA
Date: 2009-08-20 16:40:13 UTC
From: Hank Greeb
Topic: 757 Message: 757

For all members of clubs in Lower Michigan... a buck to get in or two if you want to sell. The lowest cost SWAP around. Runs 8:00 AM to noon and leaves you the afternoon to enjoy the area. Perhaps checking out the steam train museum, Curwood Castle, or just lunch and conversation with your ham friends.

The Owosso SWAP and Trunk Sale looks like it will be a near full house for Saturday. Debco, Dentronics and a couple of other vendors have reserved multiple tables, along with several that have single tables. There should be a few more for Saturday morning, but they are going fast.

Trunk sale space is a large lot, so we can accommodate who ever might want to sell something.

VE testing is available. Looks like there should be lots of activity for all to enjoy. So plan a trip and check us out. Oh, did I mention some nice door prizes?

The information is here on our Web site:
http://www.w8qqq.org/docs/sara_trunk_sale_full.pdf

Hoping to have a good number of buyers.

762. Are Sunspots Disappearing?

Yahoo group: GRARA
Date: 2009-08-24 22:04:32 UTC
From: Hank Greeb
Topic: 762 Message: 762

Thanks to Jim Stahl, K8MR, of the Mad River Radio Club.

The full article, including the graph mentioned, was at
http://www.spaceweather.com a few days ago.

Select the Archives (upper right of home page) for August 22 for the
original article.

73 - Jim K8MR

==========

ARE SUNSPOTS DISAPPEARING? Sunspots are made of magnetism. The
"firmament" of a sunspot is not matter but rather a strong magnetic
field that appears dark because it blocks the upflow of heat from the
sun's fiery depths. Without magnetism, there would be no sunspots.
That's what makes the following graph (available on the web site) a
little troubling:

According to Bill Livingston and Matt Penn of the National Solar
observatory in Tucson, Arizona, sunspot magnetic fields are waning. The
two respected solar astronomers have been measuring solar magnetism
since 1992. Their technique is based on Zeeman splitting of infrared
spectral lines emitted by iron atoms in the vicinity of sunspots.
Extrapolating their data into the future suggests that sunspots could
completely disappear within decades. That would be a bummer for
Spaceweather.com.

Don't count out sunspots just yet, however. While the data of
Livingston and Penn are widely thought to be correct, far-reaching
extrapolations may be premature. This type of measurement is relatively
new, and the data reaches back less than 17 years. "Whether this is an
omen of long-term sunspot decline, analogous to the Maunder Minimum,
remains to be seen," they caution in a recent EOS article.

One thing is certain. Solar Minimum is a lot more interesting than it
sounds.

763. Fwd: Amateur Radio Extra Class Course

Yahoo group: GRARA
Date: 2009-08-28 16:35:14 UTC
From: Hank Greeb
Topic: 763 Message: 763

Question:

Is there any interest in an Extra Class Study course in Grand Rapids? If so, should/could GRARA sponsor one? This was forwarded from the LARC list, perhaps as a hint that LARC might consider such a course. Garden city is 2+ hours from Grand Rapids, so wouldn't be feasible for many local hams to attend.

If we decided on a similar course, I suspect we could use Red Cross facilities as the venue, or get with a high school extension service such as is in place in the Rockford School District, and probably other school districts in the greater grand rapids area.

Lettuce think about this, and discuss at an upcoming meeting - probably NOT at the meeting just prior to the GRARA Hamfest.

------- Message from Lowell ARC Reflector ------------------------

The Garden City Amateur Radio Club presents the Amateur Extra course. Join us in this 14 week class and get Radio-Active on the Extra bands! The class consists of 13 weeks of instruction with the FCC exam session on the final week. No text is required, study materials and software will be distributed in class. A PC with Windows 98, XP, or Vista is highly recommended. Attendee's should hold a General Class or Advanced Class license to attend this class.

Class starts September 24nd and ends January 14th. Thursdays 6:30-9:30 PM

Three of the class fall on holidays: Thanksgiving, Christmas Eve and New Year's Eve. Those classes will be scheduled on the Wednesdays immediately preceding the holidays.

Course Questions may be addressed to Fred Comps, K8KUZ at 734-261-6441, or email k8kuz@...

Registration Information

I certainly would be very interested in attending an "Extra" Class Course. I would also like to suggest a CW course that could be held here in Grand Rapids as well. (Maybe for an additional "fee" and held at such a time that ir could dovetail the proposed "Extra" class?)
For too many of us the CW class held at Holland was unmanageable with our schedule(s).
Thanks also for all of your hard work both with the GRARA as well as with your maintaining this email list!!
Meant to say that a long time back!

Hi Tom:

I'd be willing to be a part of a team, even lead the team. This would be similar to the course we offered a couple years ago for the technician class - where each person of a team took a topic and presented it. This would mean that we'd need about 10 volunteers or so.

Are you volunteering to take one topic to teach?

Any other volunteers?

768. September Meeting

Yahoo group: GRARA
Date: 2009-09-02 14:49:52 UTC
From: Jack Kunnen
Topic: 768 Message: 768

Members and Friends,

The next meeting for GRARA is this Friday, 4 September, at 7:00 p.m. - coffee and rag chew at 6:30. Even though this is the Labor Day weekend, please try to attend as we need to finalize all plans and committees for the swap next weekend. The club members also will vote on an amendment to the Clubs By-laws.

There will be NO VE testing Friday 11 September at the Red Cross due to swap set up, there will be testing at the Swap at 10:00 am, location is the Kent County Fairgrounds, in Lowell.

Set up for the Swap will be starting I believe at 2:00 p.m. at the Fairgrounds, with a potluck starting around 6:30/7:00.

Don't forget Open Radio Room on Wednesday evenings starting at 7:00/7:20 or when ever you can get there.

Jack, AB8ND

Many thanks! I'm not a ham operator, but have several antique short-wave receivers which I often listen to. I used to be a CBer, if that is a word, using amplification, if you know what I mean. I gave that up many years ago, shortly after a good CB friend "Bob Justice" (Hobo 1136) died of cancer. I still enjoy going to the hamfests, which I know Bob would still do if he was alive today.

1. Special Event K4C

Posted by: "Jim KC8PCJ" kc8pcj@... kc8pcj_1
Date: Fri Sep 4, 2009 12:50 pm ((PDT))

Call K4C / W8ZHO / KC8PCJ
Monday, September 7th 2009 (Labor Day), W8ZHO will be working a special event station from 9:00 AM to 2:00 PM Eastern Standard Time (14:00 to 19:00 UTC) at the Cars for Cancer car show.

The show willl be located at the Hackley Health at the Lakes, in Muskegon (Near the corner of Harvey and Pontaluna Rd). We will be using the special event call sign K4C (Kars 4 Cancer). Anyone wishing to operate or make a contact with the special event station are welcome.

We will be operating on or near 14.245 MHz SSB, 7.270 MHz SSB and the MAARC 146.940 MHz repeater in Muskegon, MI. The repeater has a PL tone of 94.8. This is a great car show. They are expecting over 400 cars again this year. QSL information is on the ARRL special event web site.

The event is sponsored by the Different Strokes Car Club and Knights of Columbus #13035.

All proceeds from this event go to the Hackley Cancer Center / The Johnson Family Center for Cancer.

If you are interested in operating at the show contact kc8pcj@... or just stop at the show. Even if you do not wish to operate this is a great car show for a great cause. come on out and enjoy.

Steven,

If I may, you might make a choice between cramming for the next few days, or wait one more month. In the absence of a book locally, the Internet comes to your rescue. There are 35 question in the technician yest, from a question pool of some 500 or so. How to know what these quaestions are? Go to any number of on line study guides, such as:

http://www.eham.net/exams/
http://www.qrz.com/p/testing.pl
http://www.radioexam.org/
http://aa9pw.com/
http://www.hamtestonline.com/

I would recommend that you use at least two different sites, they do things a little differently at it. Once you find yourself at the 90% or above level, go for the test.

Topic: 775 Message: 778

Hi Steven:

As another person said, go on line and take the test. Take it several times because each time the robot draws a different set of 35 questions from the pool of questions. If you get 80 to 90% on each trial, you'll do fine.

As far as finding books, you might come down to the W8DC Radio Room @ American Red Cross Building, 1050 Fuller Ave NE, Grand Rapids, MI 49503 about 7:15 p.m. tomorrow evening and see if there's a study guide there (I don't recall.) And, you might put a plea here for someone to bring such a book - ARRL and others have good books for sale, but I don't know of a local outlet.

Note that GRARA is giving the tests on Saturday 10:00 a.m. at Kent County Fairgrounds in Lowell, NOT Friday evening. See http://www.w8dc.org for details.

There are 18 libraries in Kent County. If my 4 grade math is correct, that's $360 to cover the libraries. And, I think that doesn't cover the Grand Rapids City Library downtown. How do we split the cost amongst the various clubs? Or, do we provide a few copies, and ask folks to request them through the reservation system?

Steven, Please note that the cost to take the license test is $14. This fee goes to the ARRL. Also, the test will not be given on Friday this month because of the hamfest at the Lowell Fairgrounds. The test will be given at 10:00 am Saturday at the hamfest. Friday night, all members will be setting up for the gala.

Please see www.w8dc.org and welcome to ham radio!

Members and Friends,

For those of us who just can't get enough 'not good for you' food, we will be meeting for breakfast on Saturday at the McDonalds in Lowell at 6 am - or so. This will be very informal, just a come as you are and when you get there.
Remember that the gates open for set-up and talk-in at 6, if you are helping in one of these areas, let someone know we can get something go.

Reminder - NO Volunteer Exam (VE) testing Friday night - it will be help at the Swap. You do not need to purchase a swap ticket if you are only there to take a test.

Jack, AB8ND

We pay $20 to $25 a year for our memberships to our clubs for starters.
How much is spent on a trip to Dayton. I am sure most spend
more than $20 a year on the local area swaps. This would not be an every year thing.
We can get the books from ARRL through the instructors discount for around $18 ea, maybe even better
if we explain to the ARRL our intentions.
Each club takes donations, and pools the money together. Donate them to the libraries under the clubs name's with info about each club on the inside cover. Now they know how and where to find us. Advertising for the clubs.
Makes you wonder how many people, young and old, went to the library to find a book
on Amateur Radio to see if they wanted to spend the time and money to get into the hobby, found nothing
and just dropped the whole idea at that point. Even if it was just 5 people, that went to the
library, we lost them and the one's they would have talked with about the hobby and may have sparked their interest.
We will never know.
My $1 worth. (Inflation)

There are 18 libraries in Kent County. If my 4 grade math is correct,
that's $360 to cover the libraries. And, I think that doesn't cover the
Grand Rapids City Library downtown. How do we split the cost amongst
the various clubs? Or, do we provide a few copies, and ask folks to
request them through the reservation system?

A few years ago GRARA donated a complete set of ARRL publications to the Grand Rapids Public Library downtown. I'm sure the license manual(s) are outdated by now.

That's a situation you would have to discuss - whether to have the books in a "central" library or, perhaps, only a couple, for convenience. Most libraries with branches let you order what you need from a central location and they will have it for you at thr branch of your choice. Try sometning for a year or two and track the usage.
Maybe ARRL can help with the cost, Club cost is around $ 18, perhaps ARRL has a library cost that is cheaper.
You could also chack if Gordon West has a plan for libraries.

786. Hints and Kinks for Using HFTA -- A Joint PVRC/NCCCWebinar Event

Yahoo group: GRARA
Date: 2009-09-17 01:00:37 UTC
From: Wilson
Topic: 786 Message: 786

Date: Thursday, September 24, 2009 8 PM EDT (September 25 - 00:00 UTC)

Reserve your Webinar Seat Now at:
https://www2.gotomeeting.com/register/765264739

A Joint PVRC/NCCC Event - Presenter Dean Straw, N6BV, will build on the introduction to HFTA in the PVRC Webinar on Aug 5, 2009, which was entitled "HF Antennas DX or Domestic, What's Your Pleasure?" Attendees to the Sep 24 Webinar may wish to review the Aug 5 presentation for background information and perspective. Go to http://www.pvrc.org and click on the "PVRC Webinars" button.

Arguably, the most difficult part to using HFTA is obtaining digital terrain data for the program to manipulate.
On Sep 24 Dean will ask for a volunteer to give the exact location of his/her tower, and then show how to gather the required terrain-profile data from three on-line sources. Once he generates the terrain profiles, he will analyze various antenna configurations using HFTA, discussing a number of practical "hints and kinks" determined from his experience analyzing lots of QTHs around the world.

Pass the word!

Shake Up Your Hamfest.
By Bob Bastone,
WC3O radiofreebob@...

Have you ever been to a hamfest? I am sure that many of you have and you know what to expect. A general rule for veteran 'festers is to get there early to look over the stuff and keep an eye under the table for those goodies that others miss. Attendees at a hamfest are an eclectic bunch. There are the newly licensed operators, the soon to be licensed and the old-timers. Whether it's new gear or back breaking antiques, a.k.a boat anchors, there is something for everyone. You could even buy a raffle ticket and hope for the best.

Not much is different with hamfests all over the country but it doesn't have to be that way. A hamfests is a perfect opportunity to try something new. Ideas don't have to break the budget but they can be something that offers the crowd something just for making the trip to the show.

Here are a few suggestions that we have used at the Skyview Radio Society's < http://www.skyviewradio.net/ > events. Feel free to use them at your club's next event.

Car Show

Our club has been doing this for a few years now. Some have classic cars, hot rods, bikes or whatever. Leave some preferred parking for them as incentive to bring their fancy car to your fest. Folks really enjoy looking over these between looking at that old GE receiver card and that old, busted, early Palm Pilot with no docking station for $10.00. Depending on your hamfest situation it doesn't cost you anything extra to do and people really enjoy it!

Jam Session

Many hams are also pretty good musicians. Why not advertise on your hamfest fliers for folks to bring their instruments. This has been great fun every year at our hamfest some time now. Wait until later in your fest to get started. Promote it on your PA system. Try it, you'll like it.

Culinary Delights

Do you do your own cooking for your hamfest? Try something different. Come up with a signature dish and give it a cute hammy name. At our fest we have the Skyview Burger and the Skyview Dipole Hotdog. Both are spicy and sloppy. Most folks will break a sweat so much that when you're done eating them you normally need a shower. Folk love them! Here is a tip: Don't buy low quality generic food. Get the good stuff and charge for it. People don't mind paying extra if they feel they are getting something special for their money. Taste is a very strong sense and emotion. They will be back to your fest next year, with friends.

Paparazzi

Take lots of pictures of your event especially pictures of people having fun. Crop out unnecessary background images and post the pictures on your club web site soon after the event. It's not as good as getting you face on the cover of QST but it's nice to see your smiling mug on a web site.

The hamfest season is just about over here in the northeast so this is a good time to plan for next year. I hope some of these suggestions might help your club with its next hamfest. They have worked well for us. Use your imagination. You know what you have to work with. The idea is to shake it up. Let's get some young folks interested and make your fest much more memorable for everybody. Good luck and I hope that old rusty D-104 you got from that box on the ground works out for you. I think you got a good deal on it.

Subject: [GRARA] Re:"Shake up Your Hamfest"

I subscribe to the ARRL Club Newsletter as well. When I checked the website http://www.skyviewradio.net I couldn't find anything about hamfest suggestions. I sure wish when links like this are given out they would include the entire URL directly to the page referred to. For example, information about the VE Exams at the Red Cross building:
WRONG: http://www.w8dc.org
CORRECT: http://www.w8dc.org/grr_license_testing/license_testing.htm

To add to Jack's recommendation, if the complete url is long please
use Tinyurl.
At times long urls will wrap to a new text line dropping parts,
causing the link to be incomplete.

799. Another suggestion

Yahoo group: GRARA
Date: 2009-10-02 15:25:05 UTC
From: Hank Greeb
Topic: 799 Message: 799

Most "growing" clubs have regular programs, and the best clubs have invited speakers at most of their regular meetings.

I remember only a very few meetings where we had a formal presentation. Only the very dedicated of the membership will come out for a boring business meeting where we sit around a argue about mundane things like finances, lack of participation at events, et. nausea.

From: Gary W8GL
Topic: 795 Message: 800

All,

Great ideas to stir up interest at GRARA Hamfest 2010! I especially like the idea about the open music jam concept. I think we should either, a): get one of Dave Devos' groups to perform a short set, just before the end of the swap, just prior to announcing the grandprize winner's name, or, b): volunteer Joe Bell on drums, Ron Fredricks, Bob Robinson, and Jack Kunnen on guitars, Steve Kaney on trumpet, myself on bass or saxophone, and ask Jean, AC8AR, to be female vocalist, and any other AROs that would like to participate as the core band. We could then, in pre-swap promotion, (postcards, flyers, & website) and over the PA system the day of the swap, throughout the show, make announcements to invite anyone in the house to come up and jam. I could provide a full PA system, including PA amps, speakers, guitar amps, mics, soundboard, snake, hook-up cords, plus extra right-handed guitars for guest jammers, or we could tell everyone ahead of the swap date to bring their own favorite instruments. Then, here's the best part-- we sell disposable ear plugs at the GRARA front table, for $5.00/ pair, with all proceeds going to support GRARA! Now that's entertainment!

Wha-dee-ya think??

Me on guitar, there aren't ear plugs made that would block that kind
of noise

Me on guitar, there aren't ear plugs made that would block that kind of noise

Jack

On Oct 5, 2009, at 1:20 PM, Gary W8GL wrote:

All,
Great ideas to stir up interest at GRARA Hamfest 2010! I especially like the idea about the open music jam concept. I think we should either, a): get one of Dave Devos' groups to perform a short set, just before the end of the swap, just prior to announcing the grandprize winner's name, or, b): volunteer Joe Bell on drums, Ron Fredricks, Bob Robinson, and Jack Kunnen on guitars, Steve Kaney on trumpet, myself on bass or saxophone, and ask Jean, AC8AR, to be female vocalist, and any other AROs that would like to participate as the core band. We could then, in pre-swap promotion, (postcards, flyers, & website) and over the PA system the day of the swap, throughout the show, make announcements to invite anyone in the house to come up and jam. I could provide a full PA system, including PA amps, speakers, guitar amps, mics, soundboard, snake, hook-up cords, plus extra right-handed guitars for guest jammers, or we could tell everyone ahead of the swap date to bring t
heir own favorite instruments. Then, here's the best part-- we sell disposable ear plugs at the GRARA front table, for $5.00/ pair, with all proceeds going to support GRARA! Now that's entertainment!
Wha-dee-ya think??

To add to Jack's recommendation, if the complete url is long please use Tinyurl.
At times long urls will wrap to a new text line dropping parts, causing the link to be incomplete.

804. GRARA Table at the Holland Swap

Yahoo group: GRARA
Date: 2009-10-06 23:17:01 UTC
From: K8TB
Topic: 795 Message: 804

Hello GRARA.

As the chairman of the Holland Super Swap (Oct 17th), I have
set aside one complimentary table in GRARA's name.
Would someone like to claim this for GRARA to use for their promotion?

Just let me know who :)

Tom Bosscher K8TB

Chairman, Holland ARC Super Swap

805. State QSO Parties, anyone?

Yahoo group: GRARA
Date: 2009-10-07 01:11:59 UTC
From: Hank Greeb
Topic: 805 Message: 805

Anyone for a State QSO Party this weekend? There are two from which to choose.

~~~~~~
Pennsylvania QSO Party (CW/SSB/Digital)
Oct 10, 1600z to Oct 11, 0500z
Oct 11, 1300z to Oct 11, 2200z
Rules: http://www.nittany-arc.net/paqso.html
~~~~~~
Arizona QSO Party (CW/PH)
Oct 10, 1600z to Oct 11, 0600z and
Oct 11, 1400z to Oct 11, 2350z
Rules: http://www.azqsoparty.org/rules.htm
~~~~~~

It's possible to work both, if you use a general logging programme. Or it may be possible to up two "windows" of something like N1MM or W3KM software and switch between the two.

Tom,
Thanks so much! Thank is very kind of the Holland club. I will plan to be one of the folks manning the table, as I will have things to sell. Will it be located on an outter wall, so that we can display our GRARA banner on the wall?
Also, will there be any type of "road kill chilli" dinner on Friday night? I apologize, as I haven't been reading the HARA blogs.

808. KL50 CELEBRATES ALASKA DAY OCTOBER 18 -19

Yahoo group: GRARA
Date: 2009-10-07 22:18:03 UTC
From: Hank Greeb
Topic: 808 Message: 808

On the air, listen out on October 18th and 19th for the call KL5O. It will be on the air celebrating as a special events station in celebration of the 2009 Alaska Day. Operation will be on 160 through 10 meters, including the WARC bands using phone, CW and RTTY. Operation will be scheduled to facilitate working North American stations, though all stations worldwide are encouraged to participate. Also, Alaska state QSO credit for the ARRL Year of the QSO Party award starts with the KL5O special event. QSL's will be available via Logbook to the World and eQSL as well as traditional cards. More information is on the web at http://www.kl5o.com.

Note that multiple stations will be on simultaneously on various modes and bands, so the probability of catching this "station" will be enhanced.

Have you submitted your nomination for this year's Amateur Radio Pillars Of Society Award?
You still have time to nominate the ham you believe to be most worthy!

2009 Amateur Radio Pillars Of Society Award

The Michigan DX Association is the home of the Amateur Radio Pillars Of Society Award.
This year will mark our 6th offering of this beautifully framed award. This award is offered
to all Hams in the Great Lakes Region! Officers of the MDXA are not eligible unless it is
for their work with "another" organization or community public service service.

If you know of [any] person you would like to nominate for the Amateur Radio Pillars Of
Society Award,please respond by contacting our Events Manager Dave Smith-KC8PCL
with the nominees Call-Name-QTH and a brief description as to why you are nominating them!

Again...this is for the Entire Great Lakes Region! You must know of someone who has
done a great service for our hobby! Nominations must be received by October 30th,2009

Submit your nomination by e-mailing Dave Smith-KC8PCL below!

kc8pcl@...

Requirements:

1.Must Live In The Great Lakes Region Of 8 States and Canada

2.Must be A Licensed Amateur

3.Past Winners Are Ineligible

You can view past winners below.

Just last night at the club meeting I brought up the item about Abe, W8HVG not doing so well. I had an email waiting for me when I got home, and it stated that Abe was diagnosed with a brain tumor at the same site of his last stroke. He will be undergoing brain surgery Thursday to remove the tumor.

It is obvious that Abe will not be at the swap this Saturday, so let's all keep him in our thoughts and prayers.

Tom,
Nowhere in Holland has any.... I checked Party City, Dykstra Drugs, other local drug stores, Fris Hallmark, the Hallmark store at the outlet... nobody has seen any in town, but suggested a larger party store in Grand Rapids who might have a larger selection... and someone suggested Spencer gifts at Rivertown crossings Mall.
Sorry.. I tried!

Good news folks. From Mike, KC8WJA:

Abe is thru the surgery -- all went well. 2 tumors were found and removed completely along with the blood clots from the stroke. He is awake, setting up and talking. Doing well

May be able to go home on Sunday

There will be a get well card attached to a larger poster board for people to sign at the Holland Swap. Please stop by the IRA booth.

All,
For anyone interested, there will be a free seminar, conducted by Tel Systems, out of Ann Arbor, this coming Wednesday, October 21, 2009, at the Comfort Inn, 4155 28th ST SE, GR, MI 49152. There are 10AM and 2PM starting times, for 4 separate subjects. Advance registration is required at: www.thalner.com, or call Chris Lindsay at: (800)686-7235, x530. Free snacks and beverages provided between morning and afternoon seminars.
Join me, to learn how my antiquated analog equipment is currently non-compatible and worthless with today's cutting edge technology.
See you there,
W8GLguitarGARY

The assertion "currently noncompatible and worthless"goes much too far; analog equipment with 6.25 KHz BW will according to 90.204(J)4 be compatible into the foreseeable future. It is definitely not "currently worthless" and will remain for many users a better deal than 12.5 and 25 KHz BW equipment which will in a relatively short time not be certified under Part 90.

From: rranta@sbcglobal.net
Topic: 826 Message: 826

yup. when the leaves change colors, and the temp drops, you know its time to think who you'd like to nominate for West Michigan Ham of the Year. To give you a better idea of how to determine if your person is a candidate, just go over to the Mara web site, www.w8usa.org and click on Ham of the year. At the very bottom is a link to the nomination page. That, along with the list of who already has received the award, should help you decide.

So far, we've had one nomination: Bruce WD8KPQ. Who just became a silent key.

The award will be presented at the New Ham's Dinner, some time in February 2010.

Also, do not forget the MDXA's "Pillars of Society Award". just visit the www.mdxa1.org and click on Pillars for more information. The dead line for their submissions is October 30th.

Hello everyone,
I received my Call Sign today from the FCC. I was looking forward to being on the air. But I seem to be havening trouble keying up any local repeaters. I have a Icom,W32a with a rubberduck. Anyone have any advice? I will be investing in a new radio but at this time I just do not have the funds.

Thanks Steven

Hi Steve,

CONGRATULATIONS on receiving your license and welcome to Amateur radio.

Make sure you have the right PL tones set for the repeater you want to use, and make sure you have the off set frequency set right. Anything from 147.000 mHz and above is positive 600 kHz off set, and anything from 146.999 and below is negative 600 kHz off set. Hope that helps.
If you are still having problems and you are coming to the Holland swap bring your HT, stop by my tables and we can get things programmed for you. Just look for the old drug store tube tester and you have found me.

I have that same HT. Very good unit.

Hi Steven:

Congrats on your new call.

As Wilson said - be sure you have the offset and subaudible tone (PL) set correctly set. For example, when trying to access the GRARA repeater on 147.26 MHz, the transmit frequency should be 147.86 MHz and it should also transmit a 94.8 Hz tone. And, be sure you don't have PL set on the receiver, because many repeaters don't transmit the tone. I'm not sure about the W8DC GRARA repeaters.

The rigs can be a challenge to program correctly, so if you continue to have problems, seek help at the Holland Hamfest. For details on that gathering, see

http://www.hollandarc.org/?page_id=22

Good luck.

72/73 de n8xx Hg

p.s. Your call KD8MEY doesn't appear in the FCC Database. Make sure you read and type it correctly!

Thanks Steven:

I learned something - QRZ isn't always up today, nor is the lookup service on the ARRL web site.

Looking things up on the FCC database directly is somewhat of a challenge, but I guess I should learn!

Age 50, WB8VOJ - John Rittenhouse passed away on Friday, October 23, 2009 after a courageous battle with colon cancer. He is survived by his wife of 29 years, Silvia Rittenhouse; sons, David (Danielle) Rittenhouse, Andrejs (Tabitha) Rittenhouse; granddaughter, Breanne; his parents, Jerry (Jane) Rittenhouse; brother, Bruce (Carol) Rittenhouse; sister, Sara (Russ) Vreeland; mother-in-law, Zenta Karklins; sister-in-law, Inara (Jim) Zweedyk; many cousins and friends.

John will always be remembered for his investment with the I.R.A. system and his own 220 repeater.

KD8DEG Tom

RITTENHOUSE - John Robert Rittenhouse "WB8VOJ", aged 50, passed away on Friday, October 23, 2009 after a courageous battle with colon cancer. He is survived by his wife of 29 years, Silvia Rittenhouse; sons, David (Danielle) Rittenhouse, Andrejs (Tabitha) Rittenhouse; granddaughter, Breanne; his parents, Jerry (Jane) Rittenhouse; brother, Bruce (Carol) Rittenhouse; sister, Sara (Russ) Vreeland; mother-in-law, Zenta Karklins; sister-in-law, Inara (Jim) Zweedyk; many cousins and friends. He will be missed by his furry buddies who kept him comfortable Rudy, Ahi, and Billy. John was vice president of the family business Electronic Automation Inc. for 26 years. He loved trees, being outdoors, traveling up north, and amateur radio. A Memorial Service will be held on Thursday, October 29, 2009 at 6:00 p.m. at Trinity United Methodist Church, 1100 Lake Dr. SE. The family will greet friends one hour prior to the service. In lieu of flowers, donations can be made to Trinity United Methodist Church or Faith Hospice. Arrangements by: Memorial Alternatives 2432 Fuller NE, 363-3700 www.memorialalternatives.com

Subject: We Have a Michigan PRB-1 Bill! HB # 5556

House Bill # 5556, the "Michigan Zoning Enabling Act," was recently forwarded to House Committee. If passed, this Bill will help codify the aspects of PRB-1 into Michigan zoning laws.

The Bill also includes a "height clause" (i.e. if we stay below the specified height, local governments are not allowed to challenge us except in unusual circumstances, etc.). For more information and a link to the Bill, please take a moment to review the attached MI PRB-1 Project Status Report.

There is a snag, with a Senate version of the Bill. We may need your help getting this Bill sponsored in the Senate.

Now is the time to contact your Representatives to ask them to Co-Sponsor the Bill. Their contact information and a sample Contact Letter template can be found at http://www.prb1michigan.org/index.htm.

If you wish to be removed from the Project's mailing list, please send me an email stating such, and I will remove you from the list. Thanks.

Len Todd, N8AGS

Looks like we may have a new sunspot being born for this cycle.

One thing wrong, however, this one looks like it might suck radio waves from earth instead of propagate them.

Time to get out your wave keepers from your storage closet or you may loose it all.

http://www.solarcycle24.com/
"A new sunspot may be trying to form in the northern hemisphere of the sun. The magnetogram shows it has reverse magnetic polarity
compared to what a Cycle 24 normally would have."

Subject: [kq2h_repeater] Any Boat Anchor Collectors Here? Selling my Collins S-Line.....

I purchased this to help out a fellow Ham who was down on his luck last year. Will be selling the 30L-1 Amp RE (Look Brand New!), 75S-3B Receiver RE, 32S-3B Transmitter RE (SOLD), 32S-1 Transmitter WE, 312B-3 Speaker RE, 516F-2 Power Supply RE. These are all in above average condition and NOT eBay pieces. (RE=Round Emblem WE=Winged Emblem)

To get a quick look just look me up on QRZ.com or MyHamShack.com or e-mail me for High Rez photos.

73,
Mark / W2WP

848. W8DC operating the Sweeps

Yahoo group: GRARA
Date: 2009-11-19 20:16:46 UTC
From: Jack Kunnen
Topic: 848 Message: 848

The club station will again be activated for the ARRL November Phone Sweepstakes.
Starting at 4:00 pm and for as long as operators want the W8DC will be on the air for the contest.
No matter what your license class come on down we will find a place at the Mic for you to operate.
If you wold prefer to log we can always use help there too. If I could remember last year score I's say we should
try to beat it, but can't remember so let's just make it w fun week end.
Of the door to the Red Cross is locked we will have the repeater on or just come down and bang on the back door.

850. December Meeting Party

Yahoo group: GRARA
Date: 2009-11-20 18:58:06 UTC
From: Jack Kunnen
Topic: 850 Message: 850

The December meeting of GRARA will be a party meeting all, family and friends, are invited.
4 December, 6:30 pm set-up 7:00 official start time :)

Rather having a full blown meal this will be a "bring a dessert or munchie" potluck.
The club will provide coffee, sodas and all utensils. We will try to get some Christmas music playing.
If anyone has or had access to a good Christmas/Radio video maybe we could run it during the party

More later if anything changes

Jack, AB8ND

851. Pictures or video clips

I'd like to put a DVD together of club activities from this past year
to run during the Christmas meeting/party.
If anyone has pictures or video clips that they would like to include
please let me know.

Jack, AB8ND

852. Phone Sweepstakes today @ W8DC

Yahoo group: GRARA
Date: 2009-11-21 14:44:23 UTC
From: Hank Greeb
Topic: 852 Message: 852

You are cordially invited to take part in the annual ARRL Phone Sweepstakes this weekend.

We will be activating W8DC, which is at Red Cross, 1050 Fuller Ave NE (one block south of Leonard St.) in Grand Rap;ids.

Sweepstakes starts at 4 p.m. EST, and we'll operating "until we drop".

There will be several licensed amateurs present at all times, so anyone may operate, and are encouraged to "give it a try."

The door will be locked for security purposes, so give a call on the 147.26 MHz repeater, or call 616 456 8088 to alert us. If you arrive and don't have a rig or a cell phone, there's a "back door" at the basement level, bang on it until someone hears you!

The more the merrier!

The Icom 706 was an "OK" rig for a single operator, single transmitter setup. But, NEVER, no NEVER try to operate in a multi-multi operation with a '706 within a 100 feet or less of another rig. They're wideband RF generator on any amateur radio band in which they operate.

Besides, the '706 was originally offered in 1994 or earlier, so technology probably caught up with it.

OOPPSS. I didn't copy the correct url. SRI, chalk it up to early onset of Alzheimer's or something similar.

Seems like Amateur Radio can come through when cell phones won't work.

See:

http://www.arrl.org/news/stories/2009/12/07/11235/?nc=1

That should be the right article!

863. Anyone for a QRP CW Contest?

Yahoo group: GRARA
Date: 2009-12-11 21:29:19 UTC
From: Hank Greeb
Topic: 863 Message: 863

See: http://www.cqc.org/contests/snow2009.htm

There's even a special category for the hardy folks who go outside during the Colorado QRP Club and operate portable. Sorta like the FYBO (F)reeze Y)our B)... O)ff) contest which is held in February.

Tomorrow would be a GRRRR8 time to set up a portable station!!!! But, for the people who aren't headed for the funny farm, there is a category for those who operate from home. :-) ;-) 8-)

73 de n8xx Hg

864. And, if not QRP CW, how about 10 metres?

Yahoo group: GRARA
Date: 2009-12-11 22:17:00 UTC
From: Hank Greeb
Topic: 864 Message: 864

If 10 metres (both phone and CW) strikes you as a better choice, the ARRL 10 metre contest may be your cup of tea. It runs from 0000Z Saturday (that's 7 p.m. EST tonight) through 2359Z Sunday (that's 7 p.m. EST Sunday) evening.

One may operate 24 hours out of the 36 hour contest period. Stations may be worked once on CW, once on Phone. For more details see

http://www.arrl.org/contests/rules/2009/10-meters.html

I'm gonna try tuning up on 28.05 or so and try some QRP 10 metre stuff. Hope to see some of the locals.

866. W8DC at the Mi QSO Party

Yahoo group: GRARA
Date: 2009-12-12 13:42:33 UTC
From: Jack Kunnen
Topic: 866 Message: 866

W8DC activated for the Michigan QSO party finished 3d place in the Emergency Operations Center Class with 14,707 points

Quote from the MI QSO web page

"The third place EOC station came from W8DC, the Grand Rapids Amateur Radio Association in Kent county, also activating their EOC for the first time in MiQP. Like W8OAK, they got off to a slow start with only 8 QSOs after the first three hours, but then they got rolling. Most of their QSOs were on phone, save for a single 10M CW QSO with one of their Kent county neighbors. Their big band was 75M phone (59%). They ran low power and put 40 different MI counties and 77 unique multipliers into their log in 8:18 of operating time."

From: Hank Greeb
Topic: 871 Message: 871

ARRL 10-Meter Contest

Call: N8XX
Operator(s): N8XX
Station: N8XX

Class: SO CW QRP
QTH: MI
Operating Time (hrs): 1.5

Summary:
Band QSOs Mults

CW: 21 6
SSB:

Total: 21 6 Total Score = 504

Club: Mad River Radio Club

Comments: Wow! On Sunday afternoon a "pipeline" opened up to Texas, with the vast majority of the contacts being from Texas. Did make one contact in Oklahoma, and heard Louisiana once, but he must have been doing S&P because I never heard him again.

I'm sure I missed a few openings. I'd go up to the shack for a few minutes, if I heard zilch I'd fold and go back to other activities. People on the Minnesota Wireless Association reflector were commenting about "runs" they made with 120 per hour, etc., of course on High Power. I never heard 120 different stations on at one time.

I entered just to see if my tuner would tune out the reactance on 10 metres - which it did, and then if I could make at least one contact. And, the "Magic Antenna Converter" worked fine, converted the 1/2 wave antenna for 40 metres into two full waves in phase for 10 metres. I forget where I found that "Magic Antenna Converter" but it really works nice. If I could remember the source, perhaps I could corner it, and make several millions.

Heard a PY1 from Brazil with a good signal for several minutes on Sunday afternoon, but he was either an alligator or conditions were not good enough for him to hear me.

Lettuce hope that we get a few more sunspots, so 10 metres is really open most of the time!

This was strapped to a soldier's body and he'd walk around with antenna looking for a transmitter.

More instructive is that the seller is hardly motivated but has drawn a line in the grassy dirt on price. Sad, is that many starving people have subsisted on just such a diet.

884. cq100 sweepstakes invitation!

Yahoo group: GRARA
Date: 2009-12-31 19:54:59 UTC
From: Wilson
Topic: 884 Message: 884

Trippy, ac8s here.
I too, love contesting, and as an avid contester for 32 years, know a great contest when I see great participation in it!

Well, here's an opportunity for you to be in another contest. It's called the cq100 SweepStakes, which operates on a new mode, called cq100.

See the contest announcement below, and I sure hope to work you in SweepStakes, the first weekend in January.

Also, please forward this to every contester you know.

take care,

Sincerely,

Trippy, ac8s

the first annual cq100 sweepstakes

sponsored by: Trippy Brown, ac8s

If you've never participated in sweepstakes, you're missing out on some serious fun!

The wonderful thing is, in the cq100 sweepstakes, you won't have splatter from neighboring stations, because of digital tuning.

The goal of the cq100 sweepstakes is to make as many contacts as you can, work all 50 US states, all Canadian provinces, and all dx countries.

However, you don't have to do that. Just get on, and have some fun, working stations for an hour, a couple hours, or, whatever amount of time you want to work the contest.

Don't sit this contest out, even if you never have been in a contest before. Come on in, get your feet wet, the water is fine, so, get on the air and have some fun! If you send in your log, great, if not, great too!

starts 2300z or 6PM EST, Friday, January 1, 2010

ends 0500z, or 12 midnight EST, Sunday, January 3, 2010

classes: single op single station

modes: CW, phone, or mixed.

bands: the cq100 bands of 80, 75, 40, 20, 15, and 10 meters

NOTE--Please do not use the following calling frequencies:

14.200, the general calling frequency

14.140, the Canadian calling frequency

14.058, the cw calling frequency

3.699, the Finnish calling frequency

and 3.780, the Swiss calling frequency

exchange: qso number, beginning with 001, and when you get to 10, you can type in just 2 digits all the way on up. precedent, (the only precedent will be d for digital), your call sign, the check, that is the last 2 digits of the year you were first licensed, and your section (US stations, give your state. Canadian stations, give your province. dx stations your country.

NOTE--the section must only be the 2 letter abbreviation of your state, province, or dx country. Example, Mi for Michigan, On for Ontario, and Au for Australia.

work stations once per mode per band.

to read about cq100, and to download the software, go to

http://www.qsonet.com

qso points: 1 point per qso, for example, 50 qsos equals 50 points.

multipliers: there will be no multipliers.

scoring: total number of qsos equals total qso points, for example, 500 qsos equals 500 points, we want this scoring easy for people to figure out.

log format: can be in cabrillo, must be in plain text, or you may do your own log, using Word, or WordPad not excel. You also can use logging programs, such as n3fjp, or n1mm software.

Here's an example of what must be included in each log.

1. your email address, so if you win, I can contact you.

2. your state, Canadian province, or dx country

3. the call sign you used during the contest

4. Anytime you switch bands, you must indicate that in your log.

5. If you switch modes, from phone to cw, or, from cw to phone, you must include that.

The reason for this is, you don't want dupes, (meaning duplicate stations worked on the same band or on the same mode on a particular band.

7. Here's what each log entry needs to show:

A. the qso number you sent, from 1 through 9 it would be 001, etc., then from 10 up, just number 10, 11, 100, 1000, etc.

B. the call sign of the station you worked

C. your precedence you sent, and it's always d, because it's digital, no amount of watts.

D. the check you sent, which is the last 2 digits of the year you were first licensed as a ham.

E. your US state, Canadian province, or your dx country you sent.

An example of a log entry follows

55 w3lpl

d

60

Pa.

8. at the end of the log, put the total number of qsos you worked

So, it would say something like, total number of qsos is 5432

9. your full name, your mailing address, and phone number with area code, so I can contact you if I can't get through via email, to tell you if you won the contest, and give you your choice of what kind of an award you want, or, if you didn't win, to tell you where you placed in the contest.

deadline date for submitting logs: February 1, 2010.

email address to send logs to: wd8oep2464(at)sbcglobal(dot)net

Will print logs be accepted? Yes, but only done on a printer, not hand written.

The reason I'm being very specific about logs is, I'm blind and can only read plain text files, or files printed out on a printer through my scanner.

address for sending print logs to: Harry Brown

2631 Krafft Rd

Apt 211

Port Huron, Mi. 48060

The top winner will receive his/her choice of a very nice cq100 Sweepstakes first place trophy, metal, banner, plaque, coffee mug, pendant, patch, key chain, pin, or certificate!

+ Now You Know!: 4U1 Call Signs
By ARRL News Editor S. Khrystyne Keane, K1SFA

This past weekend when I was working the ARRL RTTY Round-Up, I came across a call sign that I had never seen before. But that's not what confused me (as I become more active on the air, I run across all sorts of interesting call signs, such as 3V8ST). No, what confused me was that the supercheck database and my logging program told me that the call sign was located in the US. We all know that AA-AL, K, N and W are all US prefixes. Then why was 4U1WB showing up as being located in the US, too?

I'm looking forward to getting one of these in my mailbox soon!

Upon assurances I was not going crazy -- and more importantly that the supercheck database and my logger were not broken -- I found out that4U1WB is a United Nations call sign assigned to the World Bank Amateur Radio Club at the World Bank in Washington, DC. There are four 4U1 call signs around the globe: 4U1WB;4U1UN, assigned to the United Nations; 4U1ITU, assigned to the International Amateur Radio Club at the International Telecommunication Union, and 4U1VIC, assigned to the Vienna International Radio Club at the Vienna International Centre.

In the past, the United Nations has issued 4U call signs to various entities, allowing its use in areas where the UN has had peacekeeping forces. In 1995, an operation from Western Sahara used 4U/KC0PA, while Burundi used 4U9U in 1994.

World Bank headquarters in Washington, DC.

While 4U1UN and 4U1ITU count for credit toward the ARRL's DXCC award, 4U1WB and 4U1VIC do not. The DXCC rules define 4U1WB and 4U1VIC as "ineligible areas." These areas are classified as "extraterritorial legal entit[ies] of any nature, including, but not limited to, embassies, consulates, monuments, offices of the United Nations agencies or related organizations, other inter-governmental

organizations or diplomatic missions." This rule also clarifies that these two stations are considered part of their "host entity" for DXCC purposes. This makes 4U1WB part of the US and 4U1VIC part of Austria for DXCC purposes.

For more on 4U1UN, be sure to check out the February issue of QST. So now when you see or hear a call sign come across the ether to your radio with a 4U1 prefix, don't be alarmed when you find out that the call sign is based in the United States. Now you know!

<Shuttle Columbia Special Event Station.doc>

Shuttle Columbia Special Event Station

The Nacogdoches Amateur Radio Club will again hold a special event station in remembrance of the shuttle disaster on Feb. 1, 2003. The event will occur on Saturday, Feb. 6, 2010. Ham operators from other areas are welcome to attend the event. If you cannot come to Nacogdoches, we would like to hear from you on 20 or 40 meters. Operation will begin at 0800 CST (1400 UTC) and end at 1500 CST (2100 UTC).

The station will be set up at the McMichael Middle School located at 4330 SE Stallings Drive in Nacogdoches. This is on Loop 224 between Hwy 21 east and FM 2259. The event commemorates how the ham radio operators from the local area went into action immediately after the shuttle crash to provide emergency communications and relay traffic necessary to the coordination of the event. Within hours, ham operators from across the state of Texas and other states as well also became involved. Many ham radio clubs sent members to assist in providing communications for the varied search teams. Other clubs provided towers and repeater equipment necessary to relay vital information.

In honor of the work performed by Amateur Radio, the Nacogdoches Amateur Radio Club has a special event station on the first Saturday in February of each year. The special event station allows ham radio operators to meet together in person to discuss the events of the fateful day in February 2003. Local club members operate radios set up at the school to make contacts across the country via various frequencies. We plan to operate on 7200 and 14270, plus or minus QRM. The local vhf repeater of 146.84, negative offset, 141.3 PL will

be monitored as a talk-in channel.

For additional information, please contact Rusty Sanders, kd5gen@....

889. Anyone for the North American QSO Party Saturday?

Yahoo group: GRARA
Date: 2010-01-15 00:05:06 UTC
From: Hank Greeb
Topic: 889 Message: 889

This would be another good test for the W8DC station. It's a "medium grade contest" with lots of activity, but usually not a "knock down, drag out" high powered contest.

Anyone for the SSB version of the North American QSO Party on Saturday, January 16? It starts at 1 p.m. (1800z) Saturday and ends at 1 a.m. (0600Z) Sunday. All bands, 160, 80, 40, 20, 15, 10 meters, 100 watts maximum power, so we wouldn't be fighting the KW+ crowd. For details see http://www.ncjweb.com/naqprules.pdf

I can't do this one. I have a conference in Battle Creek that day. However, NAQP is fun. I did about 160 Q's in about 7 hours running QRP during the CW version.

Just an update on the code class in Holland.

There has not been a lot of interest expressed for a Morse Code class, this year. None from the Holland group.

I don't want to stretch this out, but -- I really like a class of 4 - 6. It's easier to teach, builds team work and stimulates competition.

As of today, if we don't get more participation - I am going to hold off til spring. since those inquiries come from people who have to travel.

Soooo.....Any more takers???

Next opportunity Mid March!!

----- Original Message -----
From: NA8M
To: WestMichiganHams@yahoogroups.com
Sent: Saturday, January 30, 2010 1:38 PM
Subject: [WestMichiganHams] FM 2 Meter Simplex Contest Feb 7 & 10

Let's Have Some Fun on the Radio!

On February 7 and 10 the club is offering you an opportunity to have some fun on two meters. This is a contest but is might better be described as a QSO party or a great way to enjoy two meters. The rules are easy and the fun is mandatory. Every ham has two meters available. Fire up that rig and make some contacts with your friends. Limber up your privileges and you will find lots of folks on the band. We're all having tons of fun!

The rules are simple:

FM Simplex Contest
Sponsored by the
Muskegon Area Amateur Radio Council
Sunday, February 7, 2010
&
Wednesday, February 10, 2010
The purpose of this contest is to encourage amateurs to learn the basics of contesting, simplex operations, and expand the scope of their VHF operating techniques beyond those needed for repeater operation. This is a fun event that everyone will enjoy. This would be a stepping-stone toward earning your "Worked All MAARC Members" certificate.
1. This event is a sprint, lasting one hour, from 2:00 pm until 3:00 pm eastern local time Sunday, February 7, 2010. The event also runs the following Wednesday, February 10, 2010 between 8:00 pm and 9:00 pm. Participants are encouraged to work both hours of the contest. Contacts are limited to FM simplex on the two-meter band, only.
2. Contest frequencies: Contest frequencies correspond to those recommended in the ARRL band plan. Recommended two-meter frequencies: Primary 146.550, 146.565, 146.580, and 146.595 mHz, Secondary 147.540, 147.555, 147.570, and 147.585 mHz. This is a two-meter band contest. No other bands.
A. During the contest no contacts are to be logged on the 146.52 calling frequency, or the guard channels 15 kHz above and below 146.52. Any entry from a station heard making QSO's on 146.52 mHz will be disqualified. Limit contest activity to the primary and secondary frequencies, above, only.
B. Soliciting simplex contacts using repeaters, but not 146.52, is permitted.
C. This is a fun contest. Relax, enjoy, cooperate, and communicate.
3. Exchange - Call Sign, township or municipality transmitting from, and whether a member of the Muskegon Area Amateur Radio Council, MAARC.
4. Scoring:
A. Each QSO is worth one point. Only one QSO with a unique contest exchange is allowed for this event, regardless of the date logged.
B. A base station or HT can be worked only once. A mobile station could be worked more than

once after it moves to a different township or municipality. If the contest exchange changes then the station can be worked once for each QSO. For example, the mobile works you from Laketon Township. The mobile moves to Muskegon City. You can work her from the new municipality. The exchange has changed from Laketon Township to Muskegon City.
C. Each township or municipality can be used once as a multiplier. Each member of the MAARC can be used once as a multiplier.
D. Score would be calculated by multiplying total QSOs by total multipliers.
E. Technicians would multiply their final score by 1.5 for a bonus.
F. Bonus of 10 points added to final score for working club station W8ZHO once.
5. There will be Three entry classifications:
A. BASE - less than 150 watts. (ARRL classification of low power for V-UHF contests using common solid-state amplifiers.)
B. MOBILE- must work from a minimum of two townships or municipalities and power levels same as those specified for the base station classification. If you enter as a mobile then all your operating in this contest must be as a mobile. You may not combine both mobile and base classifications.
C. HTs- (not mobile units run at reduced power) - non-amplified, using any type of antenna, mobile or fixed operation (to encourage innovation and creativity).
6. Awards (Second and third place awards are at the committee's discretion)
A. First in each of the three entry classifications. (A minimum of three possible awards)
B. Awards to be presented at the April MAARC club meeting.
C. Actual awards are to be at the discretion of the contest's organizers.
7. All entries will include a copy of the station's written contest log showing the following data for each QSO: "Date - Frequency - Local time - Call sign of station worked - Township or Municipality - Status of membership in MAARC". You must declare your classification (whether Base, Mobile, or HT) together with your call sign in your log submission. An Excel spreadsheet may be created (by the contest's organizers) to facilitate scoring and log submission. Stand by for more details.
8. You need to get your log into the MAARC so we can judge the event, prepare the prizes, and announce the winners and participants. Please submit your log right after the end of the contest, February 10. Paper and electronic logs are permitted. Send your log to the easily determined addresses for the MAARC, W8ZHO. Again, we may provide you a means of logging and reporting your entry.
9. You are encouraged to swap QSL cards for the contacts in your log. These QSL cards would help you earn the prestigious "Worked All MAARC Members" award. That is a nice award for your shack.

I see we have a meeting tonight - Friday, February 5, 2009.

I haven't heard what's on the schedule, but come on down and learn all the latest and greatest about GRARA, and have an eyeball chat with your fellow ham.

Gathering starts at 6:30 p.m., at , 1050 Fuller Ave NE, Grand Rapids, MI 49503. That's near Leonard. For details instructions and a map see

http://w8dc.org/grr_common/RedCrossDirections.htm

Hope to see you there.

I am somewhat confused as to what, exactly, you need. Is this a part of the antenna itself, or something to mount the antenna on.

Chuck,
It is the base part of the antenna that mounts on a pipe or what ever.
Thanks,
 Dave

Subject: Article from Homeland Security News Wire

Home-made poisons pose risks for first responders Published 17 February 2010 A 23-year old St. Petersburg, Florida resident committed suicide by filling his car with gas which was a custom-made combination of pesticides and cleaning products; he learned about the deadly concoction from the Internet As St. Petersburg firefighters and paramedics approached the car in a residential area over the weekend in response to a suicide call, they caught a whiff of some strange-smelling gas and noticed the car was filled with smoke. What really got their attention were the five signs on the windows. "Stay Away." "Contact Haz-Mat." Tampa Bay Online's Keith Morelli reports that it did not take long for them to figure out this was more than a carbon monoxide poisoning. They backed off and donned full protective clothing and self-contained breathing devices. They pulled a 23-year-old man from inside the car, but were not able to revive him.
A police officer who helped drew a lungful of the concoction near the car and felt lightheaded. He was taken to a nearby hospital where he was treated and later released.
Morelli writes that "the incident illustrates a new problem first responders are facing these days. Diving into unknown situations to help people may endanger their own lives."
It turns out the gas in the car was a custom-made combination of pesticides and cleaning products that the man in the car learned about from the Internet.
Japanese media recently has reported on a rash of suicides of young people there in which common cleaning products are mixed together to create a quick-acting poisonous gas. St. Petersburg officials say this is the first case of this kind in the city. Fire & Rescue Lt. Joel Granata said another agency forwarded an e-mail to St. Petersburg firefighters on 27 January telling them of this new method of suicide, which can injure and maybe even kill first responders who go in unprotected.
"This whole thing transpired in Japan where they had 3,000 suicides last year," he said. Japanese officials say that about 500 of that total used this type of lethal brew. "They call it detergent suicides," Granata said. A combination of bath beads or dish detergent along with some sort of acid can emit a toxic gas, he said. Once mixed, he said, the person passes out and the heart stops within minutes.

"You can just mix it up in a bucket right there in the car," Granata said.
In Japan, suicide victims have placed signs on windows of their cars warning first responders, he said. In the weekend incident, the victim put five placards around the car to warn first responders, Granata said.
"We knew when we saw the signs that this was unusual," he said.
Information on such trends gets to departments around the world through several first responder organizations, said Tampa Fire Rescue Capt. Bill Wade. Suicide victims typically have left warning signs for first responders, he said. "We wonder when the first time will be when they don't put up a sign or when someone will intentionally not put that note up just to harm first responders," Wade said.

906. Michigan's Proposed Tower Law - PRB-1 - A Call For Your Action

Yahoo group: GRARA
Date: 2010-02-21 20:56:38 UTC
From: Hank Greeb
Topic: 906 Message: 906
Attachments: 1 described; binary payloads are missing from this source WARC

Fellow Michigan Hams:

Here's a message from Len Todd, N8AGS, MPTL Project Manager. N8AGS@...

I'll add my endorsement to Len's for you to please send your letter of support for this bill.

73 de n8xx Hg
Assistant Director, Great Lakes Division, ARRL

First off, I personally thank all of you who have already contacted your legislative repsresentatives!

Current Status of HB # 5556

The Michigan Proposed Tower Law (previously referred to as the Michigan Emergency Communications Preservation Act – PRB-1) is currently in Michigan's House of Representatives' Committee on Intergovernmental and Regional Affairs (http://www.legislature.mi.gov/%28S%28ojqmvramz0ufl155ezq4uy45%29%29/mileg.aspx?page=CommitteeBillRecordSearch&mySession=2009-2010&CommitteeName=Intergovernmental%20and%20Regional%20Affairs&chamber=house). Representative Lindberg, the Bill's original Sponsor, is asking the Committee Chairperson to move on the Bill. This is the normal practice to get the Committee to function on a bill. Once a bill is accepted or modified and accepted by the Committee, it moves to the House Floor for discussion and/or vote. The Bill can also be rejected by the Committee. Once on the House Floor, if there are enough supporting Representatives, the bill passes the floor vote.

Now is the time to write, call and/or personally contact the members of the Michigan Intergovernmental and Regional Affairs Committee.

Here are the quick & dirty steps to contact our Committee Members:

Step 1: Review the below linked draft Bill.

Step 2: Open a new email window.

Step 3: Cut and paste the below e-mail address list into the To: address line.

Step 4: Fill in Subject: Line with: "Please Support and Act on HB # 5556".

Step 5: Cut and paste the below message text to the message box. Tailor the letter to your words as you see fit.

Step 6: Send the e-mail.

A copy of the Draft Bill can be found at http://legislature.mi.gov/doc.aspx?2009-HB-5556

The below is an email address list of Intergovernmental and Regional Affairs Committee Members. It can be cut and pasted into an e-mail's TO: addressing line.

MarieDonigan@...; VickiBarnett@...;TimBledsoe@...;HaroldHaugh@...;RobertJones@...; DebKennedy@...;ColemanAYoungII@...; PeteLund@...;CindyDenby@...; ArlanBMeekhof@...; WayneSchmidt@...;

The below is sample text for an E-Mail to our Committee Members. It can be cut and pasted to your new email and edited as you desire. Please add you signature, name & address and phone # where indicated in the Red font, below.

… Start of sample text

To: Members of the Committee on Intergovernmental& Regional Affairs

As you know HB #5556 has been referred to your Committee. I urge each of you to give this legislation the attention it deserves. Amateur Radio Operators provide invaluable assis-tance to the citizens of the State of Michigan and Emergency Preparedness Organizations we serve.

It is important that you take steps to move House Bill # 5556 through Committee and assure a vote on the House Floor on a timely basis. I solicit your support and action on this Bill.

Warmest regards,

Add your Signature here

Add your Name

Add your Address here

Add your Telephone number here

… End of sample text.

It is critical that you now take the time to contact our Intergovernmental and Regional Affairs Committee Members and ask them to support House Bill # 5556!

Thanks for taking your time to do this!.

Len Todd, N8AGS

MPTL Project Manager

*Gail my server refused message going to mailing list. Would you please send this on to all on club list.

73 Harry

Wed. night I should be flying from Miami to Grenada. J37K should be on around mid to late morning Thursday until late afternoon. Most of the time I will be beaming EU when open and back across USA as paths to EU drop off. Thur. ops will end around 4pm EST. Pretty much same schedule on Friday to a dinner break and starting at 7pm all ops will be toward USA/Canada in the ARRL DX contest. During the first few hours of contest (Friday night) I will mostly op on 40,80 and 160.

Starting mid AM on Sat. and Sun. I will be beaming USA on 10,15 or 20 meters as conditions permit as the contest is to USA/Canada from rest of World. .

During the contest, I plan to op on the highest band open (10 meters being highest). Before the contest same plan will apply except add 12 & 17 meters.

Return home will be early Monday AM with a real long layover in Miami arriving back home early Tuesday AM.

Best 73 to all - Harry AC8G

911. GRARA Meeting - Friday, March 5, 7 p.m.

Yahoo group: GRARA
Date: 2010-03-03 21:14:32 UTC
From: Hank Greeb
Topic: 911 Message: 911

Ever wonder why hams are sometimes equated with those in the local funny farm? Well, consider the following topic, which will be presented at the upcoming meeting of the Grand Rapids ARA
:*
Contesting in the snow* - Hank, N8XX will give a short summary of "Contesting the the snow", otherwise known as "Freeze Your B.... Off", in which four hearty souls participated on February 6 at a farm south of Saranac. KD8CWP, KD8HNF, KA5S and N8XX operated 2 transmitters in the cold - it was 16?F when we arrived, never got above freezing... Why do ham do such strange things? Come to the meeting and see. Hank will finish with a short description of the ARRL SSB DX contests which starts at the same time as our meeting, and which we'll fire up W8DC for anyone and everyone who wishes to try his/her hand at some DX contesting. Be sure that this will NOT be a knock down, drag out contest effort - any and all are cordially invited to operate.

Meetings are held at the Red Cross building, 1050 Fuller Ave NE, Grand Rapids, MI 49503 which is just south of Leonard Street. Time is 6:30 gathering for coffee and snacks, 7:00 p.m. for meeting and, this time, approximately 8 p.m. for QSY to W8DC radio room across the hall to partake of the ARRL Phone DX contest.

All are welcome - pleas pass the word.

920. 2010 Tulip Time Parades

Yahoo group: GRARA
Date: 2010-03-15 19:09:18 UTC
From: w8jrm
Topic: 920 Message: 920

Hello, it might not feel like Spring is just around the corner but it will be here very soon, with Spring's arrival comes the 2010 Tulip Time Festival.

As in the past the Amateur Radio Operators and the American Red Cross will be providing support along the parade routes during the three Tulip Time parades.

The first parade (Volksparade) is scheduled for Wednesday, May 6, which we will need twelve Amateur Radio Operators to work as a Team with two American Red Cross First Aid Responders in covering a one block section of the parade route. Along with two Net Control Operators, we will need a total of fourteen Amateur Radio Operators, during the time frame of approximately 1:00pm until 3:30pm.

The second parade (Kinderparade) is scheduled for Thursday, May 8, which we will need the same number of Amateur Radio Operators as the Wednesday parade, during the same approximate time frame. The rain date for this parade will be Friday, May 9.

The third, the largest, and the longest parade (Muziekparade) is schedule for Saturday, May 10, which we will need twenty-four Amateur Radio Operators to cover a one-block section of the expanded parade route, along with two-three Net Control Operators. Also during this parade we need packet radio stations setup and operating at the American Red Cross Tulip Time Headquarters, Holland High School, and at Net Control.

Also for the Saturday parade, Amateur Radio Operators are needed to assist with parade lineup. This group will be working within their own net, and on a different frequency than the parade route Teams. We need approximately ten operators, six assigned to specific Division Parade Marshals, one to work with the floats, one to assist the TV Crew with their coverage, one to work with the cars, one to work directly with the Grand Marshal, and two Net Control Operators. Adding up the various activities on Saturday, we need approximately forty Amateur Radio Operators just to cover what we currently know needs to be covered.

As one can see, this is large operation in which one Club or Group cannot handle on their own. Please we need your help in getting the word out to all area Amateur Radio Operators of this need. Many have done this festival for years and have their favorite spots to serve. If you are willing to serve, and have a favorite spot, please let me know I will to my best to assign you to that specific position. For those that are new to the hobby or those that have sat on the sidelines in the past years, please consider giving it a try. It is fun, and is a great way to brush up on your net operating procedures while providing a highly visible community service.

If you're interested in volunteering, please provide me with you full name, call sign, physical limitations or special needs, contact phone number, email address, and any special assignments you would like to cover.

Please email Dave Lamer WA8RSA directly at wa8rsa@... if you're interested in working the parade line-up on Saturday.

Thank you in advance!

Jim Miller W8JRM

927. About Grid Squares

Yahoo group: GRARA
Date: 2010-04-04 01:28:47 UTC
From: K8TB
Topic: 927 Message: 927

I have received emails from two people who expressed puzzlement when I gave the grid square of my six meter beacon as EN62wu. They both knew that the grid square for the Holland area is EN62, but they didn't know what the two additional elements were for.

Around this area of the world, a 4 digit grid square is around 100 miles wide and 70 miles tall. The EN62 grid square, which contains Holland, MI, also contains South Haven, Benton Harbor, and it jumps across Lake Michigan and includes the NE area of Chicago, Racine, Wisconsin and the SE area of Milwaukee. This is a large area.

If you go to the ARRL web site on grid squares, this is explained rather well:
http://www.arrl.org/locate/gridinfo.html

When the Maidenhead system was designed, a 4 digit grid square is to be 1 degree of latitude and 2 degrees of longitude. The Maidenhead people then added the two digits to define a smaller area. The area is now 2.5 minutes worth of latitude tall and 5 minutes worth of longitude wide. This neatly divides a four digit grid square into tiny slices 1/24th as wide and tall, meaning the resolution is 576 times greater.

But by adding the two additional letters, we can now identify an area that is only 3 miles tall by 4 miles wide, such as EN62wu.

If you are interested in what your six digit grid square is, QRZ offers a good guess. Most of the time, it is very accurate, but be careful as the QRZ program can be faked out by local road addresses.

If you would really like to find your six digit grid square, use an online resource that ties into Google Maps:

Go to:

http://www.dxzone.com/cgi-bin/dir/jump2.cgi?ID=13877

Click on the line just below the top:

"** Full-screen version with gridsquare limits here <fullScreen.php> -*"

* This takes you to a page that shows the Google map. Click on and drag the map over to your area, and zoom in. Then double click on your house address, and the program will give you the six digit grid square. Zoom out, and you can see the limits of this 6 digit grid square.
As an example, the Holland HARC clubhouse is EN62ws and the GRARA Red Cross locations is EN72ex.

Many of the logging programs can use the six digit grid squares to show the azimuth between the two points, for a much superior antenna pointing accuracy.

928. Michigan QSO Party, 17 April 2010, anyone?

Yahoo group: GRARA
Date: 2010-04-05 19:42:02 UTC
From: Hank Greeb
Topic: 928 Message: 928

Membere/Officers:

Was the Michigan QSO Party discussed @ the GRARA Meeting on April 2? Sorry I couldn't make the meeting - we were visiting relatives in Indiana that day.

Anyway, the Michigan QSO Party runs from noon to midnight EDT, Saturday, April 17, 2010, or 1600Z April 17, to 0400Z April 18 for those who think in Greenwich Mean Time. For the past couple years we've put W8DC on the air with one or two transmitters, and have made a "reasonable" number of contacts.

Do we have a logging program for the radio room? We logged with a paper log for the ARRL DX contest, and it was difficult to figure out band changes, etc., so a computer logging program would seem essential.

Please advise if you plan to make it for this event.

During the recent ARRL DX Contest (April 6-8) 10 metres was "sorta open" to some parts of the world. Much of the problem is that everyone is listening and few are transmitting in normal times. Guess we need to pray to the gods of the ionosphere for a few more spots on the sun. :)

15 metres, and even 12 metres, has had more activity than in previous months.

939. N8Q NEWAygo is a go for MIQP 2010

Yahoo group: GRARA
Date: 2010-04-13 16:09:22 UTC
From: Hank Greeb
Topic: 939 Message: 939

Just received authorization to use N8Q from the ARRL 1X1 VEC, for April 16 thru April 19, so look for me from the Croton Township Dr. M. K. Conklin Park in NEWAygo County. Unless something strange happens, I'll be operating during the Michigan QSO Party this coming Saturday, QRP from a deep cycle battery, running with paper logging, propane powered light when it gets dark.

There are a bunch of naturally occurring antenna masts, estimated to be >50 feet tall, so I hope to get a dipole up at "reasonable height".

Please look for a pip-squeak signal during the event - 5 watts won't generate very many microvolts into your receiver!

942. Tally Ho! Fox Hunting Season is in Sight!

Yahoo group: GRARA
Date: 2010-04-15 13:52:07 UTC
From: Michel
Topic: 942 Message: 942

Please join us at the Holland amateur Radio clubhouse for the:

The Spring Kickoff Foxhunt - 2010.

Get the cobwebs off your RDF Gear and tune it up for the season.

This Tuesday, April 20th, 7:00 PM

All hams are welcome and encouraged to attend!

The starting location for the hunters will be at the Holland ARC Clubhouse on 8th Avenue (near the train station). Talk-in will be on the HARC repeater, 147.060. (see map link below) Please be there plenty early to finalize teams and record your odometer reading. The winner of this foxhunt will be in the car that finds the fox within the two hour limit and has the lowest odometer/trip reading. The prize is the "praise and admiration of your peers" and the first option to be the fox for the next HARC hunt. There is no entrance fee.

The fox team for this hunt will be "Team Kent", comprised of James, K8JHR, and Chuck, AJ8W. Yes, Team Kent won the last fox hunt! We hope you will come, everyone is welcome. We are hoping to have a "Team Allegan" or "Team Kazoo" this year.

Being the first hunt of the season, this will be a basic level hunt with no Doppler antennas allowed. New to fox hunting? Come on out and learn the fun way --- by doing it! We will show you how. It's great fun.

Full rules are on the MichiganFoxHunter.com site and HollandARC.org site. Hope to see you there.

Questions, please contact Mike@... <mailto:Mike@...> or ask on the MichiganFoxHunter Yahoo group.

943. Anyone going to activate W8DC for MiQP this Saturday?

Yahoo group: GRARA
Date: 2010-04-15 19:21:12 UTC
From: Hank Greeb
Topic: 943 Message: 943

I note that no one has jumped in to the Michigan QSO Party Reflector (miqp-mail@...) to say they'll be operating from KENT county for the event.

To refresh people's memories, the Michigan QSO party is being held this coming Saturday, April 17 between noon and midnight EDT or Sat, Apr 17, 1600Z to Sun Apr 18, 0400Z. Operation on 80, 40, 20, 15, & 10 metres, SSB and CW. Rules, etc, at http://www.miqp.org We had a good exercise last year @ W8DC, I haven't had any confirmation that anyone is planning to be @ the station this year.

I could deposit my itty bitty computer @ the radio room with n3fjp logging software, and will do so if I get confirmation from anyone that W8DC will be activated. Please advise.

Regardless of whether W8DC operates, please look me up during the contest. I'll be operating QRP from Croton Township, NEWAygo County, on both phone and CW. I'll start checking 75/80 metres after about 2100Z, 5 p.m. EDT.

Not all eight pin mics are wired alike, although they may be the same connector. Beware. The mic may be fine but be sure the pin connection is right.

Frits:

Congrats on your "new" rig.

If it isn't designed specifically for a rig, it's best to look at the wiring diagram of the rig, and the wiring diagram of the microphone you think might work, and make sure the connection are identical. "probably" any Yaesu microphone with the same number of pins would work - but it's still worth checking out before screwing up the rig or microphone or both with an incompatible microphone. A microphone doesn't have to cost much - look on the internet to see what kind of compatible units are available, or wait until the next hamfest (Cadillac is coming up soon, and Hudsonville in June) to find one.

Who knows, someone here on the list or on the West Michigan Hams reflector, might have a compatible unit. Try the yahoo group westmichiganhams@yahoogroups.com

Or, you can do like I usually do, hook up a J-38 key to the "Key" jack, and send CW! That's usually a fool proof modulation system. :)

949. MiQP N8Q(N8XX) Single Op QRP

Yahoo group: GRARA
Date: 2010-04-18 23:33:30 UTC
From: Hank Greeb
Topic: 949 Message: 949

Michigan QSO Party

Call: N8Q
Operator(s): N8XX
Station: N8XX

Class: Single Op QRP
QTH: NEWAygo
Operating Time (hrs): 8

Summary:
Band CW Qs Ph Qs

80: 52 63
40: 13 3
20: 7 6
15: 0 0
10: 0 0

Total: 82 72 CW Mults = 45 Ph Mults = 46 Total Score = 21,476

Club: Mad River Radio Club

Comments:

Total operating time about 8 hours - started a bit after 1 p.m. - ended at a bit after 9 p.m. with a couple breaks to get some coffee at the local gas station and to do a bit of sight seeing along the Kalamazoo river - with two Hydroelectric dams!

Cold, windy, but nice park. Found that there WAS a 110 VAC outlet, so things worked out easier than I figured. Temperature was cool when I started setting up, got colder during the day, with winds reported over 30 MPH. I stayed inside my van for operating, it was warm and out of the wind, though the wind shook things from time to time.

Rig was my trusty Drake TR-5, cranked down to <5 Watts, using a Heath QRP wattmeter as the judge.

Antenna was a 80 metre dipole, sorta an inverted V, up 40 feet in the middle fed with 450 ohm ladder line, tuned with a 1960's era Johnson Matchbox.

When I fired up the computer to run CW, the thing barfed when I plugged in the USB to COM port adapter - don't understand this but it must mean I didn't use it for contesting since a hard drive cra$hed. Without internet connection I couldn't find the driver, so had to use a trusty

olde Vibroplex bug for sending. Apologies to the newbies who have trouble reading my "Lake Erie Swing." :)

80/75 was the workhorse, for a while I could "run" on 40 or 20 CW, but bands were kinda rotten for QRP. I "ran" on both 80 and 75 - very surprising to me for QRP to command responses on phone. 75 phone beat out 80 CW for the first time for my effort. For a while it was "wall to wall" almost, from about 3780 to >3850 KHz with stations operating MiQP.

KD8HNF came up to operate at the same spot mobile/fixed, so I got one NEWAygo county contact and a phone multiplier.

Don't think the N8Q call was a help - especially with QRP - many folks asked for "fills" on the "Q" station - so N8XX probably would have had similar results. However, using a 1X1 is fun to this casual contester

If you are using version 4 try opening DM780 from the windows program menu. Expand HRD and it will be there. I cant get ver 4 to open inside HRD control either. It works on beta ver 5 but I am having other issues with that on Win 7.

Jack:

Thanks for the note. I screwed up on on thing in the report - it's the MUSKEGON river, NOT the Kalamazoo river which runs through NEWAygo county. Guess I was suffering a hangover from the event! In any event, the dams along the river have made a GREAT recreation are - much camping, boating, fishing, etc.

To:

wa5kub.video2

We are less than one month away from our live streaming broadcast of the Dayton Hamvention. This is our 8th year to broadcast and we have viewers in over 150 countries.

In addition to the video, there is a chat room where hams around the world can chat with us and each other.

We have tons of prizes. We have a GRAND PRIZE this year. It is the Yaesu FT-950 HF/6mtr transceiver. And if you are logged into the chat room when we announce the grand winner you will receive a BONUS prize of a Yaesu VX-170 handheld. We have numerous other prizes such as comet antenna, diawa wattmeters, Heil Mics and boomsets, $500 gift certificates towards Alpha Amps, to just mention a few prizes. We will be giving these prizes out when our trip starts at 1300 UTC on Wednesday May 12 and continue until we get back home on Sunday May 16th . You can start entering TODAY for the grand prize at http://w5kub.com (http://w5kub.com/)

Come on over and visit our site today and start chatting with hams around the world.

Thanks,

Tom W5KUB

956. ☐ THE OFFICIAL RESULTS ☐ The Holland Spring Kickoff Foxhunt ☐ 2010

Yahoo group: GRARA
Date: 2010-04-21 14:19:25 UTC
From: Michel
Topic: 956 Message: 956

What a fantastic fox hunt for a spring kickoff!

The Holland "Spring Kickoff Foxhunt ☐ 2010" was highlighted Tuesday night ☐ not by who won, but by the outstanding job done by the fox team. Challenged to make the hunt fairly easy for the newcomers and somewhat challenging for the old timers, the fox team accomplished both. Our hats are off to James, K8JHR, and Chuck, AJ8W of "Team Kent" (County) for a fun evening. Everyone found the fox and had funny stories to tell afterwards at the Burger King.

Normally for a kickoff hunt, the fox will park his van in some out-of-the-way park or down a lonely road and taunt hunters with periodic transmissions. Team Kent added three twists that made the hunt interesting, but not overly difficult.

For the first twist, they went portable leaving their car behind and walking to their chosen site on foot. K8JHR carried the radio and antenna and AJ8W lugged the portable "car starter" battery and a book to read to the hunters during transmissions.

The second twist was a rather unique site in a viewing section of the Kollen Park Boardwalk on Lake Macatawa. While the hunters were racing around town and getting frustrated by a train that kept blocking the way, James and Chuck were watching the sunset over the lake and feeding the ducks. They also took some time to explain ham radio to passing onlookers. (Good PR.)

The third twist did post a slight problem. It sent most hunting teams to the other side of Lake Macatowa to Dutton Park where they found nothing but walking paths and and a strong signal coming from back across the lake. The fox team used a three element yagi antenna for their transmissions. The antenna was pointed directly toward a steel boat storage building across the lake causing hunters to be temporarily distracted.

All hunters arrived at the park and boardwalk at about the same time, about an hour and a half into the hunt. The sun had already set over the lake. Each team made the long walk down the boardwalk and around a bend to the viewing deck only to find the foxes lounging and waiting with "we gotch-ya" looks on their faces. It was a great hunt!

Winner of the hunt was the team of Tom and Sheila Bosscher, K8TB and K8AJ. Second place went to the team of Jim, KD8CAN, Bob, KD8HNF, and Robert, KC8USP. The next two teams of K8EMU, KB8QAP, and K8TVU finished within two-tenths of a mile behind the second place team. The team team that came the furthest to the hunt was Mike, KB8ZGL, a MSU student from Greenville and his father, KB8ZGK from Byron Center.

This was fun. Let's do it again!

957. WQ8RP for QRP To the Field, Saturday, April 23

Yahoo group: GRARA

KA5S and I will be activating WQ8RP, the Michigan QRP club call, during the upcoming QRP-TTF this Saturday, April 24, 2010.

We'll try to be on by 1600Z (Noon EDT) and operate until about 2100Z (5 p.m.) We'll start on 20 metres 14060? KHz, then move to 40 7030? KHz when things get slow there, and be on 3535? KHz and 3560? KHz by about 2000Z (4 p.m.) (Note, 3535 is the MiQRP Net Frequency, but we'll hit 3560 KHz also. We hope to work many GRARA Members during this event. If you want to join us, we'll be listening on 145.27 MHz, the Lowell repeater.

We'll be operating from Fallasburg Park, near Lowell, Michigan. This park was originally built during the 1930's as a WPA project. Several of the buildings contain unmistakable traces of WPA construction.

Details & Rules of the QRP-TTF is at
http://www.zianet.com/qrp/QRPTTF/ttf.html

Pass the word along.

Congratulations are in order to Sheila and Tom Bosscher, K8AJ and K8TB of the Holland Amateur Radio Club.

Long time promoters of Fox Hunting in Western Michigan Sheila and Tom are quoted in CQ Magazine as they called for hunters in a recent fox hunt. The quotes are used By Author Joe Moell, K0OV, ARRL ARDF Coordinator, as he introduces his article for the May issue of CQ Magazine "The Thirteenth Annual CQ WW Foxhunting Weekend."

It is good to see local hams and a local club being quoted in a national magazine. To Tom and Sheila -- Keep up the good work promoting foxhunting in Michigan!

Yahoo group: GRARA
Date: 2010-05-17 23:45:46 UTC
From: Charles Rich
Topic: 969 Message: 969

Anyone looking for a nice, clean vintage station.

I have a TS-520 Kenwood station which includes the Transceiver, matching SP-520 speaker and PS-5 power supply.

This is one of the original hybrid amateur stations.

This is a one owner station. It was my dad's (W8HJB) who purchased it new from EDI in Muskegon.

I did a bit of price searching, and one of the on-line Kenwood experts told me that it should bring around $500 - $ 550.

I would rather not make the Hamfest scene on this one, if possible..(a bit heavy)

970. Official Results, Holland Fox Hunt, May 18, 2010

Yahoo group: GRARA
Date: 2010-05-20 19:47:24 UTC
From: Michel
Topic: 970 Message: 970

After each fox hunt here in West Michigan I find myself driving away thinking "What a blast! ☐ This was the best hunt yet!"
.. And then the next fox hunt comes along and it is just a little better yet. Such was the case with last Tuesday's hidden transmitter hunt starting at the Holland ARC Technical Center. Fox for the event, Sheila Bosscher, (K8AJ) gave us a real test of our ADF abilities with her imaginative hiding spot along with new ideas for the hunt. Once again I drove away saying "not THAT was really fun! This was the best hunt yet."

Sheila picked a hiding place that shocked most of us who are used to the fox hiding in an obvious ham vehicle in a public park, cemetery or on a country road. Instead, she picked a perfect lair by a tot-lot park in an up-scale residential neighborhood. Surrounded by a row of tall pine trees, a lake and a metal container, she sat hidden a the back seat of a borrowed car. Although the car was adjacent to the residential street, it was only visible for an instant as we passed by. We were tipped-off by the smallest of black magnetic antennas on the roof of the car.

The first to find the fox was Tom Bosscher (K8TB), Sheila's husband. Tom was our first local entry using a Doppler antenna. Obviously Tom was in a class by himself.

Following shortly behind Tom was the surprise of the night. In just 27 minutes into the hunt, first-time hunters Derrick Noland (W8DDN) and Jim Hoyle (N8OMA) found the fox using a borrowed tape-measure antenna. We are going to have to watch out for these two in the future! Their hunt took 8.2 car miles.

Winner for the night in the manual antenna class was Laryn Lohman (K8TVZ) and Ike DeWitt (K8EMU) with 5.1 traveled car miles. Second place went to the team of James Richards (K8JHR) and Chuck Nowak (AJ8W) who also had 5.1 car miles. Total hunting time was the tie-breaker in this case.

If there was an award for the most "hi-tech" looking vehicle, it would have gone to our third-place team of Jim Lamberts and Phil Van Huis who traveled 6.7 miles in their search for the fox. With a 4 element CushCraft beam floating over their truck, they turned a lot of heads as they charged over the course.

All teams found the fox within the allowed 2-hour time limit. This included the team of Jim Leys (WD8CAN), Jeff Ver Hage (KB8QAP), Robert Holton (KC8USP) and Mike Hill (W8DER) .

New to this hunt, the fox used an automated transmitter "PitCon"controller by a Byonics. This transceiver controller is specifically designed for hidden transmitter hunting and has been used on several practice hunts locally this year. (Ref: http://www.byonics.com/piccom) Hunters were treated to random computer tones instead of the normal chatter from the fox. Hints, which are ordinarily given verbally by the fox were issued to each team in sealed envelopes before the hunt. Each hint in the envelope was labeled with a time it could be opened.

The first hint, labeled "8:00 o'clock", Said "Hope you're not heeding Horace Greeley's advice tonight" Of course, Greeley's "Go west young man" would have put the hunters squarely in Lake Michigan well before 8:00 o'clock. The last hint suggested that the hunters should look for everyone else at Wendy's on US31. It was a fun night!

Everyone left Wendys looking forward to the next hunt at the IRA Hamfest in Hudsonville on June 5th and the next Holland Hunt on the third Tuesday in June. (June 15th)

Submitted by W8DER 5/19/2010.

972. BPL Frequencies

Yahoo group: GRARA
Date: 2010-05-23 04:35:38 UTC
From: Wilson
Topic: 972 Message: 972

FYI

de KD8DEG Tom

Interference from BPL and HomePlug transmitters:

Some Broadband Over Power Line (BPL) and in-building powerline communications systems (PLCs) use HF and low VHF spectrum for transmitting signals which radiate in the general area of the power lines. Some of these systems have voluntarily conformed to the HomePlug standard which uses "spectrum notches" in most of the HF ham bands in their effort to mitigate some of the interference they cause to hams. However, the existing HomePlug standard does not provide spectrum notches for the 5MHz channels. The USA FCC requires that any new BPL systems have the capability to notch out frequencies whenever they generate interference to licensed services. However, in practice, it is has been difficult to get BPL systems to deal with interference complaints.

For reference purposes, here is a list of the USA FCC-authorized BPL (Broadband over Power Lines) transmitting bands for USA

1.705 MHz to 2.850 MHz (160m Amateur Radio Service)
3.025 MHz to 3.400 kHz
3.500 MHz to 4.650 MHz (80m Amateur Radio Service)
4.700 MHz to 5.450 MHz (60m Amateur Radio Service)
5.680 MHz to 6.525 MHz
6.685 MHz to 8.815 MHz (40m Amateur Radio Service)
8.965 MHz to 10.005 MHz
10.100 MHz to 11.275 MHz (30m Amateur Radio Service)
11.400 MHz to 13.260 MHz
13.360 MHz to 17.900 MHz (20m Amateur Radio Service)
17.970 MHz to 21.924 MHz (17m,15m Amateur Radio Service)
22.000 MHz to 74.800 MHz (12m,10m,6m Amateur Radio Service)
75.200 to 80.000 MHz

Announcement:

The Ohio QSO Party - the premier Ohio operating event will be held on Saturday August 28, 2010 from local noon to local midnight. Every year during the Ohio QSO Party (OhQP) Ohioans light up the airwaves and make QSOs all over the world. In this event, Ohio stations are the "DX" and are sought after. Get on and call CQ, and experience the thrill of the world calling you!

Event Basics: Ohio stations send consecutive serial number + county. Suggested frequencies are: CW: 3545, 7045, 14,045, 21,045, 28,045 kHz; SSB 3825, 7200, 14,250, 21,300, and 28,450 kHz. Full details and an operating guide can be found onwww.ohqp.org/ <http://www.ohqp.org/>. We hope to hear you on the air!

73, Kenny K2KW

975. Fox Hunt at Saturday's IRA Hamfest.

Yahoo group: GRARA
Date: 2010-05-31 23:57:30 UTC
From: Michel Hill
Topic: 975 Message: 975

Area Hams,

If you are coming to the IRA Hamfest on Saturday, you will want to bring along your Fox Hunting Equipment. For the third year in a row, the "Good Old Days Foxhunt" will top off the hamfest with an afternoon of fun and quality hunting. We hope to see you there!

Follow the attached link to more information about the foxhunt. THIS IS TWO FOX HUNTS IN ONE -- BASIC AND DOPPLER. Check it out!

http://www.MichiganFoxHunter.com

Follow this link for a brochure on the IRA Hamfest scheduled for Saturday.

http://www.w8hvg.org/Hamfest 2010.pdf

Hope to see you there!

Topic: 977 Message: 977

Guys and Gals,

The Foxhunt coming up on Saturday at the IRA Hamfest is being held along with the CQ Magazine Thirteenth Annual World-Wide Foxhunting Weekend. This requires that we report the results of our hunt, along with any pictures we may get to CQ Magazine.

So, let me encourage all of you hunters to take lots of pictures during and after the hunt. If you get magazine quality pictures, please send them to me wee and I will send the best off to the magazine. Remember to send original resolution pictures only. You will receive credit for any picture published.

Thanks everyone. Hope you have a good time at the hamfest and on the foxhunt.

Mike, W8DER

978. June Meeting

Yahoo group: GRARA
Date: 2010-06-03 20:24:18 UTC
From: Jack Kunnen
Topic: 978 Message: 978

Members and Friends,

Don't forget the June GRARA meeting will be held after the IRA Roadkill Chili Potluck at the Hudsonville Fairgrounds. We will be planning Field Day and discussing the GRARA swap.

The DAPR group will be meeting for breakfast at the New Beginnings on Port Sheldon road before the swap on Saturday.

982. IRA Swap Fox Hunt June 5, 2010

Yahoo group: GRARA
Date: 2010-06-07 00:58:19 UTC
From: K8TB
Topic: 982 Message: 982

It was a dark and stormy night.

Ok, it was very sunny afternoon. A group of hunters and hunter wannabees gathered at the main gate at 1PM at the Hudsonville Fairgrounds. Right at 1pm, K8AJ and K8TB fired up a 25 year old box of silicon, set it to oscillate a little more than 145 million times a second, and began a 1 min on, 2 min off sequence of taunting the hunters.

The "hidden" location? A county park? A large shopping mall? Nestled in a residential neighborhood?

Nope, Sheila and Tom found some county dirt roads that service some old gravel pits, located on the east side of Jenison, within flying distance of the Jenison International Airport. 12th Avenue is the name of road. Long, dirt poor and a major port for tanker sized mosquitoes. One had to cut across 6 or 7 miles of the dense Jenison residential neighborhoods to even get close to this perverted location..

Anyway, the rules state "he/she who drives the least number of miles"... wins. That would belong to James, K8JHR and Chuck AJ8W. They clocked in at 1 hour and ten minutes, but at only 9.9 miles. Just 2 minutes before them was Laryn, K8TVZ, however, due to his smaller sized tires, Laryn clocked 10.3 miles :)

Up for third is father and son team, Jim, KB8ZGK and Mike, KB8ZGL. They showed up with 1 hour and 27 minutes, with a mileage of 10.7 miles. This is only their second hunt. That indicates a stunning performance. In fourth place, we had Bob, N8UYC and Lee, KD8IUI at 1 hour and 45 minutes with 18.3 miles. Bob said something like, "This is fun, I'll be back".

We had two other teams that did not find the fox after the two hour time limit. That means we had a six car hunt, not bad at all.

Special thanks goes to Mike, W8DER for hosting the IRA swap Fox Hunt. Mike gave a talk to the a group just preceding the "tip off" time.

Of note, this hunt was sponsored by the IRA, and as such, James and Chuck get to find and transmit from a hidden location at next year's swap.

We are looking forward to it.

vy 73 de Sheila K8AJ and Tom K8TB

983. Two tentative West Michigan Fox Hunts coming up...

Yahoo group: GRARA
Date: 2010-06-07 01:04:03 UTC
From: K8TB
Topic: 983 Message: 983

Please mark your calendars and sharpen your beams:

On Tuesday, June 15, at 7pm, the Holland ARC will host a Fox Hunt starting at the clubhouse.

On Wednesday, July 21, the GRARA group will have a hunt at 7pm, starting at the Kent County Red Cross on Fuller avenue.

More details will be posted.

For both of these events, you do not have to be club members to participate.

If you do not have any equipment, you are still invited to show up and see if there is space for you in any car going out. The more the merrier kind of thing applies here.

So we have two more hunts just in West Michigan in the few weeks.

Subject: Sign up for National Preparedness Month 2010

September is National Preparedness Month (NPM). NPM is sponsored by FEMA's Ready Campaign in partnership with Citizen Corps and the Advertising Council and is designed to encourage Americans to take simple steps to prepare for emergencies in their homes, businesses, and communities.

September 2010 marks the seventh annual NPM. This year will focus on encouraging Americans to work together to take concrete actions toward emergency preparedness. We are encouraging all Americans to join the readiness team and truly help themselves, their neighbors, and their communities be Ready.

Please consider joining the NPM Coalition! Coalition membership is open to all public and private sector organizations for free. By joining the Coalition your organization would agree to promote emergency preparedness during the month of September. Once you register you will receive access to the NPM Web site where you can find a toolkit that includes templates, resources and tips to assist you with promoting emergency preparedness. You will also find an NPM calendar where you can post your events and see what other organizations are doing in your community. In addition, can share your success stories and read about the successes of others.

More than 500 organizations have signed up so far. You can register to become an NPM Coalition Member by visiting http://ready.adcouncil.org. To learn more about NPM, visit www.ready.govand click on the NPM banner. If you have any questions, please don't hesitate to contact the Ready Campaign at NPM@....

986. 2010 MS150 - WEST MICHIGAN HAMS NEEDED

Yahoo group: GRARA
Date: 2010-06-09 04:01:05 UTC
From: Megan Heyl
Topic: 986 Message: 986
Attachments: 2 described; binary payloads are missing from this source WARC

Dear fellow amateur radio operators,
I was contacted a few days ago by the head coordinator for the MS150 bike ride / West Michigan Sector, Fred Moses W8FSM.
After a lengthy conversation, I was asked to put out a "all hands on deck" for this weekend's event.

Due to a lack of communication and some incorrect information being passed around about the use of NEXTEL phones instead of amateur radio personnel, there are several rest stop areas that need to be covered by amateurs with radios that can hit the Holland HARC 147.060 repeater from as far south as South Haven on day one (Saturday) , to as far north as Grand Haven on day two (Sunday).

Fred already has filled all the SAG vehicles, that are coming from the Detroit area, with hams from the Detroit Area. (Next year he will be calling upon all the local area hams and ham clubs to help with all of the positions.)

PLEASE GIVE A PORTION OF YOUR TIME THIS WEEKEND TO HELP THE MS150 EVENT. CONTACT ME WITH YOUR ASSIGNMENT PREFERENCES (DAY AND REST STOP) AND LET ME KNOW NO LATER THAN WEDNESDAY EVENING. I WILL BE CONTACTING FRED TOMORROW NIGHT WITH THE LIST OF VOLUNTEERS. HE WILL SEND THOSE WHO VOLUNTEER INFORMATION IMMEDIATELY.

I have attached maps and listing of the rest stops where we need help.
Rest stop #1 on Saturday (Spectators) and Rest stop #7 on Sunday (Hunt) are filled.
We need 12 more volunteers to fill the other 12 rest stops. Please let me know of your selection.

Thank you very much - we know that next year, the info and sign ups will be done earlier in the year - no more last minute scramble for hams. If you have any questions, please contact me at:

988. Re: [HARC] Wacky Night in June Foxhunt Staring Sheila the Fox

Yahoo group: GRARA
Date: 2010-06-11 02:13:30 UTC
From: K8TB
Topic: 988 Message: 988

And for those of you who can't get to a web page before June 15, a direct quote from the "Vixen":

Details from the Fox Den
Tuesday, June 15, 2010 Hunt.

All hunters, hunter wannabees, relative strangers, and strange relatives are invited to participate. You don't need to be a ham or a club member. If you don't have fox hunting equipment yet, this is your chance to learn from someone else or at least from someone else's mistakes. It's free and it's great fun!! What more could you ask?

On Tuesday, June 15, hunters and any other interested parties will start gathering at the parking lot of the Ken Groom Technical and Training Center, 280 East 8th Street, Holland at about 6:45 p.m. to check equipment, sort out who's riding with whom, take beginning odometer readings, and taunt each other mercilessly. The hunt will begin at 7:00 p.m. sharp and end at 9:00 p.m. or when all hunters have found the Fox. In other words, the hunt will end at 9:00 p.m.

Any type of direction finding equipment may be used, but Doppler users will compete only against each other and will not be eligible for the Grand Prize...if there is one. The Fox will be hiding within an eight mile radius of the clubhouse. The Fox will remain either in, or in the vicinity of, the vehicle in a spot that will be either publicly or privately owned, but will not be posted for trespassing and will not require an admission fee, passport, or DNA sample for entry. In fact, leaving DNA samples is strictly forbidden.

The geeky stuff you've been waiting for - the Fox will use a robofox, transmitting one minute on, two minutes off at 145.53 using a vertically polarized whip antenna and the frequency and power won't vary. Some assembly required and batteries not included...yeah, whatever.

Clues will be available as before. The winner of the hunt will be the person or team whose vehicle puts on the lowest number of miles finding the Fox. In case of a tie, the person or team who found the Fox first will be deemed the winner. To "find" the Fox, one person from the team must identify him/herself to the Fox by name and call sign and give the Fox the final odometer reading.

If a team finds the Fox, they will be given further instructions regarding where to go and what to do when they get there. (The Fox really enjoys that part.) Teams that don't find the Fox should just backtrack down their own trail of abject defeat and humiliation, or radio for directions to the same site. The post hunt gathering will feature the usual toasting to the winners and roasting of the uh...non-winners.

Safety first. All traffic rules and regulations must be obeyed. Anyone who is fatally injured during the hunt will be automatically disqualified from the competition, but will still meet the qualifications to be the Fox for future hunts.

Be careful out there, good luck, have fun!! Betcha you can't find me!!!

73,

K8AJ, The Vixen (That's what a female fox is called...glad it's not a dog hunt.)

Hi,

I'm doing some research for a Discovery Channel show about ships that have disappeared in Lake Michigan and have come across a newspaper report dated August 1 2006 about the search for a mystery boat. It mentioned that several ham radio operators had alerted the coastguard after picking up a distress call made on the marine radio channel. The sailor was apparently taking on water and his 25-foot boat was sinking off Muskegon County. A coast guard search was eventually called off and as far as I can tell, it was never determined if it was a hoax or an actual sinking.

I would be very grateful if any of your members could shed any light on this. I'm keen to find out which radio operators picked up the distress call and would be interested in talking to them about it.

Many thanks,

Alex.

Not to mention the original post refers to "a newspaper report dated August 1 2006" but fails to identify the newspaper!!!!

In other words, don't necessarily accept this as the god's truth. It could very well be, but without some additional facts, like which newspaper, or some witnesses like the Lakeshore hams involved, I wouldn't put a lot into it.

996. SSTV up on 445.125 - repeater is back!

Yahoo group: GRARA
Date: 2010-06-16 21:28:53 UTC
From: Joe Veldhuis
Topic: 996 Message: 996

After less than 24 hours of downtime, the Ottawa County SSTV system is back on the air as of 2:15 PM EDT.

For those unaware:

Frequency: 445.125 MHz (70cm band)
Polarization: vertical
Mode: FM
Location: US-31 and Van Buren, just north of Holland (grid EN62wu)

Every 10 minutes, the system will send a current radar image. This is a reduction from the previous behavior, but it was not possible to do any better on short notice.

Due to popular demand, the repeater function, disabled 2 years ago, has been restored. To use it, transmit a 1750 Hz tone for about a second, then wait for the repeater to acknowledge with a "K" (-.-). After that, send your picture.

Further upgrades will be done later on, hopefully by the end of the year. The computer will be replaced with a smaller, more powerful unit and the software will be rewritten from scratch. Right now it's just running MMSSTV in repeater mode with a cron job to update the radar images. Before, it was a shell script which periodically called a (very old and no longer maintained) standalone SSTV encoder.

Be sure to give the system a try sometime, and spread the word. The antenna is up 130 feet and the transmitter runs about 30 watts. Reports have come in from as far as Hart and Cedar Springs, so coverage is pretty good. Thus far, no one across the lake has copied it, but I'm sure it should make the trip given fair band conditions. I especially hope that you'll make use of it for Field Day. Take some pics of your club's site and send them out. Contacts utilizing a repeater don't count, but the "demonstration" should be worth a 100 point bonus. All you need is a radio and a laptop.

73 and have fun!
-Joe, N8FQ

Dave,

We have tents, but a canopy would be nice to have up, but we can't put in any stakes in the ground if it requires them - something about an elephant getting electrocuted once.

From: Michel Hill
Topic: 1008 Message: 1008

Calling all fox hunters......

Remember that tomorrow (Tuesday) evening is the big night! Looks like the weather will cooperate this week and we will have a great fox hunt. Jim Lamberts, Master Fox, will be the official chief taunter for the night. Meet at 6:45 in the parking lot of the Holland ARC, record your mileage, decide who is riding with who, and we will start promptly at 7:00.

Everyone is invited, it is free, and there is nothing but fun to be had. Come and join us.

For more information go to http://www.MichiganFoxHunter.Com. Be sure to click on the link.... "Instructions from Jim Lamberts, KC8KE, Master Fox"

We could use small plastic stakes, like tent stakes, but definitely NOT big stakes like are used to hold down an elephant.

I plan to use four small steaks for my enclosed canopy. I don't want to have it blown away - but the small steaks don't do much for a 50+ MPH wind like we had last year - which caused a catastrophic failure of my canopy. :)

Maybe we should ask the folks who are having the Christian Reformed/Reformed Church of America convocation @ Calvin College this weekend to pray for good weather? As it now stands, the weather forecast is for showers Saturday evening and Sunday Morning, a change from an earlier forecast when the showers were predicted for the evening Sunday.

Oh, well, we should be used to storms during field day. If I remember correctly, we've had storms on Saturday evening/Sunday morning for at least two consecutive Field Days!

What would field Day be without a lightning/thunder storm & wind? :)

FIELD DAY, FIELD DAY, FIELD DAY

Yes, it's that time of the year - The Annual ARRL Field Day is

June 26-27, 2010 at Calvin College, near the front of the Engineering
Building
Enter at 3201 Burton SE

Setup begins 10 A.M. EDT Saturday, June 26
Field Day operation begins 2 P.M. Saturday
and runs to 2 P.M. Sunday

Tear down immediately Afterward (or earlier if we all get tired!)

We will operate as W8DC, with SSB and CW HF operation
You do NOT need to have a General Class license!
Anyone may operate - there will be several Extra Class ops around as
control ops.

For map of to Calvin College see
http://tinyurl.com/2ewv5xx

For detailed map of the campus, see
http://www.calvin.edu/map/
park in Lots 4 or 5, any spot which is NOT designated for handicap parking

Contact Hank, N8XX (n8xx@... <mailto:n8xx@...>) or Ron, K8DMR
(ron_fredricks@... <mailto:ron_fredricks@...>)

1021. No go for stringing ropes in trees this afternoon?

Yahoo group: GRARA
Date: 2010-06-25 13:15:12 UTC
From: Hank Greeb
Topic: 1021 Message: 1021

I vote for NOT trying to string ropes in trees this afternoon. Scattered storms - with 70% probability, are forecast to arrive some time this evening. I've seen ropes get tangled in branches of trees under similar circumstances, so we'd more than likely need to replace one or more of the ropes anyway. With any luck we can get set up in four hours beginning at 10 a.m. tomorrow.

I can easily be convinced otherwise. The rules allow us to start assembling the station any time after 2 p.m. this afternoon, and any work we do this afternoon/evening might improve our chances of starting on time tomorrow.

Call me on my cell phone 626-828-9663 if you have ideas. I'll be at the Lunche Bunche at Schnitz South at noon, so won't be checking e-mail before I'm in the general area of Calvin College.

1024. Reminder: 445.125 SSTV repeater available for Field Day

Yahoo group: GRARA
Date: 2010-06-25 20:05:57 UTC
From: Joe Veldhuis
Topic: 1024 Message: 1024

Just a reminder that the SSTV repeater on 445.125 is operational and available for Field Day use. Although you can't log a contact (repeaters aren't allowed), the SSTV demonstration is worth 100 points by itself.

I am hoping that everyone will at least take a picture from their FD site and send it through the repeater for others to see. No special equipment is needed, just a laptop running SSTV software (such as MMSSTV) and a 440 radio. Just run an audio cable from the speaker jack of the radio to the laptop's mic jack to receive, and hold the mic up to the laptop speakers to transmit.

To use the repeater, send a 1750 Hz tone for about a second (in MMSSTV, click the 1750 button to start it and click it again to stop), then when you hear the "K", send your picture.

Please use Scottie 1 or Scottie 2 mode, as Robot 36 (and any other mode with a resolution other than 256 lines) locks up the repeater. An upgrade will be installed on Monday which will fix that problem, and also eliminate the need for the 1750 Hz tone.

The machine automatically transmits weather radar images every 10 minutes, so if any storms develop, you can use this to track them.

1025. Preliminary Field Day report

Yahoo group: GRARA
Date: 2010-06-28 13:30:02 UTC
From: Hank Greeb
Topic: 1025 Message: 1025

Another W8DC Great Field Day effort is history.

We got started on time with 3A - CW, Digital and SSB, plus 6 & 2 metre VHF.

One highlight was a visit by Congressman Vern Ehlers, who lives in the neighborhood and was invited by Ron, K8DMR. Another visitor was K8QS, from the faculty at Calvin - who was a CW op, but escaped before we could put him @ the key of the CW station! By doing a very slight bit of research, we found him at http://quentinschultze.com/ and at http://www.calvin.edu/academic/cas/faculty/

Preliminary score is around 2600, with about 2200 from contacts and 400 bonus points.

Back to back Thunderstorms, including one which was a real "gully washer" at about 9:30 a.m. caused us to QRT at that time, so we packed up and went home.

I'll try to assemble an operator/guest list (kicking my rear end for not setting up a "sign in" roster).

Good luck trying to fix that. The tower is old and there is a lot of metal up on top. I would not go up it Jim KB8QAQ

Welcome,

The regular monthly meeting for GRARA is this Friday, 2 June at 7 pm coffee and rag chewing at 6:30. We will be planning and asking for volunteers for the up coming swap. There will I'm sure be a discussion as to what to do with the broken antenna for 2M, 440 and 70cm.

Tonight at Open Radio Room the equipment will be checked to see if any other damage was done when the antenna was struck, if anyone can bring a UHF/VHF antenna analyzer we could sure use the help.

1039. The Grand Rapids Fox Hunt, July 21, GRARA Red Cross Parking lot, 7:00 pm.

Yahoo group: GRARA
Date: 2010-07-11 17:53:39 UTC
From: Michel Hill
Topic: 1039 Message: 1039

Hey guys and gals,

What better entertainment on a summer evening than a good ole fox hunt?

Come join us in the Grand Rapids Red Cross Parking lot on July 21, at 7:00 (gather at 6:30) in the evening for the "Bring Home the Flag" fox hunt.

Much more information is at:

http://www.MichiganFoxHunter.com

or

http://www.W8DC.org

The fox is the famous "Riddler Fox", Bob Robinson WD8HNF. I'm sure most of you have met Bob.

This is a BASIC LEVEL fox hunt with the only confusion being with Bob's riddles. (I didn't figure out any of them last year!)

Let's see a team from your club this year. The Holland Club has already pledged a minimum of 3 teams.

Any questions, post it here or email me at the address below:

1040. Fox Hunt Riddles -- Can anyone make any sense of them? 7 days to go....

Yahoo group: GRARA
Date: 2010-07-15 00:22:15 UTC
From: Michel Hill
Topic: 1040 Message: 1040

Next Wednesday we will be searching though the streets of northern Grand Rapids looking for the Riddler Fox. It should be a great fox hunt, but am I the only one that can't figure out the Riddler's hints? It's a good thing we don't have to solve a riddle to find out where it starts like we last year. We all know to meet in the Red Cross parking lot on Fuller NE. (6:30 to 7:00 pm) Everyone is welcome and it is free as always.

But these riddles are driving me nuts! If you haven't seen them, here they are. Maybe we should offer a reward?

If you are looking for the fox I will be sitting right here.
I will be East of _____ _____, and West of _____ _____. After you find the fox you will be given directions to the location of the restaurant that we will be meeting at. Also it's location is North of _____ _____, and South of _____ _____.
Clues:
1. If you are using a map the correct way, and you get the right answers above, you will be heading in the right direction.
2. Rain or Shine! I will be sitting high and dry.
3. I will be located less than 250 feet from the corner of the parking lot. Not including the steps.
4. I hope you don't stumble over any bones.
5. The answer to the 4 statements above, are all the same answer.
6. Looking forward to see you at this location.
.....Riddler Fox

For more information, pse see http://www.W8DC.org and http://www.MichiganFoxHunter.Com.

Gang this is a unique opportunity the Massillon Amateur Radio Club is going to put North Bass Island on the air as the newest US Island.

They need to log at least 25 contacts on several bands and modes to earn their official designation of OH0006L.

The expedition call is N8B and will operating CW on 3.530, 7.025, 14.040, 21.040, SSB 7.250, 14.250, 28.450 from 1200 Z July 24, 2010, to 1600 Z July 25, 2010

For more info check out these pages http://www.north-bass-island.com <http://www.north-bass-island.com/> or www.w8np.org <http://www.w8np.org/> .

Imagine being one of the handful of operators that will be in the first group of 25 and help them earn their island designator.

Jack KM8N

==========

From w8np.org

Island On The Air Special Event

(Apr 2, 2010) -- On July 23, 2010 the Massillon Amateur Radio Club will depart on their first expedition that will take them to North Bass Island. The club will setup world wide radio communications and attempt to qualify this island for U.S. Islands Award Program. This expedition will coincide with I.O.T.A (Saltwater Islands). North Bass Island will be the home for some 15 amateur radio operators who will on July 24th begin on-the-air operations commencing at 1200 UTC until July 25th at 1600 UTC. During our adventure we will attempt to make as many world wide contacts on many different frequencies and modes.

The wheels are still in motion in their quest to qualify the island for the U.S. Islands Award Program. The MARC is sponsoring the event by providing some equipment and a special event call sign has been issued as N8B. Club members can help too. They are seeking donations to help defray the cost of the expedition. No donation is too small and all are

welcome. If you would like to donate please make a check payable to MARC and send it to Tom Phelps, WD8MBE, Attn N8B. 235 Leonard Avenue NW, Massillon, OH 44646.

They also have a website setup at www.north-bass-island.com You can also download a flyer of the event by clicking here.

Fox Hunters,

We would like to remind you of the area fox hunt being held at the Grand Rapids Amateur Radio Association (GRARA) on Wednesday Night at 7:00 PM.

We have done a lot of work setting this hunt up to be the best run hunt of the season. We hope you will agree. We have done test
transmissions and practices to be sure everything runs smoothly and everyone has fun. We have even added a "Safety Communicator" to
help with any situations that may come up. Rich Ranta, K8JX of the MARA club will be monitoring the GRARA W8DC 2-meter repeater to handle your questions. Rich will be at a fixed location and have a phone link to the fox. But remember, only the fox can hand out hints on 145.530 Mhz.

However, the fox -- Bob Robinson, KD8HNF, is getting a little jumpy. He has instructed me to tell everyone that it is expressly against the rules to shoot the fox, chain him to a tree or duct-tape him to his antenna mast or otherwise restrain him from completing his task.
I can't understand why he is nervous, we did all solve those riddle hints -- didn't we?

We may have to talk about this at the post-hunt water hole. :-)

Information is on the GRARA Website at: http://www.w8dc.org and the Michigan Fox Hunter website at:
http://www.MichiganFoxHunter.Com . The general rules are on the
http://www.FoxHuntRules.com website. Special exception rules
will be given out before the hunt at the Red Cross.

This looks like a lot of fun.

See you there....

Hi, Dave:

You might try the QRP-L forum - lots of qrp ops use the buddistick. To
sign in you check into the web site

http://mailman.qth.net/mailman/listinfo/qrp-l

You might review the searchable archives to see if the question has been answered, though people ask the same questions from time to time and there are always answers.

1049. Fw: CoCoRaHS -- Summer fund raiser and rain bringer

Yahoo group: GRARA
Date: 2010-07-22 01:49:35 UTC
From: timothy courtier
Topic: 1049 Message: 1049

----- Forwarded Message ----
From: Nolan Doesken <nolan@....edu>
To: CoCoRaHS Mailing List <cocorahs@...>
Sent: Wed, July 21, 2010 9:22:52 PM
Subject: CoCoRaHS -- Summer fund raiser and rain bringer

Dear CoCoRaHS volunteers, friends, foes and family,

Yes, indeed, it’s July 21-- the dog days of summer. For many parts of the country this is the hottest, humidest (is that a word?), stillest (least windy) time of year. As a child, it was my favorite time even though my upstairs bedroom was painfully hot. It was the time to hang out with all the neighborhood boys in tiny Royal, IL -- playing baseball, listening to the Cubs on the radio, and trying to sell lemonade on main street where only a few cars came even on busy days. At a nickel a glass and sharing the profits 5 ways, we didn't get rich. Then, of course, was the daily ritual of cloud gazing and listening for the first rumbles of thunder. I loved doing that already by the time I was 7. Then we would watch for distant lightning after sunset with the hopes of the cool refreshment of a summer storm. I find myself longing now for those simple pleasures. Fall seemed so far away then, and summer seemed wonderfully endless. It is odd how perspectives change with age and responsibility. Now it seems like summer will soon be over and the new school year will begin way too soon -- and then come the high winter utility bills.

A reminder about why CoCoRaHS is important

Here in our part of the country (Colorado) the next 3 weeks hold more potential (based on historic rainfall data) for local intense rains than any other time of year. This is thanks to subtropical moisture carried northward by the North American monsoon, a very warm atmosphere capable of "holding" copious amounts of moisture, and a weak jet stream -- which means the storms that develop will move slowly. Even today, the air is ripe with moisture, and the potential for local heavy rains is clearly stated in the National Weather Service forecast.

This resembles the weather that first motivated CoCoRaHS several years ago. On July 28, 1997, one of those localized moisture-laden thunderheads parked itself over west Fort Collins (where I live and work) and dropped over a foot of rain while other areas just a few miles away were dry or enjoying a pleasant summer shower. In those few hours, as the rain poured down 2-3" per hour for over 4 hours straight in what is normally a semi-arid region, our world briefly but chaotically turned upside down. Houses flooded, cars floated away, our university was partially wrecked, there were hundreds of emergency rescues, a train

wreck, gas explosions -- and unfortunately 5 fatalities. It all happened so fast. 12 years earlier, on August 1, 1985 (the day after our first child was born), Cheyenne, Wyoming was in the bulls eye of a similar local storm -- and again, many fatalities and millions of dollars in damage. And then, of course, the nightmarish Big Thompson Canyon flash flood of July 31, 1976 -- over 140 souls lost in what was supposed to be the grand celebration of Colorado's statehood centennial the next day.

That is some of the motivation behind CoCoRaHS and why we care so much. With a small effort from many weather enthusiasts, we can gather critical rainfall data, avoid panic storm surprises, and let people know just how bad a storm is so that warnings can be posted and evacuations can take place sooner. We can even help engineers and planners do a better job planning and designing drainage, gutters, culverts and storm sewers. We can encourage more people to avoid driving into flood waters. And gradually, working together, we all gain a better understanding of storms and their behavior. This is the ideal and its worth the effort.

As more and more people join CoCoRaHS across the country, we are making a difference. Check out the recent "Significant Weather Reports", the "Drought Impact Reports" and the hail reports under “View Data” http://www.cocorahs.org/ViewData/

Yesterday, several stations in southern Iowa and northeast Missouri were dumped on by over 6" of rain. The peak was of 9.13" near Kirksville, MO. Today, another area will see heavy rains and tomorrow yet another area. Each time our rain gauge reports will be helpful and perhaps essential. Meanwhile, abnormally dry conditions continue to expand in other parts of the country missed by the July storms. Our rainfall reports, wet or dry, really do make a difference. Thanks so much for participating and helping out.

"Five for CoCoRaHS " Mid-Summer Fund Raising Request

Our winter fund raiser gave CoCoRaHS and our staff a huge boost and helped cover several of our operating expenses for the past 5 months. To help keep CoCoRaHS going and growing, we're going to try a very short summer fund raiser. Please consider helping in the "Five For CoCoRaHS Ten Mid-Summer Days" fund raising campaign. Our goal is to raise $20,000 over the next ten days (July 22-31st) with the help of many small $5 donations.

If just a quarter of our volunteers gave $5.00 each during this 10-day fund raiser in July, we can reach our goal of $20,000. Let's give it a try! We'll post the results each day on our "Message of the Day" which you see each time you submit a data report. That way we can all keep track.

Please consider making a donation of just $5.00 anytime between July 22 - July 31st. That's it, just five. Your gift will help sustain the CoCoRaHS network throughout the summer. If your employer offers to match your donation, be sure to indicate that on the donation form.

Contributions to CoCoRaHS are deductible as charitable contributions within the limits of the Internal Revenue Code. Please consult with your tax professional.

For those of you who wish to contribute a larger amount of $50.00 or greater, we will send you an "Official CoCoRaHS Baseball Cap" as our way of saying thanks. "Weatheryourway.com <http://Weatheryourway.com>" is helping this effort by providing complimentary shipping for all the "thank you" gifts. Thanks a bunch.

Any and every contribution will help us keep CoCoRaHS going. To make a donation to CoCoRaHS please click on the Five for CoCoRaHS Mid-Summer logo at the top of the CoCoRaHS web page <http://www.cocorahs.org> and make your donation today. Or click right here: http://www.cocorahs.org/Content.aspx?page=donatefivejuly

Any animal stories?

Sure, at our little farm there is always something going on. I found a little bundle of young raccoons last night pretending to be invisible hiding under the eave of the chicken coop roof and hoping for a chance to slip in past the barn cats and watch geese to snitch some cat food. But they didn't get a chance and after hanging there for a good hour, they finally left -- exhausted and hungry.

Today’s storms seem to have missed us. We’ll see what tomorrow brings.

Sincerely and with appreciation,

Nolan Doesken
Colorado State University
CoCoRaHS National Director

1050. Fwd: ARLB019 Vanity Call Sign Fees to Decrease August 17

SB QST @ ARL $ARLB019
ARLB019 Vanity Call Sign Fees to Decrease August 17

ZCZC AG19
QST de W1AW
ARRL Bulletin 19 ARLB019
> From ARRL Headquarters
Newington CT July 22, 2010
To all radio amateurs

SB QST ARL ARLB019
ARLB019 Vanity Call Sign Fees to Decrease August 17

On July 19, the Federal Communications Commission announced via the Federal Register that the cost of an Amateur Radio vanity call sign will decrease 10 cents, from $13.40 to $13.30. The new fees take effect 30 days after publication, making August 17, 2010, the first day the new fee is in effect.

In FY2010, the FCC expects to grant 14,800 vanity call signs, bringing in $196,840 from the vanity call sign program. Earlier this year, the FCC released a Notice of Proposed Rulemaking and Order (NPRM), seeking to lower the fee for Amateur Radio vanity call signs.

The notice in the July 19, 2010 edition of the Federal Register -- entitled "Assessment and Collection of Regulatory Fees for Fiscal Year 2010; Final Rule" -- includes all FCC regulatory fees; these fees are expected to recover a total of $336,712,213 during FY2010, encompassing all the Services the FCC regulates.

The FCC is authorized by the Communications Act of 1934, As Amended, to collect vanity call sign fees to recover the costs associated with that program. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new 10 year term.

1051. Results of last night's Bring Back The Flag Fox Hunt

Yahoo group: GRARA
Date: 2010-07-22 20:51:25 UTC
From: mike@w8der.net
Topic: 1051 Message: 1051

OFFICIAL RESULTS

"Bring Home the Flag Fox Hunt", July 21, 2010

First Place:
Laryn Lohman, K8TVZ, 7.7 miles

Second Place:
Team Ottawa: Tom and Sheila Bosscher, K8TB and K8AJ 10.3 miles *arrived first
Team Kent: Jim and Mike Wolthuis KB8ZGK and KB8BBL 10.3 miles

Third Place:
James Richards and Chuck Nowak, K8JHR and AJ8W 13.2 miles

Fourth Place:
Robert Holton, Jim Leys and Mike Hill, K8USP, KD8CAN, W8DER 14.2 miles

Details:

The Wednesday night 'Bring Home the Flag" foxhunt was nothing short of AWSOME! Our Fox, Bob Robinson, KD8HNF, did a fantastic job putting together a textbook hunt that required an ideal balance between radio direction finding skills and orienteering skills. Bob did a lot of planning and testing to be sure that his signal was available over almost the full search area. The result was an especially enjoyable hunt for all of us.

As a "hiding place" Bob selected an observation platform approximately seventy feet in the air. The platform was located on the side of a modified farm silo in a little known park between Grand River Drive and the Grand River itself on the east side of Grand Rapids. There was little chance to sneak up on the fox as he had great view if the countryside around his perch.

The real challenge was getting from the starting point at the Red Cross Building to the Park. The area by the river is characterized by winding roads that don't seem to go anywhere in particular before they come to a dead end. Backtracking to major roads cost almost everyone a lot of time and mileage.

The winner, however did an almost perfect job of navigating the course. Laryn Lohman, K8TVZ, of the Holland ARC, did a fantastic job of locating the Fox while traveling just 7.1 miles. That is a nearly perfect hunt for Laryn.

We would like to thank Bob, KD8HNF for all the hard work and planning he did for this hunt. We would like to also thank Rich Ranta of the MARA club for being our safety communicator, making sure everything went smoothly. Also thanks again to Jim Leys who is getting awfully good as our official hunt starter. These are the guys who made our Wednesday evening so much fun! Thank you

The next MichiganFoxHunter.Com Foxhunt is Wednesday, August 18th.

Use the following link for pictures and more information about the hunt.

1052. CQ OQP CQ OQP, OHIO QSO PARTY IS NEAR - AUGUST 28!

Yahoo group: GRARA
Date: 2010-07-24 13:54:30 UTC
From: Hank Greeb
Topic: 1052 Message: 1052

The following is paraphrased from a good friend from Ohio - and an invitation to all Michigan Station to join in the fun of the Ohio QSO Party, August 29. Note that I plan to be operating from my namesake county, HENRy County, Ohio, from a park in McClure, Ohio. Please look for N8Q on both SSB and CW!

==========

Please mark your calendars for August 29! The Ohio QSO Party (OhQP) is just 5 weeks away, and the excitement is already building. Stations from across Ohio are making their plans to be on the air for one of the premier state QSO parties. Our goal is to get fixed operations on from every county this year. If you are planning on being on, please let everyone know by posting your county of operation on the "Planned Operations" website at http://ohqp.org/plannedOpsEntry.html

For those who don't know what the OhQP is all about, it's a fun time for Ohio stations to be on the air and be the hunted station, or "DX". We invite people from around the world. like our neighbors in Michigan to seek out Ohio stations in this event. The OhQP occurs on Saturday August 28, 2010 from local noon to local midnight, or 1600Z to 2359Z. In the basic QSO exchange, Ohio stations send a consecutive serial number + county, and non-Ohioans (who can only work Ohio) send a consecutive serial number and state/province/DX. Suggested frequencies are: CW: 3545, 7045, 14,045, 21,045, 28,045 kHz; SSB 3825, 7200, 14,250, 21,300, and 28,450 kHz. Full details and an OhQP operating guide can be found on the official website at: http://www.ohqp.org/.

If you are one of the "close" neighbors, why not "drift across the state line" and operate fixed or mobile from some of the adjacent counties? But, in above all, remember, the ultimate goal is to just get on the air and have some fun!

73 and we hope to hear you on the air,

Kenny K2KW Ohio QSO Party PR Coordinator kenny.k2kw@...

1054. Dumb question of the day

Yahoo group: GRARA
Date: 2010-07-27 14:51:02 UTC
From: penmaker1@att.net
Topic: 1054 Message: 1054

Once again I have the pleasure of submitting the dumb question of the day. Due to the need to use a stealth antenna system - my Gr5Vjr is stretched along the peak of the house roof- I am finding that I need to run my Yaesu 857d at 85 to 90 watts to get anyone to hear me. I've spent hours sending cq at lower power (30 through 75 watts) and get no takers. When I raise the Tx power to 85-90W I am making all kinds of contact (PSK31 20 & 40 meters)

That said my question is based on comments from the original owner of the 857 who says I should not run psk at more than 35 watts and never run the rig at near max power, am I, as he claims "burning up my rig" and or messing up the band with too much power?

My antenna options are limited by a cranky park manager who just loves to pick fights. My experiment with a Buddistick did not produce the results I hoped it would for many reasons. I have no room to spread a decent ground plane and ground mount a vertical and they probably would not let me anyway.

Ideas, comments and any help MUCH appreciated

Thanks, 73 & Blessings

Dave-W8RUZ

Hey Dave,

If you send your questions to this e-mail group, TowerTalk@contesting.com , you will have dozens of answers on how to get an antenna systems setup for your limited antenna conditions. Give as much info as you can, like height of antenna above the roof, how high the peak of the roof is above ground, direction it is facing, so on.

This group only handles, antenna, tower, feed line, grounding, rotor, etc questions. If you go off topic you are band from the group.

Good luck

KD8DEG Tom

1056. HARC Fall Schedule

Yahoo group: GRARA
Date: 2010-08-02 18:26:18 UTC
From: Megan Heyl
Topic: 1056 Message: 1056

Holland Amateur Radio Club – Fall 2010 Education

CLASSES OFFERED:
Pass the word to friends and relatives that they too can get a HAM RADIO LICENSE without too much effort. HARC again offers an opportunity to become a licensed Amateur Radio Operator with classes to prepare you for a Technician License. These classes, lead by Jim, N8QMD, begin Wednesday September 15, 2010 and end November 17, 2010. For those already in the Ham community holding a General Class License, we offer an opportunity to upgrade to Amateur Extra Class, the highest level license available. It will take some work, but the ultimate outcome is a super feeling of accomplishment and the gain of additional band privileges. Tom, K8TB, will lead these classes beginning Monday September 13, 2010 and ending November 15, 2010. Then, for those who may have wanted to learn CW (Morse Code) or who have just been curious to discover what Code is all about, Mike Cole, WD8NHA will lead CW classes on Tuesday nights. This series will begin September 14, and depending on the progress of the students, will continue for about eight or ten weeks. It is a wonderful opportunity to learn the code, or to brush up some unused skills.
LOCATION AND TIME:
All of these classes will be held at our Ken Groom ZR5AAD Technical and Training Center located at 280 E. 8th Street in Holland, Michigan. Classes begin promptly at 7:00 pm. Please come early to enjoy some refreshments and to relax beforehand.
FEES:
There are no fees for the CW class, but please remember to bring paper and a writing instrument.
There is a $20 fee for each Technician or Amateur Extra class. A study book for each class is available for an additional $20 for each book.
LICENSE TESTING:
Just in time for those who complete their licensing class, or for anyone else who wants to take a License test, HARC will host a Test Session Saturday, November 20, 2010. Testing begins at 10:00 am, so please plan to arrive a bit earlier. What you will need to take the exam will be discussed during class or contacting Rick, our VE Chairman N8GGO by email N8GGO@....
REGISTRATION:
Please contact Ed Heyboer, KF8EV by email KF8EV@... or telephone (616) 772-4811.
It is not too early to plan for some education this Fall. Let’s fill up the front classroom at the Ken Groom Technical and Training Center this Fall.

1061. Reminder: Fox Hunt Next Wednesday Night, August 18th

Yahoo group: GRARA
Date: 2010-08-16 00:10:45 UTC
From: W8DER
Topic: 1061 Message: 1061

Hey guys and gals,

Don't forget the "Jamestown 880 Fox hunt" next Wednesday night at 7:00 pm (gather at 6:30 pm)

This will be a different hunt -- away from the multitude of buildings in downtown Holland, Hudsonville, Zeeland or Grand Rapids.

Click the following link for lots of information.

http://www.michiganfoxhunter.com/michiganfoxhunter/fox_events/foxhuntaugust2010.htm

This hunt will start from the large circular drive in front of John Meyer's (K8IHY) home in the farmlands of Jamestown at "Star Corners." John's place is especially good for ham radio and fox hunts. It is 880 feet above sea level and the highest point in the fox hunt search area. We will be literally at the top of the hill looking down on the fox. John lives at 1840 Byron Road at 16th Avenue. (You cannot miss the ham towers.) A picture of the his yard is on the web site at the above link. A Google map is also available on the web site.

John's place is also fairly unique also because of it's proximity to three counties, Allegan, Ottawa and Kent. The fox could be hiding in either. Speaking of the fox... Laryn Lohman, k8tvz will be your fox for the night. Laryn is without a doubt our best fox hunter and a fairly good FOX also. This should be a fun hunt! See you there.

NOTE:
The hunt will be run by the Basic Fox Hunt rules of the MichiganFoxHunter.com. Special exceptions to the rules for this hunt will be distributed at the starting point before the hunt.

Talking to K8TB, today, he informed me of the attached.

Frank Lumney, W2UHI, was a member of HARC, served as President. Started the first 440 repeater in Holland. He lived in Plymouth Acres behind the Southside Family Fare. Later moved to Grant for the remainder of his years. Spent a lot of time on satellite and built a huge dish from scratch. I remember seeing it in "raw" form prior to assembly. He was a great guy and a real character. Frank, W2UHI will be missed.

What a fantastic fox hunt! 10 Vehicles and 27 hunters. That's more than a pack -- that's a gaggle!

Results are posted on the http://www.MichiganFoxHunter.Com site.

Also some nice pictures from Tom Bosscher -- thanks Tom.

And a special "THANKS" to our fox, Laryn, K8TVZ, for a fantastic job.

I have been know to make mistake on the scores, so be sure to let me know if I did. (A senior privilege.)

1071. Morse Code Class

Yahoo group: GRARA
Date: 2010-08-20 18:11:16 UTC
From: Charles Rich
Topic: 1071 Message: 1071

I am pleased to announce my 2010 Fall Beginner Morse Code Class.

This year I will offer the class at the Ottawa County Central Dispatch Authority (911) building which is near the corner of Stanton and 120th (12101 Stanton St, West Olive) , close to the Ottawa County Fillmore Complex and County Jail.

From GR, take Lake Michigan Drive West to 120th, Head South to Stanton, West on Stanton to location..

This is a location very convenient to Holland (HARC) and Grand Haven (NOARC). All hams and SWL's are welcome.

I am planning on beginning Monday, September 13, from 7PM - 9PM , and continuing for approximately 12-13 weeks.

My classes have been highly successful over the 60 years that I have been teaching code. In fact, I will GUARANTEE that you will learn the code if you will follow my simple program. (The fact is, I was teaching code BEFORE I became a licensed ham.)

There is NO charge for the class. A beautiful laminated certificate will be awarded for successful; completion

(((((((Due to the high security of the venue, they will require your Full Name, Date of Birth and Drivers Licence Number prior to the start of classes.

Please email your info to me ASAP, if you plan on taking this class.)))))))

I have also been advised that a tour of the OCCDA may by possible on the first night, if you would like to see the OCCDA in action. (You might even see Mike, N8XPQ at work.).

This class is not limited to Ottawa County hams. Pass along the information, and come with a "buddy".. I highly recommend the "buddy system" for weekly practice at home

Thanks for joining. I am looking forward to it. THIS WILL BE A FUN CLASS ! ! !

1073. Radio equipment search

Yahoo group: GRARA
Date: 2010-08-23 13:47:32 UTC
From: Scott Herron
Topic: 1073 Message: 1073

Hello,
I Scott KD8NAK, and a friend of mine Darrell KD8NAL are newer hams and we are looking for new or used equipment for our "shacks." This list includes but is not limited to:
HF transceiver
HT or mobile/base VHF-UHF transceiver
12 volt power supply
Antenna tuner
SWR meter
50 ohm coax
Antenna mobile-base HF/VHF/UHF and material

Thank you

73s
Scott KD8NAK

1076. CW CLASS REMINDER

Yahoo group: GRARA
Date: 2010-08-24 17:21:10 UTC
From: Charles Rich
Topic: 1076 Message: 1076

Reminder: If you want to learn Code...Time is NOW to sign up.

I will begin my 2010 fall class on Monday. September 13. for 12-13 weeks.

Just because code is not required for amateur licensing, it remains a great mode for punching through thick QRM.

We have both guys and gals already signed up, and have plenty of room for additional students, -- and REMEMBER - THERE IS NO CHARGE FOR THIS CLASS...(plus a triple your money back guarantee)

My method has been proven over the years to be an easy and an effective learning process.

In fact, I have never had a failure in 60-years of teaching.

ThIs class will be held at the Ottawa County Central Dispatch Authority (911) building,
located, in the Fillmore complex at 12101 Stanton Street (Corner of 120th)

Due to the high security of the venue, I will require your full name, Date of Birth and Drivers License Number prior to the start of classes. (See note below)

I have also been advised that a tour of the OCCDA will be available on the first night, if you would like.

This class is not limited to Ottawa County hams, so tell all of your friends and contacts.

By the way-- Pilots can benefit from this class - learn code - read those beacons.

This is GUARANTEED to be a fun class. Coffee provided

Thanks for joining. I am looking forward to it.

1078. HOLLAND AMATEUR RADIO CLUB - FALL 2010 CLASS SCHEDULES

Yahoo group: GRARA
Date: 2010-08-25 02:53:08 UTC
From: Carpoolqueen
Topic: 1078 Message: 1078

Holland Amateur Radio Club ☐ Fall 2010 Education
TECHNICIAN - EXTRA - MORSE CODE

CLASSES OFFERED:
Pass the word to friends and relatives that they too can get a HAM RADIO LICENSE without too much effort. HARC again offers an opportunity to become a licensed Amateur Radio Operator with classes to prepare you for a Technician License. These classes, lead by Jim, N8QMD, begin Wednesday September 15, 2010 and end November 17, 2010.

For those already in the Ham community holding a General Class License, we offer an opportunity to upgrade to Amateur Extra Class, the highest level license available. It will take some work, but the ultimate outcome is a super feeling of accomplishment and the gain of additional band privileges. Tom, K8TB, will lead these classes beginning Monday September 13, 2010 and ending November 15, 2010.

Then, for those who may have wanted to learn CW (Morse Code) or who have just been curious to discover what Code is all about, Mike Cole, WD8NHA will lead CW classes on Tuesday nights. This series will begin September 21, and depending on the progress of the students, will continue for about eight or ten weeks. It is a wonderful opportunity to learn the code, or to brush up some unused skills.

LOCATION AND TIME:
All of these classes will be held at our Ken Groom ZR5AAD Technical and Training Center located at 280 E. 8th Street in Holland, Michigan.
Classes begin promptly at 7:00 pm. Please come early to enjoy some refreshments and to relax beforehand.

FEES:
There are no fees for the CW class, but please remember to bring paper and a writing instrument.
There is a $20 fee for each Technician or Amateur Extra class. A study book for each class is available for an additional $20 for each book.

LICENSE TESTING:
Just in time for those who complete their licensing class, or for anyone else who wants to take a License test, HARC will host a Test Session Saturday, November 20, 2010. Testing begins at 10:00 am, so please plan to arrive a bit earlier. What you will need to take the exam will be discussed during class or contacting Rick, our VE Chairman N8GGO by email N8GGO@....

REGISTRATION:
Please contact Ed Heyboer, KF8EV by email KF8EV@... or telephone (616) 772-4811.
REGISTRATION FOR THESE CLASSES IS NOW OPEN!!
It is not too early to plan for some education this Fall. Let's fill up the front classroom at the Ken Groom Technical and Training Center this Fall. We will be running this announcement a few more times before classes begin.

Ed, KF8EV
Education Committee Chair
Megan, WO0MEG

1079. A little help please....

Yahoo group: GRARA
Date: 2010-08-25 02:59:17 UTC
From: W8DER
Topic: 1079 Message: 1079

Anyone,

What am I doing wrong? Can you help? All of a sudden I can't post anything on the K8DAA@yahoogroups.com reflector. Two days in a row, I tried to volunteer for the "Memory Walk" conducted by the Alzheimer's Association on Saturday. Also on Tuesday, I posted a request looking for anyone wanting to sell a certain microphone. Nothing! I can post on the HollandARC@... site and the HollandHamRadio@yahoogroups.com site and even the GRARA site in Grand Rapids, but not the K8DAA site?

Can anyone suggest a solution or cause? Does the address look right?

Hi Mike:

Check the site. Maybe somehow you got delisted as a member. The group is still there, but members only can send and receive messages. You might be using an e-mail address which isn't the only with which you registered?

I've often done things like that for reflectors to which I belong.

Dyslexia

Hi again, Dave,

Sure would like to have you aboard.

Can you give me a description of the problem you had in learning the code previously??

I am very ignorant on your problem, so forgive me.

The only thing I know about Dyslexia is that dyslexics have problems writing down letters, and getting them backwards, etc. Can this affect what you hear, as well?? For instance could you hear the letter A which is dit dah.....as an N which is dah it?

I am trying to cover what special help you could need.

So, if you can give me some hints, I can try to work on something that would help you to learn.

Thanks,

Chuck, W8GCW

Timing is everything...

This just popped up on Craigslist..:
****

>I have a Hy-Gain Ham 4 heavy duty antenna rotor and control box for
sale. I just pulled it off my tower and still works perfectly. Rotor was
serviced by Norms Rotor Service when I installed it 5 years ago. It has
only had very light duty use. I pulled it down and tested it and all
seems to work great. Reason for selling is I have lost interest in Ham
radio so I am downsizing.

I also have a Rohn HDBX 48 tower that is installed in my back yard and
it is free to anyone that wants to carefully take down. It has a custom
rotor plate for this rotor that sets up on the lowest section of tower
along with 2 thrust bearings. I did this so in case the rotor needed
repaired I did not have to climb the tower. Tower is free.

E-mail me thru craigslist or call (616)-293-7148

Thanks 73's

****

If I had a cheap way to take the tower down, I would be interested
in it..

From: Cortland Richmond
Topic: 1086 Message: 1086

Is there anyone who can gain access to the station for Hank, N8XX. I left some gear there for him at the W8DC open-night Wednesday but he needs to pick it up today (Thursday).

Cortland
KA5S
(I don't have access)

1087. Thanks to KA5S, AB8ND, and others

Yahoo group: GRARA
Date: 2010-08-26 13:23:29 UTC
From: Hank Greeb
Topic: 1086 Message: 1087

Cortland:

Thanks to you for the loan of some backup gear for my Ohio QSO Party Expedition. Look for N8Q on Saturday, between noon and midnight - best frequencies and times will be in the 80/75 after dusk @ 3.545 KHz CW, ssb: 3.825 Phone, during the afternoon 7.045 CW, 7.200 SSB - all frequencies ? QRM. There's a European RTTY contest, so the CW activity might slide down the band a bit if RTTY becomes a problem.

Thanks to Jack, AB8ND, and others for information on getting into the radio room. My "Quick Reference card" which I had from the past, got lost in some move from billfold to billfold, and the backup on my computer seemingly didn't include the keypad code for the radio room. I'm making up another card, and will put the info in my backup stand alone hard drive - duh! I have most everything else backed up there, except for things generated this month.

Never hurts to have a backup or two.

1088. Setting up in McClure, OH

Yahoo group: GRARA
Date: 2010-08-28 04:32:36 UTC
From: Hank Greeb
Topic: 1088 Message: 1088

I made it to McClure, Ohio Friday afternoon. Had a glitch because I found a "golf ball eating tree" which wouldn't let the golf ball down to the ground. Anyway, I'm set for Saturday's Ohio QSO Party, beginning at noon and ending at midnight Eastern Time (1600Z Saturday, Aug 28 to 0400Z Sunday, Aug 29). Please listen for N8Q and I'll be happy to give you a serial number and HENRy county.

For full details of the Ohio QSO Party see http://www.ohqp.org

1089. South bound I-75 trip

Yahoo group: GRARA
Date: 2010-08-29 12:49:06 UTC
From: pobox740
Topic: 1089 Message: 1089

Hello to all.
I am planning a trip to Florida to visit with family, an am interested in makeing a few contacts on my way down.
I will be calling "CQ" on 28.490 USB at the following dates and times...
9/7 @ 17:30
9/7 @ 20:30
9/8 @ 06:30
9/8 @ 09:30
9/8 @ 12:30
9/8 @ 17:30
All times are EST
My call is KB8AFS
The rig is a Radio Shack HTX-10, 25W pep, 1/4 wave mag mount ant.
For a special "South bound I-75 trip" QSL card, pleas send me a QSL card to my home QTH if we make contact.
Or, if you just herd me.

1090. No Meeting this Friday

Yahoo group: GRARA
Date: 2010-08-30 15:22:36 UTC
From: Jack Kunnen
Topic: 1090 Message: 1090

Due to the Labor Day weekend there will NOT be a GRARA meeting this Friday, 3 August . We will have a very short at the swap set up next week Friday.

The will also NOT be a VE test session next week Friday, 10 September. There will be VE testing at the GRARA Swap, Saturday, 11 September.

Don't forget the GraHamfest on 11 September at the Home School Building at 5625 Burlingame In Wyoming (Michigan). We can use help at set-up, the swap and tear-down.
Set-up Friday from 7-9 pm and 7 am Saturday.
Swap hours are from 8 am until 1 pm

DAPR will have there meeting Saturday, 4 Sept, 8 am at the New Beginnings on Michigan Street. I hear there is an international visitor from Tunisia coming, let's make it a big welcome.

Wednesday evenings and Saturday mornings are Open Radio Room, come on out.

Jack, AB8ND

1091. WEAVER'S WORDS -- Special Request for Congress

Yahoo group: GRARA
Date: 2010-09-03 13:25:08 UTC
From: Hank Greeb
Topic: 1091 Message: 1091

Note from N8XX:

It would be nice if the IRS could be induced to allow charitable deduction of
at least 50% of the amount allowed for business, This would be ~25¢ per mile, which would cover at least the cost of gasoline and general maintenance.

-------- Original Message --------
Subject: WEAVER'S WORDS -- Special Request
Date: Fri, 3 Sep 2010 09:06:38 -0400 (EDT)
From: ARRL Members Only Web site <memberlist@...>
To: hgreeb@...

Dear ARRL Members,

I am the ARRL official appointed by your Great Lakes Division Director Jim Weaver, K8JE to serve as the contact person between the ARRL and its members on national legislative issues. Today we are requesting that ARRL members contact their US House of Representatives member and US Senators to request that they support legislation to increase the allowable charitable mileage deduction for individuals using their vehicles in support of charitable efforts. Of course, Amateur Radio operators would be effected beneficially by this legislation. As always, if you have a question on the following request or about the Grassroots program, please feel free to contact me.

This is a slightly different approach than the usual ARRL member requests in that we are not asking for support of a specific bill. Rather, we are asking them to support a concept. Several bills have been introduced into the Congress to modify the law regarding benefits for charitable mileage. Because of this, we request that you ask you representatives to support the idea of expanding the allowed reimbursement for charitable driving regardless of the bill that may be passed. A sample letter is attached that you may use. Please feel free to modify the letter to personalize it.

To find the names and addresses of your US Representative, go to http://www.house.gov/. Enter your ZIP+ 4 in the upper left of the opening screen.

To find this information for your US Senators: http://www.senate.gov/. Select your state in the upper right of the opening screen.

We are aware that many Congressional offices have places on their official website where constituents may fill out a form and send their

comments. While this is convenient, it does not provide a “hard copy” of their comments to our Washington representative who uses them to support their visits. Experience tells us that handing hard copies of letters to the Congressional offices and staff is more effective than simple emails. So please encourage members to follow our recommended procedures.

As in the past, we request that each ARRL member send his or her letters to John Chwat, our Washington legislative representative via one of the following methods:

- As a signed attachment to an email to:arrl@....
- As a signed fax to: 703-684-7594
- As a regular letter to:

John Chwat
Chwat& Co.
625 Slaters Lane
Suite 103
Alexandria, VA 22314

If you choose to email your letter, please send it as a signed attachment to the email instead of it being the text of the email. This allows you to get more bang for each of your letters by having them hand delivered to your Representative and Senators.

One last request, please send me a copy of each letter you send so I can have copies of the correspondence: You may do this via nb4k@... will be fine of by US Mail at 218 Cory Ln., Butler, KY 41006

Thanks for your help on this. If you have any questions, please contact me.

73,

John D. Meyers, NB4K
Great Lakes Division
Legislative Action Chairman

(address)

Deduction for Charitable Mileage

On behalf of the ARRL – the national organization for Amateur Radio – that represents over 154,000 amateur radio licensees nationwide, I urge you to support passage of legislation to increase the 14 cent

standard mileage rate for charitable purposes before the end of this session of Congress. There are proposals pending in the 111th Congress to increase this rate, which has remained unchanged in tax law for the past 13 years. Two key provisions highlight our request:

* As volunteers, we frequently use our automobiles as we support public service communications protecting lives and property, and to communicate with public safety officials. We feel that the deduction for these out-of-pocket expenses should be reflect increases in gasoline and auto maintenance costs

* Volunteers who are reimbursed by charitable organizations for driving activities that benefit the organization should be permitted to exclude the reimbursements from taxable income, up to the standard mileage rate for business purposes.

Organized Amateur Radio operators provide valuable, free communications when regular channels are disrupted by disaster. They also provide similar services for a wide-range of organizations and community service events. To do this, Amateurs rely on radios, battery packs, and antennas that are typically installed in their personal automobiles. This mobile capability helps them to maintain viable communication networks to support federal and state agencies, as well as volunteer organizations, during disasters, severe weather, other emergencies and more routine public service events. Increasing the charitable driving tax deduction will help Amateur Radio operators maintain their role in supporting that our communities.

Please contact our Washington representative, John Chwat, if you can help us. Please contact him atjohn.chwat@...
<mailto:john.chwat@...> or (703) 684-7703.

Sincerely,

(your signature)

Hank and all

The IRS does allow mileage for charitable use of vehicles. It is not as much as the business deduction, but I believe this year it is around 15-16c per mile. If you do your own taxes (a huge mistake) look for this in the area of charitable contributions, If you use a tax preparer be sure to tell him/her and have documentation of the miles driven and the name(s) of the charity involved.

73 and happy DXing

Yup, I agree that we can deduct 14 cents per mile. But for a standard size car, or even my itty bitty compact car, it hardly covers gasoline, much less wear and tear plus depreciation. You will note that the rate hasn't been changed for 13 years, yet gasoline prices have gone up, along with repair rates, etc..

I've been told, perhaps incorrectly, but by several sources, that the mileage rate for non profits is fixed by law, not the IRS. That's why the congress needs to get involved.

I'll double check with my sources, including a CPA, and get back if this is incorrect.

Ironically, business mileage is much more -- Seems that business people are (hopefully) making money driving, and getting a bigger tax break than us "poor" volunteers. Business mileage deduction is FIFTY CENTS!!!

I can't drive my Honda CRV for 14 Cents.

WELL, with a REALLY good kick in the head you could go on disability and really enjoy those Ren & Stempy cartoons (or maybe even CSPAN) while eating Fruit Loops! It might even help some on 40M.....
Increasing those deductions might inadvertently help a church here and there and
I'm sure that would be abhorrent to them... as there is no other god than the IRS.... (praise their name forever) It would be logical and FAIR to AT LEAST keep up with inflation for the sake of non-religious groups who's workers use these deductions..... YES I will try to write, but I'm not holding my breath on a fix!
I think the IRS does a really good job, praise their name forever! You have to admit the IRS (praise their name forever) IS more effective than congress.... But I digress further off topic..sorry...
Mark B. N8PGV I reserve the right to revise and extend my remarks....as all honest folk do....
PS.... In all fairness Carl Levin is a great guy, and I can see him helping....

I'm not bitter hi hi, just so glad I no longer have to fight with

them. 14c is slightly better than a kick in the head though hi hi

1098. Colorado & Tennesee QSO Parties This weekend

Yahoo group: GRARA
Date: 2010-09-04 04:03:27 UTC
From: Hank Greeb
Topic: 1098 Message: 1098

Anyone for the Colorado QSO party this weekend? It starts @ 1200 UTC 4 Sept. 2010 and ends @ 0400 UTC 5 Sept 2010 (8AM to Midnight EDT)

Seems like they've got things fairly well organized. See http://www.ppraa.org/coqp/index.php for details.

I know that N1MM will run the contest - at least I've set it up, and it seems to run OK. Haven't tried other contest logging programmes, the web site sez that ?CQ/X, N1MM & Writelog knows about the contest. W3KM says it will work.

I personally know that many counties in Colorado are very sparsely populated, so many counties will be covered by mobiles.

The very next day will be active with the Tennesee QSO party. That's 1800z Sunday, September 5 until 0300z Monday, September 6, 2010, or 2 p.m. to 11 p.m. Sunday. Rules are @ http://www.tnqp.org/html/rules.htm

They claim to have all 95 counties covered - fixed or mobile. See http://www.tnqp.org/html/active2010.htm for more info.

1099. Tentative Announcement for the next Western Michigan Fox Hunt

Yahoo group: GRARA
Date: 2010-09-05 02:09:14 UTC
From: K8TB
Topic: 1099 Message: 1099

Set aside Sept 15, a Wednesday night, for one more of a great series of West Michigan Fox Hunts this year.

Details:

Gather at the southern end of parking lot of the Family Farm and Home store at 6101 Lake Michigan Dr in Allendale. A Huntington Bank is just in front of the store. Stay close to the Lake Michigan Dr side. Gather by 6:30 PM.

The Vixen-Fox will start transmitting at 6:45PM. Yup, 15 minutes earlier. Gotta give some people time to find us before dark!

Frequency will be 145.53, with a Robo-Fox sequence of 1 minute on, 2 minutes off.

Vixen-Fox will be within 200 feet of their vehicle. The signal will stay the same power, fixed antenna, vertically polarized.

Vixen-Fox will be within 8.13 "as the crow flies" miles of the starting spot.

Other details are typical. Vixen-Fox will be in plain site, however, they may be wearing camouflaged outfits so it may be difficult to see them.

Fox ends at 8:45 PM. Lowest mileage wins. Dopplers invited, but they only win their category.

Have a great time "trying" to find us...

Vixen-Fox

1101. ULTIMATE CODE CLASS

Yahoo group: GRARA
Date: 2010-09-06 19:15:26 UTC
From: Charles Rich
Topic: 1101 Message: 1101

Time is running out - The count down is on...! ! ! ! !

You have 5 days to get registered for the ULTIMATE Morse Code Class.

My class is open to anyone. No license required, No club affiliation, -- just a desire to learn the original digital mode -- MORSE CODE.

Code breaks through the heavy QRM. Ask any serious contester.

We take it on one letter at a time - Learn them all, and then practice and practice 'til we get it down pat.

I have a guaranteed method that works. Never had a failure in over 60-years of teaching.

Class will meet on MONDAYS beginning NEXT MONDAY, September 13, and will go on for 12-13 weeks.

We will meet at Ottawa County Central Dispatch Authority (911) at 12101 Stanton Street.

You MUST register NOW to pass security requirements to enter building.

Register direct to my email: chucksvideo@sbcglobal. I will need your Full Name, Date of Birth and Drivers License or ID Number.Do not send secure information via reflectors.

1102. GRARA Hamfest this Saturday. NEW MODERN LOCATION BY M6 AND US131

Yahoo group: GRARA
Date: 2010-09-07 00:35:42 UTC
From: W8DER
Topic: 1102 Message: 1102

The first area hamfest of the fall season is finally here. The GRARA Hamfest is Saturday morning, and I am REALLY ready. My summer list of needed parts is longer than I could ever satisfy in a single day. Between this hamfest and the Holland Hamfest in October, I have a chance getting it all. I plan to be there right at 8:00 am when it opens.

The GRARA Hamfest is in a new, much more convenient and modern location. It is in the south part of Wyoming near the intersection of US131 and M6. Easy access, lots of parking, what more could I want?

Check out the GRARA website for details. Http://www.w8dc.org

1103. MDXA RF Express Special Event

The MAARC 146.94 repeater is gaining another net! Called the TechNet, participants will focus on issues that relate to digital modes of communication. These might involve rockets, satellites, computer hardware and programming, astronomy events, contacting the International Space Station, working Amateur Radio Satellites, EME (Moonbounce) and how to use Orbital Plotting software.
Outside of Space topics we will also discuss;
How to use your radio, Radio Orienteering, building mini transmitters for ROCA, Antenna Construction, Sound Card-to-Rig Interfaces, Cables and Connectors, DSP Manufacturers, Interfaces Manufacturers, Radio Manufacturers, Packet Radio, PSK31, Radio Programming Cables, RTTY, Ham Radio Software, Networking issues, Operating System issues and many other High Tech Radio-Computer related issues and the list goes on. Check in Saturdays at 11:00 AM on 146.940 (-) (94.8PL)
Hope to hear you.

Subject: [GRARA] Code Class

The Ultimate Code Class will begin Monday night, September 13, 2010 at 7:00 PM.

I'm sticking my neck out for anyone else who wants to get in on this class. This is the last call for the last call. Hopefully, I can get you your security clearance before class time.

YOU MUST GET ME YOUR NAME, DATE OF BIRTH AND DRIVERS L.ICENCE OR ID NUMBER, no later than Midnight Sunday. (Send this information directly to my peronal email for security. (chucksvideo@...)

Don't let this opportunity slip by. We have a nice group forming and we're going to have a lot of fun.

You will need paper (preferably legal pad) and choice of writing instrument

Thanks to all who have signed up.

From: n8xxham
Topic: 1114 Message: 1114

I was recently contacted about W8CBH, William Gerber.

A veterans' group to which he belongs has lost connection with him.

They have his home phone number, e-mail address, snail mail address, etc.

Snail mail address is listed on QRZ.com at the same address as the groups has.

I don't want to bother him, but said I'd ask around. GRARA seems a logical organization to which he might belong, or might have belonged.

Any info would be appreciated.

From: Michel
Topic: 1117 Message: 1117

For all you lucky hunters planning to attend the Wednesday night "Racing Sundown" fox hunt, we have added pictures of the start location to the web site. Lake Michigan Drive has a median down the center of the road at this point (with trees). We will be on the north side of Lake Michigan Drive. These pictures can help you find the start point. Please join us in the parking lot, as close to the road as possible.

1119. HARC CW NET

Yahoo group: GRARA
Date: 2010-09-15 17:03:05 UTC
From: Carpoolqueen
Topic: 1119 Message: 1119

NEW ☐ HARC CW Net

The Holland Amateur Radio Club is pleased to announce a brand-new CW Net!

Who: Any licensed amateur with an HF radio connected to a 10M antenna and with a means to transmit CW.
What: An informal net to practice your CW skills.
Where: 28.200 MHz
When: Each week, Thursday evening, 7:00pm local time
Why: To provide a time and place for CW operators of any skill level to meet.

There will be no minimum speed or skill level. Net Control will slow to match your speed.

Simple Steps
1. Tune in and listen for CQ HARC
2. Check in and wait until it's your turn.
3. Add your thoughts and comments on the topic of the evening.
4. Repeat weekly!

This may be one of the least-stressful ways to make a CW contact and enjoy a QSO, so we especially encourage new (or rusty) CW operators to join in.

Megan Heyl WO0MEG

President Holland Amateur Radio Club

Mike Cole WD8NHA

CW Instructor

1123. Wednesday Night Fox Hunt

Yahoo group: GRARA
Date: 2010-09-16 04:30:26 UTC
From: W8DER
Topic: 1123 Message: 1123

What a fantastic fox hunt we had tonight! Seven vehicles and 18 hunters accepted the "Racing Sundown" Challenge. Sheila and Tom did their usual fantastic job as fox and Vixen. Four clubs were represented. Hank and Sarah hosted a new ham and his daughter tonight and we have another ham "hooked" in this cool part of the ham radio hobby. I think we "closed" the McDonalds in Allendale with our after-hunt gala.

The college kids weren't the only ones having fun in Allendale tonight.

Unfortunately, Laryn had to work --- so a Muskegon Team won the hunt!

We have accepted the Muskegon challenge to avenge our loss. We will send a team to their fox hunt on Saturday, September 25th. We will bring the flag back to Holland! (Additional teams would be appreciated just in case.)

Tonight's results are being audited and will be posted tomorrow night.

Long live ham radio!

Mike

1127. Anyone want a 2011 ARRL Handbook??

Yahoo group: GRARA
Date: 2010-09-16 19:14:23 UTC
From: Hank Greeb
Topic: 1127 Message: 1127

Seems like a good price to me. I have a 2010 handbook (first since 2000, I believe, so I won't be ordering one myself.)

Check into http://www.kangaus.com for details.

72/73 de n8xx Hg

-------- Original Message --------
Subject: [QRP-L] 2011 ARRL Handbook offer
Date: Thu, 16 Sep 2010 15:00:24 -0400
From: Bill Kelsey <n8et@...>
To: qrp-l@...

Last years sale of new ARRL Handbooks was such a success I am going to do it again.

The 2011 ARRL Handbook will be available October 1 this year. Both the hard cover and softcover versions will be available from ARRL for $49.95 plus s/h for the month of October (while supplies last - They sold out of the hard cover version last year!).

I will offer either the hard cover or soft cover ARRL Handbook for $39 plus $7 s/h to US addresses. DX/VE Shipping will be at cost - and it is expensive....

This offer will be good until October 1. I can take Paypal (n8et@...), VISA, MC, or a check/MO.

New topics in this years Handbook include:
Schematic capture and Printed Circuit Board Layout
Amplifier tuning and maintenance, using surplus amp parts
Restoring vintage equipment
Remote station design

New projects include:
Microprocessor-based SWR Monitor-Meter by K1QW\
LTspice simulation files for basic electronic circuits
Selecting the right battery for mobile operation

A CD-ROM is included with each handbook, and it includes the fully searchable text and illustration in the book, as well as companion software, PC board templates, and other support files.

1128. Sept 15 West Michigan Fox Hunt

Yahoo group: GRARA
Date: 2010-09-17 00:51:26 UTC
From: K8TB
Topic: 1128 Message: 1128

So here on the details. And it was a great hunt.

Eight cars !

I am going to list the participants by mileage:

1. At 9.1 corrected miles, "Silo" Bob KD8HNF and Frank KD8OHS.
They clocked in at 8:43PM

2. At 10.6 corrected miles, that Incredible team from Muskegon,
including:
Jim KC8PCJ, Dave KD8OCZ, Cathy and Nancy,
Jeff W8SWX along with Brenda and Nathan.
This team was the first to show up at 7:54 PM

3. At 13.2 miles, Jack K8CYV and Barb KD8FBY, the "other" Muskegon
Team!
They clocked in at 8:44 PM.

4. At 13.8 miles, Mike W8DER, Jim KD8CAN, and Robert KC8USP
They clocked in at 8:23 PM

5. At 24.5 miles, 3 of them swimming, James K8JHR and Chuck AJ8W.
They clocked in at 8:43 PM

6. At 25.8 miles, "Smiling" Hank KA8COB, Sara KD8JOB and Todd KD8OQH.
They clocked in at 8:34 PM

7. At 33.1 miles, Don KG8UH and Dave N8NBU.
They clocked in at 8:45 PM.

The winners by mileage are KD8HNF and KD8OHS. I looked at the
route they took, and there is no way to go any shorter.

At the same time, as a "veteran" Fox Hunter, we have to tip our
collective hats to this Amazing group of people out of Muskegon. This is
only their second showing, and they took names. The Muskegon group took
in 2nd AND 3rd for mileage, and 1st for time. I think a monster has been
awakened. What is going to happen when they get "good" ! :) I looked at
their map and all their bearings were dead on, including the very first
one. Impressive.

I have to take a moment and make a special note of thanks to one
person. And that is Jim Leys, KD8ACN. Jim is the one who is always
handling the clipboard and taking names and mileage readings at the
start location. I think Jim has done this over 20 times now, and his
work and attitude is so very much appreciated.

I can safely state that this was a very fun hunt. Sheila and I had a great time (watching the teams coming in, and just waiting !) Thank you to all the folks involved.

And a note to anyone reading this email who did not participate. Sheila and I took an unusual step to actually post pictures of the hiding location before the hunt. You can see these pictures at : http://www.michiganbroadcasttowers.com/foxhunt.htm

Now, to dust off our Df'ing equipment

Sheila K8AJ and Tom K8TB

From: Carpoolqueen
Topic: 1131 Message: 1131

CQ, CQ, CQ
-.-. --.- -.-. --.- -.-. --.-
For those who may have wanted to learn CW (Morse Code) or who have just been curious to discover what Code is all about, Mike Cole, WD8NHA will lead CW classes on Tuesday nights. This series will begin September 21st, and depending on the progress of the students, will continue for about eight or ten weeks. It is a wonderful opportunity to learn the code, or to brush up some unused skills.
LOCATION AND TIME:
All of these classes will be held at our Ken Groom ZR5AAD Technical and Training Center located at 280 E. 8th Street in Holland, Michigan.
Classes begin promptly at 7:00 pm. Please come early to enjoy some refreshments and to relax beforehand.
FEES:
There are no fees for the CW class, but please remember to bring paper and a writing instrument.
CONTACT:
There are seats still available - please sign up with Ed at KF8EV@...

1132. [MIQRPClub] Special Event Station

Yahoo group: GRARA
Date: 2010-09-21 19:15:20 UTC
From: Hank Greeb
Topic: 1132 Message: 1132

Relayed from WB8SIW:

Special Event Station

This year marks the 75^th Anniversary of America?s oldest public service net. Radio Amateurs are invited to join in this celebration by contacting K8QMN from the Michigan Net, QMN Diamond Jubilee Banquet on October 23, 2010 at Owosso, Michigan.

Before QMN, public service and emergency communications were handled on an ?ad-hoc? basis using schedules and directional ?CQ? transmissions. This all changed during the Autumn of 1935 when members of the Detroit Amateur Radio Association created QMN to exploit the then relatively new technology of crystal control, which made it practical to create a ?spot-frequency? traffic net. QMN went on to become the prototype for the many traffic and emergency nets, which followed. The concept of a single-frequency net did much to improve the efficiency of both traffic handling as well as emergency response. QMN even established well equipped emergency communications teams before ?ARES? and similar programs became common place. It was also a QMN Committee, which created the familiar ?QN-signals? so familiar to generations of traffic handlers.

The 75^th Anniversary QMN Station will consist of all ?vintage? equipment from the 1930s and ?40s. The 40-meter station will consist of a Thordarson transmitter and RME-69 receiver operating from the banquet hall at Owosso, Michigan. The 80-meter station will consist of a National HRO receiver at the banquet facility and a Johnson Viking One transmitter located off-site and keyed remotely via a land-line Morse wire. A working land-line telegraph connection will also be in operation, allowing members of the Morse Telegraph Club to connect with the special event via the ?Morse KOB? network and ?KB? telegraph hub.

Radio Amateurs should look for K8QMN on 7050 and 3563 KHz from 2-PM to 5-PM on Saturday, October 23. The stations may return to the air for an hour or two after the banquet and program, so be sure to check for K8QMN later in the evening.

A nice 8 ? by 11 certificate suitable for framing will be issued to those operators who work K8QMN during this special event.

1133. Muskegon Fox Hunt/Workshop tomorrow.

Yahoo group: GRARA
Date: 2010-09-25 00:24:42 UTC
From: W8DER
Topic: 1133 Message: 1133

Passed on for our friends at the Muskegon Club. This should be a lot of fun tomorrow! I plan to get there about 2:00 pm.

Mike, W8DER

_____

Reminder on September 25th from Noon to 5:00 PM the Muskegon Area Amateur Radio Council will be sponsoring a Fox hunt work shop at our club house. Club house location is 2888 Scenic Drive North Muskegon, 49443

Talk in Freq. 146.940 PL 94.8

Schedule as follows
12:00 Noon Antenna building workshop (while supplies last see cost below) All materials supplied except connector to your radio, 3 feet of RG58 coax will be in kit. We have 4 kits left please RSVP soon to reserve you kit and/or also for lunch.

1:00 PM Lunch , Hamburg and hot dogs. Bring dish to pass. (see cost below)
2:00 PM Fox Hunting work shop Learn how to fox hunt and experiment with your equipment. Anyone that is willing to help educate the rest of us are welcome
3:00 PM Fox hunt we will be using the Michigan fox hunter rules Primary fox Frequency is 145.530 back up is 146.580
4:45 PM Meet back At MAARC club house for announcement of winners.

Cost for antenna kit is $6.00 bring your own connector for RG58 coax. (we are planning on having 10 kits.(5 kits left as of this afternoon) please reserve your kit now)
Cost for Lunch $4.00 and Bring dish to pass.

////////////////////// PLEASE RSVP by Wednesday Sept. 22, for antenna and/or for lunch. We need a head count//////////////////////

RSVP to Jim kc8pcj@... or Jeff W8SWX@... or Barb redoakscorner@mymailstation.com

Fox hunter rules http://www.michiganfoxhunter.com/michiganfoxhunter/fox_rules/rules.htm

I am working on a Display project on QRP.

I would appreciate any pictures of QRP operation and / or QRP rigs, antennas, etc, etc.

Home brew rigs make great material.

I have a few of "QRP in the park", but would like more of these and others for variety.

Quoteable quotes will all be appreciated

Any help will be appreciated.

1139. Balloon Launch Tomorrow Morning

Yahoo group: GRARA
Date: 2010-10-01 19:10:05 UTC
From: Hank Greeb
Topic: 1139 Message: 1139

There's a Balloon launch tomorrow with a radio transmitter beacon.

Might be interesting to tune into 14059 KHz sometime after 10:00 a.m. EDT, or 1400Z to see if it can be copied here. If it's "line of sight" it might work, if it depends on the ionosphere, the skip zone may be too far out for Iowa to Michigan.

But, I offer this as an interesting possibility.

73 de n8xx Hg

-------- Original Message --------
Subject: [QRP-L] Balloon Launch Tomorrow Morning
Date: Fri, 1 Oct 2010 13:49:48 -0500
From: WA0ITP <wa0itp@...>
To: <qrp-l@...>

The QRP ARCI sponsored iHAB-2 high altitude balloon will be launched tomorrow morning at 9AM CDT, 1400z, from Ottumwa, IA.

The beacon will be transmitting on 14.059 and sending "K6JSS IHAB 2" at about 15 wpm, with 10 seconds between transmissions. A picture of the beacon and a rough drawn
schematic can be seen here http://www.wa0itp.com/ihabbeacon.html

If you hear the beacon please post a signal report to www.qrpspots.com and/or balloon@.... A typical report might be "heard ihab 2 at 1430z, 579 indianpolis, IN de kb9bvn" QRP ARCI will be sending a nice certificate to those who send a report to balloon@...

Live video streaming can be seen at http://www.w0otm.com/iHAB/iHAB-2/

Enjoy the flight

I love this radio stuff !

1140. Honda Generator Sale

Yahoo group: GRARA
Date: 2010-10-07 15:36:01 UTC
From: Hank Greeb
Topic: 1140 Message: 1140

I received an ad from Weingartz "everything from lawn to snow" which has a 2.5 KW Honda generator on sale for $677.

The ad sez the retail value is >$1000. From what I've seen Hondas are like Timex, the take a beating and keep on ticking.

Note it's not a "super quiet" one - the super quiet 2 KW version is priced at $1000, which seems to be the regular price.

The brochure sez Weingartz is in Cedar Springs (near me), Farmington Hills, Utica, and Clarkston.

Note I have zero financial connection with Weingartz or Honda, just passing on info.

73 de n8xx Hg

p.s. If anyone knows of one of the itty bitty 350 watt Honda generators which is languishing in someone's garage gathering dust, please advise. This would be a great addition to my QRP "camping" collection. They were made in the 60's and early 70's, but were dropped in favor of a 1KW version which is a bit big and heavy for my use.

1144. Fox Hunt October 23, 2010 for West Michigan

Yahoo group: GRARA
Date: 2010-10-17 00:10:05 UTC
From: K8TB
Topic: 1144 Message: 1144

Mark your calendars and warm up the DF equipment.

The West Michigan Charter Member Auxiliary 7388 of the Michigan Fox Hunters will supply a fox hunt on Saturday, October 23, 2010.

Details:

Who: Anyone who wants to have fun with a DF hunt
When: October 23, 2010 at 10:00 AM.
Where: K8IHY's home QTH, 1840 Byron Rd, Jamestown, MI.
About 5 miles west of Byron Center.
Can't miss this house. Tall hill and a 140' tall tower.
Why: Are you kidding? Why not. Mix it up with the best.

At this time it looks like Sheila, K8AJ will be the Vixen.
I may or may not be with her. Depends. Also, Laryn, K8TVZ has indicated that it looks he will be busy that morning. More RF for the rest of us.
The Vixen will be within 8 airline miles of K8IHY's location.

More details to follow...

tom K8TB

1145. Fox Hunt October 23, 2010 for West Michigan... MOVED to Nov 6th..

Yahoo group: GRARA
Date: 2010-10-19 01:36:52 UTC
From: K8TB
Topic: 1145 Message: 1145

Folks,
I received over 6 emails from people/groups who cannot make
this Saturdays Fox Hunt due to conflicts with the last minute notice. So
I am going to change the date to November 6th.

As an addition bonus, I will be hiding, so combine that with the
month of November and it will be a hunt for "Tom the Turkey" ! Start the
comments now :)

So put November 6th, at 10:00 Am on the calender.

Tom Bosscher

Mark your calendars and warm up the DF equipment.

The West Michigan Charter Member Auxiliary 7388 of the Michigan Fox
Hunters will supply a fox hunt on Saturday, November 6, 2010.

Details:

Who: Anyone who wants to have fun with a DF hunt
When: November 6, 2010 at 10:00 AM.
Where: K8IHY's home QTH, 1840 Byron Rd, Jamestown, MI.
About 5 miles west of Byron Center.
Can't miss this house. Tall hill and a 140' tall tower.

What: The "Find Tom the Turkey" hunt... Bring your best lines.
Why: Are you kidding? Why not. Mix it up with the best.

More details to follow...

1146. Invitation to Activate Murray Lake Island - 10/23 to 10/24 (Sat & Sun)

Yahoo group: GRARA
Date: 2010-10-20 02:08:29 UTC
From: Hank Greeb
Topic: 1146 Message: 1146

QST QST QST

Calling all hams in the area. A bunch of us will be operating from Murray Lake Island, a few miles north of Lowell, with the special event call N8M, during the W/VE Islands QSO Party this coming Saturday and Sunday, October 23 & 24 2010. We plan to start setup at 10:00 a.m. at 3650 Causeway Drive NE, Lowell, Michigan. This is off Lally Street, between Lincoln Lake and Murray Lake Roads. Map with directions to the location is at http://tinyurl.com/267zsk8

We received a special use permit, so we can operate overnight if we get enough help.

We will be setting up at about 10 a.m. Saturday, and the QSO party starts at Noon, and runs until 7 p.m. Sunday. Frequencies will be around 14050, 7050, 3550 KHz CW, and around 14250, 7250, 3850 KHz, on SSB.

Details of the contest are at
http://www.usislands.org/contest_rules.html

We'd like to see many of our fellow hams join the fray. We'll have two HF stations and at least one VHF FM station on 2 metres, so there will be plenty of space and time for visiting operators. We'll try to monitor 145.27 most of the time, but we may move to other repeaters for publicity.

Hope to see you on the air from Murray Lake Island, next weekend

72/73 de n8xx
Operating as N8M during W/VE Islands QSO Party, Oct 23 & 24, 2010

1147. Electrical Theory from Klimsville

Yahoo group: GRARA
Date: 2010-10-20 06:06:41 UTC
From: Wilson
Topic: 1147 Message: 1147
Attachments: 1 described; binary payloads are missing from this source WARC

Electrical Theory
A observation from years of creating Smoke

All electrical components and wiring harnesses depend on proper circuit functioning, which is the transmission of charged ions by retention of the visible spectral manifestation known as "smoke". Smoke is the thing that makes electrical circuits work. Don't be fooled by scientists and engineers talking about excited electrons and the like. Smoke is the key to all things electrical.

We know this to be true because every time one lets the smoke out of an electrical circuit, it stops working. This can be verified repeatedly through empirical testing. For example, if one places a large copper bar across the terminals of a battery, prodigious quantities of smoke are liberated and the battery shortly ceases to function. In addition, if one observes smoke escaping from an electrical component such as a voltage regulator, it will also be observed that the component no longer functions. The logic is elementary and inescapable! The function of the wiring harness is to conduct the smoke from one device to another. When the wiring harness springs a leak and lets all the smoke out of the system, nothing works right afterward.

Starter motors were considered unsuitable for motorcycles for some time largely because they regularly released large quantities of smoke from the electrical system. Once again, the logic is clear and inescapable.

Sometimes you may miss the component releasing the smoke that makes your electrical system function correctly, but if you sniff around you can often find the faulty component by the undeniable and telltale smoke smell. Sometimes this is a better indicator than standard electrical tests performed with a volt-ohm meter.

In conclusion, the basic concept of transmission of electrical energy in the form of smoke provides a clear and logical explanation of the mysteries of electrical components and why they fail.

Rich Klim
Engineer at Klimsville

1148. CODE CLASS AVAILABLE

Yahoo group: GRARA

1153. Zombie Shuffle, Friday, October 29

Yahoo group: GRARA
Date: 2010-10-27 14:38:40 UTC
From: Hank Greeb
Topic: 1153 Message: 1153

I ran across a "different" QSO Party/contest. Most are sprints, or contests, or QSO Parties. This one is a "Shuffle?" Why Shuffle? See rules below

==========

OFFICIAL RULES FOR THE 2010 ZOMBIE SHUFFLE

WHY SHUFFLE?: Because Zombies don't sprint.

WHEN: Friday Nite, October 29, 2010
(Always the Friday closest to Halloween, except Halloween itself and ARRL SS)
TIME: From local sundown (6pm or so) to local midnight. The full 6-hours, or whatever you can spare. (Don't even have to convert from UTC).

WHERE: 20, 40, and 80 meters
Somewhere in the vicinity of the QRP gathering/calling frequencies 14.060, 7.040, 7.030, 7.110, 3.560, 3.710, or anything else that works

MODE: CW only, QRP (5W or less)

EXCHANGE: RST, SPC, Zombie Number and Name
RST -- Signal report (like 599, even if you can't hear him!)
SPC -- State/Province/Country (ex. CA, TX, BC, TRANSYLVANIA, etc.)
ZOMBIE NUMBER - Your assigned Zombie number or telephone 3-digit Area Code
If you don't have a Zombie number, email Jan n0qt@... to request one
NAME -- Your name (as shown on your birth, death or other certificate)
If you are a YL/XYL, you can use "Elvira" to pass out 666 extra points Some selected stations will be sending name ELVIS for 666 extra points

TIDBITS:
CQ BOO is the time tested CQ for the Zombie Shuffle.
NEW RULE: You may work the same station on a band every two hours.
NEW RULE: Score is the zombie number totals times stations worked per band, not SPCs
These changes so you don't get bored in spite of poor band conditions
GRAND ZOMBIES are those with Zombie numbers less than 100. If you are a Grand Zombie (you know who you are), add 1000 to your number
(Ex. Zombie #138+1000=1138)
If you are a selected ELVIS station, send ELVIS for your name.

SCORING: Basically, your score is going to be the sum of all Zombie numbers and Area Codes worked per band (add them all up for a big number) plus bonus points per band times the number of stations worked

per band. Add up the bands. This can be a fairly large score.

Last year's winner was Todd N9NE with 252,054 points with less than 30 QSOs!

BONUS STATIONS -- BONUS POINTS
You receive 666 bonus points for working the following stations:
ELVIS -- For each Elvis Station worked (name is Elvis), add 666 points
ELVIRA -- If you work an Elvira station (YL/XYL), add 666 points
CRUMMY BAND CONDITIONS is worth 666 points (every station qualifies for this). Thus, you get 666 points even if you worked no Zombies.

The Score Summary sheet is available at:
http://www.zianet.com/qrp/ZOMBIE/zombie.htm

SCORE SUBMISSIONS: Download the Summary Sheet from the website above (in .doc or .txt format, or email file) and submit to: na5n@... with Zombie in the subject by December 1, 2010.

If you prefer mail, send to Paul Harden, P.O. Box 757, Socorro, NM 87801

You do not have to submit your log -- just the summary sheet.

CONTEST PHILOSOPHY: There is no point to the Zombie Shuffle whatsoever except to get on the air and have fun with fellow Zombies and QRPers. Even with only 2-3 QSOs, you can earn a fairly large score to brag to your co-workers and QRO buddies, or your ARRL Sweepstakes (SS) friends next weekend! If you haven't been on the air for awhile, your fist is "rusty," or your code speed is slow, this is the "contest" to put a few contacts in the log. Note that the scoring is based on SERENDIPITY rather than operating skill. Band conditions and propagation is not the best at night, so most operators are not cracking out 35wpm. Around 13-18 wpm is typical. Don't be afraid to ask a station to QRS (slow down) or repeat their exchange if you miss it. He wants to work you as much as you want to work him. And remember, he's a Zombie too! We want you to stay on the air and have fun in spite of crummy bands -- so this year, you can work the same station on a band after a two hour wait (every 2 hours if you wish). So get out your straight key, keyer, bug, or spark gap and do your CW thing. For the time on the air, just think how many political campaign commercials you will miss!

Remember, Zombies have no soul. They can not be embarrassed or humiliated. Even at 5wpm. But, they can have a blast deep down inside (even if they don't show it).

The first Zombie Shuffle was held on October 30, 1998.

My name is Paul Harden and I approve this message :-(

72, Paul NA5N - and, Jan N0QT
GRAND ZOMBIE GRAND WITCHESS & CONTEST CORONER

==========

Of course, you should stay clear of the nearest Psych ward if you decide to join in this "shuffle." :)

CU Friday evening!

1155. GRARA Meeting - November 5, 2010

Yahoo group: GRARA
Date: 2010-10-27 18:52:50 UTC
From: Hank Greeb
Topic: 1155 Message: 1155

C'mon down to the next meeting of the Grand Rapids Amateur Radio Association, Friday, November 5, 2010, gathering at 6:30 p.m. meeting @ 7:00 p.m. A special feature will be a recap of the "Activation of Murray Lake Island" led by Hank, N8XX, and as many of the participants and can be arm twisted to lend their comments about this "Island Expedition."

For those who are unaware, this started out as a musing about "something to do on a weekend." I noticed that the ARRL contest page had the "W/VE Island QSO Party" listed for October 23 & 24. Checking the web page http://www.usislands.org it listed several islands in Michigan, but none in this area. I muddled around maps.google.com, and found Murray Lake, with an island, which had been connected to the mainland in the 1950's with a causeway. One thing led to another, and a bunch of members of GRARA, the Lowell ARC, and the W8HVG "lunch bunche" decided to "activate" Murray Lake Island.

The rest is history. We set up two separate stations, one on SSB, the other on CW, at the boat launch area. We made 99+ Q's on SSB, 50 on CW, got rained on a bit, but, in general, the "ISLAND-expedition" was a success. Band conditions were fine 6 or more DX countries were worked. ZL1 was heard on 40 during the wee hours of Sunday morning, but we were too weak to raise. Thanks to those who signed in including KD8CWP, NY8D, W8DA, KD8EQP, KD8HNF, NF8J, AA8JR, AB8ND, KD8OHS, KA5S, N8UVI, KA8WGF, N8XX, and AC8ZX. Several locals and fishermen came by and asked questions about ham radio. If we missed anyone it certainly wasn't intentional.

We'll have a bunch of pictures at the meeting on the 5th, plus commentary about the adventure.

Oh, yes, GRARA meets at Red Cross, 1050 Fuller Ave NE. Grand Rapids, MI 49503. Directions and Map may be found on the web site http://www.w8dc.org

CU on November 5.

This is the result of the last couple days of high winds.

Inventory:
26 element two-meter, 19 element 70 CM. 3 element 17 Meter and 40-80 trap doublet.

Tower seems OK, as is the other tower with the TH6DXX, 10,20, 15 mtr .

Anyone for a Saturday afternoon project????

This is a resend.
Obviously, the .jpg's didn't work, thus this word file.
This is the result of the winds during the past week.
Suprisingly, the tower still stands, as does the big tower which has the
tri-bander on it.
Looks like I could use some help restoring it before winter. Any volunteers???

1159. 17 Meter Beam available

Yahoo group: GRARA
Date: 2010-10-29 21:17:39 UTC
From: Charles Rich
Topic: 1159 Message: 1159

Due to storm damage this week - I have a damaged 17-meter three element beam available.

There is damage to two of the elements (One very Minor) and the balun is shot.
The elements should be available at most hardware stores.
Overall, I look at this as quite repairable.
I don't operate 17 all that much and I need the tower space.
This is FREE for the taking.
Lawn clean-up next week, so it must go----NOW!!!

Jack,

Microsoft has a converter which works with Word 2000 to convert docx to doc. Go to microsoft

it's a 37 megabyte file, but I vouch for the fact that it works with my Word 2000.

I'm able to read docx and xlsx files with it.

1163. N8XX ZOMBIE SHUFFLE SOAB QRP

Yahoo group: GRARA
Date: 2010-10-30 17:54:50 UTC
From: Hank Greeb
Topic: 1163 Message: 1163

I put this on the 3830@... reflector, just for the fish
(Halibut).

Did any other locals check into the Zombie Shuffle?
See http://www.zianet.com/qrp/ZOMBIE/zombie.htm to see what you missed! :)

Fun, fun fun, seemed to be had by all.

72/73 de n8xx Hg

2010 ZOMBIE SHUFFLE SUMMARY SHEET

Call: N8XX Zombie number: 851
Name: ELVIS
QTH: MICHIGAN
Exchange SENT: N8XX ### (USUALLY 599) MI 851 ELVIS

SCORING: 80M 40M 20M

1> Total of Zombie Numbers* = 12959 6770 0
2> __ Elvis' times 666 = 3330 666 0
3> ___ Elviras times 666 = 666 0 0
4> ADD columns 1+2+3 = 23525 7436 0
5> Number of QSOs per band = 27 12 0
6> Line 4 TIMES Line 5 635175 89232 0
THIS IS YOUR BAND SCORE

* Total of Zombie numbers: Add up the Zombie numbers + Area Code numbers
received for each QSO.

7> 80M Band Score 635175
8> 40M Band Score 89232
9> 20M Band Score 0
10> Crummy Band Bonus 666

ADD lines 7+8+9+10 725073 THIS IS YOUR FINAL SCORE

I swear (or attest) that the above is the biggest crock I have ever
submitted to a contest, but it's my story and I'm sticking to it.

HANK (AKA ELVIS) GREEB, N8XX

Note: I reporting a "fun" "biggest crock" shuffle (Zombies don't
sprint, they shuffle) isn't out of order on this somewhat sober
reflector. If you want to visit the "rules" for the Zombie Shuffle, see
http://www.zianet.com/qrp/ZOMBIE/zombie.htm

Sent with a grain of salt. :)

Yup, there WILL be a presentation of the W/VE Islands QSO Party effort put forth by ~20 local hams, from the GRARA, LARC, and the W8HVG Lunche Bunche. All those who partook of the event are encouraged to attend, and share their experiences with the group. What started out as "musings of a sometimes contester ham" turned into an effort which rivaled setting up for Field Day!

If anyone else took pictures of the event, please send them over this way for inclusion in the picture/slide show. Identification of the hams involved in the pictures is always welcome, since credit should be given where credit is due.

1168. 70cm Beam advice needed

Yahoo group: GRARA
Date: 2010-11-03 17:24:53 UTC
From: Charles Rich
Topic: 1168 Message: 1168

As most of you know, I lost a few antennas in last weeks winds. I have a 70cm beam that I hope someone can identify.

It is (was) 19 elements consisting of 1/8" rod elements held in place by what I will call reverse lock washers and a black ring on each side of the boom.

The feed point (matching) is a small loop (hairpin) grounded in the center to the mast.

I am missing a piece of boom, probably 3' in length, with two elements, which I will probably have to make, so need the instructions or advice on what this will consist of, and dimensions. I Am assuming that the total boom length would have been around 14 feet.

It does not seem to conform to the Cushcraft specs I find on the web, although that's what I always thought it was.

I bought it used, thus no info was included.

I would like to borrow a manual long enough to make a copy, if possible

What'cha think...??

Thanx

From: K8TB
Topic: 1178 Message: 1178

From the Matthysee-Kuiper-DeGraaf Funeral Home web site:

Abraczinskas, Raymond James

ABRACZINSKAS-- Raymond James Abraczinskas, age 74, passed away peacefully at home on Tuesday, November 9, 2010. After graduating from Catawissa High School in 1954, he served in the Marines and specialized in avionics and communications while stationed in Japan. He graduated from Tri-State College in 1961 with a Bachelor of Science degree in Electrical Engineering. Ray worked as a laser system project engineer and navigation engineer for Lear Siegler Inc. (later Smiths Industries) before switching to marketing research and development programs. He was instrumental in casting LSI's unique product, the Voice Controlled Interactive Device, which was designed to assist pilots with controls in the cockpit using voice commands. Ray, known as "Abe" to thousands of Ham Radio operators around the globe, was a dedicated amateur radio operator for 56 years. He was a genealogy buff, and enjoyed annual fishing trips to Quebec. He authored "Stories from my Pennsylvania" (Volumes 1 & 2), a collection of stories based on his childhood growing up in the Susquehanna Valley, PA. He will be greatly missed by his wife of 47 years, Katherine Abraczinskas; children, Laura Abraczinskas, Diane Abraczinskas (Raymond Chung), Carol Abraczinskas, David Abraczinskas; grandchildren, Nicole and Camille Chung; sister, Regina Filipowicz, brothers, Robert (Patricia) Abraczinskas, Dennis (Patricia) Abraczinskas; brother-in-law, Tom (Evelyn) Oleksy; many nieces and nephews. The Mass of Christian Burial will be offered Saturday at 9:00 am at St. Mary Magdalen Catholic Church, 1213 -- 52^nd Street SE with Rev. Godfrey Onyekwere officiating. Interment in Woodlawn Cemetery.

Relatives and friends may meet the family Friday from 2-4 and 7-9 pm at Matthysse-Kuiper-DeGraaf Funeral Chapel (Kentwood), 4646 Kalamazoo, rosary at 8:30 pm. In lieu of flowers, memorial contributions may be made to the National Brain Tumor Society.

This is found at:

http://www.mkdfuneralhome.com/_webapp_3611079/Abraczinskas,_Raymond_James

Please note that there is link on that web page where you can sign and view the guest book.

In addition, I received a note from Mike Smith, President of the IRA, that

Jean -- AC8AR is planning a memorial net for Abe this coming Sunday @ 21:00

on the link system, in place of the normal NTS Net.

If you can join in to share comment, memories of Abe, etc. please do so.

Subject: Tower Available

Chuck:
Can you please post this to the club forums?

WD8PUO has a friend who just purchased a home off from Quincey that has four tower sections up, and one tower section on the ground. He will give the tower away to anyone who is willing to take it down. His phone number is 616-502-2900.

Thanks,

David Posthuma, WD8PUO

Gentle hams of the MRRC,
I wrote a song about my longing for a big tower and recorded it during last weekend's SS SSB, and you can see the video at http://www.youtube.com/watch?v=uNWZjzrzgwA. Jim K8MR already saw it and sent me a nice note, so maybe others of you have, but I didn't want to miss anyone (besides I live for those youtube hits!) I hope you enjoy it, and hope you're having a great contest season.
Best rx & 73 de kt8k - Tim

MDXA PSK DeathMatch

The 8th running of the MDXA PSK DeathMatch will take place on December 11th and 12th. Our contest has been referred to as the "Premier PSK contest".One of the unique things about this contest are the awards! Winners receive real swords and daggers! For 48 hours the PSK waterfall is full of DeathMatch signals. The PSK DeathMatch has been featured on Newsline and on eHam.

We wish to thank Bela W. Lindenfeld - N8SHZ for his support. For several years he's paid for the main sword awards! Also....Chuck LeMar - W8VOM pays for the Class III dagger.

We hope you will join us for this year's PSK DeathMatch...click the link below for more information!

1193. Meeting this Friday

Yahoo group: GRARA
Date: 2010-12-02 13:36:47 UTC
From: Jack Kunnen
Topic: 611 Message: 1193

Greetings All,

Friday is the monthly meeting of GRARA, 7:00PM, at the Red Cross chapter house. It will be a casual meeting with the usual officer reports, put also a get together to relive and rag chew over the years radio activities. The club will spring for coffee and sodas, if you want bring any snacks, cookies, etc you like - finger food is best.

For our snowbirds, we will miss you, but hope you are having a warm time in sunnier climates.

Hi Jack,
Planning on attending the GRARA meeting/Christmas party, tonight, with Bob Tiemersma and possibly another friend of Bob's-- Matt Potter (church friend), if that's alright. Matt will already be in the car, because Bob takes him to church every Friday night, as Matt does not drive. Please advise if this will be alright.
PS I was planning on making my famous home made authentic Italian cannolis, but I need to go buy some fresh ricotta cheese for same.

1195. Want some "on the air" code Practice?

Yahoo group: GRARA
Date: 2010-12-09 15:00:19 UTC
From: Hank Greeb
Topic: 1195 Message: 1195

Many folks in the Lowell Area of SW Michigan should have no trouble checking into this new slow speed net from Indiana.

Note they will slow down to your speed when you check in, so don't be intimidated if you're not quite up to the speed of the Net Control.

It may help to review the "Q" and "QN" signals - such as QNI, QTC, QRU, QNX, etc. These are found on the ARRL web site at

http://www.arrl.org/files/file/Public%2520Service/fsd218.pdf

But, remember, everyone's a newcomer in a slow speed net. So don't be intimidated by anything you hear!

-------- Original Message --------
Subject: [qrp-l.org] New Slow Code Net
Date: Thu, 9 Dec 2010 08:41:33 -0500
From: Brian Murrey <kb9bvn@...>
To:

Do you think your CW needs some practice? Would you like to be a little faster?

The Indiana Section has started a Slow Code Net that is held every night at 00:00Z on a frequency of 3535 Khz. The net runs about 40 minutes or so, and the speed is 10-13 WPM. They will take slower check-ins if that works for you.

At 00:00Z the NCS (Net Control Station) will begin sending the net preamble. The net preamble basically explains what the net is, when it meets, who the NCS for the session is, and all that. At the end of the preamble the NCS will start to take check-ins. It is customary to just send the first letter of your suffix. KB9BVN would send B. When you hear the NCS send your letter back, then reply with your full call sign, first name, and QTH. Nets can be a big help in building speed and accuracy. Try it, you'll like it.

Once the list of check-ins has been completed the NCS will go down the list and give a signal report and ask for traffic or comments from each checker inner.

A nine-volt battery does not carry the amperage to heat water. A direct short with a wire across the terminals of a nine-volt battery would cause the wire to get hot, but it could cause the battery to overheat and be dangerous. That is, if the battery did not go dead first.

It depends on what material it is made of, how long, how big in diameter. Case in point: the Nichrome wire used to ignite model rocket engines will get plenty hot enough using 9V but will destroy itself in the process. I have a cup heater that plugs into my cigar lighter in my car that warms my coffee or hot chocolate which doesnt get that hot but survives the effort. Its doable but you would need a lot of specialized knowledge in the Engineering Materials Science area. All of us Engineers were required to take one semester on the subject but some people specialize in that and take all their elective classes, masters classes, and doctors classes on the subject. It is non-trivial.

One might think to ask what are you going to do with it? I hope you're not trying to build a bomb.

P.S. If you have ever shorted out a 9V (easy to do by accident since both poles are on the same side) they get so hot that you cant touch it. That should be enough energy to heat a cup of coffee but it would probably be a one shot affair - the 9V would have given its life in the effort.

This is my suggestion: I stop at McDonalds and get a senior coffee for sixty-nine cents. It costs less than a 9V alkaline battery.

I'm in Florida where we had about 8 hours of freezing weather last night, with another 8 hours predicted for tonight. Most of the tropical plants in our retirement park are dead. I am watching my queen palm trees which can freeze and die. My tangerine tree seems to be okay, but I expect in a few days, many of its leaves will fall. The tangerines are still good. My grapefruit tree is okay. My heating bill is going to be huge, since we heat with FORCED AIR ELECTRIC. I may get some ear plugs to block all the complaints my wife is giving me. Yes, as all men know, when something goes wrong it's always our fault.

Gentlemen,

Heating water requires energy, no matter how you accomplish it.

The Imperial system unit of heat, the British Thermal Unit or BTU, is the amount of heat required to raise the temperature of one pound of water through 1 degree Fahrenheit at sea level.

1 BTU = 1055.06 Joules = 0.293 watt-hours

The heating element's temperature does not really matter, providing it is above your desired temperature AND it eventually delivers enough energy.

The energy contained in a 9V battery is about 19,278 Joules, or 18.3 BTU, enough to raise the temperature of one pound of water (128 fluid ounces) 18.3 degrees, or to raise 32 oz of water 73 degrees from 45 F from the tap to 118 F in the container.

Some energy will be lost due to resistance of the wires, radiation and convection from the container, but you get the idea...

I had no idea we were talking about a pound of water, I was thinking about 1/3 of that. If you cant find an immersion heater at an Auto Supply store then McDonald's is a great option.

Subject: [GRARA] Re: HOT WIRE

Gentlemen,

Heating water requires energy, no matter how you accomplish it.

The Imperial system unit of heat, the British Thermal Unit or BTU, is the amount of heat required to raise the temperature of one pound of water through 1 degree Fahrenheit at sea level.

1 BTU = 1055.06 Joules = 0.293 watt-hours

The heating element's temperature does not really matter, providing it is above your desired temperature AND it eventually delivers enough energy.

The energy contained in a 9V battery is about 19,278 Joules, or 18.3 BTU, enough to raise the temperature of one pound of water (128 fluid ounces) 18.3 degrees, or to raise 32 oz of water 73 degrees from 45 F from the tap to 118 F in the container.

Some energy will be lost due to resistance of the wires, radiation and convection from the container, but you get the idea...

THE ANNUAL SANTA NET

"CALLING ALL HAMS"

On December 24, 2010 @ 2200 hrs local time.

Gather your children, and grandchildren, around your radios
for the annual Santa net.

While Santa is delivering presents around the world,
the children can call for Santa, KD8DEG, and Santa
will ask each child if they have been good little boy's
and girls, and what they would like for Christmas.

Elf Radar Frank, N8UVI, will be giving Santa's location using
NORAD, along with Elf Techno Dave, KC8PCL, scribing, both located
at Santa's communications center at the North Pole.

You can find the "Santa Net" on the Lowell repeater 145.270 pl 94.8;
also use IRLP node 4635; & Echolink node 87878.

1213. Pet Rock Sorint - Jan 1 - 1500 - 1800 Z

Yahoo group: GRARA
Date: 2010-12-31 06:35:13 UTC
From: Hank Greeb
Topic: 1213 Message: 1213

If you want to "go back" to the 50's and earlier for a bit of nostalgia, or if you're a die hard "QRP Build it Yourself-er" or you just want to have some fun on New Year's day, you might like to partook of the upcoming QRP ARCI Pet Rock sprint.

Details should be on qrparci.org web site, but, just in case there's a glitch, they're repeated here.

2011 QRP-ARCI(sm) PET ROCK CELEBRATION

Date/Time: 1500Z to 1800Z on Saturday 1 January 2011. That's 10 a.m. to 1 p.m. Eastern Standard Time

Mode: HF CW only.

Exchange: Members send: RST, State/Province/Country, ARCI member number
Non-Members send: RST, State/Province/Country, Power Out

QSO Points:
Member = 5 points
Non-Member, Different Continent = 4 points
Non-Member, Same Continent = 2 points

Multiplier: SPC (State/Province/Country) total for all bands. The same station may be worked on multiple bands for QSO points and SPC credit.

Power Multiplier:
>5 Watts = x1
>1 - 5 Watts = x7
>500 mW - 1 Watt = x10
>200 mW - 500 mW = x15
>55 mW - 200 mW = x20
<55 mW = x25

Suggested Frequencies: Please remember this is a contest is focusing on rock-bound transmitters/transceivers.

80m 3560 kHz
3568 kHz
3579 kHz
40m 7030 kHz
7040 kHz
20m 14060 kHz
15m 21060 kHz
10m 28060 kHz

Bonus Points: For crystal controlled gear add 2,000 points for using rockbound receiver; add 3,000 points for using rockbound transmitter; or

add 5,000 points for using rockbound transceiver. These bonus points are available per band.

If you are operating PORTABLE using battery power AND a temporary antenna, add 5000 points to your final score. (You can NOT be at your shack operating from battery power using your home station antenna to qualify for this bonus.) This is to help level the playing field for contesters who work from the field against contest stations with 5 element yagis at 70 ft.

Score: Final Score = Points (total for all bands) x SPCs (total for all bands) x Power Multiplier + Bonus Points

Categories: Entry may be All-Band, Single Band, High Bands (10m-15m-20m) or Low Bands (40m-80m)

How to Participate: Get on any of the HF bands except the WARC bands and hang out near the QRP frequencies. Work as many stations calling CQ QRP or CQ TEST as possible, or call CQ QRP or CQ TEST yourself! You can work a station for credit once on each band.

Email Log Submission: Submit Logs in plain text format along with a summary stating your Callsign, Entry Category, Actual Power and Station Description along with score calculation to contest@...

Snail mail Log Submission: Submit Logs along with a summary stating your Callsign, Entry Category, Actual Power and Station Description along with score calculation to:

QRP-ARCI Pet Rock Sprint
c/o Jeff Hetherington, VA3JFF
139 Elizabeth St. W.
Welland, Ontario
Canada L3C 4M3

Deadline: Entries must be postmarked on or before 15 January 2011. (Note this is 14 days after the contest runs)

Results: Will be published in QRP Quarterly and shown on the QRP-ARCI website.

Certificates: Will be awarded to the top scoring entrant in each category. Certificates may be awarded for 2nd and 3rd place if entries are sufficient in a category.

1214. Posting from N1TUP [CTFoxhunter] Foxhunt Reminder

Yahoo group: GRARA
Date: 2011-01-01 04:15:16 UTC
From: W8DER
Topic: 1214 Message: 1214

Fox hunters,

you may be interested in this posting by Paul Gibson, N1TUP, manager of the annual New Years Day Foxhunt near Manchester, Connecticut. In the past, their New Years Day Hunts have been very successful. You can see pictures of past hunts on their Yahoo Page at: http://groups.yahoo.com/group/ctfoxhunter/

This is the group that first brought my attention to the "FoxBox" built into an ammo box. They are also doing an interesting "2-week" hunt in the summer that we may try.

Another interesting thing they are doing is having the fox transmit on the input frequency of their local repeater. That way it is easy for everyone to listen-in and follow the hunt. (Good PR for the next time.)

The following is their posting about tomorrow's Annual New Years Day Hunt. Paul is very helpful in promoting out fox hunting efforts. I am sure he would answer any questions you have.

Subject: [CTFoxhunter] Foxhunt Reminder

Hello Foxhunters,

Just a reminder of the annual New Years Day foxhunt to be held beginning at 1 pm, January 1, 2011.

We will gather at the Wapping Elementary School, 91 Ayers Road, South Windsor, CT. The roll call of foxhunters will begin at 1 pm. Most hunters arrive in advance of the starting time to allow for set-up and getting acquainted with each other. The fox will not be transmitting prior to the start time but hunters will be on the 145.11 MHz repeater, PL 77.0 Hz if anyone needs assistance.

The fox will be making all transmissions on the repeater listed above. Please listen to the input frequency 144.51 MHz while taking your headings. Listening to the output frequency will just lead you to the repeater location, and the fox will not be there. The same repeater is used for information sharing between hunters and any fixed based stations which may choose to participate.

Sharing of information is encouraged but not required. We do ask that once you have spotted the fox, you discontinue all further transmissions. Listen carefully to the communications as much of it

will prove helpful. If someone says they are going to checkout say a particular school and you never hear from them again, they either found the fox, or drove off the edge of the earth. Foxes frequently lie or provide meaningless information, it is unusual for the hunters who are functioning as a team to mislead the rest of the team.

The actual hunt time is usually about an hour so dress to be comfortable during the driving part of the hunt. We then socialized outdoors at the foxes den for about an hour so. This may include standing on packed snow, given the recent weather event, so please dress to be comfortable for this part of the hunt as well.

This is a fun event, please drive carefully. Experience has shown that the winner (first one in) usually has driven the fewest miles. Working carefully and following the signal is a better approach than running around checking out spots you "think" the fox might be. The fox may ask for your starting odometer reading during initial check-in. The last three digits including tenths is sufficient or zero if you are resetting a trip odometer.

Have fun, be safe, and we will see you at the den with some nice hot soup and other refreshments.

Good Luck,
Paul, N1TUP

1215. January MiQRP Contest - 8 Jan to 9 Jan 2011

QST QST de N8XX

Be advised that the Michigan QRP Club is sponsoring their annual January CW Contest 1200Z 01/8/11 to 2359Z 01/9/11.

Yup, you read correctly, it's a 36 hour marathon, but you may operate any or all of the time period.

Rules are at http://www.miqrp.org

Scroll down and click on the left side for this party.

Be aware that there is a RTTY roundup and a North American QSO Party (CW) running concurrently with part of this time period, so the bands may be full of RTTY and high power CW stations. Note that neither n8xx personally nor MiQRP club had anything to do with these concurrent events.

Hope to see as many folks as possible.

1220. HOLLAND AMATEUR RADIO CLUB - WINTER 2011 CLASS SCHEDULES

Yahoo group: GRARA
Date: 2011-01-06 17:16:49 UTC
From: Carpoolqueen
Topic: 1220 Message: 1220

HOLLAND AMATEUR RADIO CLUB 2011 WINTER CLASSES ANNOUNCED
TECHNICIAN - GENERAL - MORSE CODE CLASSES OFFERED
Pass the word to friends and relatives that they too can get a HAM RADIO LICENSE without too much effort. HARC again offers an opportunity to become a licensed Amateur Radio Operator with classes to prepare you for a Technician License. These classes, lead by Jim, N8QMD, begin Wednesday January 12, 2011 and end March 30, 2011.
For those already in the Ham community holding a Technician Class License, we offer an opportunity to upgrade to Amateur General Class, the middle level license available. It will take some work, but the ultimate outcome is a super feeling of accomplishment and the gain of additional band privileges. Jim, N8WMD will lead these classes beginning Thursday, January 13, 2011 and ending March 31,2011.
Then, for those who may have wanted to learn CW (Morse Code) or who have just been curious to discover what Code is all about, Mike Cole, WD8NHA will lead CW classes on Tuesday nights. This series will begin January 11, 2011 and depending on the progress of the students, will continue for about eight or ten weeks. It is a wonderful opportunity to learn the code, or to brush up some unused skills.
LOCATION AND TIME: ;All of these classes will be held at the Ottawa County Red Cross Building, 270 James Street in Holland, Michigan. Classes begin promptly at 7:00 pm. Please come early to enjoy some refreshments and to relax beforehand. If time is an issue, feel free to bring your supper along.
FEES: There are no fees for the CW class, but please remember to bring paper and a writing instrument. There is a $20 fee for each Technician or General class. A study book for each class is available for an additional charge. Let Ed know if you need to order a book.
LICENSE TESTING: Just in time for those who complete their licensing class, or for anyone else who wants to take a License test, HARC will host a Test Session Saturday, April 2, 2011. Testing begins at 10:00 am, so please plan to arrive a bit earlier. What you will need to take the exam will be discussed during class or contacting Rick, our VE Chairman N8GGO by email N8GGO@....
REGISTRATION: Please contact Ed Heyboer, KF8EV by email KF8EV@... or telephone (616) 772-4811.
REGISTRATION FOR THESE CLASSES IS NOW OPEN!! It is not too early to plan for some education this Winter. Let's fill up the classroom at the Red Cross. We will be running this announcement a few more times before classes begin.
Ed, KF8EV232;Education Committee Chair Megan, WO0MEG President Holland Amateur Radio Club

1222. HOLLAND AMATEUR RADIO CLUB - WINTER 2011 CLASS SCHEDULES

Yahoo group: GRARA
Date: 2011-01-06 22:08:45 UTC
From: Carpoolqueen
Topic: 1220 Message: 1222

HOLLAND AMATEUR RADIO CLUB - WINTER 2011 CLASSES ANNOUNCED

TECHNICIAN - GENERAL - MORSE CODE CLASSES OFFERED

Pass the word to friends and relatives that they too can get a HAM RADIO LICENSE without too much effort. HARC again offers an opportunity to become a licensed Amateur Radio Operator with classes to prepare you for a Technician License. These classes, lead by Jim, N8QMD, begin Wednesday January 12, 2011 and end on March 30, 2011.

For those already in the Ham community holding a Technician Class License, we offer an opportunity to upgrade to Amateur General Class, the middle level license available. It will take some work, but the ultimate outcome is a super feeling of accomplishment and the gain of additional band privileges. Jim, N8QMD will lead these classes beginning Thursday, January 13, 2011 and ending on March 31, 2011.

Then, for those who may have wanted to learn CW (Morse Code) or who have just been curious to discover what Code is all about, Mike Cole, WD8NHA will lead CW classes on Tuesday nights. This series will begin on January 11, 2011 and depending on the progress of the students, will continue for about 8 - 10 weeks. It is a wonderful opportunity to learn the code, or to brush up on some unused skills.

LOCATION AND TIME: All of these classes will be held at the Ottawa County Red Cross Building, 270 James Street, Holland, Michigan. Classes begin promptly at 7:00 pm. Please come early to enjoy some refreshments and to relax beforehand. It time is an issue, feel free to bring your supper along.

FEES: There are no fees for the CW class, but please remember to bring paper and a writing instrument. There is a $20 fee for each Technician and General Classes. A study book for each class is available for an additional charge. Let Ed know if you need to order a book.

LICENSE TESTING: Just in time for those who complete their licensing class, or for anyone else who wants to take a License test, HARC will host a Testing Session on Saturday April 2, 2011. Testing begins at 10:00 am, so please plan to arrive a bit earlier. What you will need to take the exam will be discussed during class or contacting Rick, our VE Chairman N8GGO by email N8GGO@...

REGISTRATION: Please contact Ed , KF8EV by email KF8EV@... or telephone (616) 772-4811. REGISTRATION FOR THESE CLASSES ARE NOW OPEN!!! It is not too early to plan for some education this winter. Let's fill up the classroom at the Red Cross. We will be running this announcement a few more times before classes begin.

Ed KF8EV Education Committee Chairman
Megan WO0MEG Holland Amateur Radio Club President

1223. RTTY Roundup @ W8DC?

Yahoo group: GRARA
Date: 2011-01-06 22:47:38 UTC
From: Hank Greeb
Topic: 1223 Message: 1223

The ARRL's RTTY Roundup is this weekend - Begins 1800 UTC Saturday, ends 2400 UTC Sunday (January 8-9, 2011). For those who still thing "Eastern Time" that's 1 p.m. Saturday to 7 p.m. Sunday. Rules are at http://www.arrl.org/rtty-roundup

I know that W8DC was (and probably is) set up for RTTY, so might I suggest this as a good test of this mode?

Anyone interested? Anyone know how to set up things for macros, etc., which are useful for the contest?

I know zilch about how to operate with whatever software/hardware combo is @ W8DC, so some expert would have to be around for the effort.

Lettuce discuss this @ the meeting tomorrow evening. In the meantime, thimk about this opportunity with an open mind.

Hello,My Name is Frank. After many years away from Ham Radio,I am coming back to it. It also means relearning every thing I need to learn to obtain a licence to operate a Ham Station. The equipment I used to use was an Yaesu 102 with a manual antenna tuner hooked up to an inverter V long wire. I also had a one(1)gallon pail filled with oil for a dummy load. With this information, what would be some good choices in choosing good UESED EQUIPMENT to get started again. Also I am on fix income and home bond. Thanks to all who are able to help. Frank

After you get your FT817 and have played with it a bit to know what you like and don't, be sure to check out W4RT. The 817 has an almost cult like following and has an incredible number of 3rd party accessories available.

Frank

Glad to hear of your renewed interest in Ham Radio. I'm a come back kid also. Was originally licensed in 1950 and with college, marriage and kids, let the license lapse. A year ago thanksgiving I gave a used laptop to a friend who said he was going to use it for Ham radio. I was intrigued but having lost my hearing about 12 years ago I figured I would not be able to pass a code test. Good news is that there is no longer a code test required. Long story short I took all 3 elements this year and now am operating extra class.

I would be happy to help you get back on the air. I have all the test study manuals that i will lend you, and help with study and setup any way I can. I'm retired so I am available most days.

Email me at penmaker1@.... We can discuss the situation further privately that way.

1237. N1L for FYBO, February 5, 2011

Yahoo group: GRARA
Date: 2011-01-23 13:09:54 UTC
From: Hank Greeb
Topic: 1237 Message: 1237

Yup, a group of hams (perhaps of questionable sanity?) from the Greater Grand Rapids area are going to be using the call "N one L" or N1L, a pseudonym for "N)ot 1)n L)og. during the upcoming F)reeze Y)our B)... O)ff (You fill in the ...'s) event on Saturday, February 5, 2011. The event officially begins at 1400Z (9 a.m.) and ends at 2400Z (7 p.m.) "Rules" for the event are at http://www.azscqrpions.org/FYBO2010.htm Note the rules are for 2010, the event is promulgated by a group of operators who like to operate with low power, and they seem to like to operate more than they like to keep up their web site, but, c'est le guerre!

Why N1L? That's a looooonnnnngggggggg story,but, the short answer is, "What the "L" why Not N1L?" Contesters often are bemoan when the sponsor's log checking team finds "Not In Log" (NIL), so why not have a legitimate N1L in the log?" :)

Anyway, please look for N1L during FYBO, 1400Z thru 2359::59Z Saturday, February 5, 2011. Several of us will be operating as N1L from a site a few miles south of the Megalopolis of Saranac, MI ((Population 1326 - 2000 US Census)) on all bands from 80 thru 10 metres. Probably 80/75 metres will be best for the GRARA members in Michigan - we'll try to check at 2100Z, 2200Z, and 2300Z on or around 3560 KHz or 3895 KHz ? QRM.

If you'd like to know the exact location, it is at the corner of Morrison Lake Road and Grand River Drive about 5 miles south of Saranac. Longitude: -85.21408 W (-85? 12' 51'' W). Latitude : 42.88647 N (42? 53' 11'' N), QTH locator : EN72jv. If you'd like to come out with us, Bob Robinson, KD8HNF, says we must be sure to have a valid passport, Visa, and Parking pass (we're expecting great crowds?) so please lettuce no of your intent if at all possible. Otherwise, just come on out. Maybe the State Police will let you through the blockades they're planning to set up to try to control the throngs (*of political supporters?**- **Of psychiatric care givers? - because of the common belief that all hams are suspect, and those who go out in the field during the dead of winter are even more suspect?* *Or, maybe, just maybe, because the writer of this announcement is known to say things in jest?*)

That's the plan. Hope 2 c many GRARA members during FYBO 2011. Remember *"N1L."*

For those who are sarcastic about the impending weather, and more so about emergency preparedness, please remember the Blizzard of January 1978......

I don't know how it was here in Michigan, but in SW Ohio we had an estimated 7" of sn*w, which wouldn't be a problem normally, but it was preceded by about 2" of frozen rain, which collected on streets and highways. Combined with 40+ MPH winds, there were drifts of more than 3 feet on top of glare ice. No one except folks with 4WD vehicles were permitted on the roads for more than 24 hours, and on side streets for several more days. The City and county offices were shut down except for emergency personnel. My employer was closed except for security and maintenance personnel for the first time in about 150 years - except once when a flood hit the Ohio River and its tributary, causing 8' of water in the manufacturing plant (in 1937). I was fortunate to have a neighbor with 4WD vehicle, he took me to Red Cross hq, and some 36 hours later I was relieved of duty when help arrived. We communicated for police and national guard, who had their own communications but couldn't cross communicate. National Guard vehicles were taking medicine to the home bound, supplying ambulance service to communities without 4WD equipment, etc. This lasted for 3 days until most of the roads were cleared. We also communicated with Ohio Disaster Services in Columbus, OHio on HF. One new licensee got his baptism by fire whilst receiving a 140+ word message from State DSA to Hamilton County on the Ohio Single Sideband Net.

Yup, we get complacent, pooh pooh emergency preparedness, but in SW Ohio, as late as 2004 we were needed to do damage assessment. In 1999 a tornado wiped out communications to whole communities, in 1997 a flood along the Ohio River and tributaries caused the telephone system to become non existent in some places, and overloaded in many places so the only emergency communications were via amateur radio. Even cell phones were useless when a worker at a shelter insisted on using his phone for hours, while a supply truck was being loaded with supplies. I had to travel some 30 miles out of my way from another shelter to tell the "clown" to get off his phone so he could advise what supplies were actually needed.

Yes, we all think communications links are 100% reliable now a daze, but all too frequently their deficiencies are brought to light.

Lettuce knot forget one of the main reasons amateur radio exists - to provide communications when all else fails.

We have the Red Cross Communications Team, in need of more volunteers. IF we were called out by Red Cross, who would have enough training in

handling emergency communications to be of service?

Jack,
 I could not see that bad weather coming as I look at my outdoor thermometer and see its 77 degrees and sunny at 11:30 AM Tuesday. Maybe you all should come on down to Florida,

So you bought your significant other that last wilted rose from the greeter at Walmart, added 5 Tootsie Roll Midgies, and you think this might be enough?

Well, it's not.

Join a bunch of us dysfunctional people Feb 14th (a Monday night) at the Golden Bell buffet restaurant starting at 6:23PM. The Golden Bell Buffet is located on the SE corner of US 31 and Felch street, in the NW corner of the Westshore Mall. For under $ 10.00 each, they have Chinese, Mexican and American food, plus really nice fruit and veggie and dessert bars.

But I don't have a significant other!
We don't care.
But I want to bring my kids!
We don't care.
I won't pay my bill.
Now we care.

This is open to all of us silly hams in the West Michigan area.
Grand Rapids, Holland, Grand Haven, Muskegon, Allegan and Hooterville.

1253. Plan B - FYBO 2011 - Saturday Feb 5

Yahoo group: GRARA
Date: 2011-02-04 15:26:18 UTC
From: Hank Greeb
Topic: 1253 Message: 1253

Due to the "Blizzard of 2011" - the site we were planning to use outside of Saranac for FYBO 2011 is socked in with up to 2' of sn*w. The fellow who owns the place is having difficulty with his sn*w plow, so the place won't have any parking area.

We looked at several other possibilities, but couldn't find any with shelter from wind - low temperatures don't bother nearly as much as a brisk wind.

Therefore, we're turning into a bunch of w1mps and will be operating indoors @ W8LRC, 11535 E Fulton Suite 101, Lowell. Any and all interested hams are invited to join us. This site seems more popular, so we'll have a pot luck lunch about 1 p.m. - bring something to share.

Map to the place can be found at http://tinyurl.com/4boa2j2

We'll be operating Multi-2 2 rigs on 2 bands.

The FYBO starts at 9 a.m. Saturday 9 a.m. and runs until 7 p.m.

1260. Contests this weekend

Yahoo group: GRARA
Date: 2011-02-12 17:46:37 UTC
From: Hank Greeb
Topic: 1260 Message: 1260

There are a bunche of contests going on this weekend. Take your pick.l Looketh like you could run Louisiana, OMISS, and New Hampshire in one swell foop. Both Silly Side Band and Corn Whiskey are permissible in each of these.

If you want some "real" fun, look @ the rules for the North American Sprint, Silly Side Band version. I tried the Corn Whiskey version last week, and it was a real challenge with 100 or so stations crammed into 15 KHz between 7025 and 7040 (two other contests were going on in other parts of the band), especially since I had my rig cranked down to <5 watts! If one were to use 100 watts or more, plus having the entire Phone band in which to operate, one probably could make a respectable showing.

Louisiana QSO Party CW/SSB Feb 12, 1500Z - Feb 13 0300Z Rules http://laqso.w5yl.org

OMISS QSO Party CW/SSB Feb 12, 1500Z - Feb 13 1500Z Rules: http://www.omiss.info

New Hampshire QSO CW/SSB Party Feb 12, 1500Z - Feb 13 1500Z Rules http://www.w1wqm.org

FISTS CW Winter Sprint CW Feb 12, 1700Z - Feb 12 2100Z Rules: http://www.FISTS.org

RSGB - First 1.8 MHz Contest CW/SSB Feb 12, 2100Z - Feb 13 0100Z Rules: http://www.rsgbcc.org (http://www.rsgbcc.org)

1268. Fw: LINK TO AES SUPERFEST FLYER

Yahoo group: GRARA
Date: 2011-03-01 23:00:47 UTC
From: Charles Rich
Topic: 1268 Message: 1268

I have attended this event for many years, and find it quite rewarding. You will especially enjoy the many forums which they offer. I have brought many of these forums back to Michigan on video to share with West Michigan clubs.

All the new gear will be on display from all major manufacturers, and reps to answer your questions.

It's a half day drive, but worth it. (I go up the night before.) Special hotel rates available at the Radisson Inn. (One of the best in town)

It's all FREE, and even a drawing for door prizes.

Give it a try...!!! CU There!!

From: Jack Kunnen
Topic: 635 Message: 1270

I reminder that this Friday, 4 March, is the next meeting of the Grand Rapids Amateur Radio Association, 6:30 PM get together, 7 PM meeting.
Club dues were owed at the end of February, Rich, KC8NKA will be more than glad to except them at the meeting.
Many things to discuss, Marshal Swap, Dayton and FIeld Day just to start.

Don't forget the MARA “Build Your Burger” at the 5th street hall.
Corner of 5th street and Davis NW.
5 PM - 8 PM Plenty of time before the meeting.
MARA has some excellent cooks and their deserts are not to be missed.

1272. ARRL DX Contest, SSB, this weekend

Yahoo group: GRARA
Date: 2011-03-04 20:10:21 UTC
From: Hank Greeb
Topic: 1272 Message: 1272

The ARRL DX contest is being held this weekend. Anyone interested in operating @ W8DC?

Starts at 0000Z Saturday (7 p.m. EST Friday evening) and ends at 2400Z Sunday (7 p.m. EST Sunday evening). Details at http://www.arrl.org/arrl-dx

It's all SSB, so this should give folks who like to talk with their vocal chords rather than diddle their fingers a chance to try. Anyone interested?

Please talk this up. We could adjourn to the radio room after the meeting this evening. All that is needed to operate one one person with a general class or higher license. Anyone who is thinking about getting a General Class License or higher can operate.

I regret to have to tell you that Janice died at about 4 AM this morning at Bethesda North Hospital. She was admitted to the hospital the afternoon of the 4th and seemed to be doing better by the 6th. At about midnight she took a turn for the worse and became critical just about 4. She was alert and comfortable until the very end. Her funeral is tentatively planned for this Friday at St. Susanna Church in Mason. Visitation is being planned for the hour preceding the Mass of Christian Burial. She will be buried at Gate of Heaven Cemetery in Montgomery, OH. I thought you would want to know.

Subject: [HARC] Walkie talkie disrupts safety system at Davis-Besse nuclear plant

March 5, Cleveland Plain Dealer - (Ohio) Walkie talkie disrupts safety system at Davis-Besse nuclear plant. The Davis-Besse nuclear power plant in Oak Harbor, Ohio went "radio-inactive" March 3 - losing its emergency water cooling system for 2 minutes - due to a technician's walkie talkie. The technician used his walkie talkie in a room containing a back-up or auxiliary control panel for a system designed to automatically pump water into the reactor in the event of a catastrophic accident. The radio wave disrupted the signal from the control panel to special pumps and emergency valves that even on stand-by are electrically alive for an instantaneous reaction. In two bursts of conversation lasting 8 seconds and 19 seconds during a 2-minute period, the technician rendered the plant's entire emergency shutdown system inoperable, the company told federal regulators March 3. The company posted a sign on the door to the room warning all employees not to key radios near the sensitive control panel, a company spokesman said. The incident should have never happened, said a nuclear safety engineer with the Union of Concerned Scientists. He said such incidents occurred many times in the early 1980s, so much that the Nuclear Regulatory Commission (NRC) issued a warning bulletin in December 1983. "This hasn't happened in decades," he said. "We will definitely be looking into this," said a spokeswoman for the NRC's regional office in Chicago. 1287. Hidden Transmitter hunt, April 9th, 9:30 to 11:30 + after glow.

Yahoo group: GRARA
Date: 2011-03-15 13:48:23 UTC
From: W8DER
Topic: 1287 Message: 1287

Guys and gals,

I am all fired-up about the fox hunt coming up on Saturday, April 9th. I always look forward to the first hunt of the season as an opportunity to get the equipment "tuned-up" for the summer.

On fox team for this hunt, Chuck (AJ8W) and James (K8JHR), have a new twist in store for the event -- Two hidden transmitters. Although this is common in other parts of the country, I think it is the first time two foxes have been used in West Michigan. Come see how it is done!

Check-out the details at the MichiganFoxHunter web page:

http://www.MichiganFoxHunter.com

Hope to see you there. Don't have any equipment? Come anyway. Somebody will need another team-mate.

See you in Marshall this weekend.

Mike@...

+ Public Service: After Devastating Earthquake, Japan's Radio Amateurs Provide Communications Support

After the 8.9 earthquake that struck near Sendai, Japan at 2:46 PM JST (0546 UTC) on Friday, March 11, the island nation is trying to recover. Soon after the earthquake -- which the US Geological Survey is calling the largest to hit the island nation in 140 years -- Japan has been rocked by tsunamis and power outages caused by trouble at a nuclear power station. Reports from Japan tell of phone and Internet service still up in most parts of the country. Even so, the Japan Amateur Radio League (JARL) -- that country's IARU Member-Society -- has asked that 7.030 MHz be kept clear for emergency use. Other reports are asking that these additional frequencies be kept clear: 3.525, 7.030, 7.077, 7.087, 7.097, 14.100, 21.200 and 28.200 MHz.

JA1RL, the JARL HQ station -- along with other amateurs throughout the island nation -- is maintaining the effort to support the disaster relief operation, according to IARU Region 3 Secretary Ken Yamamoto, JA1CJP. "In less damaged areas, the electric power supply is being restored gradually and local amateurs have started to establish stations at shelters," he said. Yamamoto said that JA1RL continues to operate as an emergency traffic center on 7.030 MHz, as well as 2 meters and 70 cm. It is receiving and reporting news from Japanese amateurs who are in the affected area. Using battery power or small generators, Japanese stations are active and are using various frequencies to exchange rescue and disaster relief operation information with JA1RL and others.

This map shows Japan and the areas affected by the 8.9 earthquake that struck the island nation at 2:46 PM (JST) on Friday, March 11. [Map courtesy of the US Geological Survey]

"While 3.525, 7.030, 7.043 and 7.075 MHz have been mentioned as in use, it's wise to keep those -- and all of the Center of Emergency frequencies -- clear of normal and non-urgent traffic," said IARU Region 3 Disaster Communications Committee Chairman Jim Linton, VK3PC, who added that there is no call for additional foreign radio amateurs in Japan.
For more on how radio amateurs in Japan are providing communications support after earthquake, click here (http://www.arrl.org/news/radio-amateurs-in-japan-provide-communications-support-after-earthquake). For information on how US amateurs are helping out, click here (http://www.arrl.org/news/japan-asks-radio-amateurs-to-keep-frequencies-clear-as-country-goes-into-recovery-mode-after-devasta). For more on how Japan, Hawaii and the Western US dealt with the immediate aftereffects of the earthquake and tsunami, click here (http://www.arrl.org/news/massive-earthquake-hits-japan-tsunami-warnings-issued).

99th Anniversary of the Titanic Disaster -- W0S

(http://www.wzeros.com/Square1net/Titanic_Special_Event.html)

This event will take place on Saturday, April 9th starting at 1300Z to Sunday, April 10thending at 0000Z. The Special Event Station will be located at the World's Largest Titanic Museum Attraction on Highway 76 in Branson, MO. April 14, 1912 was the night the Titanic met her demise with a huge iceberg on her maiden voyage from South Hampton, English. Radio operators played a large part during this disaster. It was one of the first times the new international distress call "SOS" gained popularity by radio operators around the world.

Three stations will operate simultaneously using SSB,and CW. All stations will be manned by operators from a consortium of clubs and non-club members from Southwest Missouri, as well as licensed visitors from outside the area. All are welcome to come join us in this Special Event, taking it into the 100th Anniversary. A very nice QSL card for each contact. This will continue each year until it's 100th Anniversary. QSL card information can be found at

(http://www.wzeros.com).

Operators at the Titanic Museum will be stationed in full view of the visitors at it's entrance. A massive media promotion is planned by the owners of the museum to cover local, regional and news media. Amateur Radio will be the featured event in this promotion.

NEW THIS YEAR!! A sister station, W4S, will be operating from the Titanic Museum in Pigeon Forge, TN. TEN-TEC will be providing 3 new EAGLE radios plus matching tuners for the operator's use.

For more information and future updates the website:

(http://www.w4sspecialevent2011.bravehost.com)

Updates will follow as new information becomes available. For questions and more information on operating frequencies, schedules, and equipment, send an email to or visit (http://www.wzeros.com). We will also be live on our Website during the event. Please come see the fun and excitement!

TITANIC SPECIAL EVENT

We will start at 8AM Saturday and continue through 16:00 Sunday.

Operating frequencies will be as follows for SSB and CW.

14.260 ssb +/- 3KC
7.260 ssb # +/- 3KC
3.860 #ssb #+/- 3kc

CW will be running split, "If need"

14.060 CW UP 2kc
7.060 CW UP 2kc
3.560 CW UP 2kc

1305. Table Repair

Yahoo group: GRARA
Date: 2011-04-05 19:27:59 UTC
From: Jack Kunnen
Topic: 1305 Message: 1305

The people at The Home School Building, where the club has the Swap has asked us for help in repairing a few of the broken tables. There is a man working on them, but can use some help as they have a big event coming up a week from Saturday, 16 April. The problem is they have events going on in the evening so we would be needed in late morning or early after noon next week Thursday. Let me know if anyone can help with the project.

I am assuming "next week Thursday" means April 14. Although being late morning, early afternoon, it shouldn't interfere with the evening M-57 Road Side Pickup alternate date in case of rain on Tuesday April 12. Anyway, I should be available to help with the tables IF OTHERS IN THIS CLUB ARE ALSO WILLING. I know most are at their jobs during the day on Thursday, but not everybody. 'Nuff said.

I can help for a few hours on Thursday, the 14th. I gather this is at 5625 Burlingame, SW, Wyoming, MI 49509-9702. Who do we ask to see?

Any other suckers.... err. volunteers for the task? I know there must be some other olde fogeys who are retired, and not too tired to help. The more the merrier!

Lettuce no the proposed start time, and the contact person, and I'll be there!

The proposed time is 10:30 AM, yes at the 5625 Burlingame SW address.
They have tools, but bring a cordless drill and a variety of screw
drivers if you can.

1309. 50th GA QSO Party This Weekend

Yahoo group: GRARA
Date: 2011-04-06 22:24:33 UTC
From: Hank Greeb
Topic: 1309 Message: 1309

Courtesy AC0W, Minnesota Wireless Association.

Hello all:

This weekend will be the 50th GA QSO Party, the first one having been organized by Rusty Epps, K4BVD, now W6OAT in May, 1962. All information can be found at: http://gqp.contesting.com. This year, there are some pecial events to mark the 50th GQP. There will be 18 one-by-one calls, W4, N4, K4 calls ending in G-E-O-R-G-I-A. A special certificate will be issued to every entrant who works at least seven of these one-by-one call signs so that the suffixes spell out the state name. Also, special certificates will be issued to every entrant who sends a log this year and who also made QSOs in GQP in 1962. We have tried to identify those who are still active and sent e-mails to them, but it is possible we may have missed some, so let us know if you think you qualify, but no special claim will be needed for those we have identified if your call is still the same or we have identified your past and current call signs.

In addition to those fun activities, the traditional QSO party will be continue and we have promised activity from at least one fixed, portable, or mobile station from each of GA's 159 counties. GA has more counties than any other state except Texas and the counties are relatively small so mobiles can cover many counties in the 10 hours on Saturday and 10 hours on Sunday.

Counties as multipliers are counted once on CW/digital and once on Phone. If you have any questions or problems, e-mail me or the GQP manager Mike, NE4S.

The GA QSO Party is co-sponsored by the SECC and the SEDXC.

73,

John, K4BAI.

1310. Sunny and warm for Saturday's first fox hunt of 2011

Yahoo group: GRARA
Date: 2011-04-07 00:21:36 UTC
From: W8DER
Topic: 1310 Message: 1310

Fox Hunters,

Would you believe it? We can look forward to perfect weather for Saturday's first FOX HUNT of 2011. Bill Steffen is projecting a sunny day with the temperature in the high 60's.

Or fox team, Chuck, AJ8W and James, K8JHR must have a special arrangement with Mother Nature. Let's see if they can hide as well as they choose super Saturdays. This will be a two-fox hunt among the fields of Jenison/Hudsonville. What a fantastic kick-off for our summer of challenging hidden transmitter hunting.

I hope you will be joining us on the corner of Port Sheldon and 28th Avenue for the start at 9:30 am. Look for Jim Leys, KD8CAN, our official starter. He will need you odometer reading and your trip meter reading as well as the name of each team member.

Yes, this is a 2 fox hunt! Check the rules on the web site. You can find either fox first and then the other. Odometer readings will be taken at the post race meeting "joint". (meeting place will posted by each fox and announced on the air.)

For more information pse check the http://www.MichiganFoxHunter.com web site.

I am READY! See you there.

Mike, W8DER, for MichiganFoxHunter.com

I'm thinking I'm disappointed the GQP is this weekend. I tried to get on the air last weekend and had no luck. The Misery (MO) QSO Party was on and there was such a ruckus noone heard my measly 2.5W. Listening to the brag, I heard they were using big gun antennas like TH7's and at least 100W and a large number were running linears. No wonder no one heard me.

1322. May 7, 2011 Drill

Yahoo group: GRARA
Date: 2011-04-16 13:07:06 UTC
From: KD8CAN
Topic: 1322 Message: 1322

Hi Guys
Just a reminder to mark your calendars for the upcoming drill on May 7, Sat morning. Please meet at the chapter at 8:15. Please RVSP to me if you are planning on attending. This will be a drill involving other departments from the Red Cross and some from Ottawa county. This should be a great fun drill and we can use as many "hams" as possible. This drill will be open to any interested members of GRARA and of course the RCCT Team. Any questions or ideas please contact Joe Bell or me.
Thanks and hope to see you all there.
Jim Leys

Hello all Disaster Volunteers!

I would like to extend an invitation to participate in an upcoming Chapter Disaster Response Exercise the morning of May 7th. The basic idea is that we need to practice in order to be ready when the need arises, and we want to test our readiness while engaging as many of our volunteers as possible (and to have some fun!). Some details of the exercise are being kept secret in order to maintain an element of surprise, so all we ask is that you show up at the Chapter (1050 Fuller Ave. NE) 8:15am May 7th, prepared to participate. Field activities will occur between 9-12am. If you plan on attending the Exercise, please RSVP to me (adavis@...) as soon as possible. A free lunch will be provided.

We hope you can join us!

I'll be in touch.

1323. Tulip Time Parades

Yahoo group: GRARA
Date: 2011-04-20 00:09:08 UTC
From: Jim Miller
Topic: 1323 Message: 1323

Greetings!

We are getting down to the last couple of weeks and are looking for a few more volunteers to help with the Tulip Time Parades.

Below this email is a more detailed description of the events, but for those that like to skip to the important part, here it is:

Here is what we need:

Wednesday May 11, 2011
-We need 3 more volunteers for this event Thursday May 12, 2011
-We need 5 more volunteers for this event Saturday May 14, 2011
-We need 13 more volunteers for this event If you can only make one parade, we would really appreciate the help on Saturday. This is the biggest and longest event of the week and without your help we will leave some rather lengthy stretches without support to the spectators and/or participants.

Did I mention that you get a FREE LUNCH on Saturday?? Boars Head is donating lunch similar to the ones we have had in the past!

If you would like to help, please send me an email indicating which date you would like to work, your call sign, and preferred location if you have one. I will do my best to get you as close to that spot as possible.

More detailed information:
As in the past the Amateur Radio Operators and the American Red Cross will be providing support along the parade routes during the three Tulip Time parades.

The first parade (Volksparade) is scheduled for Wednesday, May 11, which we will need twelve Amateur Radio Operators to work as a Team with two American Red Cross First Aid Responders in covering a one block section of the parade route. Along with two Net Control Operators, we will need a total of fourteen Amateur Radio Operators, during the time frame of approximately 1:00pm until 3:30pm.

The second parade (Kinderparade) is scheduled for Thursday, May 12, which we will need the same number of Amateur Radio Operators as the Wednesday parade, during the same approximate time frame. The rain date for this parade will be Friday, May 13.

The third, the largest, and the longest parade (Muziekparade) is schedule for Saturday, May 14, which we will need twenty-four Amateur Radio Operators to cover a one-block section of the expanded parade route, along with two-three Net Control Operators. Also during this parade we need packet radio stations setup and operating at the American Red Cross Tulip Time Headquarters, Holland High School, and at Net Control.

Also for the Saturday parade, Amateur Radio Operators are needed to assist with parade lineup. This group will be working within their own net, and on a different frequency than the parade route Teams. We need approximately ten operators, six assigned to specific

Division Parade Marshals, one to work with the floats, one to assist the TV Crew with their coverage, one to work with the cars, one to work directly with the Grand Marshal, and two Net Control Operators. Adding up the various activities on Saturday, we need approximately forty Amateur Radio Operators just to cover what we currently know needs to be covered.

As one can see, this is large operation in which one Club or Group cannot handle on their own. Please we need your help in getting the word out to all area Amateur Radio Operators of this need. Many have done this festival for years and have their favorite spots to serve. If you are willing to serve, and have a favorite spot, please let me know I will to my best to assign you to that specific position. For those that are new to the hobby or those that have sat on the sidelines in the past years, please consider giving it a try. It is fun, and is a great way to brush up on your net operating procedures while providing a highly visible community service.

Thanks in advance!

Jim Miller

1328. State QSO Parties,anyone?

Yahoo group: GRARA
Date: 2011-04-28 00:32:13 UTC
From: Hank Greeb
Topic: 1328 Message: 1328

State State parties galore, 5 in the next couple weak endz:

~~~~~~
Florida QSO Party (CW/Phone)
Apr 30, 1600z to May 1, 0159z and
May 1, 1200z to 2159z
Rules: http://www.floridaqsoparty.org/
~~~~~~
Nebraska QSO Party (CW/SSB/Digital)
Apr 30, 1100z to May 1, 1700z
Rules: http://www.hdxa.net/neqso/index.htm
~~~~~~

And, The following weekend, May 7/8, 2011, three State QSO Parties

~~~~~~
7th Call Area QSO Party (Ph/CW/Dig)
May 7, 1300z to May 8, 0700z
Rules: http://www.codxc.com/new/page.asp?content=dryland7s
~~~~~~
Indiana QSO Party (All) ...
May 7, 1600z to May 8, 0400z
Rules: http://www.hdxcc.org/inqp/
~~~~~~
New England QSO Party (Phone/CW)
May 7, 2000z to May 8, 0500z
May 8, 1300z to May 8, 2400z
Rules: http://www.neqp.org/
~~~~~~

The 7QP, InQP, and NEQP can be logged in one programme using N1MM logger (maybe others? I dunno).

1329. Any N1MM experts out there? I need help again, please!

Yahoo group: GRARA
Date: 2011-05-02 01:06:10 UTC
From: Hank Greeb
Topic: 1329 Message: 1329

Last year (I seem to recall) that I had N1MM set up to send CW, and to be able to log the New England, Indiana, and 7th Area QSO parties. Those QSO Parties are coming up next weak end, and I need to be ready.

But, alas! I seem to have lost the details of how I did this.

I plead incompetence, borderline senility, with a good touch of liddism. Who is the resident expert at setting up N1MM logging software who will help this dunce get things working again?

I think I have the logging part set up correctly, but am cornfuzed as to how to change modes from CW to Phone and back again, and how to change bands, and how to get the keyboard keying set up. The home brew interface I have works fine with N3FJP software, so that shouldn't be a problemme..

Hi Henry,

To change modes, simply type what you want in the call sign box. CW gets you CW and SSB gets you USB or LSB depending on the band. One other thing, just entering the frequency in the call sign box will also change it on the transceiver and if set up correctly will also set the mode. I hope you have your transceiver interfaced. N1MM will also track your transceiver when you make adjustments there. Good luck in the contest. I wish I had the time.

Thanks, Rich:

I'll hook up my keying circuit and try these various aspects of the N1MM software. I'll probably operate only CW, unless sunspots are truly up and the ionosphere works much much better than this past weekend. QRP and SSB doesn't work very well unless propagation is great!

1336. Hidden Transmitter Hunt, Saturday, May 14 at 10:00 AM

Yahoo group: GRARA
Date: 2011-05-07 23:37:54 UTC
From: K8TB
Topic: 1336 Message: 1336

The hunt last month was a warm up. Now, dust off the equipment one more time and join in the second hunt for West Michigan this year.

Details:

Congregate time: 9:30 am, May 14, 2011
Fox on air time: 10:00 am
Start location: Same as last time, Family Fare at 28th and Port Sheldon in Hudsonville
(Hint, there is an ice cream place right across the street)
Fox will be within 8 airline miles
Lowest mileage wins
Maximum Fox Hunt Time of 2 hours
Fox will be using Robo Fox, 1 min on, 2 min off
Fox will be located in a car, on publicly accessible land or water.
OK, the Fox will actually be a Vixen. One guess.

Sincerely,

The Vixen and her Fox

1338. Could we try for Fox Hunting Pictures in CQ Magazine next year?

Yahoo group: GRARA
Date: 2011-05-10 13:26:20 UTC
From: W8DER
Topic: 1338 Message: 1338

Fox hunters,

We have gotten good coverage in CQ Magazine the last two years (May, 2010, 2011) thanks to the clever writing of Tom and Sheila Bosscher. I wonder if we can step it up one notch this year with a picture or two getting published. They are asking for pictures.

What quality does it take to publish a digital photo in a magazine like CQ?

It is easy to see what type of picture they select. There is always one with tape measure antennas, group pictures, one action shot and maybe a unique hiding place. Do we have a fox hunter who is good at taking pictures?

Information on where to send pictures and stories for next year's article is on Joe Moell's (K0OV) web site http://www.homingin.com

Thank you, and thank you to all who have replied... I couldn't make it tonight because I had a birthday party... MINE, so I couldn't duck out! We just finished up...
It gives me time to brush up on another element.... I passed all of them once and couldn't get my code portion... I love CW... but I'm no good at it.... I would like to get my novice call back.... KB8MFY.... Try PGV on voice..... simply terrible.... always comes across EEE.

Hi Mark,

Thanks for asking. The next examination is tomorrow, Friday, May 13, 2011 at the Red Cross Building room L-4. We start around 6:30 PM. The address is 1050 Fuller, NE; Grand Rapids, MI. I hope to see you there. Make sure you bring a COPY of your current license and of course, proper ID. The cost of the exam is currently $15.00 and covers one shot at all of the elements.

73,

1349. 462.5625

Yahoo group: GRARA
Date: 2011-05-17 03:24:47 UTC
From: pobox740
Topic: 1349 Message: 1349

How many of us (hams and non hams) have the ability, to listen in on 462.5625 Mhz nfm.
This freq is channel 1 of the FRS (family radio service) radio service.
A low power, non license short range use service.
And is used by family, and busnisses alike.
As for the rest of the "TEC STUFF", I will let you look it up on your own.
"What an I getting at?"
As some of you know, I live next to the White Pine Trail.
And I see people that have the FRS radios with them when thay are on the trail, to keep in contact with friends/family that are also on
the trail(or near by).
This service is also uesd by hunters in the game area, camping families, and moms at the park.
Just to name a few.
My thought is this...
If you live near a public recreation site, or in the area of one,
keep an ear tuned to this channel.
You never know when you may hear someone in need of help, and you may be the only one who hears it.
I am NOT saying that you need to get one, but if you have one sitting around, turn it on.
Most 440 HTs can tune the frequince in, along with dule band units
and scanners.
And eventhou you can not talk to a person in need, you can tell the
911 dispatcher what you herd.
"Why this channel?"
There is a lot of "radio groups" that have pushed for this channel to be the "EMERGENCY" channel, and contact channel.
As far as I have researched, the FCC dose not have any ruleing for an "emergency channel" for the FRS service.
And I have not found any FRS clubs, national or otherwise.
However, there is a lot of FRS radio companies that have CH1 as the emergency channel in the users guidbook.
With the weather getting warmer, I have noticed a small rise in use on this band.
And thought that maybe this would be another way us hams could help our community.

This is a GREAT idea. Most of us have this availability. I am going to program it into my radio, today. When I'm out "hanging loose" I'm scanning, anyway.

Hi Timothy,
This is a great article, I read this article in it's entirety to the Lowell Tuesday night net I also told the net that you wrote it and deserve the kudo's. Everyone thought that it was a well written, and timely. The article even inspired some to go and purchase some FRS radios. Everyone said that they will be listening on that frequency more often. I think that you have started something here Timothy, Good Job. I hope that I did not do something wrong by reading this to the net, If I did, I apologize. Again, this is a great article, Thanks for writing it Timothy, 73.

Great thought Tim! I agree- kind of like "Wilderness Protocol" on the ham bands- Too bad that on 146.52 there are high power base stations that use this freq as a chit chat channel in Kent Co driving informal monitors off the freq.
Sorry- couldn't resist the comment- Your FRS monitoring for emergencies made me think of this-

1354. CQ WPX CW Contest this weekend

Yahoo group: GRARA
Date: 2011-05-26 14:44:56 UTC
From: n8xxham
Topic: 1354 Message: 1354

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
CQWW WPX Contest (CW)
May 28, 0000z to May 29, 2359z
Rules: http://www.cqwpx.com/
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

All HF bands, except 60 metres and the WARC bands, CW only (start exercising that left foot NOW!), High power, Low Power, QRP Single op categories, plus several multi-op categories.

If you have one of those "interesting" prefixes, like the call I'll be using (WQ8RP) this can be a very fulfilling adventure.

I've even entered it with my garden variety N8 prefix, and have had fun!

Give it a try, you won't be disappointed.

1358. QRP IN THE PARK EVENT! - Saturday, June 18th 6:30PM

Yahoo group: GRARA
Date: 2011-06-02 21:45:43 UTC
From: K8TB
Topic: 1358 Message: 1358

Hi Everyone,

Please join us at Helder Park from 6:30 PM to DUSK on Saturday, June 18th 2011. We will be firing up the grills and putting our amateur radio skills into action. If you ever wanted to work low power portable on CW, SSB phone, or the digital modes with HF, UHF, VHF bands; and to get some practice in before field day... we invite you to stop by and see us!

Where? HELDER PARK
3751 104th Avenue
Holland, Michigan

When? SATURDAY JUNE 18TH 2011 - 6:30 PM TO DUSK

Note: This event is weather permitting and will cancel if severe weather is expected for the area. Please monitor this reflector and 147.06 K8DAA repeater the evening of the event for any changes of times or event cancel.

See You There!

1359. June VHF contest this coming weekend

Yahoo group: GRARA
Date: 2011-06-06 19:37:36 UTC
From: Hank Greeb
Topic: 1359 Message: 1359

Dig out those IC-706's, or try that 6M band daylight rigs and get on the air this weekend.

The ARRL June VHF contest is coming. Starting 1800z June 11 through 0300z June 13. Last year we had some of the best 6M Eskip propagation I've ever experienced in this contest. Some parts of the country also got a nice 2M Eskip opening as well. There we a handful MRRC'ers that made a few hundred contacts on 6, so let's hope we get great condx again this year.

One of my fellow contesters sez he often can do meteor scatter.

1360. Morley site cleanup, N24HC, Field Day

Yahoo group: GRARA
Date: 2011-06-09 02:39:02 UTC
From: Jack Amelar
Topic: 1360 Message: 1360

Morley receive site grounds maintenance with campout.
It's time once again for grounds maintenance at the 250ft commercial tower NE of Morley owned by T&W Electronics which, among other radio services, hosts the Lowell 145.27- (94.8Hz) Morley remote receiver 144.67 MHz. And now includes the K8SN 442.075 (103.5Hz) repeater!
Part of our arrangement with T&W is upkeep of the grounds.
Being the site is a mix of field and woods located in a rural area near Amish families and an Elk-Deer-Buffalo farm, some of us combine this with a camping trip.
The main cleanup day will be Saturday, June 11. Figure start around 10AM. Rolls and coffee will be provided in the morning, Burgers and beverages for lunch. The "better half" and kids are certainly welcome.
There are no toilet facilities here, but I will have the rest room in my motorhome available. It's not a problem, really!
I plan to arrive Thursday or Friday and not leave "until I'm ready to".
Anyone else interested in a cheap non-crowded campsite is welcome.
Electricity is available. Questions? My cell phone is (616)438-1464.
On the cleanup agenda this time. Mowing. Clearing trees and brush growing under the south guy wires and cutting / clearing fallen trees near the south anchor. If time and energy permits, the same for the east guy wires.
An extra mower (in case the one I bring breaks down, been there, done that) as well Extra chain saws and operators a BIG plus.

HOW TO GET THERE?

Use your preferred mapping program and input: 3800 155th Ave, Morley, MI 49336 Or follow the Google Maps with the tinyurl links below.

Directions from Grand Rapids via US-131 Expressway are simple. If your arriving from Lowell, the "from Lowell" directions use paved county roads and really is the shortest, quickest way. But I know some people will go 100 miles out of the way to use expressway. Decide for yourself.

FROM GRAND RAPIDS to Morley receive site.
http://tinyurl.com/m7zff9
Head north on US-131 expressway to Morley exit 125, Jefferson Rd.

Turn right / east for 1 1/2 miles to Northland Dr. in the center of Morley.
Just before passing thru Morley, give a shout on the Lowell repeater to see if we need Ice or anything from a gas station / convenience store.

Jog left / north then right / east. Continue on Jefferson Rd for another 1 3/4 miles.

Turn left / north on 155th Ave for 2 1/2 miles.

Turn right in the drive and park. You will have spotted the tower well before you arrived.

FROM LOWELL to Morley receive site
http://tinyurl.com/kv7sxx

Head north on Lincoln Lake Ave, for 20 miles, crossing Hwy M-44 and M-57 along the way.

Turn left / west on 18 Mile Rd., toward Cedar Springs, for 1 mile.

Turn right / north on Meddler Ave for 4 miles. Meddler ends at 22 Mile Rd.

Turn left / west on 22 Mile Rd for 1/2 mile. 22 Mile Rd borders Kent and Montcalm Counties.

Turn right / north on Amble Rd, entering Montcalm County, for 2 miles.

Turn left / west on Briggs Rd for 1 mile.

Turn right / north on Bailey Rd for 4 1/2 miles, passing through the village of Coral.
Just before passing thru Coral, give a shout on the Lowell repeater to see if we need Ice or anything from the gas station / convenience store.

Turn right / east on Church Rd for 1 mile.

Turn left / north on Amble Rd for 7 1/2 miles. **If Amble Rd were a thru street, I would not have routed you thru Coral!** You will cross Hwy M-46 along the way. Past M-46, you will enter Mecosta County where Amble Rd becomes 150th Ave.

Turn left / west on Jefferson Rd for 1/2 mile.

Turn right / north on 155th Ave for 2 1/2 miles.

Turn right in the drive and park. You will have spotted the tower well before you arrived.

Saturday, June 18
The National 24 Hour Challenge (N24HC) http://www.n24hc.org is a 126 1/2 mile bicycle route through Barry County that takes place on the day / Saturday before Fathers Day that attracts about 400 riders plus their support crews. Amateur Radio communications is an important part of the logistics of this annual event taking place this year on June 18.
As I type this, the following communications positions are in need of volunteers for 3 check points and 3 vehicles (supplied with driver).
The event coordinators provide shirts, limited refreshments, and Friday evening spaghetti dinner. Please contact the Ham Radio Communications Director, Jack NY8D, if you are willing to help.

Saturday, Sunday, June 25 and 26.
FIELD DAY WEEKEND!!!! The Grand Rapids Amateur Radio Association is coordinating a combined FD event with the Lowell Amateur Radio Club, and possibly others. Location is Calvin College. More details as available.

1361. Re: [GRARA] June VHF contest this coming weekend

Yahoo group: GRARA
Date: 2011-06-12 03:11:10 UTC
From: Steven Kaney
Topic: 1359 Message: 1361

I was hoping to have some fun today but the day in CT started with quite pregnant clouds and it started drizzling about 1pm just before the contest started. Too wet for radio in the park. Tomorrow is likely to be just a little nicer. I dont think the bands were all that good today either - I couldn't hear much from the apt.

Question: Is it OK to use both a Heil competition mic element AND the compression in the radio at the same time?

Subject: [GRARA] June VHF contest this coming weekend

Dig out those IC-706's, or try that 6M band daylight rigs and get on the air this weekend.

The ARRL June VHF contest is coming. Starting 1800z June 11 through 0300z June 13. Last year we had some of the best 6M Eskip propagation I've ever experienced in this contest. Some parts of the country also got a nice 2M Eskip opening as well. There we a handful MRRC'ers that made a few hundred contacts on 6, so let's hope we get great condx again this year.

One of my fellow contesters sez he often can do meteor scatter.

Mr. Johnson:

Field day is:

June 25 & 26 2011
June 23 & 24 2012
June 22 & 23 2013 (Yes it's the fourth full weekend in June, NOT necessarily the LAST weekend in June)
June 28 & 29 2014
et. nausea.

I'm sure someone else will determine the setup schedule, but, sorta traditionally, we have set up starting early Saturday morning (sometime between 8 and 10 a.m., typically) to be ready to go by the 2 p.m. EDST start time.

It is at the east campus of Calvin college, somewhere near the Prince Conference Centre. K8DMR will know the eggzakt details and be happy to tell you where to go. I'm very sorry I don't have those details, becuase I LOVE to tell people where to go. :)

Hey Jim- When the guys are done with the generator please fefill with gas and add "stable" to the gas so it will stay fresh- No telling when it will be used again-
On another note- I will not be attending GRARA's FD as I will be participating in the FD effort for the Tri-County ARES/RACES event at Grose Park.

You are in charge to make sure our equipment is handled safely and care is taken-
Have you and Ray got on D-Star yet?? Let me know when you plann on it and I might join in-
JB

From: Phillip
Topic: 1374 Message: 1374

Hi All
I have a MFJ-948 Tuner that would be good for field day. This is the first of the 948 series. $50

Also a sat dish mount that would be great for a mast or smaller ant.
It is a galvenized steel frame with a short vert. pipe on one side. You could clamp a mast on the side or slide a mast over it. This is a ballast mount. Meaning you use cement blocks to hold it down. The more blocks, the more it will support. The mount is easy to carry and not really big. Google Dish ballast mounts and you can see how they work. $20

I am located in Dutton, 1 block south of 68th st.

From: Hank Greeb
Topic: 1378 Message: 1378

Seems like whenever there's even a remote possibility of a tornado or a reasonably heavy storm around here, the TV Weathermen go bonkers and all, yes all, commercial stations switch to non-stop weather.

Shucky durn, from whence cometh I (SW Ohio) we needed a confirmed tornado with actual visible damage to start such activity from the weather people. There seemed to be one unconfirmed tornado in Allegan County, yet every station, including Channel 41 in Battle Creek, went to continuous weather. Don't the TV stations have anything better to do?

Pardon the rant, but from whence I come, today's weather was "run of the mill."

Hank,

It's TV. If it bleeds, it leads. Consultant based news driven by
folks from Atlanta. It will not get better.

But, the TV weather folks in Ohio are just as bad with the Chicken
Little yelling. Same ownership, same consultants.

tom K8TB, who works for a TV station that has no video :)

I remember after the Standale tornado when there was any thought of one we where send home from school. At home the farthest we could go outside was the front porch. That was a but of over kill, but today because of the weather service "crying wolf" so much no one even listens to warnings let alone watches.
Hank is right about the over done coverage, but then the weather is much better programing than what is normally on.

Seems like whenever there's even a remote possibility of a tornado or a reasonably heavy storm around here, the TV Weathermen go bonkers and all, yes all, commercial stations switch to non-stop weather.

Shucky durn, from whence cometh I (SW Ohio) we needed a confirmed tornado with actual visible damage to start such activity from the weather people. There seemed to be one unconfirmed tornado in Allegan County, yet every station, including Channel 41 in Battle Creek, went to continuous weather. Don't the TV stations have anything better to do?

Pardon the rant, but from whence I come, today's weather was "run of the mill."

-------- Original Message --------
Subject: [Kcares_general] Rock tri help all info
Date: Sat, 25 Jun 2011 08:17:45 -0400
From: Kent County RACES General List <kcares_general@...>
Reply-To: no_reply@...
To: ksar_members@..., kcares_general@...

***** This is the General Announcement List from the Kent County ARES / RACES / SAR Groups
to be removed see the information at the bottom of this email *****
Here is a compilation of a few of the emails I have sent out in the
pas regarding the Rockford Tri. I sent yesterday's email out early and
I guess I wasn't fully awake. This should have all the information.

All
So far we have six people signed up to work the Rockford Area Kids
Triathlon. We still could use 10 more people. Please take a minute and check
your calendar and see if you might be available to help. This is a great
event that helps to fund some great programs. This event is run by members
of the KCSD, Rockford Police, MSP, Kent County CERT, Kent County MRC,
KCRACES, and a few others. This is a great opportunity for our groups to
work together and get some exposure with the community. Please sign up at
http://vrm.cc/rockfordtri if you can help. As always please feel free to
contact me with any questions and thank you.

All
Summer is underway and it is time to start planning for our summer events.
This year's Rockford Area Kids Triathlon is Saturday July 9th at the
Rockford High School. RACES, CERT, and MRC have once again been asked to
help out with this year's event. We will be helping in many areas of the
event, so there is something for everyone to do. This is a great way for our
groups to get out into the community. More information about the Rockford
Area Kids Triathlon is available at http://www.rocktri.com/

We will be needed between 6 and 6:30AM to help with setup. The final awards
ceremonies will start at 12:30, so most of us will be done before then.
There will be additional information as the event draws nearer. If you are
able to help out please sign up at http://vrm.cc/rockfordtri

As always if you have any questions please feel free to contact me.

What fun! I wish my knees weren't shot so I could enjoy some of that.

I spent a couple of hours on 15m SSB QRP with a VersaTee full size vertical from a Low Hill in CT. It was almost a drive up. I got out as far as SC, IL, MI and parts between. I was using a small 26W folding solar panel w/ battery backup. If it had started earlier I could have kept it going for 10 to 12 hours but by 4 or 5pm the shadows from the trees were blocking my panel.

Wow what a great event.

While cleaning out my rig I may have found that item you have been looking for.

1. Set of dentures or plate.

2. Jacket.

3. Nice pair of sun glasses.

4. Radio.

5. Antenna Tuner.

6. 80 meter dipole.

You may claim your item by giving a detailed description of the item, and making a large donation to the radio club.

Contact me at KD8HNF at arrl dot net

1398. IARU HF World Championship This weekend

Yahoo group: GRARA
Date: 2011-07-05 22:30:24 UTC
From: Hank Greeb
Topic: 1398 Message: 1398

QST QST QST DE n8xx

Attention all Amateurs,

This weekend will feature

IARU HF World Championship (CW/SSB)
Jul 9, 1200z to Jul 10, 1200z
Rules: http://www.arrl.org/iaru-hf-championship

This is an ARRL DX contest on steroids - in that any station may contact any other station in the world.

And, it's only 24 hours instead of some DX contests which last 36 to 48 hours total.

CU on the bands.

During the stand-off the other night, I was put wise about a neat Kent/Ottawa police scanner. You might want to give it a try. It is a free basic service and works quite well considering all the stations it scans.

It has great reception, and a neat way of delaying "covered" transmissions so none are missed.

1401. IARU N8XX SO CW QRP

Yahoo group: GRARA
Date: 2011-07-11 02:50:34 UTC
From: Hank Greeb
Topic: 1401 Message: 1401

IARU HF World Championship

Call: N8XX
Operator(s): N8XX
Station: N8XX

Class: SO CW QRP
QTH: MICHIGAN
Operating Time (hrs): 12

Summary:

Band	CW Qs	Ph Qs	Zones	HQ Mults
160:	0	0	0	0
80:	13	0	3	1
40:	62	0	7	6
20:	64	0	8	10
15:	18	0	5	3
10:	0	0	0	0
Total:	157	0	23	20 Total Score = 12,943

Club: Mad River Radio Club

Comments:

Rotten conditions for most part, Especially when running <5 watts to a wire antenna, Participation seemed much less than last year, worked out most of the run stations, and slim pickin's for last 4 or 5 hours. With a mediocre antenna it was hard to get heard even in Europe. But, fun, fun, fun. Tnx 2 the organizers.

Note: I figured that, with QRP and a wire antenna <40 feet up, I'd not radiate much of a signal. However, just for the fish (halibut) I called CQ a few times during the waning hours of the event, because it seemed I had worked all the signals who were loud enough to be able to hear me.

On the reverse beacon network, I was very surprised to see my call several times with >10 dB above the noise, at several places. I worked about 4 or 5 Q's during this period, though "most" of the folks who could hear me had either given up or had already worked me, or weren't doing S&P.

Some of the results:

WZ7I N8XX 14011.6 CQ 11 dB 22 wpm 1118z 10 Jul
<snip>

```
W3LPL N8XX 7031.5 CQ 20 dB 22 wpm 1110z 10 Jul
<snip>
N4ZR N8XX 7031.5 CQ 17 dB 22 wpm 1110z 10 Jul
K3MM N8XX 7031.5 CQ 13 dB 22 wpm 1110z 10 Jul
<snip>
N7TR N8XX 7046.5 CQ 12 dB 21 wpm 1055z 10 Jul
K3LR N8XX 7046.6 CQ 19 dB 21 wpm 1055z 10 Jul
N4ZR N8XX 7046.5 CQ 14 dB 21 wpm 1055z 10 Jul
W3UA N8XX 7046.5 CQ 14 dB 21 wpm 1055z 10 Jul

More often than not, it's software and an interface box, or homebrew cables. Typically uses a computer to generate tones into a rig in the SSB mode to generates AFSK. There are ways to use FSK, but that often requires digging into a rig, unless it's specially designed for RTTY and other FSK modes.

for the NAQP, it's only HF.

What does it take to use RTTY with the RTTY mode in the radio? Is it just a cable or do you need one of those big AEA PK-232 gizmos? I would like to hear that its just a cable because the AEA PK-232 is not very friendly for taking to the park.

You nd a teletype machine and lots of paper for it.
No, only a data cable with a compatible din plug for your radio or a cable that goes into the mix socket depends on your interface and radio. The interface is the same as for PSK. You also need a serial port on your computer, there are USB to serial converters - some work with RTTY some don't. There are interfaces, such as the Signalink at the club shack that are sound cards themselves so the compiter is just a dumb terminal and USB is used.

I have a Rig Blaster PNP that I am able to do sound card modes with. I have done a little PSK with it. But I was reading that using the RTTY mode in the radio is much better than doing it with a sound card interface. I was hoping I could either use cables or a small interface that I could go to the park with but the smaller interfaces such as the Kam 3 apparently dont do RTTY leaving only the big PK-232 units for RTTY. Isnt theere anything in between a soundcard interface and a full size TNC that would use the Rig's RTTY mode?

I made my own interface with cables, an isolation transformer, and an 60 dB inline attenuator, all available from Rat Shack. A bit unwieldy, and I had to figure out what went where each time I wanted to use Feld Hell, RTTY, PSK31, et. nausea. But, it worked, co$t less that $25, and was locally available.

RTTY with direct FSK inside the radio is a bit better, but, it either takes a radio which has the internal connections built in, or needs a hack job to gain access to the innards. Note that the best time to experiment with a new mode is NOT during a contest. :)

1416. REMEMBERING 911

Yahoo group: GRARA
Date: 2011-07-26 03:24:13 UTC
From: pobox740
Topic: 1416 Message: 1416

COMMEMORATIVE EVENTS: REMEMBERING THE FIRST DECADE SINCE 911

This coming September 11th will be the 10th anniversary of the al-Queda backed terrorist attacks of September 11th of 2001. These attacks felled the two World Trade Center tower buildings in New York City and damaged the Pentagon when radical Islamic extremists high-jacked four United States flag carrier jetliners and crashed them into the two structures. Over 3000 American citizens were killed as well as a number of foreign nationals who worked in the twin towers buildings.

Over the years there have been several ham radio operations in remembrance of those whose lives were lost in this senseless and wanton carnage. With this being the first decade anniversary of the September 11th, 2001 tragedy, we here at the Amateur Radio Newsline are trying to compile a list of radio clubs and individual hams who are planning any form of amateur radio memorial operation to honor those whose lives were lost that day. If you have plans to commemorate 911, please drop us an e-mail to newsline at arnewsline dot org and let us know all of the details. We in turn will list as many as we can on our website at www.arnewsline.org.

Those whose lives were lost on 911 deserve to be remembered. We will do our part by providing web-space to list ham radio commemorative activities. It's up to you to do the rest. (ARNewsline)

Mike:

Thought you'd never ask. From a freind who is trying to drum up
bizziness 4 the OHQP.

And, to work N1L from BROWn county, beam heading would be SSE.
However, best band(s) to work that distance from GRand Rapids area would
be 40 meters in the afternoon and 80/75 meters in the evening.

Oh, if you work me, please spot me on the DX Cluster network - whenever
I got spotted last year it increased the number of contacts
considerably, not as much as on a DXpedition, but every point counts! I
don't know the local DX clusters, my favorite one is dxc.w9zrx.net.
There are some which you can check in via a web browser, I use telnet
and the command "o dxc.w9zrx.net" Please ask someone else what kind of
clusters you can access via a web browser.

Here's the plug from my friend in OhHoHo

==========

You're invited to a Party!

What: Ohio QSO Party
When: Saturday, August 27th (local noon to midnight)
Where: Anywhere in Ohio
RSVP: http://www.ohqp.org/plannedOpsEntryOhQP.html
Info: http://www.ohqp.org

Please join us for the upcoming Ohio QSO Party. 2010 was a record year
for activity, but we're looking to do even better on 2011. Can you join
the event?

This is a fun event with no QRM (unlike Field Day), and even stealth
antennas and QRP stations will get lots of callers. If you have any
questions about getting on, give me a buzz. And please spread the word
to the your local clubs and other Ohio hams.

Rules and an operating guide can be found on the official OhQP website
http://www.ohqp.org

Hank, yes I know Brown County Ohio! It's about 20 miles SE of Cincinnati along the O-HI-O river.

Do you mean that with a population of 42285, they have to hire a gunslinger from Michigan to cover the county for the Ohio QSO Party?

Heck, if they don't have any hams down yonder, I would let the county go back to the moonshiners!

Now I know why you are using the contest call N1L -- you are in disguise!

I put the following info on my cork board anyway: I will pretend I don't know who you really are......

Actually, Mike:

I subscribe to the Minnesota Wireless Association reflector - for reasons which escape me.? But, they have lots of good ideas.

One time they were discussing how many "NOT IN LOG" or NIL subtractions they had in their logs from one of the adjudicated contests, AND the Minnesota QSO party was coming up.? I put 2 and 2 together, and requested N1L for the party.? I advertised that I'd be operating with the call, just so everyone who worked me would have at least one N)ot 1)n L)og (or N1L) in their log.?

It was so much fun that I thought it a good idea to use N1L for the Ohio QSO Party as well.? :)

73 de n8xx Hg
Operating as N1L/BROWn during OHQP 2011

p.s. I don't think there has ever been a "native" fixed station operating during the Ohio QSO party since the early 1990's when I got interested in the "new" OHQP.? I operated there with some other hams for several years as a club project and a second "Field Day" type operation.? I'd not "blame" the BROWn county hams - right in our back yard, MECOsta county has had only very spotty activity, as had NEWAygo county - I activate NEWAygo in 2010 and MECOsta in 2011.?? I am a bit critical of the Mad River Radio Club, who seem to want to encourage their own members to go out mobiling in the rare counties rather that stir up interest in contesting in native operators.? It's like a voice crying in the wilderness.?

1425. [QRP-L] North American QSO party - Saturday - August 6 U.S. Time

Yahoo group: GRARA
Date: 2011-08-05 19:36:26 UTC
From: Hank Greeb
Topic: 1425 Message: 1425

Last minute reminder:

North American QSO Party (CW) ... 100W Max. Aug 6, 1800z to Aug 7, 0600z
Rules: http://www.ncjweb.com/naqprules.php

This is a contest where the MAX power is 100 watts output. So the modest station stands a chance.

Teams of 2 to 5 members (typically from within a club) may be registered. So, gather the conesters from your favorite club and for a team! This can be extra fun!

Lettuce hope we have some propagation - with all the solar flares and other abbe rations on the sun.

NOAA satellite eyes Emily: Images aid hurricane forecasters

Meet NOAA IMET Valerie Meyers

NOAA satellites track raging U.S. wildfires, aid firefighters

When the Sun acts up, NOAA knows why

VIDEO: 'When Lightning Strikes'

ArchiveWhen the Sun acts up, NOAA knows why
Peak solar activity expected in 2013

Forecasters from NOAA's Space Weather Prediction Center in Boulder, Colo., use information from many sources to understand and predict potentially dangerous space weather heading toward Earth. This image of the Sun is from NASA's STEREO satellites.

(Credit: NASA)
On a summer day in 1859, a silent surge of power from a major geomagnetic storm fueled by a solar eruption hit telegraph offices around the world. Some telegraph operators got electric shocks. Papers caught fire. And perhaps most amazing, many telegraph systems still sent and received signals even after operators disconnected batteries.

It was as if the very air was charged with electricity.

In some ways it was, said Tom Bogdan, director of NOAA's Space Weather Prediction Center, or SWPC, in Boulder, Colo.

"We now know how powerful space weather can be and how events that begin on the surface of the Sun can end up wreaking havoc here on Earth," said Bogdan. "This is why NOAA has a Space Weather Prediction Center ☐ to forecast when space weather is coming our way, so we can avoid or mitigate damages."

Chris Balch (seated), David Marshall and Meghan Stockman check the latest space weather event reports. The three work as forecasters at NOAA's Space Weather Prediction Center, a 24/7 operational space weather forecasting center in Boulder, Colo . The center advises industries affected by space weather, such as satellite operations, electrical grid operations and airlines.

Download here. (Credit: NOAA)
Bursting with electrical energy

When a burst of charged particles ejected from the Sun's corona (the solar atmosphere) barreled into Earth's magnetic field at more than 5 million miles an hour in 1859, it triggered brilliant auroras ☐ those fascinating displays of light caused by the collision of charged particles in Earth's atmosphere ☐ visible as far south as the Caribbean. The ejection also induced currents that surged through telegraph cables, the electrical systems of the time.

Today, humans rely on many more systems that are vulnerable to space weather:

☐GPS apps on mobile phones and in cars;
☐Power grids that serve critical users such as hospitals and airports;
☐Airline communications; and
☐Military and environmental satellites, to name a few.
In fact, a storm of similar magnitude today could cause $1 to $2 trillion in damage, globally, according a 2008 report of the National Research Council.

Power grid managers and systems operators are keeping a close eye on SWPC forecasts, especially as the Sun enters an active phase of activity that peaks about every 11 years. The next solar maximum is expected in 2013.

When a space weather storm is on the way, satellite operators can switch into standby mode and temporarily forgo communication between ground control and spacecraft in orbit to prevent the garbling of messages . Airlines can reroute planes that normally take fuel-saving polar routes. Along those routes, pilots depend on high-frequency (HF) radio communications that are vulnerable to disruptions by space weather. This impact has already occurred in 2011: during space weather events in February and June, airlines reported loss of HF communication near the Arctic.

An aurora, as seen over the Poker Flat Research Range north of Fairbanks, Alaska, on Feb. 28, 2011.

Download here. (Credit: NOAA)
Here comes the Sun

Teams of forecasters staff SWPC's operations center 24/7, watching monitors intently for "space weather fronts" that might be heading toward Earth. The forecasters rely on data from a network of monitors, including NOAA and NASA satellites, and U.S. Geological Survey sensors that detect magnetic fields (magnetometers). At NOAA's Satellite Operations Facility in Suitland, Md., experts control the spacecraft that closely monitor solar activity and process the data that go into the SWPC forecasts. The SWPC issues space weather alerts, noting triggers that are important to different users. Its forecasters also speak daily with NASA ☐ anyone in low Earth orbit could receive an extra dose of radiation when energized particles sweep by.

Today, Bogdan and his colleagues have several new missions, too, made more critical by people's increasing reliance on vulnerable systems and by the impending solar maximum. They're working with the United Kingdom's Meteorology Office to help the UK set up what could become a long-awaited backup to SWPC. The United States and Britain are collaborating to create a sophisticated new model for more accurate predictions of both terrestrial weather and the effects of space weather on Earth's technological systems.

SWPC is also engaging with users and the general public to promote understanding. This includes the annual Space Weather Enterprise Forum (SWEF) held in Washington, D.C. The theme of this year's forum posed a question that is on many minds: "Solar maximum ☐ Can we weather the storm?"

"I honestly don't know if there's a yes or no answer," said SWPC space scientist Joe Kunches. "But we increase the chances of `yes' with good forecasts and warnings and emergency procedures in place We are working hard here to ensure the greatest probability that we can withstand whatever the Sun doles out."

If you have ever read any article written by Dave Ingram, K4TWJ,
you know he is a very good and fun read. Dave is now a Silent Key, and
his family has released his last book to folks who would like to read
the book for themselves.

This downloadable book is a 91 page, illustrated, all about keys.
Big ones, little ones, weird ones and cool ones.

A great book to read, and for those who can't read, great pictures.

Go to http://www.k4twj.com/books.htm

and click on of the the two yellow "click here" for your choice of
a high or low resolution PDF.

Looking at the pretty pictures, tom K8TB :)

1435. Ohio QSO Party in 2 weeks!

Yahoo group: GRARA
Date: 2011-08-15 02:47:27 UTC
From: Hank Greeb
Topic: 1435 Message: 1435

The most fun on the radio, the Ohio QSO Party, is just 2 weeks away on August 27th.I hope you will spread the word to your club members and encourage them to get on the air.

The goal of the Buckeye operators is to get fixed stations on from every OhioCounty.The more stations we can get on, the more fun for all.

We welcome any and all participation.Part timers, QRP, indoor antenna, even station from other states to provide us extra multipliers!

Every station will have fun and add to the excitement on the air.

Lettuce fill the bands with Buckeyes and stations trying to contact Buckeyes, (Like Michiganders) and have a great QSO Party.

Information, rules and operating guides can be found on the official website: www.ohqp.org <http://www.ohqp.org/>

Paraphrased from the words of Kenny K2KW, Ohio QSO Party Committee - kenny.k2kw@...

p.s. Look for n8xx, masquerading as N1L/BROWn from BrownCounty.That was you can have a "real" N)ot 1)n L)og contact! AND, if you hear me, be sure to "spot" me on your favorite DX Cluster - this gives an added boost to operators from "rare" counties like BROWn, which hasn't had a fixed station operating from a permanent location is recorded history.

Mike

You had better direct your question about why Ohio QSO party doesn't
recognize digital modes other than CW.

Some QSO parties encourage digital by giving extra multipliers for
counties contacted by digital modes.

Jim can answer the question about "dark ages."

For me, I'd prefer they recognize sp*rk emissions as a separate
category. :)

1438. 9/11 STATION

Yahoo group: GRARA
Date: 2011-08-17 21:49:22 UTC
From: pobox740
Topic: 1438 Message: 1438

a reminder that this coming September 11th
will be the 10th anniversary of the al-Queda backed
terrorist attacks on September 11th of 2001. Attacks that
felled the two World Trade Center tower buildings in New
York City and damaged the Pentagon when radical Moslem
extremists high-jacked four United States flag carrier
jetliners and crashed them into the two structures and
killing over 3000 American citizens.

Over the years there have been several ham radio operations
in remembrance of those whose lives were lost in this
senseless and wanton carnage. With this being the first
decade anniversary of the September 11th, 2001 tragedy, we
are trying to compile a list of radio clubs and individuals
who are planning any form of ham radio memorial operation to
honor those whose lives were lost that day.

Already a group in Pennsylvania and another in New York City
are planning on-the-air commemorative operations. If you of
any others please drop us an e-mail to newsline at
arnewsline dot org and let us know all of the details. We
in turn will list as many as we can on our website at
www.arnewsline.org starting this week.

Those whose lives were lost on 911 deserve to be remembered.
We will do our part by providing web-space to list ham radio
commemorative activities. It's up to you to do the rest.

I will be on the air from 16:00 - 21:00 E.S.T. on 147.500 FM simplex.
Location will be my front porch.
North of Rockford, MI.

1445. Fox Hunt This Wednesday, August 31, 2011, 7:00 PM

Yahoo group: GRARA
Date: 2011-08-28 22:47:21 UTC
From: Michel
Topic: 1445 Message: 1445

Hello all fox hunters,

No, it is not time to put that fox hunting equipment away for the year yet. The August hunt is scheduled for this Wednesday night at 7:00 PM.

Our goal this year is to have at least one fox hunt in west Michigan each month from April through November. We cannot let August slip away without a hunt.

Our August hunt will feature one of our most creative foxes, Laryn, K8TVZ, winner of the July hunt. We are putting the final details together as you read this email. That's often the best kind of hunt!

Pse check with the http://www.MichiganFoxHunter.com for the latest information. We will keep the web site up to date with the rest of the instructions and the results on Thursday.

We hope to see you there. The winner of this hunt will have the first option to be the fox for the September hunt.

A11 Arizona Statehood QSO Party Announcement!

Announcing the 2011 Arizona Statehood QSO Party, sponsored by the ARRL Arizona Section and Catalina Radio Club, from Oct 8 1600Z to Oct 9 0600Z and Oct 9 1400Z to Oct 9 2359Z. Phone, CW and Digital modes on 160/80/40/20/15/10/6/2 meters. Single-Op, Multi-Op, Arizona Multi-Multi, Arizona County Expedition and Mobile categories. Work stations once per band and mode. Mobiles may be worked once per band and mode in each county. County Line operations (two counties max) count as 2 QSOs. Outside Arizona exchange name and location (State, Province, or DXCC Prefix). Arizona Stations send a year of significance in Arizona History and State/County abbreviation. Suggested Frequencies (kHz): CW: 1812, 3548, 7048, 14048, 21048, 28048, 50048. SSB: 1848, 3848, 7189, 14248, 21348, 28448, 50148. FM Simplex: 146.48MHz. One point per Phone QSO, two points for CW and Digital QSOs. Multipliers for non-AZ entries are the 15 AZ counties by band and mode. Multipliers for AZ entries are States, Provinces, and DXCC Countries by mode. Final score is total QSO points times total multipliers + 100pts for Bonus Station W7SA. Mail logs no later than Oct 31 to Catalina Radio Club, C/O Gary Keck, PO Box 17811, Tucson, AZ 85731 or via email to logs@... . For full rules, along with log and summary sheets, Cabrillo electronic file format, and Award information, see http://www.azqsoparty.org.

Looking forward to hearing you on the air!

1453. 2011 Arizona Statehood QSO Party Announcement

Yahoo group: GRARA
Date: 2011-09-11 18:50:52 UTC
From: Hank Greeb
Topic: 1452 Message: 1453

This might be an interesting test for W8LRC's station? Best band(s) for working Azirona from here during the daytime would be 15 and 20 metres (10 if band conditions permit), so testing could include the beam on top of the 100' tower?

And, in the evening, I recently worked the west coast (and heard Azirona) with my itty bitty wire antenna and 5 watts on 40 metres, so the 40 metre 2 element beam on 40 @ 110' or so should do wonders.

Just a thought - we have a month during which to think about this subject.

Mobiles may be worked once per band and mode in each county. County Line operations (two counties max) count as 2 QSOs. Outside Arizona exchange name and location (State, Province, or DXCC Prefix). Arizona Stations send a year of significance in Arizona History and State/County abbreviation. Suggested Frequencies (kHz): CW: 1812, 3548, 7048, 14048, 21048, 28048, 50048. SSB: 1848, 3848, 7189, 14248, 21348, 28448, 50148. FM Simplex: 146.48MHz. One point per Phone QSO, two points for CW and Digital QSOs. Multipliers for non-AZ entries are the 15 AZ counties by band and mode. Multipliers for AZ entries are States, Provinces, and DXCC Countries by mode. Final score is total QSO points times total multipliers + 100pts for Bonus Station W7SA. Mail logs no later than Oct 31 to Catalina Radio Club, C/O Gary Keck, PO Box 17811, Tucson, AZ 85731 or via email to logs@... . For full rules, along with log and summary sheets, Cabrillo electronic file format, and Award information, see http://www.azqsoparty.org.

Looking forward to hearing you on the air!

From: K8TB
Topic: 1456 Message: 1456

OK, it won't be a Fox Hunt, it will be a Vixen Hunt. (Look it up!)

The transmitter goes on the air at 6:30 PM, on Wednesday, September 21, 2011 with the starting point of 28th Ave and Port Shelden in Hudsonville. Frequency is the usual 145.53

And this Vixen has hidden very well in the past. You are warned.

More details to follow at

http://www.michiganfoxhunter.com

Tom K8TB, related to the said Vixen.

Date: 2011-09-12 23:05:21 UTC
From: Hank Greeb
Topic: 1461 Message: 1461

If you're looking for a State QSO party this weekend,you have three from which 2 choose.

~~~~~~
Connecticut QSO Party (SSB/CW/Dig)
Sep 17, 0000z to 2359z
Rules: http://www.ctqp.org/Rules.html
~~~~~~
South Carolina QSO Party (ALL)
Sep 17, 1300z to Sep 18, 2100z
Rules: http://www.w4cae.com/scqp/scqsoweb.html
~~~~~~
Washington State Salmon Run (CW/SSB/Dig)
Sep 17, 1600z to Sep 18, 0700z
Sep 18, 1600z to Sep 18, 2400z
Rules: http://www.wwdxc.org/
~~~~~~

Have fun!

Got any details about the antenna in picture 7? Looks very interesting but I know from experience that a lot of these things catch more hams than QSO's.

Itty bitty is relative. How big is your itty bitty wire and how high is it? Is it a relatively permanent install? If so what do you do to keep it from becoming a lightning magnet?

I'm thinking of putting up an 'itty bitty' wire in the tree outside the apartment here.

This might be an interesting test for W8LRC's station? Best band(s) for working Azirona from here during the daytime would be 15 and 20 metres (10 if band conditions permit), so testing could include the beam on top of the 100' tower?

And, in the evening, I recently worked the west coast (and heard Azirona) with my itty bitty wire antenna and 5 watts on 40 metres, so the 40 metre 2 element beam on 40 @ 110' or so should do wonders.

Just a thought - we have a month during which to think about this subject.

1464. Antenna Ideas

Yahoo group: GRARA
Date: 2011-09-13 01:12:14 UTC
From: Hank Greeb
Topic: 1452 Message: 1464

Steven:

My "itty bitty" antenna is a 135' dipole, fed in the center, with 450 ohm (Nominal) window line. Center is at 28' right now, though I've had it at 32' at times.

Lightning protection is to throw the feedline outside and attach it to a ground steak whenever there's a chance of electrical activity in the atmosphere.

For three or so years I used a 67' dipole, fed in the center with similar window line, between two trees at ~ 35 feet at each end. The one end had a marine pulley with a rope, and a paint bucket full of sand for a weight so it would flex in the wind. The problem with that is feeding it on 80 metres - the impedance is highly reactive, and choice of feedline length was critical to be able to match it with any reasonable choice of inductance and capacitance on 3.5 to 4.0 Mhz. And, 80/75 metres is one of my favorite bands. I bought 80 feet or so of military surplus fibreglass reinforces plastic mast at the Dayton Hamvention a few years ago, and it has served well for home and field supports for antennae.

One antenna which KA5S and I have used is fashioned from a 32' collapsible fishing pole, with a wire running down the pole. The ones we use are called "jackite poles" which are used as anchors for kites, as well as fishing pole. They are available at your local kite store or from http://www.jackite.com/product_info.php?products_id=132. The neat thing about these poles is that they collapse to about 3', easily transportable. A quarter wave counterpoise at ground level works best, though I've used a ground steak at the bottom in lieu of an artificial ground at times. This will tune on 40 through 10 metres with a LDG autotuner at the bottom of it. To get it to work on 80 metres a coil (of ~ 30 feet of wire) reduces the capacitive reactance and allows it to work with the autotuner. We've only used this in field operations, but, depending on conditions, we've been able to make "reasonable" number of contacts. Cortland has made vertical beams for 20 metres with two or three of them - look of "bobtail curtains" on the internet for details.

Good luck on your endeavors.

Yahoo group: GRARA
Date: 2011-09-13 14:38:22 UTC
From: Hank Greeb
Topic: 1467 Message: 1467

2011 Adrian Hamfest - Sunday, September 18, 2011, 8:00 A.M. – 1:00 P.M. or ? Set-up starts at 6:30 A.M. Sunday morning

Location: Lenawee County Fairgrounds, 602 N. Dean Street, Adrian, MI 49221
Talk-in 145.370- PL 85.4 W8TQE

Prices: $10.00 per (1) Table
$5.00 per (1) Trunk Space
$5.00 per Ticket (Advance tickets receive 2 stubs)

Hamfest Chair: Mark Hinkleman, NU8Z, cqnu8z@...

VE Licensing Exams: Walk-in VE Licensing Exams, starting 9:00 A.M.
Registration at 8:45 A.M.
Bring Photo ID, $15.00, and Photo copy of existing license if upgrading.
Questions? Contact Kevin Brooks (kbrooks@...)
Phone 517-467-7695

There will be no half tables or half spaces offered. You must purchase a whole 8ft. space. Each vendor MUST purchase one ticket per person regardless of how many tables or trunk spaces purchased. Limited wall space and electricity is available for inside space. A food vendor will be provided during the ham fest on Sunday! Get a printable form to reserve your table(s).

Visit our website at: http://www.adrianhamfest.com

Jack:

Well, I made it to the "o'dark thirty" part of the hamfest Saturday morning - helped with GRARA booth, etc. Had to leave to help with an all afternoon event at our church.

Didn't make it to the setup - because I figured I'd be too pooped to pop Saturday morning.

When I clicked on the link I got a "page working" - and closed it because, even though I have up to date anti-virus programme installed. I figure valor is the better part of discretion.

1470. How did the hamfest go?

Yahoo group: GRARA
Date: 2011-09-13 16:53:46 UTC
From: Hank Greeb
Topic: 1465 Message: 1470

It seemed that things were selling fairly well @ the GRARA booth. N8DGD seemed quite pleased with the sales from an estate.

Did we make any money for our moneybags treasurer/treasury?

I purchased a virgin copy of Windoze 98 Second Edition to upgrade my itty bitty and very ancient laptop which still runs nicely, eggzept it won't run any of the WiFi adapters because Windoze 98 first edition doesn't know what WiFi i all about. Total outlay $8, including an entrance ticket.

BTW, my "itty bitty" ancient laptop is a BIT later vintage than my first sp*rk gap rig. :)

(I figure the above sentence is needed lest the assembled multitude would wonder why I was keeping a computer which originated in 1998.) :)

Sorry to butt in, but your lappy sounds like a good candidate for Linux. I'm running all my old Windows programs with WINE on PCLinuxOS and I love the speed boost and stability.... And that's on an old HP laptop running at 433 Mhz. With Windows the thing was so slow I wanted to toss it out the window. It's no speed demon with Linux either, but fast enough to use. (OK, coming off the i5 machine it IS noticeably slower) LOL

Jack:

Well, I made it to the "o'dark thirty" part of the hamfest Saturday morning - helped with GRARA booth, etc. Had to leave to help with an all afternoon event at our church.

Didn't make it to the setup - because I figured I'd be too pooped to pop Saturday morning.

When I clicked on the link I got a "page working" - and closed it because, even though I have up to date anti-virus programme installed. I figure valor is the better part of discretion.

Steven:

Propagation was strange. Hardly any propagation on 20, but 40, and later 75/80 were excellent for local contacts (within 300 miles or so). I only managed 7 Q's in the first hour while I was on 20. Switched to 40 much earlier in past years, and the band was hopping.

1489. Simulated Emergency Test October 1?

Yahoo group: GRARA
Date: 2011-09-29 17:57:03 UTC
From: Hank Greeb
Topic: 1489 Message: 1489

I was reminded in another mail list that the Annual Simulated Emergency Test is being held this weekend.

I also believe that somewhere I received notice that GRARA/Red Cross Communications Team is planning an event in conjunction with this effort.

To remind me, and others with faulty memory and too much lethargy to look up an older e-mail, would some high honcho in charge please send a reminder so that I (and others) might attempt to join the fray on Saturday?

My memory is that we arrive at Red Cross at "Oh-Dark thirty" and get deployed to outer Mongolia to attempt a fruitless task of trying to contact Lansing EOC via direct VHF packet radio. But, that's just a feeble impression I received from tiny tinglings in the sparse grey matter in the cranium.

I'm at least 0.0001% sure that Michigan Net, (QMN) will be active on 3563 KHz (Corn Whiskey), though nothing is on their web site about the event (but there has been a bit of chatter about SET on their e-mail reflector) and the Wolverine Net will more than likely be active on 3935 KHz (Silly Side Band), even though nothing, zilch, NADA, is on their web page about SET.

The few brain cells between my ears these daze would appreciate a jolt of information about our local SET.

Hank, this is the text of Sept. 18th email from Jim Leys to GRARA members:

Howdy
Just a update and reminder of the upcoming drill and training.

We will have a packet and message training session on Thursday Sept 29 at 6:30 pm at the Red Cross.
The drill will be on Oct 1 at 8 am at the Red Cross. This drill will correspond with the National SET that takes place that day.
We will be using Packet radio, HF, VHF and the Red Cross Radios. This will be a great exercise to test our skills.
Would like to have a good turnout of operators.
Please R.S.V. P. so we can get a idea of many will show up.
Thanks
Jim

Tnx Gerry:

I'll make an attempt to be @ Red Cross this evening for the training session. I think I volunteered before, but better late than never.

Lettuce hope the lack of chatter on the reflector(s) about SET is not an indicator of overall interest. Keeping one's operating skills sharp is always a worthwhile effort. If you've been in even one disaster area in your ham radio career (and I've been in at least half dozen, if not more relief efforts for floods, tornadoes, snow emergencies), emergency preparedness comes out high on one's priority list.

2011 Arizona Statehood QSO Party Reminder!

Only a week and a half away, the 2011 Arizona Statehood QSO Party, sponsored by the ARRL Arizona Section and Catalina Radio Club, from Oct 8 1600Z to Oct 9 0600Z and Oct 9 1400Z to Oct 9 2359Z. Phone, CW and Digital modes on 160/80/40/20/15/10/6/2 meters. Single-Op, Multi-Op, Arizona Multi-Multi, Arizona County Expedition and Mobile categories. Work stations once per band and mode. Mobiles may be worked once per band and mode in each county. County Line operations (two counties max) count as 2 QSOs. Outside Arizona exchange name and location (State, Province, or DXCC Prefix). Arizona Stations send a year of significance in Arizona History and State/County abbreviation. Suggested Frequencies (kHz): CW: 1812, 3548, 7048, 14048, 21048, 28048, 50048. SSB: 1848, 3848, 7189, 14248, 21348, 28448, 50148. FM Simplex: 146.48MHz. One point per Phone QSO, two points for CW and Digital QSOs. Multipliers for non-AZ entries are the 15 AZ counties by band and mode. Multipliers for AZ entries are States, Provinces, and DXCC Countries by mode. Final score is total QSO points times total multipliers + 100pts for Bonus Station W7SA. Mail logs no later than Oct 31 to Catalina Radio Club, C/O Gary Keck, PO Box 17811, Tucson, AZ 85731 or via email to logs@... . For full rules, along with log and summary sheets, Cabrillo electronic file format, and Award information, see http://www.azqsoparty.org.

Arizona Stations: we did a great job last year activating all Arizona counties! Let's do it again this year! Please send your planned operation information to info@..., and we'll put your operation on the Planned Operation page.

Thanks!

Planned operations as of Thursday, Sep 29:

AZQP Planned Ops 2011
Apache, AZAPH, KK7AC
Cochise, AZCHS, W7SVD (county line)
Coconino, AZCNO, K7IA (county line)

Info For all concerned RE SET Kent County/General Info:
The Red Cross RCCT will deploy an ERV and man the Chapter radio room. We will have an E Team contact off site linked through the MIVHF traffic Net on the W8IRA link system. Staging and briefing starts at the Chapter at 8am. Deployment to follow. Packet and NTS messages will be practiced.
The State ARRL had problems with their ARPSC web site and most info has been posted on the Michigan National traffic System web site the exact link address escapes me at this late hour but planning has gone on for quite some time- detailed planning in fact-
Freq's to monitor for traffic:
HF- 3932 LSB, 3952 LSB- participating HF nets are: MITN,GLETN, MI NET QMN, MACS,Wolverine-and VHF Nets: SE Michigan and MIVHF Traffic nets. Each has a specific client to serve in this exercise.
Feel free to listen and assist where possible- DE WD8USA ...-.-

Subject: [GRARA] Simulated Emergency Test October 1?

I was reminded in another mail list that the Annual Simulated Emergency Test is being held this weekend.

I also believe that somewhere I received notice that GRARA/Red Cross Communications Team is planning an event in conjunction with this effort.

To remind me, and others with faulty memory and too much lethargy to look up an older e-mail, would some high honcho in charge please send a reminder so that I (and others) might attempt to join the fray on Saturday?

My memory is that we arrive at Red Cross at "Oh-Dark thirty" and get deployed to outer Mongolia to attempt a fruitless task of trying to contact Lansing EOC via direct VHF packet radio. But, that's just a feeble impression I received from tiny tinglings in the sparse grey matter in the cranium.

I'm at least 0.0001% sure that Michigan Net, (QMN) will be active on 3563 KHz (Corn Whiskey), though nothing is on their web site about the event (but there has been a bit of chatter about SET on their e-mail reflector) and the Wolverine Net will more than likely be active on 3935 KHz (Silly Side Band), even though nothing, zilch, NADA, is on their web page about SET.

The few brain cells between my ears these daze would appreciate a jolt of information about our local SET.

Joe,

I could bring up AAR5UT/m with Winmor; will there be a MARS station running in the State EOC?

Joe:

Michigan NTS Nets are all listed at

http://nts.ares-mi.org/netinfo.php

The MITN on 3952 SSB and QMN on 3553 CW Nets are known to be active. QMN will be off their usual frequency of 3563 KHz - for reasons only known to the high honchos whose logic defies comprehension. QMN will have nets on the half hour beginning at 8:30 a.m. EDT, and continuing at 9:30, 10:30, 11:30, a.m.

I cannot guarantee that the MITN will be on 3952 KHz because I'm not privy to inside information of this august group who seemingly arbitrarily TELL established nets to move from their normal operating frequencies.

I'm 99.44% sure the Wolverine Net on 3.935 KHz will also be operational, but there is no information on their web site. And, the Michigan VHF Traffic Net on the linked repeater system (147.16 MHz around Grand Rapids) will more than likely be operational.

Hope this helps with your planning.

1497. For "After SET" enjoyment - California QSO Party

Yahoo group: GRARA
Date: 2011-09-30 23:45:50 UTC
From: Hank Greeb
Topic: 1489 Message: 1497

For folks who are in need of another "operating fix" this weekend (in case you're not too exhausted from the Simulated Emergency Test), the California QSO Party begins at 1600Z (noon EDT) Saturday (1 October 2011), and ends at 2200 UTC (6:00 p.m. EDT) on Sunday (2 October 2011)..

Details are at http://http://www.cqp.org/Rules.html

California is a large state, and seems to be well organized, so there should be many opportunities to contact stations on both Phone and CW. Last year over 900 logs were submitted, containing over 200,000 QSO's.

GL es cu in SET and during the CQP!

I've located a list of the various hamgate.xxxx.ampr.org on the web. WD8USA.ampr.org is listed, as are three or four others in the county. I can't get through to your bbs via telnet, nor can I get to any of them via telnet. I suspect every telnet link is shut down for the SET. Hope I can remember enough about BBS operation for the SET. Been a long time.

1501. Pennsylvania QSO Party October 9/10

Yahoo group: GRARA
Date: 2011-10-04 13:10:28 UTC
From: Hank Greeb
Topic: 1501 Message: 1501

Yup, it's this time of year again,

Pennsylvania QSO Party 2011 will be Operating between 1600Z (Noon EDT) October 08 to 0500Z (1:00 A.M. EDT) October 09, and 1300Z (9:00 A.M. EDT) October 09 to 2200Z (6:00 P.M.) October 09.

Suggested Frequencies are: SSB: 1.850, 3.825, 7.200, 14.280, 21.380, 28.480, 50.125, 146.55. Note that 12, 17, 30, 60 meter and repeater QSOs are not permitted. CW: 40 KHz up from the bottom and 1810KHz PSK: 3.580, 7.080, 14.07015, 21.080, 50.250 RTTY: 3.580, 7.080, 14.080, 21.080, 28.080 160 meters Try at 0300Z Sunday Follow 160 meter band plan

Details at http://http://www.nittany-arc.net/paqsorules.html

1502. AND - Azirona QSO Party Also on October 9/10

Yahoo group: GRARA
Date: 2011-10-04 13:49:30 UTC
From: Hank Greeb
Topic: 1502 Message: 1502

If the Pennsylvania crowd moves to 20 thru 10 metres during daylight hours, and/or if you like working folks to the west, there's the Arizona Statehood QSO Party during the same weekend. Note that I worked California last weekend during their QSO party on 7 MHz, both SSB and CW running 5 watts to an inverted V antenna at 28 feet. If propagation is as good this coming weekend as it was then, Azirona should be a slam dunk for anyone with 5 watts or more and any antenna somewhat better than a dummy load buried 6' underground.

Eggzact times for AZQP are 1600Z (Noon EDT) Saturday to 0600Z Sunday (2:00 A.M. EDT), and 1400Z (10 A.M. EDT) Sunday to 2359Z (7:59 P.M. EDT) Sunday, 24 hours total. All on the upcoming weekend, October 8-9.

Suggested frequencies (KHz unless otherwise noted): CW: 1812, 3548, 7048, 14048, 21048, 28048, 50048. SSB: 1848, 3848, 7189, 14248, 21348, 28448, 50148. FM Simplex: 146.48MHz.

Note, Azirona was the 48th state to be admitted into these United States, so they like 48 KHz up from most band/mode edges.

Compleat rules at http://http://www.azqsoparty.org/rules.html

With a modest antenna and 5 watts (measured by my recently recalibrated Heathkit QRP wattmeter) I was able to work over 100 California Stations in about 6 hours of effort. Especially on Sunday Afternoon, when the "pickin's were apparently slim" and many of the "big guns" were repeatedly calling repetitive CQ's with no answers, they really dug down deep, asked for multiple repeats, and seldom told me they couldn't pull me through, even on SSB.

A few others reported on the QRP reflectors that they were able to work California with 900 milliwatts and so forth, one with a GADS (Gutter And Downspout) antenna, so it seems I wasn't the only op with success with low power.

I agree that working Pennsylvania on 80 and 40 with a modest setup should be easier than working Azirona on 20, 15, and 10. The BIG EXCEPTION will be if band conditions are as good this coming weekend as they were last weekend, then Azirona might also be a "near slamdunk" for QRP ops.

Give it a try, you may be as surprised as I was last weekend.

1506. Morse code on Letterman tonight

Yahoo group: GRARA
Date: 2011-10-06 21:46:17 UTC
From: Hank Greeb
Topic: 1506 Message: 1506

CW enthusiasts out there will note that there was a bit of real morse on today's Late Show with David Letterman. Every effort was made to use real morse, and text that matched the on-screen graphics.

The CW plays at the end of the first segment of the show... Dave's monologue. 73 de Ray K2ULR

I might watch it if you knew the day. There was an interesting one a while back, I think it was on Leno, where they had a contest between CW and phone texters and CW won. As an aside note, last year you could watch any of the 4 or 5 episodes online for free but this year a lot of the are wanting you to pay for it - if I have to pay I wont watch it.

1511. PaQP N8XX Single Op QRP

Yahoo group: GRARA
Date: 2011-10-09 19:17:34 UTC
From: Hank Greeb
Topic: 1511 Message: 1511

Nice even score. I hardly believed it when I gave up with 110 Q's, and
then tuned onto 14 MHz to find Azirona, and instead,found lots of
Pennsylvania Stations. Just had to make another 10 or so Q's w/PA stations.

Pennsylvania QSO Party

Call: N8XX
Operator(s): N8XX
Station: N8XX

Class: Single Op QRP
QTH: MICHIGAN
Operating Time (hrs): 6

Summary:
Band CW Qs Ph Qs RTTY Qs PSK31 Qs

160: 0 0 0 0
80: 39 16 0 0
40: 33 22 0 0
20: 9 2 0 0
15: 0 0 0 0
10: 0 0 0 0
6: 0 0 0 0
2: 0 0 0 0

Total: 81 40 0 0 Mults = 40 Total Score = 8,000

Club: Mad River Radio Club

Comments:

Wow! What a party! Conditions were lousy on 20 on Saturday, so went to
40 early and was delighted! Only problem was high noise level at some
places in PA, so I couldn't snag some of the multipliers with my mighty
5 watts. Was delighted to work PA on 20 metres, both SSB and CW!

Congrats to the Organizing group.

1516. Fwd: ARRL November Sweepstakes Bulletin

Yahoo group: GRARA
Date: 2011-10-11 16:25:03 UTC
From: Hank Greeb
Topic: 1516 Message: 1516

ARRL Affiliated Clubs

Sweepstakes Bulletin – 2011

Larry Hammel, K5OT – Sweepstakes Contest Manager

Clubs are always looking for operating events and opportunities that excite and motivate their members to be active, especially on HF. This year's ARRL November Sweepstakes (http://www.arrl.org/sweepstakes) certainly fits the bill and – for the first time in years – the bands will have plenty to offer Technician license-holders, too! Sweepstakes – or "Sweeps" among friends – is a contest in which modest stations can do very, very well. There's no need for giant towers and antennas or legal-limit amplifiers – a backyard dipole or vertical and a "barefoot" HF rig will do just fine. In fact, SS is one contest in which antennas can be too high!

Because Sweepstakes brings out so many US and Canadian operators, it is very popular for friendly "contests within a contest" between clubs and between club members. A club contest to work the most sections, make Worked All States, or ring up the highest score is a nice way to wrap up the season with awards being presented at the year-end meeting. Many clubs have a friendly competition with other nearby clubs for local bragging rights. Even small clubs can get into the action on a national scale in the Local category of the ARRL Affiliated Club Completion (http://www.arrl.org/general-contest-information).

College clubs (http://collegearc.org/) can participate in two ways. The first is to submit a score in the School Club category of the main competition. With its 30-hour time limit, the shared-operating nature of the category fits right in with the busy fall semester. Give the Phone weekend (Nov 19-20) a try before heading home for Thanksgiving break! The second is to participate in the Collegiate Championship (http://www.collegiatechampionship.org/), sponsored by Ken Harker, WM5R. Ken has compiled a long list of yearly winners (http://www.collegiatechampionship.org/conferences/) for each of the NCAA Division I Conferences – has your school's club participated? The website is currently being updated with the 2010 scores and we need some help sorting out the current conference assignment for the record-holders - any volunteers? Finally, for a relaxed "practice" opportunity, try the ARRL's School Club Roundup (http://www.arrl.org/school-club-roundup) from Oct 17-21.

Did we mention the opportunities for Technician licensees? Techs have a large chunk of 10 meters available to them on both Phone (28.3-28.5 MHz) and CW (28.0-28.2) but in recent years, there hasn't been much activity due to quiet solar conditions. Lately, the solar flux has been kicking up to 120 and higher, meaning that 10 meters opens up coast-to-coast and beyond! If your club's Techs have been wondering what all the fuss is about 10 meters, be sure to encourage their activity during Sweeps. Perhaps one of those intra-club challenges we were talking about?

If you'd like to know more about Sweepstakes, download the Sweepstakes Operating Guide (http://www.arrl.org/sweepstakes) – there are simple explanations of the rules and a list of resource articles and websites to help you get the most from your Sweepstakes weekend. Maybe you'll even bring home the coveted "Clean Sweep" coffee mug!

CQ Sweeps!

1522. Local source of Aluminium or steel tubing?

Yahoo group: GRARA
Date: 2011-10-17 19:20:04 UTC
From: Hank Greeb
Topic: 1522 Message: 1522

I'd like to get 10' of "TV type" Aluminium or Steel Tubing for a TV antenna I wish to put on top of the house. I already have a tripod and mast on the house, but figure a new mast would be a good investment. Seems like some Rat Shacks have such tubing, but a friend who is installing an antenna at his cabin on Lincoln Lake says they want about $18 for 5' of tubing, which seems a bit high to me.

Yes, we have satellite TV (the cable company says we live in the stix so they haven't put a cable along our road). We can't get the local secondary stations which have continuous radar, and supplemental programming.

Thanx in advance.

Thanks, Rich:

I found a nice "Digital" TV antenna (I'm wondering how they get those digits transmitted, and whether it will work on analog FM, frequencies which is says it covers, but that's a different subject). Anyway this antenna has a built in rotor, preamp (at the Antenna), and a control/decoupling circuit which allows all functions with just the coaxial cable.

72/73 de n8xx Hg

p.s. you beat me in license date by a year or so, my first license was in December, 1951

Yes, we have satellite TV (the cable company says we live in the stix so they haven't put a cable along our road). We can't get the local secondary stations which have continuous radar, and supplemental programming.

Thanx in advance.

Topic: 1531 Message: 1531

Back in the '80's, I was N8DOL. Now, I'm nothing, back to square one I guess. I did grab a TenTec Omni-D off Ebay and am looking to get started again. I understand that I don't have regain my CW skills for licensing now, correct?

I also seem to see I could get on 10 meters with a Tech license?

Now to find a decent dipole and get our condo group to let me string one. ;-)

Jon

Welcome to the group Jon:

CW is optional these daze, but if you knew it once, it probably will
come back easily.

I've heard, but can't prove it, that if you pass the Tech License now a
daze, but have passed it anytime in the past, you can get automagically
"grandfathered" to General Class. Check with the folks who are VE's to
see if my info is still correct - it is several years olde.

10 metres SSB and CW are both permitted for Tech Licensees, I do
believe. There are CW allocation for Technicians on 15, 40, and 80
metres, if CW floats your boat.

Lol, not only knew it once, got a CW WAS back in the day.

I passed Novice, then General back in the '80's. I figured Tech would be an easy start if I were to brush up on band permissions and some schematic symbols? Correct me if I'm wrong, but I used to build a lot of things and figured schematics would come back easy.

Are there any local stores carrying any gear or gadgets?

Thanks,

Jon Vandenberg

Topic: 1531 Message: 1535

Jon,

Since you already passed the general in the past, studying for the tech should be easy. Today, with the net, it is even easier. Here are some of the online sites that let you study and take the tests. Quite frankly, I would recommend that you take the tech, pause a month or two and take the general. Then come January, you might want to go for the extra!

Online Testing:

<http://www.qrz.com/p/testing.pl>http://aa9pw.com/http://hamexam.org/

http://www.eham.net/exams/http://kb0mga.net/exams/

http://www.qrz.com/p/testing.plhttp://copaseticflow.blogspot.com/

http://www.radioexam.org/http://www.hamradiolicenseexam.com/index.html

http://www.dxzone.com/cgi-bin/dir/jump2.cgi?ID=5626

Try one or two of these and see how you do. If you start out with a 35% passing rate, congrats, you fall in line with most of us.

And make sure you let the collective here know how you have done.

Jon:

Why don't you visit one of the many "practice sites" for FCC tests, and see how you do on the general test.? You may be pleasantly surprised.? I know I was when I looked at the Extra test a few years back, I found I got 85% (70% is passing), even though I took the test back in the 50's when transistors were very experimental, one had to draw schematic diagrams of tube rigs, SSB was prevalent but still rather new, etc.

In no particular order,

http://aa9pw.com/radio/

http://www.radioexam.org/exam

http://www.eham.net/exams/

Good luck!

Where do you live?? If you live within striking distance of Rockford, Let me know and maybe we can get together over a cuppa cafe?

And, if you're available at noon on Friday, there's a lunche bunche of hams who meet at Schnitz' South, 1529 Langley St Grand Rapids, MI 49508,? They have sandwiches, soup, etc., all very good.? We'd love to have you attend - after you order just go to the back room and you'll see a motley group of folks on a long table.? Introduce yourself and chime in!

73 de n8xx Hg

p.s. if you need ideas on "stealth antennae" I ran one for almost a year when I lived in an apartment in Cincinnati.? The only problem was that it was made from #28 wire, and occasionally birds would crash into it and bring it down.

1543. Swap and Foxhunt Reminder

Yahoo group: GRARA
Date: 2011-10-24 15:20:55 UTC
From: kg8jk
Topic: 1543 Message: 1543

Just a reminder that the Straits Area ARC is having a Swap and Foxhunt on November 5th in Petoskey.

The Swap will run from 8:00 am to 12:00 pm and will be at Emmanuel Evangelical Church on the corner of Grove and Emmet St. in Petoskey. Unfortunately there is no wheelchair access to the basement of the church where the swap will be.

Please let me know so I can reserve a table ($10)or 1/2 table ($7.50) for you. Remember, that also includes the price of your door ticket.

We will be starting the Foxhunt from there as well. It will be from 1:00 to 3:00. The fox will be transmitting on 146.55 Mhz.

Hope to see a lot of you there.

Okay, there's a "full blown" Silly Sideband contest coming up this very weekend, and another "full blown" Corn Whiskey Contest the following weekend.

The sidebanders in local clubs (Like W8DC) have a great chance to show how their rigs and antennae can work this very weekend.

And, the following weekend, the Corn Whiskey aficionados can let their light shine.

Or, we can do a big yawn, say "what the h.. I don't partake of contests" and forget about it.

BPL isn't even slightly about internet for the masses. Thats just how they are trying to push it. What it is about is the 'smart grid' which is much more than what it claims - its a way for the power companies and ultimately the government to spy on virtually everything about you. George Orwell's 1984 was only a few years off in the dates of its predictions.

From: ka5s
Topic: 1546 Message: 1548

This is the Commission's first try at complying with the court order issued by the DC Court of Appeals after the ARRL got a decision that it had violated the Administrative Procedures Act.

http://www.arrl.org/news/court-finds-fcc-violated-administrative-procedure-act-in-bpl-decision

I'd say they haven't complied yet. The ARRL agrees, and I'd not be surprised to see another round of action at the DC Court of Appeals.

Welcome to the GRARA site Jon,

There are no local ham stores, but the internet has all you want. My favorite is Amateur Electronic Supply in Wisconsin. http://www.aesham.com/ I order from them in the morning and the equipment is here the next morning.

Also, you cannot beat eBay prices for connectors, cables, etc. It is a direct line to Asia.

If you want to check out the Technician test pool, go to http://www.qrz.com and find your way to practice tests. (Free stuff)

Your name sounds familiar, Jon, but I cannot place you yet. I am working on it.

Lol, not only knew it once, got a CW WAS back in the day.

I passed Novice, then General back in the '80's. I figured Tech would be an easy start if I were to brush up on band permissions and some schematic symbols? Correct me if I'm wrong, but I used to build a lot of things and figured schematics would come back easy.

Are there any local stores carrying any gear or gadgets?

Thanks,

Jon Vandenberg

Welcome to the group Jon:

CW is optional these daze, but if you knew it once, it probably will
come back easily.

I've heard, but can't prove it, that if you pass the Tech License now a
daze, but have passed it anytime in the past, you can get automagically
"grandfathered" to General Class. Check with the folks who are VE's to
see if my info is still correct - it is several years olde.

10 metres SSB and CW are both permitted for Tech Licensees, I do
believe. There are CW allocation for Technicians on 15, 40, and 80
metres, if CW floats your boat.

Name familiar??? Are you an ex-councilman?

For my location in a condo project I am thinking my best antenna is going to be a multiband inverted V. I will probably just buy one pre-made from ebay.

Thanks,

Jon Vandenberg

1553. Meeting this Friday?

Yahoo group: GRARA
Date: 2011-11-02 02:17:09 UTC
From: Hank Greeb
Topic: 1553 Message: 1553

I presume there's a meeting this Friday, @ Red Cross,

1050 Fuller Ave NE (just south of Leonard)
Grand Rapids, MI

6:30 p.m. gathering, 7:00 p.m. start of meeting

The 2nd part of "Standing up for Standing Waves" will be shown?

Will there be a projector and computer for use? I can bring my laptop if needed, with DVD/CD player if we can locate a projector.

From a fellow QRP operator. Haven't seen it in this reflector

Due to a large number of radio amateurs uploading their logs to Logbook of The World (LoTW) after last weekend's CQ Worldwide SSB Contest, the ARRL's online QSL verification service is experiencing delays. According to ARRL IT Department Manager Michael Keane, K1MK, there is about a 33 hour wait for logs to be processed. "Logs are processed in the order in which they were received," he explained. "If you have uploaded your log to LoTW, your log is currently queued for processing. It has not been lost in the system. Uploading your log multiple times will only further delay your log and those of others to be processed."

From another ham radio reflector. Obviously, these folks didn't check the ARRL contest calendar. . . .

However, if you're on before SS starts, you might find W3T or W3Y or YU0TESLA on the air.
==========
Wardenclyffe, Nikola Tesla?s last laboratory will be on the air November 5^th as special event station W3T! Wardenclyffe is located in Shoreham, NY on Long Island. W3T is part of a network of special event stations that are helping to raise awareness for the effort to purchase the laboratory and restore it into a science museum. To read more about the effort to restore Wardencyffe, please check outhttp://www.teslasciencecenter.org. The other stations in the network are N3Y which will transmit via satellite and possibly HF from the New Yorker Hotel, Tesla?s last home in Manhattan, and YU0TESLA which will transmit on 20m as well as other HF bands from the Tesla Museum in Belgrade. For the latest updates on what frequencies to catch the stations on and a sneak peek at the QSL cards and QTHs, go tohttp://copaseticflows.appspot.com/teslaevent.

If you?re in the Shoreham area on the 5^th , please stop by the station!

Also, be sure to check out the Radio Central Amateur Radio Club. They will have the Marconi radio shack on the air a few miles away transmitting as a special event station commemorating the 90^th anniversary of the opening of the RCA transmitting antenna farm in Rocky Point, NY. More details are available athttp://www.rcarc.org/. Without the RCA club W3T would not be on the air. Their help has been invaluable!

And, this just in, we are proud to announce that one more historic station will be on the air with us on the 5th of November, the Police Athletic League Amateur Radio Club of Yonkers, NY, a mere few meters from the site of the first FM transmission 66 years ago on November 5th of 1935 will be on the air with same call sign as the historic station: W2XAG.

If you have any questions, or you?d like to help out, please feel free to contact me athcarter333@... <mailto:hcarter333@...>.

1568. Foxhunt Rules

Yahoo group: GRARA
Date: 2011-11-04 19:21:05 UTC
From: kg8jk
Topic: 1568 Message: 1568

Hello Bob,

The church is located in Petoskey on the corner of Emmet and Grove (620 Emmet St.). We will start in the parking lot and end there as well.

Here are the rules for the hunt.

The hunt will begin promptly at 1:00 and end at 3:00 or as soon as all participants return to the starting point, whichever comes first. Participants need to be at the Emmanuel Evangelical Church parking lot before that time so the officials can record the mileage of the vehicle used for the hunt.
The Fox will be transmitting on 146.55 Mhz. Transmissions will last approximately 1 minute with an interval of 5 minutes between transmissions. Auxiliary communications should take place on 146.52 or the SAARC repeater 146.68 (pl 110.9).
This hunt will be judged by the mileage traveled, not the time taken to find the Fox. All participants will start at the church parking lot and have their mileage recorded by one of the SAARC members. Once the team has located the Fox, they will pick up proof that they found it (a slip of paper located on top of the Fox) and return to the starting point where their mileage will be recorded again.
The winners will be the team with the lowest round trip mileage to the Fox and back to the starting point.
Certificates will be giving to all participants who find the fox with special certificates going to the first, second, and third place teams.

1569. Anyone "know" N1MM?

Topic: 1569 Message: 1569

I've been using (and sometimes cursing) N1MM logging programme for the past year or so. The latest "feature" which I don't understand is how it works when "running,"

There are probably other "features" of which I'm totally ignorant.

Would there be interest in finding a contest operator who knows all the "features" of the program to give us a programme about it? Or, does anyone know of a club within driving distance who has such a programme on its schedule?

From: Hank Greeb
Topic: 1570 Message: 1570

ARRL Sweepsteakes Contest, CW

Call: N8XX
Operator(s): N8XX
Station: N8XX

Class: Single Op QRP
QTH: Michigan
Operating Time (hrs): 12 (A SWAG - I didn't time myself, but I'm sure it's less than the maximum permitted because I fell asleep instead of operating in the wee hours of Sunday morning!)

Summary:
Band QSOs

160: 0
80: 126
40: 68
20: 62
15: 29
10: 51

Total: 336 Sections = 74 Total Score = 49,728

Comments: A Personal Best, at least in recent history. 28 MHz was a boon this year! California and the rest of the "left coast" was booming in at the start. Mostly S&P with my mighty 5 watts and a low inverted vee. Tnx to all OPs who dug my signal out of the mud. Only had one fellow who couldn't pull me through and he finally had to say NIL. One highlight was working KH7X on 80 metres at 11:52Z on Sunday morning! That was the only PAC station that I could work, on 20/15/10 metres they seemed to be swamped with others calling them, and I couldn't "win" the pileup.

Looking forward to a Multi-Single @ W8DC during the upcoming phone Sweepsteaks.

I to have tried to get this very complicated program to work with my station. Without much luck! N1MM should be figured out and used before the next Field Day. So that the various stations can be linked. I think N1MM can be used as a multi-operator logging program.

Steven:

Well, it seems to be some sort of "glitch" in how I set the thing up when I first set it up for Sweepsteaks. If I were running, a fellow would answer me, I'd send data using F2, get his data, and then hit "enter." Instead of logging he data, it would send my data again, not the "TU N8XX SS" and would not save the info to the log. I didn't want to screw around, so I set up F12 to call CQ while running, and used F6 and a manual response to log while running. A poor workaround, but since I was not running very often, it didn't slow me down very much.

After asking in this reflector, NF8J responded and told me how it was supposed to work. I set up another Sweepsteaks log in the same data base, simulated a new contest with my rig running at zero power into a dummy load. It worked fine. I could use F1 to send CQ while the "running" box was checked, use F2 to send my data, and after I copied the other fellow's info, I'd hit enter and it would send the exchange stored in F3 and log the data.

Since I don't know enough about N1MM, I didn't know that my setup was malfunctioning, so I just muddled through. Had I known, I'd have checked the "running" and "S&P" features before the start of the contest, and it would have probably worked as I found it to do so after the fact.

Oh, well, live and learn. I'm seeking an "expert" at N1MM setup to give a talk and demo about its use, so that perhaps we can use it in a networked implementation and have all rigs/computers hooked together during Field Day 2012. That would be a big help!

Thanks to Paul, NF8J, and others who gave me details of how N1MM should work, and gave me "work arounds" in case I get into trouble in the future.

Steve:

You're missing one great feature of N1MM. You may record "Wav FILES" for the CQ, the "Exchange" (except for the number, which you have to announce yourself and then hit "F2" (where the exchange file is stored), and then hit "RETURN" to Log the contact and send the wav file which is stored in "F3".

At least 95% of the "talking" can be eliminated, let your computer do the talking, save your vocal chords. All it takes is a couple audio cords, a switch box to change from your microphone input to you computer input for when you want to send data with your voice or with your computer. You probably need an attenuator between the output of the computer and the microphone input, unless there's a "line" input on your rig.

Since I don't operate much with SSB, I haven't set this feature up in N1MM, but the procedure is there, and I understand the rudiments of it.

It's very similar to setting up PSK-31 or other digital modes which work through the audio in/out part of your rig.

From: Hank Greeb
Topic: 1579 Message: 1579

Anyone interested in trying out the new antennae at W8DC during the ARRL Sweepsteaks (SSB) this weekend. The event starts at 2100Z (4 p.m. EST) Saturday, and ends at 0300Z Monday (10 p.m. EST Sunday). The rules specify Multi-Single, i.e. we can use only one transmitter at a time, but we may have multiple operators.

For full rules see: http://www.arrl.org/sweepstakes

It appears to me that this would be a great time to indoctrinate new operators in how to operate the station, and the basics of contesting.

Subject: HELP PROMOTE THE ARRL AND THE HOBBY AROUND THE WORLD

You are invited to help spread the word about this wonderful hobby amateur radio to a global radio audience!

You are invited to call into a live radio show tomorrow Saturday November 12, 2011 between 4 PM Central and 10 PM Central.

This is an International Shortwave Radio broadcast with global coverage.

You are invited to call in and tell us about your local club or organization and share with us things your group may be doing.

We would like to hear about your interests in the hobby and what it was that got your interest and opened the door to the hobby.

There are millions of shortwave listeners around the world, so this a good opportunity to tell them about our hobby and the ARRL.

So spread the word to all radio amateurs that you know and let them know they are invited to call in.

Saturdays broadcast is the launch of a new 100,000 watt shortwave transmitter for a new shortwave facility, WTWW just outside of Nashville, TN.

The frequencies are from 4 PM till 6PM Central 9990 KHZ and from 6 PM till 10 PM Central 5085 KHZ.

A link to a live stream will be posted on http://www.tedrandall.com <http://www.tedrandall.com/>

We will be reading emails over the air, taking requests and dedications and most important putting as many radio amateurs on the air that will call in.

Lets tell the world about our hobby and spread some international good will!

The phone number to call in starting tomorrow at 4 PM Central is 615-547-9520

The world will be waiting to hear from you!

Thanks for your participation and 73

Ted Randall

Hay Frank. I think that I have just what you need. It has a stupid cable on it but it is an Icom microphone with the key pad and works well with my 706. Since it is a spare and not being used, you are welcome to it. I won't be at the RR tonight, but will probably be there next weed. What say you?

73,
Rich Douglas, KC8NKA

1585. ARRL November Sweepstakes - SSB - Starts TODAY!

Yahoo group: GRARA
Date: 2011-11-19 19:01:39 UTC
From: Hank Greeb
Topic: 1585 Message: 1585

Last minute reminder, The SSB portion of the November Sweepsteaks starts in a few hours. 2100Z (5 p.m. EST, 4 p.m. CST, 3 p.m. MST, 2 p.m. PST, et. cetera. and run thru 0300Z Monday Morning (10 p.m. EST, 9 p.m. CST, 8 p.m. MST, 7 p.m. PST, etc. Sunday evening)

Note, for folks who attended the For Twain hamfest on Saturday, there's still plenty of time to rack up a score on Saturday evening and all day Sunday.

At this time, it seems that 10 and 15 metres are open to/from many parts of these Untied States, so we should be in for a good time on all bands.

This is a US to US contest, DX contacts have zero value for points and for multipliers.

Rule are at http;//www.arrl.org/sweepstakes

1589. Swepsteaks SSB N8XX Single Op QRP

Yahoo group: GRARA
Date: 2011-11-21 03:50:44 UTC
From: Hank Greeb
Topic: 1589 Message: 1589

By popular demand. my claimed score for 2011 November Sweepsteaks, SSB.

Did anyone fire up W8DC during the event? I didn't hear the call in any pileup, but I wasn't on nearly all the time.

==========
ARRL Sweepsteaks Contest, SSB

Call: N8XX
Operator(s): N8XX
Station: N8XX

Class: Single Op QRP
QTH: MICHIGAN
Operating Time (hrs): 10

Summary:
Band QSOs

160: 0
80: 136
40: 28
20: 12
15: 30
10: 5

Total: 211 Sections = 69 Total Score = 29,118

Club: Mad River Radio Club

Comments:

First attempt at a Phone contest, QRP. Exceeded my expectations. Have a wire antenna, inverted V, 130' long, with apex at ~ 28 feet, so I claim it is a bit better than a dummy load buried 6' underground. Was glad 28 MHz was open, but 75 metres was the "golden band" - even worked KH7X in the wee hours of Sunday morning. N1MM gave "interesting results" with two compilations for 75 and 40 metres - maybe because I erroneously forgot the change bands manually and then had to edit the frequencies on several Q's after I note the error or my ways.(I don't have an interface to my ancient sp*rk gap rig, so I have to manually change bands).

Thanks to all the "B", "M" and "U" operators who dug down deep and copied my peanut whistle.

cool. Post the details on here when it gets closer. You can also submit lauch info here for the rest of the ARHAB community.
http://www.arhab.org/
I don't have the time myself to get deeply involved with launching balloons, but I am on the GPSL group and keep up on details as much as I can.. If you haven't heard of them check them out for tips and hints for launch day.

Also the date has been set for the 2012 convention in Omaha, NB. details here: http://superlaunch.org/

From: Hank Greeb
Topic: 1595 Message: 1595

ARRL 160-Meter Contest

Call: N8XX
Operator(s): N8XX
Station: N8XX

Class: Single Op QRP
QTH: MICHIGAN
Operating Time (hrs): 11

Summary:
Total: QSOs = 197 Sections = 42 Countries = 0 Claimed Score = 16,548
Lettuce C how many are busted or NIL. ;)

Club: Mad River Radio Club

Comments:

Jerry Rigged 260' "sorta" inverted V cloud warmer, was surprised that it got out atall. Even did some short "runs" as many as 30+ per hour. For QRP first time on the band for many years, it was fun. Thanks to all who dug me out of the mud!

1596. Extra Class class

Yahoo group: GRARA
Date: 2011-12-05 23:17:43 UTC
From: K8TB
Topic: 1596 Message: 1596

Do you have a general or advanced class amateur radio license? Would you be interested in upgrading to an Extra Class license?

The Grand Rapids Amateur Radio Association will hold an Extra Class License class this winter on Wednesday nights starting on January 4, 2012 at 7:00 PM for ten weeks. On March 14th, the 11th week, there will be an official ARRL Extra License testing session. The cost will be $20 for the classes and you should have a copy of the ARRL Extra Class Manual.

The class will be held at the American Red Cross Building, 1050 Fuller Avenue, Grand Rapids.

1597. Tube Tester for sale

Yahoo group: GRARA
Date: 2011-12-12 20:30:51 UTC
From: Charles Rich
Topic: 1597 Message: 1597

I am the proud owner of a Precision Tube Master, TUBE CHECKER.
I would call this a high end tester.
It is a Series 10-12, dating to around the 60's.I have used it, and it appears to work fine. There are tube charts galore. It is in a portable case with cover.
If you are into antique tube radios, this is for you. I will take $ 50.00.

1609. Dummy load?

Yahoo group: GRARA
Date: 2011-12-31 23:01:38 UTC
From: Hank Greeb
Topic: 1609 Message: 1609

I've seen a small dummy load (I think it's rated at 20 watts for 10 minutes or so) at local hamfests this past year. They're built into a small tin can for shielding.

I thought they were W8AMZ, but it must be a local radio club which makes and peddles them. Would someone tell me where to go (on the internet, preferably, I know that several of you might want to tell me to go someplace considerably warmer :) to find such a item?

Thanks in advance es Happy New Year.

From: Hank Greeb
Topic: 1612 Message: 1612

This is for Jack, AB8ND, and any other folks who are knowledgeable in photography.

There's a Scandinavia on line publication called PileUP http://www.helsinki.fi/~korpela/PU/PU.html - written by folks who sponsor the Scandinavian Activities Contest. They've produced a DVD and a YouTube video about some of their activities - as a way to publicize their contests and other activities.

This leads me to ask - do we have sufficient expertise to put together a video about some of our activities - like Field Day, our Red Cross communications exercises, QSO parties, DX contests, etc. for publicity purposes? Seems like this could help recruiting of the general populace into ham radio, and get some new blood into the organization.

Just a thought.

Feb 11th,

We had to change the date.

The F.Y.B.O. contest is on the 4th.

Can anyone pick Frank up on Wed evening?

Hi Jack, My Name is Frank (KD8QXC). I am the guy with the walker. I live at 2040 Sinclair Ave.,N.E. At present,the Drs. will not let me drive. Do you know of anyone who will be able to help me get to the Red Cross Building this Wednesday Night. David Ed has brought me in the pass, but he is in Florida until April. I am also interested in joining the GRARA,I just need help in getting to the Meetings on the Frist Friday of the Mouth. Thank you for your help,Jack.
My E-mail is sassy22600@....

Thanx 4 the reminder.

You forgot to mention the $$'s needed for the folks who are paying. (I thimk it was mentioned earlier, but early onset of Alzheimer's and not being particularly relevant to my thinking processes contribute to my lack of knowledge on the subject.)

1628. RE: Winter 2012 Events

Yahoo group: GRARA
Date: 2012-01-16 01:45:06 UTC
From: Richard MI Ranta
Topic: 1628 Message: 1628

Welcome to Winter 2012!

Another year starts off with;

The New Hams Dinner. It is being held on February 11th at 2:00PM

At Fire Mountain

3725 Alpine ave NW

Comstock Park Mi 49321

This event is open to all Ham's, family and friends. All new Hams receiving their license since February 2011 will eat free.

There is no need to sign up. If you have any questions contact the Lowell Amateur Radio club- officers at w8lrc.org.

The Michigan Amateur Radio Alliance is holding its' "After Christmas Dinner" at Brann's restaurant on Cascade near
28th street. It is being held on February 11th 2012 and be there at 5PM to chat before dinner.

It will once again start at 5:30PM and end near 8:30PM or so. We're having another "White Elephant", so wrap your treasure up and if it is gender

Specific, please state either male or female. You don't have to participate in the "White Elephant", but it is fun.

Please R.S.V.P. MARA at W8USA@... and tell us who is going to come to the dinner.

Any questions contact Rich K8JX at K8JX@....

Don't forget "Build your Burger" is coming up on March 23rd. For further information on this, visit our web site at

WWW.W8USA.ORG <http://www.w8usa.org/> and click on Burger.

Let's warm up this cold winter with Ham Events!

Rich K8JX

1629. Anyone for a Silly Sideband Contest this weak end?

Yahoo group: GRARA
Date: 2012-01-18 22:42:12 UTC
From: Hank Greeb
Topic: 1629 Message: 1629

Last weak end there was a Corn Whiskey version of the North American QSO Party. It was fun!

Anyone for the Silly Sideband version? NAQP SSB, 1800Z January 21 to 0600Z January 22, 2012 (Third full weekend in January)

Eligibility: Any licensed radio amateur may enter.
Object: To work as many North American stations as possible during the contest period.
North American Station: Defined by the ARRL's DXCC list with the addition of KH6.

Rules are at http://www.ncjweb.com/naqprules.php

Note, contacts may be made on 160/75/40/20/15/10 Metres. Last weekend 10 metres was open between about 1800 and 2200Z. Most contacts were along the west coast of the U.S. but I don't have a directional antenna, and I was running my usual "Mighty 5 Watts" to an antenna "proven to be somewhat better than a dummy load buried 6' underground" so with any "reasonable" beam and 100 watts, things could be different.

I'll be puttering around with my "Mighty 5 watts" so if you're within striking distance, particularly on 160 and 75 metres, you might run into my call.

1630. RS-39 satellite

Yahoo group: GRARA
Date: 2012-01-21 14:18:20 UTC
From: Cortland Richmond
Topic: 1630 Message: 1630

RS-39 has CW beacons on 435.315 and 435.215 MHz that can be received directly by schools and colleges for Educational Outreach purposes. It will be deployed from Progress M-13M into a 500 km orbit on 25 January at 00:14 UT. (Doppler shift on the beacons will be about ? 10 kHz)

The team of RS-39 will very much appreciate any reception reports of ?Chibis-M?. Special attention is requested for the first orbits as these are outside of control stations for ?Chibis-M?. The team say each report will be confirmed by special QSL card.

For further information see

http://www.uk.amsat.org/3910

1631. January VHF Contest

Yahoo group: GRARA
Date: 2012-01-21 18:33:26 UTC
From: David DeVos
Topic: 1631 Message: 1631

Today (Saturday) and tomorrow (Sunday) the ARRL VHF contest will be going on. All frequencies, all modes 50 MHz and up. The most common are 50 MHz (6 meters) where the call frequency is 50.125, and 144 MHz (2 meters) where the call frequency is 144.200.

Local times are 2:00 PM Saturday until 11:00 PM on Sunday evening. I'll be on from home.

Have fun and 73 de KF8QL!
 Dave

1633. Marshall Hamfest?

Yahoo group: GRARA
Date: 2012-01-25 22:28:45 UTC
From: Hank Greeb
Topic: 1633 Message: 1633

I was mulling over some things inside the vacuum between my ears, and remembered the Marshall Hamfest.

from: http://www.w8df.com/hamfest.html

It's getting to be that time of year again and once again SMARS is pleased to announce the 2012 Crossroads Hamfest. This years event is once again at the Marshall Activity Center on March 17, 2012 from 8am until it's over. The 2011 Crossroads Hamfest Co-Chairs are:

Dave "Doc" Ashbolt K8OLY
Bob Kingsbury AC8GL
Mike Schmieder KD8NJA

Tables sold out by March 1st last year, so make sure to get your reservations in early. Remember, we must have the registration form from the Hamfest flier and payment to reserve your tables. No tables will be held without these!

There will a VE Session at 10am for anyone interested in getting or upgrading their license.

==========

Anyone Marking their calendars for March 17?

1635. FYBO 2012 Trailer

Yahoo group: GRARA
Date: 2012-01-26 14:44:30 UTC
From: Hank Greeb
Topic: 1635 Message: 1635

K6BBQ made a little trailer to promote the F)reeze Y)our B)... O)ff (FYBO) 2012 which occurs on February 4, 2012

(You fill in the .... in the above!)

Purr hapless you'd be interested in joining a group of (demented?) hams to go out on a similar adventure in this area? The video last about one minute - and Rem does a nice job of video editing.

http://youtu.be/elWjGYdxmsA

Details and rules for the FYBO are at
http://www.azscqrpions.com/fybo2009rules.html
Yes, I know it says 2009 but it IS 2012.

Now's the time to get organized!

1637. GRARA Hamfest Brochure.

Yahoo group: GRARA
Date: 2012-02-01 13:51:03 UTC
From: W8DER
Topic: 1637 Message: 1637

Guys,

check out the club website http://www.w8dc.org for the 2012 Hamfest brochure and information. Also you might note the dates of this year's ARRL Field Day. There is more to come on both.

See you at the meeting Friday night.

1638. ARHAB -- Amateur Radio High Altitude Ballooning

Yahoo group: GRARA
Date: 2012-02-01 14:06:54 UTC
From: Timothy Cathcart
Topic: 1638 Message: 1638

Hello all,

If there is any interest from anyone in the group in high altitude ballooning. The 2012 GPSL event is a little closer to Michigan this year. However, it is still a solid day drive to Omaha, NE.

I am still trying to see if my schedule can support me going to this years event. My dad is pretty committed on going and planning to launch a balloon again this year. If you would like to simply get in on the actions with out going. It should be possible to attach your payload to a balloon going into flight. Upon successful recovery you would received your recovered payload back.

For those that might be interested in the conferences we usually have a web meeting feed setup for those that can not attend in person.

For more details you can follow updated on superlaunch.org

Below is additional details and logistics for anyone interested in attending.

--
Timothy Cathcart
RM&S Engineer
Grand Rapids, MI

GPSL 2012 attendees,

Here is some additional information on venues and events for this year's Super Launch.

The GPSL 2012 e-mail list I set up last fall is still not working, despite Yahoo's response to my support ticket that it's now fixed. Still hoping to get it going.

For greater Omaha, numbered streets are north/south starting near the Missouri River and are 12 blocks per mile - I-680 is about 114th St and "west Omaha" generally refers to locations west of this line. Dodge Street is the major east/west artery through the center of the city, I-80 is to the south of the city center. Other major east/west streets are Pacific, Center, L, and Q Streets. Most of the city is laid out on a grid with few diagonals making navigation fairly easy.

Thursday, June 7th

1-5 pm: Guided tour of the Strategic Air and Space Museum<http://www.sacmuseum.org/> near Ashland, NE (just off I-80 Exit 426, about 25 miles southwest of Omaha).

7-9 pm: Early arrivals dinner at the Upstream Brewing
Co.<http://upstreambrewing.com/> (171st
and West Center Road, Omaha - this is tentative)

Friday, June 8th (all Friday events at Arbor Hall
Omaha<http://arborhallomaha.com/>,
14040 Arbor St [near 144th St and Center St])

Admission for the Friday sessions will be $40 per person, which includes breakfast, lunch, and dinner at the hall. Coffee, iced tea, and water will be available through the day. Additional dinner tickets for spouses, etc., can be purchased for $16. If you don't want to attend the Friday dinner, the cost for breakfast, lunch, and the sessions will be $25. My wife arranges her professional meetings at Arbor Hall regularly and says the food and service is outstanding, and this is a very reasonable price for the total package. It will also be very convenient to have everything in one location Friday to minimize wasted time driving.

8am: Doors open, light breakfast
9am-noon: Presentations begin
Noon-1pm: Lunch (sandwiches/salad)
1pm-4pm: Presentations continue
4pm-5pm: Weather briefing, launch logistics, etc.
5pm-6:30pm: Break
6:30-8:30pm: Dinner (roast beef/chicken, steamed vegetables, mashed potatoes, dessert, no-host cash bar)

Saturday, June 9th

6:30am: Launch crews arrive
7:30-9am: Launches
11am-6pm: Post flight lunch and discussions at Don Carmelo's
Pizza<http://doncarmelos.com/> in
Elkhorn (north of West Dodge Rd on 204th St)

Sunday, June 10th

Backup flight day

Hotels:
*
*
Blocks of rooms are not being arranged due to a variety of lodging preferences for the GPSLparticipants. Individuals/groups should make their own reservations and may be able to obtain multi-room discounts.
*
*
TownHouse Inn and Suites <http://www.townhouseinnandsuites.com/>, 140th St and West Center
I don't know a lot about this hotel personally, but have been told by the Arbor Hall staff that it is a clean locally-owned hotel with reasonable rates ($50-80/night) and is only four blocks from the hall (walking

distance).

Super 8<http://www.super8.com/hotels/nebraska/omaha/super-8-omaha-west-dodge/hotel-overview?hotel_id=08021&campaign_code=IP_Local>,
116th and West Dodge Rd (about 4 mi from Arbor Hall)
My parents stay at this hotel when they visit us and have never had a bad experience. Rooms presently available at $66/night, non-refundable rate for less.

Hampton Inn, 17606 Arbor Plaza (north of 176th and Center, about 3 mi from Arbor Hall)
I see bad reviews for pool maintenance, but otherwise looks decent.

There is also a cluster of hotels near 108th St and L St, just off I-80, with a variety of rates and amenities.

Any of these locations should be convenient for both the hall and the Thursday/Saturday events. More upscale facilities can be found in the downtown area, but will be less convenient.

Other area attractions
*
*
Henry Doorly Zoo (just south of I-80 at 13th St exit). One of the best zoos in the region if not in the US. Plenty of shaded areas for warm sunny days, but some ups and downs to the terrain so it's not the best for those who have difficulty walking.

Lauritzen Gardens/Kenefick Park (just north of I-80 near 13th St exit). Approximately 100 acres of gardens and botanical exhibits. Kenefick Park has two retired Union Pacific engines on display.

Durham Western Heritage Museum (just south of downtown area). This used to be Omaha's Union Pacific train station, now converted to a museum. Lots of exhibits from the late 1800s and early 1900s. A must see for history buffs or rail fans.

Casinos are located just across the river in Council Bluffs, IA. The "Old Market" in the downtown area has a wide selection of small shops and restaurants all in walking distance. Other nearby shopping centers include Oak View Mall (just south of Arbor Hall), Village Pointe (168th and Dodge), L Street Marketplace (108th to 132nd on L St) and Westroads (102nd and Dodge).

Timothy:

Interesting report! Hope you can make it.

I got my first "high altitude" ballooning back at my very first Field Day in 1952. My father took me to a Field Day near the Missouri River in SE Nebraska. I remember an old, abandoned farmhouse, plenty of room for antennae, etc.

But, the thing which really sticks in my mind is an "emergency radio beacon" antenna, military surplus, which was brought out for the 160 meter vertical. I was an eager volunteer, so the olde tymers put me in charge of reeling out the wire from a very well constructed reel. The instructions were to "reel out the wire until the end, then attach the transmitter to the antenna with the supplied wire and clip." I was happily unwinding the wire as the hydrogen (Yes, very flammable hydrogen from a hydrogen generator which also came with the emergency radio beacon) filled balloon. When it got to the end - "What, no attachment to the reel?" I, and the others, were aghast as the 200' or more of very expensive (to the US Government, at least) wire was floating off into the sky. The Olde Tymers reassured me that it wasn't my fault, the directions were clear, to unwind the wire until it reach its end, but I was mortified.

Now I wonder what would have happened if that had been in a lifeboat or other place where it was actually needed for a 500 KHz beacon transmitter.

So if one of your balloons has a high res camera attached, see if you can find remnants of a military emergency radio beacon antenna to the south and a bit east of Omaha. :)

Hello all,

If there is any interest from anyone in the group in high altitude ballooning. The 2012 GPSL event is a little closer to Michigan this year. However, it is still a solid day drive to Omaha, NE.

I am still trying to see if my schedule can support me going to this years event. My dad is pretty committed on going and planning to launch a balloon again this year. If you would like to simply get in on the actions with out going. It should be possible to attach your payload to a balloon going into flight. Upon successful recovery you would received your recovered payload back.

For those that might be interested in the conferences we usually have a web meeting feed setup for those that can not attend in person.

For more details you can follow updated on superlaunch.org (http://superlaunch.org)

Below is additional details and logistics for anyone interested in attending.

--

Timothy Cathcart

RM&S Engineer

Grand Rapids, MI

GPSL 2012 attendees,

Here is some additional information on venues and events for this year's Super Launch.

The GPSL 2012 e-mail list I set up last fall is still not working, despite Yahoo's response to my support ticket that it's now fixed. Still hoping to get it going.

For greater Omaha, numbered streets are north/south starting near the Missouri River and are 12 blocks per mile - I-680 is about 114th St and "west Omaha" generally refers to locations west of this line. Dodge Street is the major east/west artery through the center of the city, I-80 is to the south of the city center. Other major east/west streets are Pacific, Center, L, and Q Streets. Most of the city is laid out on a grid with few diagonals making navigation fairly easy.

Thursday, June 7th

1-5 pm: Guided tour of the Strategic Air and Space Museum (http://www.sacmuseum.org/) near Ashland, NE (just off I-80 Exit 426, about 25 miles southwest of Omaha).

7-9 pm: Early arrivals dinner at the Upstream Brewing Co. (http://upstreambrewing.com/) (171st and West Center Road, Omaha - this is tentative)

Friday, June 8th (all Friday events at Arbor Hall Omaha (http://arborhallomaha.com/), 14040 Arbor St [near 144th St and Center St])

Admission for the Friday sessions will be $40 per person, which includes breakfast, lunch, and dinner at the hall. Coffee, iced tea, and water will be available through the day. Additional dinner tickets for spouses, etc., can be purchased for $16. If you don't want to attend the Friday dinner, the cost for breakfast, lunch, and the sessions will be $25. Went to a high altitude balloon presentation at the last Radio Society of Tucson club meeting. It was put on by David G. Ladevaia KF7MZY, and very informative and way cool. If you go to his wed site, _www.davidiadevaia.com_ (http://www.davidiadevaia.com/) you will find a lot of info on high altitude balloon experiments and many links and videos. The balloon he talked about at the meeting starts out at 6 ft in dia. caring 2 cameras a repeater, beacon radios. The balloon finely get to 30 ft in dia. when it breaks at about 30,000 ft. It takes a long time for it to fall the 20 miles back to earth, see the video. The Arizona Near Space Org. Is planing to have a launch at the Yuma, AZ hamfest Feb. 18, and I am planing on being there.

"Second Friday? I thought it was traditionally the First Friday."

Yeah, I brain was at another club who meet on the second Saturday.
I should have written FIRST FRIDAY OF THE MONTH. Things like this is
why I also put down the actual date, February 3, which I was correct on.

It's almost midnight as I type this, so most will read this on the
actual meeting date, Friday, February 3, 2012, 6:30/7PM until
adjournment.

1648. International PI day celebration - 3/14

Yahoo group: GRARA
Date: 2012-02-06 23:39:53 UTC
From: Hank Greeb
Topic: 1648 Message: 1648

I'm happy to announce that I'll be operating one of several stations which will be operating as KD8DKU during the celebration of International Pi Day and Albert Einstein's Birthday. I'll be operating mainly CW and VHF FM. Others will be operating SSB, PSK-31 and ?????

When/what? 03/14/2012 | International Pi Day / Einstein's Birthday

Mar 14, 0000Z-2359Z, KD8DKU, Marquette, MI & other locale. Organized by Lake Effect Amateur Radio Club. PSK31 14.070 SSB 7.285, other frequencies/Modes TBD.

QSL. Lake Effect ARC/Pi, 36 Southfork St, Marquette, MI 49855.

A fun event for the nerd in all of us. Lemon pi(e) at club HQ for local drop-ins! Will sked QSOs. For further information see http://www.lakeeffectarc.info/Event-PiEinsteinDay/PiDay.htm

There's a nice commemorative QSL card available - see the above web site for QSL policy.

My tentative schedule will be to operate for an hour or more beginning at 03:14Z, 03:14 EDT, 15:14Z (3:14 p.m. GMT), and 15:14 EDT (3:14 p.m. EDT). CW Frequencies are not determined yet, refer to the above web site for up to the minute information. I will operate on local 2 Metre FM repeaters and the W8HVG Linked repeater system.

Looking forward to making contacts with many stations on March 14.

1649. New Hams Dinner this Saturday

Yahoo group: GRARA
Date: 2012-02-07 01:30:52 UTC
From: Jack Amelar
Topic: 1649 Message: 1649

Keep the date open, this Saturday, February 11, 2PM, the New Hams Dinner.
This annual event is where we welcome the New Ham licensees and Hams
new to the West Michigan area.
Sponsored by Grand Rapids Amateur Radio Club http://www.w8dc.org and
Lowell Amateur Radio Club http://www.w8lrc.org

If you are a new ham since last year's dinner, identify yourself at the
door and dinner is on us.
And the rest of us welcoming you, dinner runs about $13 includes
beverage and gratuity.

Fire Mountain Restaurant
3725 Alpine Ave NW
Comstock Park, MI 49321
(616)785-1200
www.firemountain.com

Just north of the I-96 expressway just past 4 Mile Road on the
Left/West. There is also a back entrance off 4 Mile Road just past
Comerica Bank (easier left turn from Alpine).

This event is open to all Amateur Radio Operators, family and frends.

There is no need to sign up.

Bring along photos, stories of events or QSL Cards.
If you have any questions. Contact the Lowell Amateur Radio Club
Officers at w8lrc dot org.

If you have worked HK0NA, they now have a nice web page showing how
to set up a DXpedition on a rock, and Malpelo is a rock.

Have a look:

http://69.89.25.185/~trexsoft/t-rexsoftware.com/hk0na/operating.htm

Find the picture of the path to the high operating point "A" and look at
what the walk is like.

As a side note, they are using nothing but Elecraft K3's :)

More climbing than walking to get to OP A! What an experience it must have been to be part of that team. And did an awesome job of sharing that experience with the rest of us via pictures.

I had fun working them on 7 out of 29 possible band slots!

1654. New Hams Dinner this Saturday

Yahoo group: GRARA
Date: 2012-02-10 23:25:51 UTC
From: Jack Amelar
Topic: 1649 Message: 1654

Keep the date open, this Saturday, February 11, 2PM, the New Hams Dinner.
This annual event is where we welcome the New Ham licensees and Hams
new to the West Michigan area.
Sponsored by Grand Rapids Amateur Radio Club http://www.w8dc.org and
Lowell Amateur Radio Club http://www.w8lrc.org

If you are a new ham since last year's dinner, identify yourself at the
door and dinner is on us.
And the rest of us welcoming you, dinner runs about $13 includes
beverage and gratuity.

Fire Mountain Restaurant
3725 Alpine Ave NW
Comstock Park, MI 49321
(616)785-1200
www.firemountain.com

Just north of the I-96 expressway just past 4 Mile Road on the
Left/West. There is also a back entrance off 4 Mile Road just past
Comerica Bank (easier left turn from Alpine).

This event is open to all Amateur Radio Operators, family and frends.

There is no need to sign up.

Bring along photos, stories of events or QSL Cards.
If you have any questions. Contact the Lowell Amateur Radio Club
Officers at w8lrc dot org.

Subject: TALARC Alert
Importance: High

Reminder: This weekend, The American Legion Amateur Radio Club will conduct two nets. We hope you can check in.

Saturday, Feb. 11 at 1400 EST (1900 Zulu) until ???? on IRLP Crossroads Reflector 9205. Net Control will be Bill, NZ9S.

Sunday, Feb. 12 at 1400 EST (1900 Zulu) until ???? HF Net on ten meters at/near 28.610 MHz Net Control will be Craig, W3CRR.

If you find these net times (and frequency) good and like the venues, please let net control know s o we can lock them in on a monthly basis. Naturally, all suggestions are welcome.

Look forward to hearing you on the nets this weekend.

73,

Joe March - KJ9M

Mark:

I suggest you look at ARRL's web site on operating in Mexico. Mexican Hams have a different philosophy of allowing "gringos" into their ethereal space, but it IS possible.

One of the benefits of the ARRL. I don't believe they charge anything for the information on the web site.

1659. Ham wins ham at New Hams Luncheon

Yahoo group: GRARA
Date: 2012-02-15 16:43:33 UTC
From: Jack Amelar
Topic: 1659 Message: 1659

----- Forwarded message from ka5s@... -----
From: Cortland Richmond <ka5s@...>

Kent County Amateur Radio operators' annual "New Hams" luncheon, at the Fire Mountain restaurant in Comstock Park, went off well Saturday afternoon, 11 February, with recently licensed "Ham Radio" operators and members of local Amateur radio clubs in attendance. The new Amateur Radio operators were treated to a dinner and welomed to the hobby, after which free door prizes were drawn for.

This year, Lowell and Grand Rapids radio club member Cortland Richmond provided a Grand Prize he described to assembled members and families as a "ham radio kit." This was won by long-time operator Hank Greeb, of Rockford. Members then got a full description of what Richmond called a "Broomhilda" (the cartoon witch) Special; copper wire and some mustard to "build a ham radio" (as cartoonist Russel Myers described his character's purchase). To make it complete, Richmond included a spiral cut ham so, just as Amateur Radio has interests for everyone, it didn't matter what direction it was cut.

Greeb was seen smiling at the win.

Amateur Radio Leadership Workshop is Coming to Kalamazoo
Posted by: "James C Duram" jimk8cop@... k8cop
Tue Feb 14, 2012 6:21 pm (PST)

Greetings,
I am pleased to announce that the second in a series of Ham Radio Club Leadership Workshops is coming to Kalamazoo on April 21. The initial workshop is taking place in Ann Arbor on March and now the workshop is hitting the road and coming to West Michigan. This workshop will concentrate on leading volunteers in an a group setting and is appropriate for leadership in Clubs, ARES/RACES organizations or other activities where volunteers are utilized.

The Kalamazoo club has agreed to sponsor the workshop and they were able to secure a classroom for us at the Red Cross building in Kalamazoo. The all day workshop will be led by Dan Romanchik, KB6NU, Michigan ARRL Assistant Section Manager for Training and will be held on Saturday, April 21. The class times will be determined and published shortly. The cost for this workshop is $10 and this includes all class materials, coffee and doughnuts and lunch.

More details to follow soon. We would appreciate it if you would help us to spread the word within your organizations. Please feel free to contact Dan Romanchik, KB6NU at kb6nu@... or at 734-930-6564.

We hope to see you in Kalamazoo!

Ladies and Gentlemen"

Don't wish to rain on anyone's parade, but I must inform the assembled multitude that the Michigan QSO Party is being held on its very, very long time date of the Third Saturday of April, which this year is April 21, from Noon to Midnight.

The home page of MiQP web site doesn't list the date, but the rules, activity map, etc., have 2012 and the date/

If you're an active ham (even if you're an active in a "leadership" role) you may wish to partake of the very popular Michigan QSO party.

For details of the party, see http://www.miqp.org/Rules.htm

1662. Lighthouse QRM to GPS to be Toast...

Yahoo group: GRARA
Date: 2012-02-15 22:35:23 UTC
From: K8TB
Topic: 1662 Message: 1662

If you have heard about it, the FCC gave a huge chunk of spectrum
to a wireless company called Lighthouse, who was going to light up
40,000 nodes around the US for wireless. Each running over 1,000 watts.
The problem? The spectrum is right next door to the GPS frequencies, of
which we are trying to receive 10 watt signals from space. The FCC
bypassed 2 procedures that are required when they repurpose spectrum.
The spectrum was marked for satellite uplinking.
Anyway, the US NTIA, who controls all frequencies within the federal
government, said that Lighthouse may not operate. Too much interference
to government GPS systems. The FCC then said, well, ah, 'What they said".

From www.thebdr.net :

LightSquared had its conditional approval to operate terrestrial
transmitters on frequencies near GPS use pulled by the FCC on Tuesday as
a letter from the NTIA
<http://www.ntia.doc.gov/files/ntia/publications/lightsquared_letter_to_chairman_genachowski_-_feb_14_2012.pdf>
(National Telecommunications and Information Administration) regarding
their study had determined there was interference with GPS receivers,
and there was no practical way to mitigate the potential interference
within the next few years. The wavier for operation, granted by the FCC
to LightSquared, was "suspended indefinitely,

From: Hank Greeb
Topic: 1665 Message: 1665

Actually The Phone part of the ARRL DX contest starts at 7 p.m. March 2, Eastern Time, coincidentally with the GRARA March Meeting.

Anyone want to activate W8DC between the end of the meeting and 7 p m Sunday the 4th?

It would be a GRRRR8 opportunity to check out the amplifier - AND, do we have an effective Noise Blanker? Cortland, KA5S has shown that a noise blanker CAN take out noise - so maybe there's hope for all the trash affecting W8DC. MAYBE we can actually receive signals that are less that 99 dB over S-9 on 80 and 40 metres?

Lettuce b thimking about this possibility The station SHOULD get some real ham radio related activity (but perhaps that just an opinion of one?)

Subject: [digitalvoice] Re: FDMDV plus Video

Hello all,

My previous post (11/1/11) introduced "FDMDV plus Video", which adds video to the FDMDV signal.

The early version of the video software had a problem with corruption of the FDMDV signal by the adjacent video subcarriers. An update to the video software corrects this problem by changing the video subcarrier spacing from 43.0664 Hz to 37.5 Hz, exactly half the spacing of the FDMDV subcarriers (thus retaining orthogonality in the composite signal).

I've posted a demo screenshot video of the new version to YouTube at:

http://www.youtube.com/watch?v=StQ_OIwocFU

73, Rick, WA6NUT

On Tuesday, November 1, 2011 11:29:09 AM UTC-6, wa6nut wrote:
Hello all,

Group members who use FDMDV may be interested in an experimental technique that adds simultaneous video to the voice signal.

The technique, known as "FDMDV plus Video", provides low-resolution video (36 lines) at 1 frame/sec (like surveillance video). The video software is a modified version of ZL2AFP's "Analog OFDM" NBTV. The video software is run simultaneously with HB9TLK's software currently used for FDMDV.

Separate PC's are used for transmitting and receiving (I use laptop PC's with 1.6 GHz minimum clock speed).

The 15-subcarrier FDMDV signal is increased to 64 subcarriers total, requiring a baseband bandwidth from 0.38 to 3.7 kHz for transmitting and receiving (good with newer Ten Tec, FlexRadio and some other HF transceivers). Unlike FDMDV alone, the operator should not transmit FDMDV plus Video unless all frequencies from 14236 to 14240 kHz are checked and found not to be in use!

The signal has a high peak-to-average power ratio (PAPR), and requires high linearity in the transceiver's AF and RF transmitting stages. Depending on your transceiver, external amplifiers may be required to obtain the required linearity. I use a PA-100 and HF Packer 2 linear from HF Projects (K5OOR), giving 20-30 watts output (the HF Packer has the PSU-36V mod for operation from 36Vdc).

Tony, K2MO, has included PathSim simulations for the FDMDV plus Video signal (without voice) at his YouTube pages:

http://www.youtube.com/watch?v=NDc2z7bQvuI

and http://www.youtube.com/watch?v=IJYPB9ysn7Q

The simulations are computer-to-computer, and show the effects of propagation on the video portion of the FDMDV plus Video signal. Because an actual RF link is not used for the simulation, the effects of frequency drift in the transmitter and receiver are not simulated. Also, because the video software is run without the FDMDV software, the effects of interaction between the video and FDMDV subcarriers are not simulated.

Software and information on FDMDV plus Video (an 840Kb zipped folder) can be downloaded from:

http://www.hamsdr.com/personaldirectory.aspx?id=1182

and http://www.hamsdr.com/personaldirectory.aspx?id=1183

Read the text file "FDMDV plus Video Info" first.

More information is found at:

http://groups.yahoo.com/group/ssb-plus-video

If you're interested, you're invited to join the Yahoo! group.

Because an actual RF link is not used for the simulation, the effects of frequency drift in the transmitter and receiver are not simulated. Also, because the video software is run without the FDMDV software, the effects of interaction between the video and FDMDV subcarriers are not simulated.

Software and information on FDMDV plus Video (an 840Kb zipped folder) can be downloaded from:

http://www.hamsdr.com/personaldirectory.aspx?id=1182

and http://www.hamsdr.com/personaldirectory.aspx?id=1183

Read the text file "FDMDV plus Video Info" first.

More information is found at:

http://groups.yahoo.com/group/ssb-plus-video

1672. GRARA February Meeting Minutes online

Yahoo group: GRARA
Date: 2012-03-02 13:16:27 UTC
From: GRARA-owner@yahoogroups.com
Topic: 1672 Message: 1672

The February Membership meeting minutes are on the website. Checkout the About_us Page on www.w8dc.org .

(From N8DGD, GRARA Secretary)

1673. 1 week until π (pi) day

Yahoo group: GRARA
Date: 2012-03-06 15:01:42 UTC
From: Hank Greeb
Topic: 1673 Message: 1673

QST, QST, QST Attention all QRPers, and other hams.

Yes, it's only one week until International π (pi) day. Several of us will be operating with the Lake Effect Amateur Radio Club call KD8DKU during the day (0000z - 2359Z 3.14.2012 (Yes, I understand that 3.14159.... is closer to the actual number for π (pi) but we had to fit in the year somehow.)

*Band / Ops Plan for KD8DKU operation
*

*Time / day Band/mode Target Frequency
0000 / 8pm edt Tuesday 20m PSK 14.070
1500z / 11am edt Wednesday 40m SSB 7.285 and up
1900z / 3pm edt Wednesday 17m SSB 18.155 and up
2100z / 5pm edt **Wednesday** 20m PSK 14.070
0314Z/11:14 p.m EDT. Tuesday 80 M CW 3531.4 KHz
0714Z or 3:14 am EDT Wed. 80 M CW 3531.4 KHz
1514Z or 11:14 a.m EDT 40 M CW 7031.4 KHz
1914Z or 3:14 p.m. EDT 20 M CW 14031.4 KHz
*

If propagation permits, we will attempt other band/modes and times - so look on QRP-SPOTS for KD8DKU's location.
And, note that CW crew will be as near 31.4 KHz from the lower end of the band(s) as possible ± QRM.

We will operate for any combination of the following periods of time:

1. For one hour after the specified time and/or
2. Until the pileup subsides and/or
3. Until we get tired and/or
4. Until we suffer a catastrophic breakdown of a critical part of the transmitting/receiving station, and/or
5. If we feel like stopping

As you might guess from the preceding, this is a "fun" event, celebrating π (pi), and also Albert Einsteins Birthday Anniversary (March 14, 1879).

If you'd like a Commemorative QSL of this event, please see the Lake Effect ARC site:

http://www.lakeeffectarc.info/Event-PiEinsteinDay/PiDay.htm

Please pass the word on your local ham reflectors and nets.

Looking forward to a massive πlups (pileups) on 3.14.2012

1676. Idaho QSO Party this weekend

Yahoo group: GRARA
Date: 2012-03-10 01:08:37 UTC
From: Hank Greeb
Topic: 1676 Message: 1676

I haven't seen much of a plug for this one, so here a "shameless plug"
for the Idaho QSO Party:

From: http://www.idahoarrl.info/qsoparty/

The 2012 IDQP starts March 10 Starts 1900Z -- 2PM EST, 1PM CST, 12
Noon MST, 11AM PST..and ends on Marc 11 at 1900Z -- 2PM EST, 1PM CST,
12 Noon MST, 11AM PST..a full 24 hour period.

Every year the IDQP gets more popular, this year promises to be no
exception, with lots of sun spots we should have "way" better
conditions on 10 &15 meters.

For out-of-state'rs this is your chance to snag Idaho and maybe some
rare counties. Or just have fun working the pileups !

For the Idaho stations it a chance to show the world there are indeed
Idaho hams in Idaho !!

Idaho ranks 37 our of 50 states in ham population, we are not California
so you will need to search for us on the bands.

Out of state stations, please feel free to spot Idaho Stations, help
others find us. Put IDQP in the comments field..

Many Idaho stations and groups are already planning to make this year
bigger and better.

Editorial Note # 1 - there IS a QRP category!

Editorial note # 2 - Lettuce prey that the recent solar flares are not
too disruptive to communications via HF to/from Idaho this weekend.

1677. Another CME Heads for Earth

Yahoo group: GRARA
Date: 2012-03-10 02:30:37 UTC
From: Hank Greeb
Topic: 1677 Message: 1677

If it doesn't rain it pours (Electromagnetic Radiation from the sun)
==========
Space Weather News for March 9, 2012
http://spaceweather.com

INCOMING CME: As Earth's magnetic field reverberates from the impact of one CME on March 8th, a second CME is on the way. Big sunspot AR1429 unleashed an M6-class solar flare today, and the eruption hurled a cloud of plasma almost directly toward Earth. Forecasters say the CME could reach our planet during the late hours of March 10th or early hours of March 11th. Strong geomagnetic storms are possible when the cloud arrives. Check http://spaceweather.com for more information and updates.

1678. Pneumatic Mast?

Yahoo group: GRARA
Date: 2012-03-13 02:26:37 UTC
From: Hank Greeb
Topic: 1678 Message: 1678

A bunch of years ago I borrowed a military surplus 50' air operated mast for a field day operation.

I'm doing a field operation from Howard City during the Michigan QSO Party on April 21.

Does anyone reading this know of such a mast in working condition which I could rent or borrow? It would be much easier to raise a small beam with such a mast than to raise it with my push up mast.

Thanks for any tips. Private replies seem appropriate.

1679. International PI/Einstein Celebration starts this evening

Yahoo group: GRARA
Date: 2012-03-13 21:48:27 UTC
From: Hank Greeb
Topic: 1679 Message: 1679

Yep, it's 3/14/2012, and that's a good reason to celebrate PI (3.14159xxxxxxxxxx) which is the ratio of the circumference to the diameter of a circle. It is also the birthday of Albert Einstein.

Two good reasons to get on the air. Wallpaper collectors, please note QSL information at

http://www.lakeeffectarc.info/Event-PiEinsteinDay/PiDay.htm

At least four of us, WA8REI, KC8ULE, N8XX and KA5S will be sharing the honors with various times and frequencies noted on the above web site.

WA8REI, N8XX, and KA5S will be operating CW, 31.4 KHz (? QRM) above the lower end of the CW band, on 3.5 thru 28.0 MHz bands. We will spot ourselves on QRPSPots. Some of the operating times and frequencies are noted on the above site, but we'll randomly choose other bands.

So, come one, come all, and join the fracas! We'll try to contain our enthusiasm for the event.

1681. Build a burger Night, Friday March 23, 2011

Yahoo group: GRARA
Date: 2012-03-19 05:41:26 UTC
From: Hank Greeb
Topic: 1681 Message: 1681
Attachments: 1 described; binary payloads are missing from this source WARC

Note, I waived my usual (somewhat less than) $10,000 endorsement fee for this event. I can only attest to the great taste of the burger or Fish Sandwich (I've had at least one of both types), plus all the fixin's. You MAY, if you wish, purchase a beer or other libations at the bar on the other side of the room!

1683. ARRL Michigan Section Ham Radio Club Leadership Workshop in Kalamazoo.

Yahoo group: GRARA
Date: 2012-03-19 18:18:37 UTC
From: chip_wb8alw
Topic: 1683 Message: 1683

Greetings!

The Kalamazoo Amateur Radio Club is hosting a Ham Radio Club Leadership Workshop in April (Same weekend as the Michigan QSO Party!). Here's the info from the flyer:

"The Michigan Section of the ARRL is proud to announce the second in a series of leadership workshops offered to Club Officers, Members of Boards of Directors, ARES/RACES Leadership Officials or those aspiring to improve their leadership skills in relationship to amateur radio clubs.

The Kalamazoo workshop will be held on Saturday, April 21, 2012 at the American Red Cross building in Kalamazoo, MI, which is located at 5640 Venture Court.

Class will begin at 8:30 AM and end at approximately 4:00 PM. The cost for this workshop is $10 and registration and payment in advance is required. This fee includes class materials, coffee and doughnuts, lunch and a handsome Certificate of Completion.

Contact Dan Romanchik, KB6NU at kb6nu@... for details and registration. You can also reach him at 734.930.6564. For local registration, you may also contact Chip Locke at wb8alw@...."

One of our members attended the first session in Ann Arbor, and "Highly Recommends" the workshop. It promises to be an enjoyable day of education and fellowship. We have 9 people on the list already, from 4 different counties!! Workshop is conducted by Dan Romanchik, KB6NU. Contact information is above.... Hope to see you there....

Missouri QSO Party

Call: N8XX
Operator(s): N8XX
Station: N8XX

Class: SOAB QRP
QTH: MICHIGAN
Operating Time (hrs): 3.5

Summary:
Band CW Qs Ph Qs

160: 0 0
80: 4 1
40: 18 11
20: 0 0
15: 0 0
10: 0 0

Total: 22 12 Mults = 20 Total Score = 1,220

Club: Mad River Radio Club

Comments:

Score includes working W?MA "bonus station."

20 was too long for contacts, at least with a pipsquoke signal of 5 watts and a cloud warmer (inverted V @ 28' apex.) 40 was a bit short early, but by about 2000Z signals picked up so most Missouri stations whom I could hear were able to copy me.

It was fun chasing KI?I and N?AX around the state - both mobiles had awesome signals on 40, and "almost readable" signals on 80. QRN picked up as the evening wore on - seems like a thunderboomer was pelting the Upper Peninsula of Michigan amongst other parts of the country.

Thanks to the organizers of this event!

1698. Re: [GRARA] Gmail Tap using morse code-awesome. How can we try it?

Also, it might be associated with the date, 1 April 2012 (all fool's day). But, for those of us who know International Morse code, it could be faster than trying to type with fat fingers on one of those itty bitty keyboards on a cellular phone.

1703. ARRL Needs Your Help

Yahoo group: GRARA
Date: 2012-04-03 21:09:19 UTC
From: Hank Greeb
Topic: 1703 Message: 1703

Do you live in a CC&R- restricted community or participate in EmComm activities? Have deed restrictions / HOA covenants prevented you from erecting amateur radio antennas? Have these restrictions prevented you from full participation in emergency communications activities during disasters?

If your answer is "Yes", ARRL needs to hear about your experience.

As you are probably aware, Congress has directed the FCC to conduct a study of the uses and capabilities of Amateur Radio Service communications in emergencies and disaster relief. The FCC was directed to identify " impediments to enhanced Amateur Radio Service communications, such as the effects of unreasonable or unnecessary private land use restrictions on residential antenna installations". Finally, the study is to make "recommendations regarding the removal of such impediments."

The FCC has issued a Public Notice - DA 12-523- soliciting input from the public as part of their study. The ARRL is gathering comments from the Amateur Radio community to present as part of its comments on the public notice.

The ARRL is looking specifically for input in two specific areas:

* Recent Amateur Radio involvement in actual emergency communications and disaster relief;

* Specific details about how CC&Rs and other private land use restrictions have impaired licensed Amateurs to participate fully in these disaster relief communications.

If your ability to participate in ARES, RACES, SKYWARN, CERT, or other emergency and disaster relief communications has been limited because the inability to have adequate antennas due to CC&Rs, you are asked to provide that information to the ARRL.

First, we recommend that you prepare a narrative of your exact situation, in as much detail as practical. Some areas for you to consider in writing your story might be:

* Were there alternative properties without CC&Rs in the area you wished to reside?

* What exactly does your CC&R allow / prohibit (please include a copy of the specific wording)

* Have you applied for a waiver of the CC&R with the Home Owner's Association / Architectural Review Committee but were denied? If so,

what was the reason?

To assist you in sharing your information with the ARRL, please visit the special ARRL website built to allow you to readily provide the pertinent information at <http://www.arrl.org/ccr-study-information>

This page will present you with an overview of what we are asking and have links to the two forms for you to complete. Please be as factual as you can with the information you provide and please provide only information about events and activities in which you were directly involved.

If you wish to write out the details of your situation in advance, please do so. Then, they can be either uploaded to the website or they can be sent as an email attachment to an email sent to <CCRinfo@...>

Keep in mind that the FCC study does not apply to ordinances and zoning laws implemented by the government - such as towns, cities or counties. PRB-1 covers those situations.

TIME IS OF THE ESSENCE! Congress directed that the FCC provide the report back within 180-days and that clock is already counting. The FCC is only accepting comments for a 45-day period, which will end May 17,2012. In order for the ARRL to collate your information in a common report, we ask that you send in your information no later than WEDNESDAY APRIL 25. If you need more information, please contact <reginfo@...> The time to act is NOW!

I'm sorry you couldn't hear w1aw, Mike, it would have been great to work you. Every time I pointed the beam toward MI, somebody from the south or Midwest called and I had to swing it away from MI. I was just getting the hang of using digipan software by the time they made me qrt at 3:45pm so that they could get ready to run cw practice.

It was great fun! I recommend visiting ARRL and W1AW if in the New England area.

Gerry

1709. ARRL Michigan Section Ham Radio Club Leadership Workshop in Kalamazoo.

Yahoo group: GRARA
Date: 2012-04-06 21:11:54 UTC
From: chip_wb8alw
Topic: 1683 Message: 1709

Hello Kent County!

Just a reminder that the subject workshop is only two weeks from tomorrow at the Red Cross building in Kalamazoo. We have a roster of 15 so far, representing at least 6 clubs in southern Michigan.

Spend a pleasant Saturday with us! Check out http://w8vy.org/archives/881 for further information and registration instructions.

The workshop is open to to you regardless if you are in a leadership role in a club, interested in being in a leadership role, or just interested in broadening your horizons!

Hope to see you there...

73

Chip Locke for the KARC.

1710. Michigan QSO Party noon to midnight, April 21 EDT

Topic: 1683 Message: 1710

Reminder that the Michigan QSO Party is only two weeks and 1 day away,
begins at 1600Z April 21 and ends as 0359:59::59Z April 21. That's Noon
to Midnight, April 21 in the Eastern Time Zone of these United States.

Rules and other information on this event is at http://www.miqp.org

Hope to see a bunch of GRARA folks on for this party! It's GREAT fun!

I will be in Montcalm county, operating as K6JSS/MCLM during the event.
I have permission from the Village of Howard City to set up at the old
railroad station and now Staging area of the White Pine Trail. I hope
to be on for the entire 12 hours and work many of you.

Only 3 weeks until the first Tulip Time parade, and we're running behind
on getting volunteers signed up for this major event!

Two changes from previous years:
1. The parade line-up group for Saturday is currently not requesting any
additional help, so for now we are only taking sign-ups for the Red
Cross teams.

2. All volunteers must have a background check. Current OCEC members are
all set, others will need to get this taken care of before the event.
Members of other volunteer groups that require them are probably OK,
we'll verify this with the RedX and TT committee.

So, we need:
Wednesday, May 9: 14 volunteers
Thursday, May 10: 14 volunteers
Saturday, May 12: 30 volunteers

Anyone interested should send an e-mail to Bryan, KD8LDX at:
bryan.leenheer@... <mailto:bryan.leenheer%40gmail.com>
Remember to include contact info!

Forward this far and wide - spam it out to every list you're on!

Yahoo group: GRARA
Date: 2012-04-14 00:56:20 UTC
From: W8DER
Topic: 1716 Message: 1716

It's hot off the press......

"Larry the Fox", reigning victor of the March Fox Hunt has just announced preliminary details of the _April Fox Hunt_. This hunt features a brand-new search venue that will certainly challenge even the best of our hunters. At the same time, this new hunt will give the newcomers an even chance to win.

Where: The April hunt will start from the Rogers Plaza Parking Lot near the 5/3 Bank on the corner of 28th Street and Michael Avenue in Wyoming.

When: Saturday, April 28th from 9:00 am to 11:00 am. Be sure to arrive early to check-in with or starter, KD8CAN, Jim Leys.

Why: Because there isn't a better way to start a spring Saturday morning than a tri-county, ham radio, hidden transmitter hunt.

Who: "Larry the Fox" DeBlaay, WA8PAP, that's who.

Hope you all can come -- it will be a lot of fun.

Watch this Yahoo Group and the http://www.MichiganFoxHunter.com for details as they become available.

Date: 2012-04-14 02:28:45 UTC
From: Steven Kaney
Topic: 1714 Message: 1717

Radio Shack used to have kits fort that. There were pens that you drew the traces with and then you put the circuit in a tray with an etching chemical and voila nothing left but the board w/ traces. I recently saw the etching fluid in a Radio Shack in CT but they didn't have the pens or the trays. If it isn't in your Radio Shack you might be able to order it from their website. Or there is always Digi-Key.

1720. A new Ham Radio Yahoo Group - AmateurRadioLeadership

Yahoo group: GRARA
Date: 2012-04-24 15:00:46 UTC
From: W8DER
Topic: 1720 Message: 1720

At last Saturday's Michigan Section ARRL Amateur Radio Leadership Workshop in Kalamazoo, it was suggested that we start a new Yahoo Discussion Group to further our efforts to grow the ham radio hobby. Dan, KB6NU, took on this task and as of this morning, the new Yahoo Group is Active. Dan's description reads as follows:

"This group is for amateur radio operators interested in becoming better leaders of their amateur radio clubs, especially those who have attended an Amateur Radio Leadership Workshop. We will discuss a wide range of topics, including:
- Why amateur radio clubs exist.
- How to recruit and retain members.
- How to organize amateur radio clubs."

We hope that everyone interested in ham radio leadership will join and contribute their ideas. A link to the site is below.

I would recommend just doing the renewal online through w5yi.

http://www.w5yi.org/page.php?id=87

You can pay with credit card or PayPal and they submit it immediately and take care of everything for you. Cost is $8.00 for non-vanity.

On another note, if you just wait for the mail to go through, he has a 2 year grace period to renew. Information is on that same page. Just can not use it while it is expired.

OUCH!!, It takes a bit of reading to figure it out. I have had a stroke, I'm missing more than a few marbles and I still figured it out! It takes some effort to look up your code to get into the system, but it REALLY isn't that hard. Maybe he needs to drink a 6 pack then try... LOL

1729. Reminder of the Fox Hunt, this Saturday, April 28 at 9 am

Yahoo group: GRARA
Date: 2012-04-26 01:30:01 UTC
From: K8TB
Topic: 1729 Message: 1729

"Larry the Fox", reigning victor of the March Fox Hunt has just announced preliminary details of the _April Fox Hunt_. This hunt features a brand-new search venue that will certainly challenge even the best of our hunters. At the same time, this new hunt will give the newcomers an even chance to win.

Where: The April hunt will start from the Rogers Plaza Parking Lot near the 5/3 Bank on the corner of 28th Street and Michael Avenue in Wyoming.

When: Saturday, April 28th from 9:00 am to 11:00 am. Be sure to arrive early to check-in with or starter, KD8CAN, Jim Leys.

Why: Because there isn't a better way to start a spring Saturday morning than a tri-county, ham radio, hidden transmitter hunt.

Who: "Larry the Fox" DeBlaay, WA8PAP, that's who.

Hope you all can come -- it will be a lot of fun.

Watch this Yahoo Group and the http://www.MichiganFoxHunter.com for details as they become available.

Fox Hunters,

I'm happy to say that the Arduino Robo-Fox is ready to go, so this will be a two transmitter hunt. The Robo-Fox will be set to go off at 9:00 and I will transmit right after that at 9:01 to signal the start. I may not be in my vehicle but you will be able to tell it is me. The object should be to find the Robo first and remember the number that will be on the top, as proof of finding the Robo. Happy hunting.

Careful with that one, the site was programmed by one of those government geniuses. I tried pasting in my FRN from the QRZ page but the FCC doesn't like that and pops a dialog box with only an OK choice. Click the OK and it pops again. That locks up the browser so you can't correct the problem or close the tab or go to a different tab or exit. Had to kill the browser from the Task Manager. Relaunch the browser and it continues where it left off. Had to delete all my history, cookies, etc.

Don't try and look up your FRN using their search function. It does the same thing.

Good one!!! How are these geniuses ever going to manage Socialized Health Care?

You can renew for free on the FCC website using the Universal Licensing System. I did it and it was easy. Here is a link to the info.

I would recommend just doing the renewal online through w5yi.
http://www.w5yi.org/page.php?id=87

You can pay with credit card or PayPal and they submit it immediately and take care of everything for you. Cost is $8.00 for non-vanity.

On another note, if you just wait for the mail to go through, he has a 2 year grace period to renew. Information is on that same page. Just can not use it while it is expired.

Good gosh. "Where's the problem?" I volunteered to help some of our club's members renew their licenses. If the FCC's server is slow, you will be there a while. Me, I'd check back later, like 11AM to 2PM and not on a Friday or weekend. I did this as a free offering to our elder members: the youngest was 67 and the oldest was 94. Maybe this is some thing your clubs should offer it's members and the Amateur community in general??

You just need a trustworthy person to do it and one the members trust with their FRN number and password. Me, I print everything out, then maybe keep a record, if I suspect the member might lose the material.

Just a thought. If you want to increase interest in your club, offer more Ham stuff to the ham community.

Just my thoughts on the matter.

Topic: 1724 Message: 1739

Rich:

Tell that to my knuckleheaded brother in law. Whilst we were visiting them about 6 months ago, I looked up a couple local clubs in the Bloomington, Indiana area where he lives, looked up the telephone number of at least one of the ossifers of one of the clubs. Also gave him the URL of the form 605 and the VEC 605 which he could have used. I asked him a few months later when we were again visiting, he made some excuses, etc.

I'm 99.44% sure that one or more of officers in one of the clubs in his area would have helped him with the renewal. But, about a month ago I noted he hadn't renewed, so I downloaded a FCC form 605, filled it out, sent it to him for signature with a self addressed envelope. I check about 2 weeks ago, sent him an e-mail, He responded that he hadn't sent it in, that he has procrastinated so long that his wife accidentally discarded the envelope. I provided him an address for FCC again. He finally responded last week saying he had been engrossed in a "spreadsheet for his Federal Income taxes and forgot about sending it in until after April 17. (I chided him for the nth time that Turbo Tax or Tax Act would have saved him hours of reading the IRS forms about changes since last year, but he's too cheep to pay $30 to $50 for software.)

The problem is NOT that I'm not willing to help, or that folks in his city aren't willing to help.

I still don't know for sure whether 5 weeks is enough time for FCC to act for a paper renewal request. ARRL HQ thinks it probably will, but said I should check in about 2 weeks if it hasn't issued. Typical turn around for VEC response is within days, so 2 weeks is their "best guess" as to what will happen to a paper 605 renewal form.

73 de n8xx Hg

p.s. I can't figure out for the life of me why people keep ragging me about "use the internet" I specifically did NOT ask how to do that, I asked if anyone has filed manually via mail, yet people keep babbling along about "use W5YI" or "do it on the internet" etc.

Could just be the case your brother-in-law no longer has interest in Amateur radio!
Having said that, it is still short sighted not to renew. I've met a number of former hams over the years, including some retired folks, that regret not keeping the license.
Ultimately, that's a personal decision.

From: Hank Greeb
Topic: 1747 Message: 1747

Indiana - see http://www.hdxcc.org/inqp/ for rules and other info

7th Area, see http://www.7qp.org for rules and other info

New England, see http://www.neqp.org for rules and other info.

N1MM logger (and possibly others) have a template for logging three QSO Parties this weekend simultaneously.

The N1MM template works fine for out of state stations, don't know how it works if you're operating within the area of one of these parties. For out of state folks (like me) all I need to do is make one cabrillo file from the bunch of contacts, and send it into the three scoring addresses.

Having three things going on (almost) simultaneously seems a fun exercise!

1750. ARLB009 FCC Seeks Higher Vanity Call Sign Fee

Yahoo group: GRARA
Date: 2012-05-08 02:47:26 UTC
From: Hank Greeb
Topic: 1750 Message: 1750

Seems a waste of time and money for FCC to have to put out a NPRM for a proposed 80 cents increase in a vanity call fee, but, that's our congress at work.

Anyway, if you're a vanity call holder, you may wish to send your comments to ARRL and/or the FCC. Instructions are in the bulletin quoted below.

Note, if the url for the FCC below gets truncated by your e-mail program, try

ARRL Bulletin 9 ARLB009
From ARRL Headquarters
Newington CT May 7, 2012
To all radio amateurs

SB QST ARL ARLB009
ARLB009 FCC Seeks Higher Vanity Call Sign Fee

The FCC released a Notice of Proposed Rulemaking (NPRM) on May 4, seeking to raise the fee for Amateur Radio vanity call signs. The NPRM can be found in PDF format on the web at, <http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db0504/FCC-12-48A1.pdf>http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db0504/FCC-12-48A1.pdf.

Currently, a vanity call sign costs $14.20 and is good for 10 years; the new fee, if the FCC plan goes through, will go up to $15 for 10 years, an increase of 80 cents. The FCC is authorized by the Communications Act of 1934 (as amended) to collect vanity call sign fees to recover the costs associated with that program.

The vanity call sign fee has fluctuated over the 14 years of the current program -- from a low of $11.70 in 2007 to a high of $70 (as first proposed in the FCC's 1994 Report and Order). The FCC said it anticipates some 14,300 Amateur Radio vanity call sign "payment units," or applications, during the next fiscal year, collecting 214,500 dollars in fees from the program.

The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign

for a new term. The first vanity call sign licenses issued under the current Amateur Radio vanity call sign program that began in 1996 came up for renewal six years ago.

Those holding vanity call signs issued prior to 1993 are exempt from having to pay the vanity call sign regulatory fee at renewal, as Congress did not authorize the FCC to collect regulatory fees until 1996. Such "heritage" vanity call sign holders do not appear as vanity licensees in the FCC Amateur Radio database.

Amateur Radio licensees may file for renewal only within 90 days of their license expiration date. All radio amateurs must have an FCC Registration Number (FRN) before filing any application with the Commission. Applicants can obtain an FRN by going to the ULS web site at,
<http://wireless.fcc.gov/uls/index.htm?job=home>http://wireless.fcc.gov/uls/index.htm?job=home
and clicking on the "New Users Register" link. You must supply your Social Security Number to obtain an FRN.

FYI for Dayton attendees,

John Amodeo (NN6JA) Producer of "Last Man Standing" will be at Dayton. Friday at 10:00 at the Icom booth. Hi will also be present Saturday in an ARRL forum at 10:00 AM. John hosted a net on set with the PAPA system club and is quite active in the hobby. It's refreshing to see an amateur radio presence in main stream television entertainment!

Thought of you all when I found out John would be attending Dayton.

Bob, AC8ZX

1754. Last minute DAYTON idea.

Yahoo group: GRARA
Date: 2012-05-17 01:34:59 UTC
From: pobox740
Topic: 1754 Message: 1754

TOUR INFORMATION:
The National VOA Museum of Broadcasting will be open for tours on Saturday May 19th from 1pm until 6pm and on Sunday May 20th from 1pm until 4pm. We are opening to accommodate the many requests in association with the Dayton Hamvention and others. However, we are just finishing some major construction work so some items may not be redisplayed by those tour dates and some areas may not be as organized as they will be. What you will be able to see is how wonderfully the building has been restored even if a little messy. Also, on Saturday the 19th there will be a Blues and BBQ Festival on our front lawn and they will have a $5.00 per car parking fee on Saturday. That is the total cost for entrance to the festival so you can also enjoy some of the best Blues music the Cincinnati area as well as the Museum. Hope to see you there. We will set regular hours in the near future.

1756. Maybe there's hope

Yahoo group: GRARA
Date: 2012-05-18 03:08:02 UTC
From: Hank Greeb
Topic: 1756 Message: 1756

Even with a dysfunctional State Government (almost as bad as what goes on in Lansing) Hams in Ohio have managed what was considered an "almost impossibility" by getting a "State PRB-1" through the maze of State roadblocks and passed into law. Perhaps there is some hope for us here in Michigan?

From the ARRL web site @ http://www.arrl.org/news/new-prb-1-law-now-in-effect-in-ohio

New "PRB-1" Law Now in Effect in Ohio
05/16/2012

On May 15, Ohio Governor John Kasich signed a bill into law granting comprehensive rights to Amateur Radio operators in that state. Several key players in the successful effort to enact a “PRB-1” law in Ohio were present for the signing, including Section Manager Frank J. Piper, KI8GW; Rick Swain, KK8O; Bill Carpenter, AA8EY; Steve Katz, N8WL, and Constance Barsky, WD8ODC. ARRL Great Lakes Division Director James Weaver, K8JE, was also at the signing.

Ohio SM Frank Piper provided some background:

“In the past three years, we have had four versions of this bill in the Ohio Statehouse. In the last State Assembly, these bills died in Committee. In this current Assembly, everything lined up for us, and House Bill 158 made the entire journey from Introduction to the Governor Kasich’s signature.

"We had to make a few revisions to HB 158 during its travels through committee hearings, but in the end we finished with an Act that places the full language of CFR 47, Part 97.15 into the Ohio Revised Code. In addition, language at the end of the law states: ‘Any legislative authority that denies an application for approval of an amateur station antenna structure shall state the reasons for the denial and shall, on appeal, bear the burden of proving that the authority's actions are consistent with this section.’ This language removes the burden of proof from the Amateur Radio operator and places it on the legislative authority.

“State Government Liaison Nick Pittner, K8NAP, did a tremendous job over the past several years, staying on top of the status of bills that were running their course on both sides of the Statehouse. Nick knew when to call in key people to testify to Committees, and was instrumental in the process of negotiating the required revisions when requested.

“My thanks go out to all the Amateur Radio operators in the Ohio Section who called, wrote and e-mailed their State Representatives and Senators to support this legislation. Without their grass roots work, this victory would not have been possible.”

1757. CQ WPX Contest this weekend

Yahoo group: GRARA
Date: 2012-05-24 18:40:08 UTC
From: Hank Greeb
Topic: 1757 Message: 1757

CQ WPX contest runs this weekend, from 0000Z Saturday to 2359Z Sunday (that's 8 p.m. EDT Friday to 8 p.m. EDT Sunday) Rules at http://www.cqwpx.com/rules.htm

This is an interesting contest in that you get multipliers for prefixes, and there are so many possible prefixes you hardly ever run out of new multipliers - even when you're a big gun! For example, KA5S, KB5S, KC5S, NA8W, KC8CWP, W8LRC, etc. would each be a new multiplier in your log. It's easy to wind up with 200 or more multipliers even with casual operation. Many countries have special event prefixes which boost the multiplier count. You get QSO points depending upon whether the contacts are within your own country, continent, or different continent.

Try it, you may like it.

1758. QRP in the Park, plus Fox Hunting...

Yahoo group: GRARA
Date: 2012-05-25 00:33:18 UTC
From: K8TB
Topic: 1758 Message: 1758

You've seen the note from Jeff, KB8QAP about QRP in the park this Saturday, but wait, there's more!

In addition to the fun starting at 3 pm, there will be a few 15 milliwatt transmitters hidden within the park. You are more than invited to find them. There is no competition with this hunt, just the fun of finding these little boxes.

Bring your own equipment, or there will be gear there to be loaned out for you to hunt within the park.

Recapping the email from Jeff:
****

Hi Everyone,

We will be firing up the grills and putting our amateur radio skills into action as we kick off our first QRP IN THE PARK for 2012! If you ever wanted to work low power portable on CW, SSB phone, or the digital modes with HF, UHF, VHF bands; we invite you stop by and operate with us. All operators are encouraged to operated from battery for this event. No generators will be provided.

Where? HELDER PARK
3751 104th Avenue
Holland, Michigan

When? SATURDAY MAY 26TH - 3PM TO DUSK

Note: This event is weather permitting and will cancel if severe weather is expected for the area. Please monitor this reflector and
147.06 K8DAA
repeater the evening of the event for any changes of times or event cancel.

See You There!

1759. Great Lakes Emergency Communications Conference Online Registration

Yahoo group: GRARA
Date: 2012-05-25 20:40:10 UTC
From: Hank Greeb
Topic: 1759 Message: 1759

Don't know how many might be interested, but this is purported to be an event for the entire Great Lakes area, so I'm forwarding it. The event is near Cleveland.

Please forward as appropriate.

Online registration for the 2nd Annual Great Lakes Emergency Communications Conference is in full swing. If you have already registered, I say thank you. If not, you still have plenty of time. But try not to wait till the last minute as we were fairly close to maximum capacity last year.

Online registration couldn't be easier. Go to www.glecc.org (http://www.glecc.org) and click on the registration tab. Complete the online registration form and you'll receive confirmation when you're done. Yes, ladies and gentlemen, it's that simple.

Walk-ins are authorized however we highly encourage you to register ahead of time to ensure the proper amount of food is prepared and a meal is provided for you.

Some new conference additions this year include:

* Ashtabula County Amateur Radio Club debut of their new communications trailer
* Focusing on what conference was intended for...emergency communications
* Not just one but two Field Training Exercises (FTX)

As well as a continued tradition of:

* Free training taught by dedicated volunteers
* Communications Vehicle/Trailer display
* Go Box Display
* Catered lunch for only $6.00

Thanks Everyone!

Our 2012 Spring QRP IN THE PARK event & Fox Hunt was a huge success and it was nice to see many new faces out there and sharing the afternoon with us. If you missed this event, We hope you can make the next one. Keep watching this reflector for the summer QRP schedule.

We certainly had a wide variety of antennas, rigs, and operating modes in play during the event and had some nice DX contacts to boot. As always our digital operators seem to have the edge when it came to working DX!

Here is a short list of some of the stations worked by our VIGILANT QRP'ers for the event.

9A3W
S54K
VE2SF
G6MC
M0BPQ
TM51B
NRX3
OM7JG

CV2JX
IK6CVI
F4GOJ
EA2CP

N7RKY
IZ0PED

Our fox hunting combo at the park proved to be a great success with many new hams trying it out for the very first time. Thanks to Mike W8DER and Tom K8TB for putting in the extra effort and setting up the hidden transmitters. It was Great fun!

We want to thank all who donated extra food, soda, desserts, chips, hot dogs, buns, etc, and manning the grill, with out your help these events would not be possible.

If you missed our QRP IN THE PARK, and would like to get out and operate in the field with Amateur Radio. Please Mark your calendars down for the ARRL FIELD DAY coming up on JUNE 23rd thru JUNE 24th. HARC will be participating in this National Event and will be operating remotely in field at the Ottawa County Fair Grounds!

Please join us in this marathon of fun, and competitive nature of Field Day! We are still looking for guest operators, and I encourage you to bring others along who may be interested in ham radio to see what it is all about!

Get out there and enjoy Amateur Radio!

73 Thanks again,

Jeff KB8QAP

1763. Communications for N24HC

Yahoo group: GRARA
Date: 2012-05-29 01:25:51 UTC
From: Jack Amelar
Topic: 1763 Message: 1763

Saturday, June 16, 2012.

The National 24 Hour Challenge (N24HC) http://www.n24hc.org is a 126 1/2 mile bicycle route throughout Barry County that takes place on the day, Saturday, before Fathers Day and attracts nearly 400 riders plus their support crews.

Amateur Radio communications is an important part of the logistics of this annual event taking place this year on Saturday, June 16. Communications positions are in need of volunteers at course check points and in vehicles (supplied with driver). Ground Zero is at Thornapple-Kellogg Middle School in Middleville. Our mode of communications is on Amateur Radio Two Meter, which of course you use your own radio.

The event coordinators provide shirts, limited refreshments, and Friday evening spaghetti dinner at the Middle School. Please contact the Ham Radio Communications Director, Jack NY8D, if you are willing to help.

From: K8TB
Topic: 1766 Message: 1766

This is an email I received from Larry, WB8R, our ARRL SCM.
Does anyone know K8XL and could stop by to see if needs help?
According to QRZ, Bob, K8XL lives at O-2204 Hayes St NW, Marne, MI

****

Subject: Grand Rapids, MI storms leave ham needing help

Larry,
Today 05/29/2012 on the MidCars net on 7258 kHz there was a check in from
a ham station K8XL stating that last nights storm had taken out many of his
antennas and most of his equipment. He has insurance but he needs assistance
on checking out antennas (such as on his roof) since he has medical
conditions due to his age. Is there anybody or clubs maybe that you can get
in touch with to help this guy out? I am sure once his insurance replaces
the damaged items he will need help getting it set back up as well.

Sincerely,

Collin A Dvorak

1767. IRA Fox Hunt this Saturday, at 1 PM...

Yahoo group: GRARA
Date: 2012-05-31 00:36:55 UTC
From: K8TB
Topic: 1767 Message: 1767

Get the beams ready. We will be having another Fox Hunt.

At 1 pm, after you have spent all your money at the IRA swap this Saturday, (www.w8ira.org), one of the areas most consistent fox hunters will be, well, hiding.

K8TVZ. You've heard of him. Now, you will have to find him.

This will not be a "find the floating bottle in the Grand River" type hunt. Laryn will be transmit clean and mean. OK, clean.

Find Mike, W8DER and the others around 12:30 pm or 12:45 pm to check in and have your mileage logged.

Normal frequency of 145.53 Mhz.

See you there.

Tom K8TB

1774. ARRL June VHF Contest this Weekend June 9, 10

Yahoo group: GRARA
Date: 2012-06-05 11:10:38 UTC
From: David DeVos
Topic: 1774 Message: 1774

I want to remind everyone that this coming weekend is the June VHF contest sponsored by the ARRL. All Bands 50Mhz and up are included in this contest, with lots of activity on SSB, and CW. So, if you have a multi-band HF radio that has 6 meters, and 2 meters please get "radio active" and have some fun on VHF/UHF. The contest starts Saturday at 2:00PM and ends Sunday at 11:00PM. Hot spots on the band will include 50.125 the 6 meter call frequency, and 144.200 the 2 meter call frequency.

Local amateurs you are likely to hear on the band include K8DOG/R, KF8QL/R, WD9USA, N8DGD and others.

Here is an article introducing the contest on the KC9BQA website, who is a very active contester in Wisconsin.
http://kc9bqa.com/?p=1677

I operate as a mobile station or "rover" during the contest, and it will take me into 7 grids during my driving between the hills I operate from. My schedule is posted on my website here:
http://www.davedevos.com/KF8QL.html

I look forward to hearing you on the bands!

Dave KF8QL
http://www.davedevos.com

1775. For Sale: 2M and 70CM Antennas and Accessories

Yahoo group: GRARA
Date: 2012-06-09 21:12:34 UTC
From: Greg York
Topic: 1775 Message: 1775

I have the following items for sale:

1) 4 pairs of ZD Engineering 75 to 50 ohm 7/8" hardline matching transformers / connectors. 2 pairs are for 2M and 2 pairs are for 70cm. One 2M pair is used and in good condition, other 3 pairs new in original packaging. $25 for all 4 pairs.

2) Cushcraft 2M 15-element 215WB FM Boomer. Was used outside for a couple of months, and then stored inside since. Condition is good. $100.

3) Cushcraft 2M 17-element 17B2 Sideband Boomer. New in box and never opened. $150.

4) Cushcraft 70CM 24-element 424B Sideband Boomer. Never used, partially assembled with all parts. $125.

All 4 items, $300.

If interested, contact me via e-mail at gwyork@... .

Date: 2012-06-13 03:06:56 UTC
From: Hank Greeb
Topic: 1776 Message: 1776

For Field Day 2012, Lettuce b sure to:

1. Copy the field day message over the air. There's a transmission on Friday evening before the start of Field Day.
Day Mode Eastern UTC
FRIDAY CW 8:00 PM 0000 (Sat)
Digital 9:00 PM 0100
Phone 9:45 PM 0145
CW 11:00 PM 0300
CW frequencies are 1.8025, 3.5815, 7.0475, 14.0475, 18.0975, 21.0675, 28.0675 and 147.555 MHz.
Digital frequencies are 3597.5, 7.095, 14.095, 18.1025, 21.095, 28.095 and 147.555 MHz
(Note: PSK31 and MFSK16 are now included in the regular Digitalruns.)
Phone frequencies are 1.855, 3.990, 7.290, 14.290, 18.160, 21.390, 28.590 and 147.555 MHz.

Probably 40 or 20 metres would be betst at 0000Z, It's a guess for me @ 0100Z, but I'd try 40 first, then 20.
for the two later times I'd suggest 80 or 40.

I'll try to copy The Corn Whiskey version, would appreciate at least one other person volunteer to copy on whatever mode with which they're more comfortable.

2. Send a message to the Section Mangler, WB8R - probably at 2230Z (6:30 p.m) Saturday evening on 3.563 KHz, or, will there be a VHF net on 147.16 linked repeater system? Details of the message format and content are in the rules as follows:

"7.3.5. Message Origination to Section Manager: 100 bonus points for origination of a National Traffic System (NTS) style formal message to the ARRL Section Manager or Section Emergency Coordinator by your group from its site. You should include the club name, number of participants, Field Day location, and number of ARES operators involved with your station. The message must be transmitted during the Field Day period and a fully serviced copy of it submitted must be included in your submission, in standard ARRL NTS format, or no credit will be given.."

It appears that we have a publicity release - we're in a public location - do we have signs directing folks from East Beltline to our area? How about a Public Info table? A "representative of our served agency" Red Cross (WD8USA, KD8CAN, any others?) are likely to show up to give us a bonus! Can we convince some of the younger folks who visit us at our meetings (or are progeny or friends of our members) to make at least one contact on the SSB or VHF station? We can get 20 points for each

person (licensed or not) who makes at least one contact - up to a maximum of 100 bonus points.

How many bonus points can we muster? Lettuce try to remember to get as many as possible.

Your best bet on getting traffic to WB8R is designate a person to bring it to the MITN (Michigan Traffic net) at 7pm Sat night- on 39.52 .
There is no VHF Traffic net on Sat night-
On the Digital runs are any on MT-63 or Olivia? DE WD8USA ...-.-

Topic: 1776 Message: 1778

I guess we could try 3.563 CW @ 2330Z, if NIL, then 3.952 SSB That would give us two tries @ passing the traffic. If nothing else, we could transmit it to some local who is at another FD site or at home - it doesn't NEED to get to WB8R on Field Day weekend, we just have to originate it during the FD session.

1779. Amateur Radio Week

Yahoo group: GRARA
Date: 2012-06-13 09:03:50 UTC
From: KD8CAN
Topic: 1779 Message: 1779

For Immediate Release:

Michigan Legislature Recognizes Contributions of Amateur Radio Enthusiasts

(Lansing, MI, June 6, 2012) ☐ The Michigan House of Representatives has issued a resolution recognizing the public service contributions of Michigan's Amateur Radio Operators, as they prepare for their annual emergency communications exercise. On June 1st, the State house passed House Resolution No. 287, A resolution to declare June 17☐23, 2012, as Amateur Radio Week in the state of Michigan.

Amateur Radio (or "ham radio") operators from throughout Michigan will be joining Hams across the nation, attempting to talk to people around the world using an amazing variety of differing methods. These range from the tried and true Morse code to voice and digital communications, even to using amateur satellites as they demonstrate their unique dedication to public service during Amateur Radio Week. Michigan's local ham radio clubs will be active in their communities to raise awareness about Amateur Radio in preparation for the week's culminating event, an annual emergency preparedness exercise called "Field Day." Field Day is a 24-hour marathon event where the object is to contact as many other stations as possible during the contest, which will occur over the weekend of June 23 and 24. Field Day is sponsored by the American Radio Relay League (ARRL), the national association for Amateur Radio.

Field Day is designed to test operators' abilities to set up and operate portable stations under emergency conditions such as the loss of commercial electricity and normal avenues of communication. Most participants will set up their Field Day stations in city parks, on village greens or even in shopping mall parking lots. The event is a serious test of skill, and a contest for fun, too. During the weekend, the radio operators try to contact as many other Field Day stations as possible, simulating the on-air skills needed to assist state, regional and local officials as well as agencies such as the Salvation Army and the American Red Cross during an emergency. More than 37,000 Amateur Radio operators across the country participated in last year's event, a far cry from the handful of hams that participated in the first Field Day back in 1933.

The public is invited to stop by and watch the proceedings, ask questions and will often get a chance to join in, making a few contacts themselves under the watchful eye of a friendly ham operator. Anyone interested in visiting a Field Day site may locate the site nearest you by using the online locator on the ARRL website at http://www.arrl.org/field-day-locator

With more than 650,000 Amateur Radio operators in the United States and more than 2.5 million worldwide, the Amateur Radio hobby is alive and well. And best of all, anyone can become a ham. Information on how to become involved in Amateur Radio is available from the American Radio Relay League, 225 Main Street, Newington, CT 06111 or by calling 1-800-32-NEW HAM. The URL for the ARRL's home page on the World Wide Web is www.arrl.org.

###

Reps. Lindberg, Darany, Byrum, Yonker, Hovey-Wright, Hammel, Liss, Dillon, Kandrevas, McBroom, Barnett, Durhal, Geiss, Heise, Horn, LeBlanc, Slavens, Switalski, Talabi and Tyler offered the following resolution: House Resolution No. 287. A resolution to declare June 17□23, 2012, as Amateur Radio Week in the state of Michigan. Whereas, Amateur radio operators are celebrating over a century of the miracle of the human voice broadcast over the airwaves; and Whereas, Amateur radio has continued to provide a bridge between peoples, societies and countries by creating friendships and the sharing of ideas; and Whereas, Amateur radio operators have also provided countless hours of community services both in emergencies and to other local organizations throughout these decades; and Whereas, These amateur radio's services are provided wholly uncompensated; and Whereas, The state of Michigan also recognizes the services amateur radio's people also provide to our many civilian Emergency Response organizations, including the American Red Cross and the Salvation Army; and Whereas, These same individuals have further demonstrated their value in public assistance by providing free radio communications for local parades, bike-a-thons, walk-a-thons, fairs and other charitable public events; and Whereas, The state of Michigan recognizes and appreciates the diligence of these "hams" who also serve as weather spotters in the Skywarn program of the National Weather Service; and Whereas, Amateur radio once again proved its undisputed relevance in the modern world by providing emergency communications when other systems failed in the wake of Hurricane Irene, the paralyzing October Blizzard that hit the Northeast and Atlantic Seaboard; and Whereas, The Amateur Radio Relay League (ARRL) is the leading organization for amateur radio in the USA; and Whereas, The ARRL Amateur Radio Field Day exercise will take place on June 23-24, 2012 and is a 24-hour emergency preparedness exercise and demonstration of the Radio Amateurs' skills and readiness to provide self-supporting communications without further infrastructure being required; now, therefore, be it Resolved by the House of Representatives, That the members of this legislative body declare June 17□23, 2012, as Amateur Radio Week in the state of Michigan

Jack:

Methinks we should use this forum to publicize things like meetings (which we sometimes do), special meetings (like the technical meeting we had last evening W8DC). cleanup on M-57, grass cutting, etc, @ the repeater site, et. cetera.? After all, Ham Radio has something to do with communications.

The meeting which we proposed @ the May meeting (and possibly the June meeting @ Hudsonville, which I couldn't attend) was for NEXT Wednesday, the 20th @ W8DC open radio room.? MAYBE the meeting for last evening was decided @ Hudsonville, but the attendance was a bit light.

I thought last evening's gathering was announced here, but find that the announcement was in a private message.?? I've put up an announcement within the GRARA yahoo group, so it will appear here on Monday, June 18, and then again 12 hours before the meeting time on Wednesday to remind us all.

So, For anyone interested in finding out the intricacies of how to set up N1MM for Networked operation are cordially invited to attend a "working/learning session"? Text of the announcement which will be automagically sent to this reflector 2 daze and again at 12 hours before the event is as follows:

Field Day Preparation Gathering
Date:???? Wednesday June 20, 2012
Time:???? 7:15 am - 9:15 am
Author:?? n8xxham
Type:???? Club Event
Reminder: There are reminders set for 12 hours and 2 days before this event.
Location: W8DC
Street:?? 1050 Fuller Ave NE
City/State/Zip:??? Grand Rapids, MI 49503
We will continue learning N1MM logger - networked versionat

Note, we will end either when we "think" we know enough about N1MM logger or we give up in exasperation! :)? The proof of whether we actually know enough about the setup will be on the 23rd & 24th!?

Congrats to KD8HNF for guiding us through the setup.? We learned a lot - and next week we hope to "nail it."

SB QST ARL ARLB015
ARLB015 New Amateur Extra Class Question Pool Effective July 1

The new Amateur Extra class (Element 4) question pool -- released by the National Conference of Volunteer Examiner Coordinators (NCVEC) in January 2012 -- becomes effective on Sunday, July 1. The current Amateur Extra class pool expires on June 30, 2012 and cannot be used after that date. This new question pool -- including graphics and diagrams -- will remain valid until June 30, 2016. The new Amateur Extra pool contains 702 questions, from which 50 are selected for an Element 4 examination. As of June 13, three questions -- E1D09, E2A14 and E6E10 -- have been removed from the new pool. The current Technician class question pool that became effective July 1, 2010 is valid through June 30, 2014. The current General class pool that became effective July 1, 2011 is valid until June 30, 2015.

I put the following info on the Field Day calendar for June 23 and 24 - slightly different for Sunday. Please look the announcement over and see if there are any errors, omissions, or lies. The June 23 announcement will issue on Wednesday and Friday. The 24th announcement will show up early on Sunday.

Please let me know if there are any errors. Thanks.

==========

Field Day - W8M - Field Day!
Date: Saturday June 23, 2012
Time: 9:00 am
Author: n8xxham
Type: Club Event
Reminder: There are reminders set for 1 day and 2 days before this event.
Location: Next to Devos Communications Center, Calvn College
Street: 1810 East Beltline Aven SE
City/State/Zip: Grand Rapids, MI 49546
ALL are invited, members, visiting hams, general public. We begin setting up about 9 a.m. Saturday morning, with the event starting at 2 p.m., and running until 2 p.m. Sunday afternoon. We will have four stations - two Please let your fellow hams know of this event.

Note this is on the EAST side of East Beltline. We will try to monitor 147.26 MHz repeater for directions, but may get busy setting up and operating.

Topic: 1787 Message: 1787

Hi, Bob:

Don't know what plans, if any, we have for public info booth for Field Day, but, if we're having one such thing (for which we get 100 bonus points or so), I have 50 each of the ARRL fliers *'We Do That" & "When all Else Fails" *which I had planned to use for another function in August, but I'd donate them to the Field Day cause if needed.

Also, do we have any signs to put up to guide visiting hams and the general public to our Field Day? I've put up directions on the ARRL Field Day Locator web site, but the location, being in the "other" part of Calvin might be a bit of a puzzle for people to find, even with the address and a GPS.

Here's a "very interesting" contest this weekend...

Summer Stew Perry Topband Challenge:

1500Z, Jun 16 to 1500Z, Jun 17

Same rules as the December challenge
http://jzap.com/k7rat/stew.rules.txt

There's even a QRP category... Who would be crazy enough to try <5 watts on 160 metres in the middle of a heat wave? Well, last year there WERE 2 QRP entries, one did an amazing 692 miles with QRP. Yep, 692 miles with <5 watts during June 2011 on 160 metres! Wouldja ever believe it could be done?

I received a very sad call this morning from Terrie, W8CJQ.

Bill Borgman, K8CJQ, from Allegan, a long time friend of so many of us, has passed away.

Bill has had a series of severe illness's over the last few years. But yet, he was at Dayton this year, with his 'CJQ smile. (And Terrie, thank you for the hard work of pushing him around)

He is someone we will miss. I cannot remember, but I think he has fired up over 25 Michigan Islands on his travels.

And those of us who had any "industry" connection with him at the FCC, we are reminded of his soft words of encouragement to "do things right", and his professionalism.

1792. Double CME Hits Earth, Sparks Auroras

Yahoo group: GRARA
Date: 2012-06-17 19:36:13 UTC
From: Hank Greeb
Topic: 1792 Message: 1792

Space Weather News for June 17, 2012
http://spaceweather.com

As predicted, a double CME hit Earth's magnetic field on June 16th. The impact strongly compressed Earth's magnetosphere, exposing geosynchronous satellites to solar wind plasma and sparking more than 24 hours of geomagnetic storms. (The storms are still in progress as this alert is being written during the middle hours of June 17th.) In the United States, Northern Lights have descended as far south as Wisconsin, Washington, Minnesota, and the Dakotas. Southern hemisphere observers are also reporting colorful aurora australis. Check http://spaceweather.com for photos and updates.

1793. ARRL Field Day Bulletin Sked

Yahoo group: GRARA
Date: 2012-06-18 18:50:50 UTC
From: Hank Greeb
Topic: 1793 Message: 1793

Attention all GRARA members:

QST QST QST. Please, pretty please, especially those members who have capabilities of copying RTTY or other digital modes,

Please, pretty please, copy the Field Day message on one of the schedules on Friday evening.

The folks who can copy Corn Whiskey @ 18 wpm so please copy the bulletins on CW if you're able to do so. I'll be listening at the 8 p.m. time, but if I miss a word or two, I'll need a backup. My antenna will be down after that to be taken to the Field Day site as a backup antenna.

I pray that we will have multiple copies of the FD message - a pristine copy is worth 100 bonus points to add to our entry.

1801. Re: Coverage of our field day in Mlive

Yahoo group: GRARA
Date: 2012-06-20 18:24:12 UTC
From: ka5s
Topic: 1796 Message: 1801

I felt compelled to answer "John Smith's" comments there deprecating our efforts.

John Smith raises a concern often voiced inside the Amateur Radio community.

However, it is a spurious complaint. It doesn't MATTER that, once a year, we have fun doing things; operating without commercial power from locations that could be deprived of utilities and facilities, demonstrating we can contact other stations by actually doing so, and doing things as PRACTICE (and for fun), that we must be able to do in a real emergency.

Years ago in California, our local Radio Club ran one Field Day outside the City offices and dispatch center, simulating setting up as if they had been made useless by an earthquake.

And he deprecates hobbies, as if they do not teach useful skills. Target shooting is a hobby. Occasionally, it is a skill valued for its military uses. Occasionally, Amateur Radio operators find use doing for the Military when (sic -- should read "what") it fails to train Soldiers -- or enough of them -- to do. A small but highly trained number of Amateur radio operators are members of the Military Auxiliary Radio System, and THEY train to communicate not only in local emergencies, but with and between military and Federal stations with digital modes all of them share. These folks, as I recall from 21 years in the Army, were often better communicators than the Signal Corps soldiers.

A hobby? Perhaps. But not a Hobby Horse. On the way home from the Art Festival, stop by Calvin College and see us playing. Playing at what we may some time have to do in earnest.

Oh, as to the PURPOSE of Amateur Radio, the FCC says it best:

§97.1 Basis and purpose.-

The rules and regulations in this Part are designed to provide an amateur radio service having a fundamental purpose as expressed in the following principles:

(a) Recognition and enhancement of the value of the amateur service to the public as a voluntary noncommercial communication service, particularly with respect to providing emergency communications.

(b) Continuation and extension of the amateur's proven ability to contribute to the advancement of the radio art.

(c) Encouragement and improvement of the amateur service through rules which provide for advancing skills in both the communications and technical phases of the art.

(d) Expansion of the existing reservoir within the amateur radio service of trained operators, technicians, and electronics experts.

(e) Continuation and extension of the amateur's unique ability to enhance international goodwill.

From: Hank Greeb
Topic: 1796 Message: 1802

Ron, K8DMR sent out the info to several newspapers, so perhaps that's one of his setups?

As Cortland says, Amateur Radio is a hobby, but it is defined by the Federal Communications Commission as the Amateur Radio Service - and has been defended against intrusion by that definition. A very small number of our licensees devote a part of their time in training for, and actual operating in disaster recovery operations when "All Else Fails" (a subtitle of a brochure produced by the American Radio Relay League which will be @ the Field Day Site.) The rest of us are free loaders, who enjoy privileges earned by these dedicated volunteers.

73 de n8xx Hg

p.s. To Cortland, KA5S: You speak so eloquently in print - our church occasionally has need of a "fill-in" preacher - are you available? :)

1803. Fwd: N1MM and field day

Yahoo group: GRARA
Date: 2012-06-21 03:00:07 UTC
From: Hank Greeb
Topic: 1803 Message: 1803

For people who are coming to Field Day - either at Calvin College (east side of E-Beltline near the Prince Conference Center and the Communications Arts Buildings), or at any other info where you will be confronted with N1MM logging program.

This is a 12 minute video, well worth your time, if you aren't familiar with N1MM logger.

Note: We _*hope*_ to have the tree HF stations in a networked configuration. We have most of the glitches worked out, but there may be some unforeseen problemmes. Even if we aren't successful with networking, the N1MM logger will work essentially the same, except we won't be exchanging logging info "live." (Thanks to Bob, KD8HNF for figuring out what was going on when we were having severe glitches this evening.,)

Hope to see everyone @ Field day - we'll be starting setup at as close to 9 a.m. Saturday, June 23, as we can muster. Help will be appreciated! And, we hope to be completely set up and checked out by the official start time of 2 p.m. We will be shutting down at 2 p.m. Sunday. So, we'll have 4 stations, 3 HF, 1 VHF, and possibly a "Get on the air station). There will be plenty of time for YOU to operate. See you this weekend!

1805. Field Day at Calvin College

Yahoo group: GRARA
Date: 2012-06-21 15:06:04 UTC
From: Hank Greeb
Topic: 1805 Message: 1805

Since the Yahoo Group screwed up the announcement a bit, here's a better message concerning field day.
==========
All are invited to a multi-club effort for Field Day @ Calvin College, Grand Rapids, Michigan. Since it's a multi club effort, we will be using W8M special event call!

As most of you know by now, Field Day is on Saturday June 23, 2012 Official Start is 2 p.m. Saturday, but we will be setting up stations beginning at 9:00 a.m. It will end at 2:00 p.m. Sunday.

We have been invited by "Quint" K8QS (Professor @ Calvin) and will be set up next to Devos Communications Center, Calvn College, 1810 East Beltline Avenue SE, Grand Rapids, MI 49546. This is on the EAST side of Beltline!

Map with directions is at http://goo.gl/maps/Sz4n Put in your starting directions, and you'll have a guide to the location. Remember, it's on the EAST side of East Beltline!

ALL are invited, members, visiting hams, general public. We begin setting up about 9 a.m. Saturday morning. We will have four stations - Three HF and one VHF Station. One HF station dedicated to CW, one to SSB, and the third to "operator's choice." Plenty of time for operators! Please let your fellow hams know of this event!

Steven:

KC8WQL can tell you about software for the "mesh network"

The need for this kind of network hasn't been explained. It
ain't in the N1MM docs. Maybe the idea is to strategically
locate one of the special controllers at a high spot on or in
one of the buildings to cover the "hop" from KD8HNF's site to
the other two rigs. I dunno.

But, if it works, we'll use it. If it confuses N1MM software,
we'll go to plan B, which hasn't been explained yet.

1809. Field Day Live on Shortwave Radio

Yahoo group: GRARA
Date: 2012-06-22 14:41:52 UTC
From: Jack Amelar
Topic: 1809 Message: 1809

WB8PUM
http://forums.qrz.com/showthread.php?351064-International-shortwave-broadcast-quot-Field-Day-Live-quot-everyone-invited-to-call-in

International shortwave broadcast "Field Day Live" everyone invited to call in

The QSO Radio Show will once again be broadcasting ☐Field Day Live☐
on Saturday from 12PM CDT to 6 PM CDT on International Shortwave Radio.
This year the broadcast will be on the new WTWW just outside of
Nashville TN with 100,000 watts of power and heard around the world.
This is double the power than the years before now on the new WTWW
facility so the outreach will be phenomenal!

We have some things we will be giving away on the air.

Call us from where ever you are and talk to us live ☐on the air☐
about your group, club, organization and your Field Day set up.
Including what the chef is cooking for Field Day.

If you not part of a group it matters not we want to hear from you.

We want to promote amateur radio and international good will, by
letting you and your Field Day group talk to the world about the fun
and unique experience of amateur radio. Feel free to line up some
people in your group to talk about the fun they are having and share
their own Field Day experiences.

This broadcast will be repeated thorough out the year and will be
downloadable as a podcast on Itunes for years to come.

Help us get the word out again this year and be sure to give us a
call and get on worldband shortwave radio and share the hobby with
millions of listeners.

The phone number to call to get on the air is 615-469-0702.
The time is 12PM EDT to 6PM EDT
The station is WTWW Lebanon TN
The frequency is 9990 KHZ
The live stream will be at http://tedrandall.com/pages/qso-live.php
Will update the website for any additional information
http://www.qsoradioshow.com

Should the phones get real busy feel free to email us your phone
number and we will call you back.
Let☐s have a great Field Day and share it with millions listening
all over the world.

73□s
Ted Randall WB8PUM
QSO Radio Show
http://www.qsoradioshow.com
tedrandall@tedrandall.com

P.S. To avoid any confusion as in years past, WTWW is a federally licensed shortwave broadcasting facility with multiple transmitters. 9990 KHZ is a shortwave broadcasting frequency just outside of the 31 meter band. This broadcast is not on amateur frequencies.

Topic: 1810 Message: 1810

Hello, I am in need of a volunteer to assist me with picking up the generator at the red cross. I will be there about 8:30am.
We will load the generator in the local ERV that I have signed out for two days.

Please email me at stprovost@... if you can assist.

Also I am still working out the issues with the wireless setup.
I will finish that process up today and will announce what I have later today.

If you have a linksys router, you can review the following pdf on setting up your own mesh network:

http://hsmm-mesh.org/images/stories/hsmmmesh-step-by-step.pdf

If you get stuck, just bring your equipment and I will assist you in the setup.
The more units we have, the connectivity will be the greatest!

thanks
Stephen KC8WQL

Or, if we can't get another volunteer, could someone set up a receiver @ calvin so we can receive the Saturday morning transmissions?

W1AW will operate on its regularly published frequencies:

· CW frequencies: 1.8025, 3.5815, 7.0475, 14.0475, 18.0975, 21.0675, 28.0675 and 147.555 MHz.

· Digital frequencies (includes PSK31 and MFSK16) using 45.45-baud Baudot: 3597.5, 7.095, 14.095, 18.1025, 21.095, 28.095 and 147.555 MHz.

Phone frequencies: 1.855, 3.990, 7.290, 14.290, 18.160, 21.390, 28.590 and 147.555 MHz.

I'd very much prefer to have a 2nd, 3rd, and 4th opinion on what W1AW sent, even though I at one time could copy CW with "reasonable" proficiency.

The response to my previous message seemed very underwhelming.

I just listened on 40 metres to W1AW regular bulletin sked. They're "wall to wall and treetop tall" or 599+ on that band.

Hope they're as loud at 000Z tonight.

Here's my take on the FD bulletins ... discrepancies exist between my cw and digital copies in the number of field day contacts, and the wording of the "year round 365 day 24/7 enjoyment" line. I expect I copied the cw wrong, but perhaps they issued slightly different versions for each mode?

CW:

SPCL C210 AND PFB CW25 FOLLOW

HR SPCL CW10 FROM ARRL HQ NEWINGTON CT JUNE 22, 2012 TO ALL RADIO AMATEURS

IS IT THAT WEEKEND ALREADY? PERHAPS NOTHING SAYS AMATEUR RADIO LOUDER THAN ARRL FIELD DAY. WHETHER ON A HILLTOP OVERLOOKING A NATIONAL MONUMENT IN WYOMING, ENJOYING THE VIEW OF THE PACIFIC FROM THE HAWAII COAST, SPRAYING FOR MOSQUITOS IN THE HUMID CAROLINAS, ENJOYING THE ANNUAL COVERED DISH SUPPER IN IOWA, OR SIMPLY TRYING TO STAY COOL ALONG THE GULF COAST, YOU ARE PART OF THE SPLENDID HERITAGE THAT DATES BACK TO 1933.

WHILE FIELD DAY IS A ONCE A YEAR EVENT, AMATEUR RADIO CAN BE A YEAR ROUND 365 DAY 24/7 ENJOYMENT IN YOUR LIFE. IT IS MORE THAN AN 8 HOUR SHIFT AT AN EOC OR THE QUEST OF DXCC AND CONTEST AWARDS FOR MANY. FIELD DAY BECOMES THE ZENITH OF OUR SHARED EXPERIENCE. IT IS WHERE OUR FRIENDSHIPS COME TOGETHER WITH OUR FAMILIES TO CREATE UNIQUE SHARED MEMORIES. STATISTICS SHOW THAT OVER 1R3 MILLION CONTACTS WILL BE MADE DURING THIS WEEKEND. SO REMEMBER IT IS NOT THE NUMBER OF CONTACTS YOU LOG. THE QUALITY OF THE EXPERIENCE MAKES FIELD DAY 2012 A LASTING MEMORY.

HAVE FUN AND ENJOY THE DAY. 73

BPSK31:

ARLX010 and ARLP025 follow

ZCZC AX10
QST de W1AW
Special Bulletin 10 ARLX010
From ARRL Headquarters
Newington CT June 22, 2012
To all radio amateurs

SB SPCL ARL ARLX010
ARLX010 2012 W1AW Field Day Bulletin

Is it that weekend already? Perhaps nothing says Amateur Radio louder than ARRL Field Day. Whether on a hilltop overlooking a national monument in Wyoming, enjoying the view of the Pacific from the Hawaiian coast, spraying for mosquitoes in the humid Carolinas, enjoying the annual covered dish supper in Iowa, or simply trying to

stay cool along the Gulf Coast, you are part of the splendid
heritage that dates back to 1933.

While Field Day is a once a year event, Amateur Radio can be a year
round, 365 and 24 enjoyment in your life. It is more than an 8
hour shift at an EOC or the quest of DXCC and contest awards. For
many, Field Day becomes the zenith of our shared experience. It is
where our friendships come together with our families to create
unique shared memories.

Statistics show that over 1.4 million contacts will be made during
this weekend. So remember, it is not the number of contacts you log.
The quality of the experience makes Field Day 2012 a lasting memory.

Have fun and enjoy the day. 73
NNNN

See ya tomorrow!

Thanks. I think we can take the digital version as "gospel" Lettuce c
if anyone else has copied it. I have a copy of mine, and will print out
all the copies and see if we have a consensus of the "correct version.
